Chapter 1. Common names of the cultivated vegetable crops of the world listed by division, family, genus and species	23
Division Sphenophyta	23
Division Pterophyta	23
Division Anthophyta (Magnoliophyta)	
Class Monocotyledons (Lilopsida)	25
Division Anthophyta (Magnoliophyta)	
Class Dicotyledons (Magniliopsida)	64
Chapter 2. Common names of the cultivated vegetable crops of the world listed alphabetically	217
Chapter 3. Latin binomials and synonyms	617
Chapter 4a. Edible plant part utilized listed by English common name	709
Chapter 4b. Edible part utilized listed by abbreviated scientific name	717
Chapter 5a. Method of preparation listed by English common name	725
Chapter 5b. Method of preparation listed by abbreviated scientific name	731
Chapter 6. Language critiques	737
Chapter 7. Language synonyms	773
Chapter 8. Dialects	791
References	811
Appendix I. Diacritics	821
Appendix II. Unique letters/symbols and alphabetization	825
Unique letters and symbols	825
Italicization	828
Alphabetization	828

Introduction

With the human population in many areas of the world already above the carrying capacity of the land, food availability and advances in productivity are becoming increasingly critical. It is predicted that the world population will reach 9 billion people by 2050, which represents a dramatic increase in the number of people to feed, with increasingly scarce crop land, water, fertilizer, and fuel. Vegetables make up a major portion of the diet of humans, providing not only calories but essential vitamins, fiber, and minerals and will play an increasingly important role in food availability. Of the over 400 vegetable crops that are grown commercially, the genetic diversity in critical attributes is exceptional. The edible portion of vegetables is comprised of an array of morphological parts [e.g. leaves, stems, lateral buds, young plants, shoots, petioles, flowers, flower buds, fruit (immature to mature), seeds, seedlings, roots, tubers, corms, bulbs, rhizomes]. Vegetables vary widely in the length of time required from planting to harvest, postharvest longevity, and day length, temperature, water, fertility, and pesticide requirements. They provide a diverse range of tastes, aromas, textures, colors, and nutritional attributes, greatly increasing the variety in the foods we eat and satisfying a myriad of personal preferences. The length of time required to produce a crop (i.e. planting to harvest) varies from days to several years and the length of optimum harvest maturity from hours (gerkins – *Cucumis sativus* L.) to years (giant taro – *Alocasia macrorrhiza* (L.) Schott). The fact that short production cycle vegetables allow multiple cropping and a significant volume of the vegetables grown worldwide are produced on small plots, militates against accurate production statistics, preventing a clear understanding and appreciation of the value of these crops to the world food supply.

Vegetables are a critical component in the health of humans. While the nutritional importance of vegetables has long been recognized within the nutrition and medical communities, there is an increasing awareness among the general public of the health advantages of increased vegetable consumption. In many areas of the world, increased consumption of vegetables has been stimulated not only by a growing understanding of the health implications but an increasing variety of vegetables available.

The introduction of new crops via Columbian and Eurasian exchanges has had an immeasurable impact on world food availability and in turn on population growth and the history of mankind (Diamond, 2005; Gunn, 2003). The introduction of plants between the New and Old World since the latter part of the 13th century has been described as “one of the most important aspects of the history of life on this planet since the retreat of the continental glaciers” (Crosby, 1972). In the 16th and 17th centuries, ship captains and diplomats routinely collected and sent unique plants to their home countries. This was especially true for several European countries. Plant exploration subsequently became officially supported by various governments and combined with the efforts of private and commercial plant collectors and botanical gardens, many exotic new species were introduced around the world. Expeditions by Joseph Banks, Joseph Hooker, Nathaniel Ward, David Fairchild, Frank N. Meyer, N.I. Vavilov and others provided a wealth of new species. Initially the focus was on finding superior cultivars; however, the emphasis shifted in the mid-20th century toward collecting germplasm with the focus now on unique genes (Harlan, 1975).

The introduction of a new species, however, does not equate to adoption. In many instances, even with ornamentals, new introductions represented little more than curiosities, seldom gaining wide spread popularity. What then drives the adoption of new crops? Demand is the key factor and the ease and avenue for creating demand differ widely among types of crops. With many agronomic (sunflower – *Helianthus annuus* L.) and industrial (longleaf pine – *Pinus palustris* Miller) crops, government and business interests create the demand and contract production with growers, guaranteeing purchase. Vegetable crops, on-the-other-hand, generally involve much lower production volumes and with

Introduction

successful introduction, demand increases slowly until the positive attributes of the crop become common knowledge. Gourmet restaurants, looking for unique entrees, represent one recent means by which the demand for new vegetables has increased. More importantly, increased exposure to new crops and the substantially greater variety of vegetable crops available in many local markets is due to immigration and, to a lesser extent, international travel. Cuban, Thai, Indian, Filipino, Chinese, Vietnamese and Cambodian immigrants arriving in South Florida in the later half of the 20th century brought with them an existing demand for specific vegetables that were an essential component of everyday life in their countries of origin. Crops, such as bitter melon – *Momordica charantia* L., chayote – *Sechium edule* (Jacq.) Swartz., guar – *Cyamopsis tetragonoloba* (L.) Taubert, luffa – *Luffa aegyptiaca* P. Miller, pea eggplant – *Solanum torvum* Swartz, pointed gourd – *Trichosanthes dioica* Roxb., tindora – *Coccinia grandis* (L.) Voigt, and winged bean – *Psophocarpus tetragonolobus* (L.) DC., began being grown locally and offered in ethnic markets (Lamberts, 1992). Some subsequently spread to more traditional markets and wider use. Similar stories are found in hundreds of locations around the world where immigrants congregate.

With the rapidly growing world population, vegetables have a critical role to play. Vegetable research is increasingly focusing on elevating productivity (kg/ha/day) and broadening diversity, while reducing inputs of water, fertilizer, fuel and pesticides.

Purpose of the book

The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture, commerce, regulation, and other fields dealing with vegetable crops; encourage consistency in terminology; and better understand the extent and diversity of vegetable production and utilization worldwide. The book represents an essential reference source for research scientists to gardeners, with the information presented in a concise and readily accessible format. It provides up-to-date scientific names, synonyms, and vernacular names for the commercially cultivated vegetable crops of economic importance worldwide (402 crops), in addition to information on the plant parts utilized and their method of preparation. Vernacular names from 370 languages are presented along with information on each of the languages.

Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. There currently is a wide range of vegetables shipped around the world as seasonal, economic and other forces are shifting markets from exclusively local toward global. This is especially so for crops that cannot be grown in the importing country or have a limited season of availability due to climatic conditions. Vegetables that are more probable candidates for import/export markets typically have sufficient postharvest longevity, allowing them to reach retail markets within the importing country in excellent condition.

Increased international exchange of agricultural products, as well as travel, too frequently results in confusion concerning the identity of many crops. Likewise, when new crops are introduced to an area, the common name used by the group introducing the crop is often maintained. In some cases, different names are utilized in neighboring markets run by the same or other ethnic groups. When the large number of vegetable crops is combined with the extremely large number of languages worldwide, the number of common names is in the tens of thousands. As a consequence, starting with a common name in an unfamiliar language, it can be difficult, if not impossible, to determine the crop in question. The information in this text allows indentifying such crops and is therefore of use to university and governmental researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

Linguistic value of common names

The study of the origin of cultivated plants and the forces driving their introduction into other areas of the world utilizes an interdisciplinary approach that may involve genetics, linguistics, history, anthropology, archaeology, ethnology, economics, geography, food science, horticulture, plant pathology, climatology, and disciplines studying human behavior. Linguistic evidence, in some cases, can be exceptionally helpful in identifying the timing and therefore sequence of crop domestication and/or introduction into a particular geographic location (Alpern, 2008). The origins of taro (Williamson, 1993) and maize (Blench *et al.*, 1994) in West Africa were inferred from the distribution of the vernacular names among local languages and historical data. The names for maize in southern Nigeria indicated a northern, trans-Saharan origin instead of introduction by the Portuguese. According to Diamond (2005), the names for crops in the Niger-Congo language family in southern Nigeria can be separated into three groups; (1) those in which the words for a particular crop are very similar in all of the languages due to the crop probably being first domesticated there; (2) those in which the names are consistent within only a small subgroup of southern Nigerian languages and probably represented crops of Indonesian origin; and (3) names that are inconsistent among the languages and are thought to represent New World introductions. For a number of crops that are more recent introductions around the world, the vernacular name across many languages is fairly consistent. When tomato (*Lycopersicon esculentum* var. *esculentum* P. Miller) is contrasted with onion (*Allium cepa* L. Cepa group), a crop in which wild species are relatively pandemic, there is a tremendous range in the names of the latter across languages. Comparing the names for tomato/onion across several languages illustrates the point: (AFAR) tamaàtim/bàsal; (AFRIKAANS) tamatie/ui; (ALBANIAN, TOSK) domate/qepë; (AMHARIC) tomatim/gäyy šənkurt; (ARABIC) tamatum/bassal; (ARMENIAN) tomat/soch; (BAFUT) tòmatò/ányěšà; (BAOULÉ) tomati/djaba; (BASQUE) tomate/kipula; (BEMBA) matimati/kanyense; (BEROM) tùmatùr/àlbàsà; (BÉTÉ) tomaté/djaba; (BRETON) tomatez/ognon; (BULGARIAN) domat/luk; (CAROLINIAN) tumóótis/subwuyas; (CATALAN-VALENCIAN-BALEAR) tomatera/ceba; (CEBUANO) kamatis/sibuyas; (CHEROKEE) tamahli/svgi; (DAGAARE, SOUTHERN) tomati/zanmē; (DANISH) tomat/kepa-løg; (DENDI) timáti/albasa; (DUTCH) tomaat/ui; (ENGLISH) tomato/onion; (ESTONIAN) tomat/sibul; (ÉWÉ) tomatos/sabala; (FINNISH) tomaatit/sipuli; (FRENCH) tomate/oignon; and (GIANGAN) kamatis/sibuyas.

Derivation of common names

The derivation of common names occasionally represents an intriguing story. For example, the name for *Helianthus tuberosus* L. in a cross-section of European countries is “topinambur” [or a close variation thereof (Kays and Nottingham, 2007)] the use of which began in France in the early 1600s. A French expedition to South America returned to Paris in 1613 with six members of a warlike tribe of the Guaranis race, known as the Topinambous, who were taken from the Isle de S. Luiz de Maranhão in Brazil (De Malherbe, F., 1862). These exotic looking natives created a great attraction that more or less coincided with the introduction and sale in Parisian markets of the equally exotic and somewhat uncouth looking tubers of *H. tuberosus*. Street hawkers adopted the term topinambou to draw attention to their new offering (Salaman, 1940).

Buck (1949) lists the synonyms for the modern English word “cabbage”, describing the apparent derivation of names in a cross-section of Indo-European languages. The word appears to have evolved from the Greek *κavλός* (stalk) and subsequently *caulis* (stalk) in Latin. The subsequent similarity in names is quite striking: *cavolo* (Italian), *col* (French), *col* (Spanish), *cāl* (Old Irish), *cabāiste* (New Irish), *cawl* (Welsh), *kaolenn* (Breton), *kāl* (Old Norse), *kaal* (Danish), *kål* (Swedish), *cawel* (Old English), *cole*, *caboche* (Middle English), *cabbage* (New English), *kool* (Dutch), *cōl* (Old High German), *kōl* (Middle High German), and *kohl*, *kraut* (New High German). English words

Introduction

sauerkraut and coleslaw evolved from several of these words. In Eastern Europe, the names for cabbage appear to have been derived from ‘caput’ (head) to give the following: kopustas (Lithuanian), kāposts (Lettish), kupus (Serbo-Croatian), kapusta (Czech), kapusta (Polish), and kapusta (Russian). For many vegetables, however, there is relatively little information on the derivation of their names.

The first usage of a word for cabbage in the English language was in 1440 (Royal Society, 1790) “Take cabaches and cut hom on foure..and let hit boyle.” In 1495 Caxton (Jerome, *et al.*, 1495) wrote “He laboured the gardins, sewe the seedes for cabochis, and colewortes” and subsequently in 1580 Baret wrote “Cabage, or colewoort, *brassica*. Cabage, or cole cabege, *brassica capitata*.” The word cabbage appears to have evolved from colewort (Simpson and Weiner, 1989).

Using the text

The publication contains of the following information:

- Common Names of Individual Crops
 - a. Listed by division, family, genus and species (Chapter 1).
 - b. Listed alphabetically (Chapter 2) with each of the common names given a numerical designation for the family and species, followed by the language.
- Scientific Names and Synonyms

Chapter 3 lists the correct scientific name (in bold with the family and species numerically keyed back to the taxonomic list) along with synonyms that are followed by the correct genus and species.
- Crops listed by Plant Part Consumed (Chapter 4)
- Crops Listed by Method of Preparation (Chapter 5)
- Languages
 - a. Language critiques – A short synopsis is given for each language listed (Chapter 6) that includes language synonyms, number of speakers, geographical location where spoken, language family classification, and dialects.
 - b. Language synonyms – Since many languages have more than one name, alternative names are also listed and keyed back to the appropriate name (Chapter 7).
 - c. Dialects – A number of languages are known by their dialect name. Chapter 8 keys the dialects to the language name utilized in the text.
- References
- Appendices
 1. Diacritics.
 2. Unique letters/symbols and alphabetization.

Starting with a common name and not knowing the language or scientific name of the plant, it is difficult to determine the species, and hence alternative names in the same or other languages using a taxonomic list alone. The information presented in this book evolved from a journal publication (Kays and Silva Dias, 1995) covering 15 languages. The current list greatly expands the amount of information presented and has transformed it into a much more readily accessible format.

To find a crop starting with the scientific name (e.g. *Aalius androgynus* Kuntze), look the binomial up initially in Chapter 3 to ascertain if it is correct or a synonym. In this case, *Aalius androgynus* Kuntze is a synonym for *Sauropus androgynus* (L.) Merrill that is followed by a numerical code (39.5) that keys back to Chapter 1. The number 39.5 indicates family 39 (Euphorbiaceae) and crop number 5 under that family. Starting with Division Sphendophyta, the families are listed in numerical order.

To find the scientific name of a crop starting with a common name, look up the common name which is arranged alphabetically in Chapter 2. For example, “kangkong” is followed by a numerical code (36.2). In Chapter 1, 36.2 corresponds to the family 36 (Convolvulaceae) and crop 2 (*Ipomoea aquatica* Forssk.). Looking over the names for the crop in different languages, “kangkong” is found to be a vernacular name for the crop in Tagalog, Malay, Ilocano, Pangasinan, Tok Pisin, Dutch and others.

To find all of the crops that are grown for a specific edible part (e.g. tubers), use Chapter 4. Under the heading of “Tuber” the individual crops are listed by their English (Chapter 4a) and scientific names (Chapter 4b). The edible part (EP) is also indicated in Chapter 1, to the right of the scientific name. When an additional part (or parts) of the plant has a secondary use, it is designated with a superscript “s” (e.g. root^s).

The methods of preparation (P) have been separated in Chapter 5 into the following classes (R - raw, C - cooked, P - preserved). Preservation includes pickled, salted, jellied, or preserved by other methods, excluding canning and freezing. When more than one method of preparation is employed, they are presented in the general sequence of frequency of use. As with the edible plant parts (Chapter 4), the plants categorized under each method(s) of preparation are listed by their English (Chapter 5a) and scientific names (Chapter 5b).

Crops

“Vegetable crop” is a somewhat nebulous term that usually denotes a plant cultivated for an edible part or parts and generally excludes sweet fruits and dried seeds. Vegetable is not a scientific term but rather one that is based largely on culinary and cultural traditions. Vegetables can be consumed raw, cooked, or preserved in some manner and prepared in innumerable of ways, though generally not as desserts. However, exceptions are common; for example, rhubarb (*Rheum rhabarbarum* L.), considered a vegetable, is almost invariably served as a dessert. Likewise, certain members of the Cucurbitaceae, such as watermelon (*Citrullus lanatus* (Thunb.) Natsum & Nakai) and cantaloupe (*Cucumis melo* L. Cantaloupensis group), are technically sweet fruits; however, their culture is essentially the same as a number of other members of the Cucurbitaceae that are vegetables and as a consequence, are commonly grouped together as vegetables. Therefore, what is considered a vegetable varies somewhat among the diverse range of individuals (e.g. scientists, government officials, gardeners, chefs) dealing with this food group.

In the text, vegetables are crops that are: (1) herbaceous or largely herbaceous plants or plant parts; (2) consumed by humans; (3) eaten raw, cooked, or preserved; and (4) typically eaten as part of the main course or appetizer, rather than as a dessert (Chittenden, 1951; Fritz *et al.*, 1989; Gove, 1971; Huxley, 1992; Parker, 1989; Seymour, 1990; Soule, 1985). The list of vegetables was further restricted by excluding: (1) non-cultivated species; (2) lower organisms (e.g. fungi); (3) most trees and woody shrubs; and (4) plants grown in or gathered from salt water (e.g. sea weeds). The list has several exceptions that were included: (1) banana inflorescence (*Musa paradisiaca* L. var. *paradisiaca*) and plantain fruit (*M. paradisiaca* L. var. *paradisiaca*) that are from herbaceous trees; (2) several species that are traditionally utilized as condiments but are consumed in sufficient quantities in salads in some areas of the world (e.g. basil or mint); (3) several species that could be considered woody shrubs but are cultivated as leafy vegetables, such as *Cnidoscolus aconitifolius* (Miller) Johnston and *C. chayamansa* McVaughn or as a root crop, *Manihot esculenta* Crantz.; and (4) a few that are sufficiently sweet as to be considered a dessert fruit.

Introduction

The list of crops was compiled with the help of horticultural and botanical authorities from over 40 countries, representing diverse climatic and ethnic regions.

Scientific names

Modern plant taxonomy began with publication of *Species Plantarum* by Linnaeus (Von Linné, 1753). While there was some initial resistance to acceptance of the binomial system established by Linnaeus (e.g. "... attempts to reduce the names of plants to a system, has rendered the study more difficult and more subject to error, than it would have been if the Student had only used his sight for the distinguishing of plants, and his memory for registering them." Brookes, 1763), it fairly rapidly became the universal standard.

Plant taxonomy is based on a hierarchy of categories to which taxa (plants) are assigned. The hierarchy, established by the International Code of Botanical Nomenclature (McNeil *et al.*, 2005), includes the order, family, genus, and species with each progressive category being more specific. Families are groups of plants that have distinctive reproductive and vegetative features and are subdivided into genera and species. Genera represent a category in which the included species have more characteristics in common than species of other genera and therefore represent an aggregation of closely related species. Individual species are characterized by distinct morphological differences from other closely related species and can be further subdivided into subspecies, variety and form. These latter categories are used to characterize variation within a population of plants of the same species.

A scientific name is not complete without indicating the author or authors who first described the taxon. These names are critical for accuracy and assigning priority. Authors who have named a number of taxa often have their names abbreviated. For example, Linnaeus is shortened to L. and A.P. de Candolle to DC. (see Brummitt and Powell, 1992 for a list of these abbreviations).

There are several variations in how the author is cited after the binomial that concur with established rules. For example in the binomial *Centella asiatica* (L.) Urban, the original author (Linnaeus) is listed in parenthesis when a later author (Urban) transferred the original species to another genus or rank. When the author designation has an "ex" connecting two authors (e.g. *Allium tuberosum* Rottler, ex Sprengel), the first author (Rottler) initially proposed the name but did not validly publish it; the second author (Sprengel) validated the name while citing the first author.

Synonyms

In the early days of plant classification, due in part to difficulties in communication, it was not uncommon for a specific taxon to be assigned a Latin binomial by more than one individual. A synonym is created when a taxon is given different scientific names by separate authors. Synonyms can greatly complicate the identification and communication of a species of interest. According to the International Code of Botanical Nomenclature (McNeill *et al.*, 2005), the first author naming the taxon has priority. Subsequent names are deemed synonyms and their use is incorrect. Synonyms are always referred to as a synonym of a particular taxon (e.g. *Acmella caulorrhiza* Delile is a synonym of *Acmella oleracea* (L.) R.K. Jansen). In the text, finding the correct vegetable crop in the botanical list (Chapter 1) is difficult, if not impossible, when starting with the incorrect scientific name. Therefore, synonyms for the crops are listed in Chapter 3, with the correct binomial indicated in bold, followed by a number that indicates the family and the specific crop within the family in Chapter 1 (e.g. 24.1. indicates the 24th family and the 1st crop).

Changes in scientific names

Changes in nomenclature occur due to the fact that the classification of a taxon is not absolutely fixed. While there are specific rules with regard to assigning binomials, there remains considerable debate on the phylogenetic level. Some taxonomists are more inclined to separate groups of similar plants into discrete species while others are more inclined to lump them together into one or a small number of species. The advent of molecular genetics and the emerging use of molecular evidence and cladistic analysis have further stimulated proposals for changes in existing classifications. For example, molecular evidence supports the tomato (*Lycopersicon esculentum* var. *esculentum* P. Miller) belonging in the *Solanum* genus (e.g. *Solanum lycopersicon* Blanco). As a consequence, there is a continuing debate between developing a more phylogenetically meaningful classification and that of preserving nomenclature that has been used, in some cases, for a century or more.

Another taxonomic problem is that a number of cultivated species have undergone considerable genetic manipulation by plant breeders. In certain instances, there are new forms of plants produced that represent hybrids between two species. These are generally denoted, as in the edible chrysanthemum, with the binomial for each species separated by an \times sign (e.g. *Chrysanthemum coronarium* L. \times *Chrysanthemum morifolium* Ramat.). Plant breeders continue to produce a diverse selection of cultivated plants that are termed “cultivars”, generally abbreviated as “cv”. A cultivar is a cultivated variety of a species that had been selected for specific desirable characteristics (e.g. fruit size, shape, color, flavor, postharvest longevity) that are genetically fixed with the offspring retaining the plant’s unique characteristics from one generation to the next.¹ Cultivars are reproduced under carefully controlled conditions, especially when they are a cross-pollinated species, and many are now routinely patented to prevent unwarranted sale by competitors.

Although the practice is declining, the term “variety” continues to be widely and incorrectly applied to cultivars. Variety is a taxonomic category and not an agricultural term. Cultivar names are not in Latin, begin with a capital letter and can be listed after the scientific name (e.g. *Zea mays* L. ssp. *mays* cv. Silver Queen).

In the taxonomic treatment herein, several closely related species in which the edible parts are very similar are grouped under the genus name (e.g. *Dendrocalamus*, *Amaranthus*) and the common names are listed collectively. When distinct names for particular species are available, they are indicated using a numerical superscript at the end of the common name indicating the species [e.g. *Dendrocalamus* spp. (e.g. *D. asper*¹, *D. brandisii*², *D. giganteus*³, *D. hamiltonii*⁴, *D. latiflorus*⁵, *D. membranaceus*⁶, *D. strictus*⁷) or *Amaranthus* spp. (*A. albus*¹, *A. caudatus*², *A. cruentus*³, *A. dubius*⁴, *A. hybridus*⁵, *A. lividus*⁶, *A. mangostanus*⁷, *A. spinosus*⁸, *A. sylvestris*⁹, *A. tricolor*¹⁰, *A. viridis*¹¹)]. Therefore “sraha nsoe⁸” is an Akan name for *Amaranthus spinosus* L.

With some species, breeders have created such diversity in morphology that they are segregated using group categories (e.g. *Allium cepa* L. Cepa group, *Allium cepa* L. Aggregatum group). While several authors have separated crops within the Brassicaceae into groups (e.g. *Brassica oleracea* Botrytis group vs. *B. oleracea* L. var. *botrytis* L.), the older, more widely adopted botanical variety designation has been utilized in the text. In *B. oleracea*, this treatment was followed, taking into consideration the morphological diversity and cultural traditions associated with the kales and other compacted rosette coles like tronchuda cabbages (*Brassica oleracea* L. var. *costata* DC.).

¹ With the exception of hybrids.

Introduction

The taxonomy within some of the Cucurbitaceae is also a problem, with distinctions among some crop types occasionally being nebulous at best. For example, pumpkins can be found in both *Cucurbita maxima* Duch. and *C. moschata* Duch. ex Poir. Therefore common names, especially more generic ones, may be assigned to multiple species. In the Cucurbitaceae, classification is further complicated by hybridization among some species.

Taxonomic sources

Taxonomic divisions follow Raven, Evert, and Eichhorn (1992) in the text, with classification terminology within parentheses following Cronquist (1988). Alternate family names, that have the correct ending (*-aceae*), have been sanctioned by the Code [e.g. Apiaceae (Umbelliferae), Asteraceae (Compositae), Brassicaceae (Cruciferae), Fabaceae (Leguminosae), Lamiaceae (Labiatae)] and adopted by many taxonomists. The newer version has been used in Chapter 1. Genus and species names, where applicable, largely follow the USDA-ARS Germplasm Resources Information Network (GRIN) of the National Plant Germplasm System (NPGS) treatment <<http://www.ars-grin.gov/cgi-bin/npgs/html/taxecon.pl>>. In several instances where large numbers of species have been used similarly (e.g. amaranths, lily), the group is condensed under the genus, with a representative list of the species grown, though not as individual crops. Where distinct differences are evident among subspecies, the nomenclature used in the primary country of utilization is adopted. For example with *Brassica juncea* (L.) Czern., a vegetable that originated in China and has undergone extensive morphological manipulation in breeding programs there, the classification system presented by Yang *et al.*, 1988 is adopted.

Common names

Sources

A publication of this nature would be impossible without the help of a number of horticultural and botanical authorities from around the world (see Acknowledgements). Vernacular names have also been gleaned from an extremely wide range of published sources.

Alphabetization

In a number of instances (e.g. some of the African languages), the 26 Latin characters used as the basis for the English language are not adequate for creating all of the sounds required. As a consequence, it has been essential to include several AfroRoman characters as well as certain other unique characters from other languages. Where multiple languages are used, even when using the same alphabet, the appropriate alphabetical order is not always clear. For example, in French é and ô are simply accented letters while á, í, and ö in Icelandic are distinct letters. The common names listed herein (e.g. Chapter 2) are alphabetized in the following order: a/á, æ/ae, b/þ, c/ç, d/dʹ/d̥, e/é/ʹ/è, f, f, g, h/ħ, i/í, j, k/ķ, l, m, n/ñ/ŋ, o, p, q, r, s, ß, t, u, v, w, x, y/ʸ, z, ð, ñ. A / between letters indicates that they are handled as equivalents with regard to alphabetization. Diacritics (see Appendix I) are ignored during alphabetization. For a more detailed explanation of non-Latin characters see the Appendix II.

The crop names are derived from a number of alphabets (e.g. Hebrew, Greek, Cyrillic, Armenian, Arabic) and logograms (e.g. Chinese, Korean, Japanese). Presenting the names in a uniform text necessitates transcription or transliteration of unique characters into the Latin alphabet (Romanization) or in some instances, AfroRoman characters. Conversion can vary among individuals, resulting in slight differences in spelling for a specific word. Alphabet and logogram alterations come from the

source of the names and are accepted as received. When variation in spelling is present between two sources, both versions are included.

Most appropriate name

When possible, the most widely used common name has been listed first for each language, followed by less frequently used names. However, the source for some languages did not indicate the preferred name; as a consequence, in a number of instances, accurately prioritizing the names is not possible. In others several names are comparable in the frequency of use. The priority for the names may also differ among countries using the same language. For example, Crioulo is a Portuguese Creole language that is spoken in Cape Verde as well as certain countries in West Africa (e.g. Guinea-Bissau, Senegal). Many Crioulo names differ markedly with location. The situation is made even more complex when the most appropriate common name varies with location within a country as in the case of a number of Spanish names for vegetables in Mexico. In some instances, due to the complexity of distinguishing the most appropriate name for individual locations, the common names are simply listed. As a consequence, the first name listed may not necessarily be the most frequently used.

When foreign names are used locally (“loan words”), they have been included [e.g. “aubergine” for *Solanum melongena* L. in England versus “eggplant” in the United States]. The occurrence of loan words is fairly common, especially with more recent introductions. For example oca, a Quechua word from the Cusco region of the Andes for *Oxalis tuberosa* Molina, has been adopted by several languages [oka (Czech), oka (Danish), oca (English), oca (Portuguese), oca (Spanish), oka (Vlaams)] even though the crop is not grown or consumed in most locations where the languages are spoken. The absence of a name for a crop in the language, the willingness to adopt loan words, and the relative ease of pronunciation by speakers of the language adopting the name are factors affecting adoption.

Many of the crops listed lack names in one or more languages. Likewise, the presence of a name in a language does not necessarily indicate that the crop is grown in the country where the language is spoken.

Number of names

The list does not include all possible common names for a crop within a language and the level of thoroughness varies somewhat among languages. Hung *et al.* (1992), for example, lists 34 common names for tomato in Chinese. While the Chinese characters for a vegetable name are uniform across dialects, the pronunciation of the name can vary widely depending upon the dialect. Therefore, the preferred common name can vary with dialect, as well as with location. Including every name for each language was simply not feasible due to the number of vegetable crops. What has been included, in the case of 8 Chinese dialects covered, is the name designated by Hung *et al.* (1992) as the most widely used. While this name may not be the most appropriate across all of the dialects and/or locations in which Chinese is spoken, a more detailed treatment was not within the scope of the current work.

Lack of a common name

There is an extremely wide range in the number of common names listed across languages. Inuktitut and Aleut, for example, are used in the very northern latitudes where the growing season and/or temperature tremendously limit the vegetable species that can be successfully cultivated. As a consequence, there are very few Eskimo names for vegetables. In contrast, speakers of certain other languages very readily coin names for new crops, even those that are not grown or, in some cases,

Introduction

even known where the language is spoken. In some instances, the new name simply represents the name used in the country of the plant's origin. This is often the case when the language in question is on the wane and the names for new crops are generally derived from the replacement language (e.g. English names for vegetables being used by many speakers of Native American Indian languages).

The existence of a name in a particular language does not necessarily mean a vegetable is cultivated in the area where the language is spoken. Conversely, the absence of a name does not necessarily mean that the crop is not cultivated. As indicated earlier, the existing collection of vernacular names is a “work in progress” and there are numerous additional names and languages that would be advantageous to eventually include.

Generic terms

Generic names, names that refer to a general kind or group of plants or plant products, are widely used in cultivated crops. Unfortunately in some instances, generic names can create a problem due to their lack of specificity. Bean or beans, for example, can be correctly applied to the edible fruit or seeds of a number of legumes that are used as vegetables. So when one refers to a bean, is it a green, lima, sword, jack or other type of bean? Likewise, corn (maize) can be equally applied to sweet corn, field corn, popcorn and other forms. The term corn is also used for wheat (*Triticum aestivum* L.) and oats (*Avena sativa* L.) in Europe and occasionally for certain other cereals. Generic names/terms are commonly used in a number of languages. In some cases, they indicate all forms that are not distinguished using more specific names. A similar situation occurs for the name used for both banana and plantain in some languages, where the two plant types are not distinguished. Likewise, the generic term “mint” includes *Mentha spicata* L., *Mentha pulegium* L. and a number of wild mint species. Spinach is the English name for *Spinacia oleracea* L.; however, spinach is also used for other leafy greens such as *Amaranthus* spp. in Africa and *Basella alba* L. in parts of Asia. In such cases, it is important to be cognizant of the setting in which the name is used. The potential for confusion when using generic names is a primary reason to know and, when appropriate, use the scientific name for a crop in question.

Dried crops

Vegetables are routinely thought of as relatively succulent, fresh products; however, in some instances, they are dried (e.g. beans, corn, peas, radish leaves) or altered in some manner before using, often to increase the postharvest longevity of the product. A number of the legumes are consumed as both fresh and dried products (e.g. cowpeas, *Vigna unguiculata* (L.) Walp. ssp. *unguiculata*). Dried seed is the prevalent form in which cowpeas are utilized worldwide, though in the United States the seeds are generally harvested and used prior to significant drying in the field or after harvest.

Languages

While there are over 6800 languages worldwide (Gordon, 2005), 96% percent of the people of the world speak only 4% of the languages. In contrast, 25% of the languages are spoken by fewer than 1000 people. It is currently estimated that a language becomes extinct every two weeks. Sabah and Sarawak in Malaysia are now extinct and there are similar losses elsewhere. In the United States, the number of monolingual speakers for many Native American languages has declined markedly [e.g. Kiowa Apache (18), Caddo (25), Kickapoo (6)] with the remaining speakers generally limited to older adults (Gordon, 2005). The death of languages results in a loss in language diversity, ethnic identity, a repository of history, a part of human knowledge, and simply interesting subjects in their own right (Crystal, 2000). While a few previously undiscovered languages are identified each year,

they do not numerically compensate for those lost and are often also in a precarious position with regard to their own future.

Language families

A language family is a group of related languages that have evolved from a common ancestor (i.e. a proto-language). The objective herein was to include as many language families in the text as possible, and while the number of families less than desired, the text does provide the most detailed cross-section of families to date. Languages families and the number of languages within each are: Afro-Asiatic (14), Algic (4), Altaic (9), Austro-Asiatic (5), Austronesian (61), Dravidian (6), Eskimo-Aleut (3), Hmong-Mien (2), Indo-European (69), Indo-Iranian (1), Iroquoian (2), Kartvelian (1), Khoisan (2), Kiowa Tanoan (1), Misumalpan (1), Muskogean (2), Na-Dene (2), Northeast Caucasian (1), Niger-Congo (128), Nilo-Saharan (6), Quechuan (1), Sino-Tibetan (18), Siouan (2), Tai-Kadai (4), Uralic (3), Uto-Aztecan (3), language isolates (4), Creole (8), mixed (1), unclassified (6).

Individual languages

In Chapter 6, a very brief critique of each of the languages is presented that includes the family and further sub-categorization, synonyms, number of speakers, and locations where spoken. Individual languages in the text are: Abua, Adamawa Fulfulde, Afar, Afrikaans, Agta, Aja, Akan, Akan-Akuapem, Akan-Asante, Akan-Fante, Akha, Aklanon, Akpa, Akwa, Aleut, Amharic, Ando, Anuak, Anyin, Arabic, Armenian, Assamese, Baatonum, Badaga, Bafia, Bafut, Baga, Balanta-Kentohe, Balti, Balkan Romani, Bamanankan, Bamileke, Baoulé, Basque, Bassari, Belarusan, Bemba, Bembé, Bengali, Berom, Bété, Bete-Bendi, Binukid, Blackfoot, Bodo, Bokyi, Bontoc Central, Bosnian, Botolan Sambal, Breton, Budik, Bughotu, Buhid, Bulgarian, Bullom So, Bulu, Burmese, Butbut Kalinga, Butuanon, Cajun French, Cape Verde Crioulo, Car Nicobarese, Carolinian, Casiguran Dumagat Agta, Catalan-Valencian-Balear, Cebaara Senoufo, Cebuano, Central Bicolano, Central Khmer, Central Palawano, Central Sama, Chechen, Cherokee, Chickasaw, Chuwabu, Comanche, Croatian, Cusco Quechua, Czech, Dagbani, Dakota, Dangme, Dangme-Krobo, Danish, Dendi, Digo, Ditammari, Doondo, Dutch, Eastern Canadian Inuktitut, Eastern Farsi, Eastern Maninkakan, Eastern Panjabi, Ede Nago, Edo, Efik, English, Estonian, Éwé, Ewondo, Fijian, Filipino, Finnish, Fon, French, Fulfulde, Ga, Gaddang, Galician, Gà, Ganda, Gbaya, Gbe-Vhe, Gen, Georgian, German, Gangan, Gikuyu, Gola, Gonja, Gourmanchéma, Gourmantché, Greek, Gujarati, Gun, Guro, Haitian French Creole, Hakka, Hanunoo, Harari, Harsüsi, Hausa, Hawaiian, Hebrew, Herero, Hiligaynon, Hindi, Hindustani, Hmong, Daw, Hmong-Njua, Hopi, Hungarian, Ibaloi, Ibanag, Icelandic, Iceve-Maci, Ifugao, Igbo, Ilocano, Indonesian, Irish Gaelic, Isnag, Italian, Itawit, Ivatan, Izon, Japanese, Javanese, Jicarilla Apache, Jola-Fonyi, Jula, Junkun Takum, Kabiyé, Kalagan, Kankanaey, Kannada, Kanuri, Karen, Kashmiri, Kati, Kazakh, Kiowa, Kirghiz, Kiribati, Konkani, Konkomba, Kono, Koongo, Korean, Koro, Krio, Kung-Ekoka, Kuranko, Kwangali, Kwanyama, Kwéyòl, Ladino, Lahu, Lakota, Lao, Latvian, Limba, Lisu, Lithuanian, Loko, Lower Sorbian, Luo, Luxembourggeois, Luyia, Macedonian, Madura, Maguindanao, Maithili, Makhwa, Malagasy, Malawi Lomwe, Malay, Malayalam, Malimba, Maltese, Mandarin, Manding-Bambara, Manding-Mandinka, Manding-Maninka, Mandinka, Mandjak, Maninka, Mankanya, Manobo, Manu'a Samoan, Manx Gaelic, Maori, Maranao, Marathi, Marinduque, Marquesan, Marwari, Mehri, Mende, Micmac, Min Bei, Min Nan, Minangkabau, Mizo, Mohawk, Mongolian, Mòoré, Morisyen, Mundari, Muskogee, Nama-Damara, Navajo, Ndali, Ndonga, Nepali, Newar, Ngizim, Ngundi, Niue, Northern Azerbaijani, Northern Kissi, Northern Kurdish, Northern Pashto, Northern Sotho, Northern Thai, Norwegian, Nupe-Nupe-Tako, Nyakyusa-Ngonde, Nyanja, Ogbia, Ogbia-Agholo, Oriya, Pali, Pampangan, Pamplona Atta, Pangasinan, Plains Cree, Polish, Portuguese, Potawatomi, Pulaar, Pular, Pumé, Rarotongan, Romanian, Ronga, Russian, Samoan, Sanga, Sanskrit, Santali, Sarangani Blian, Scots, Scottish

Introduction

Gaelic, Sena, Serbo-Croatian, Serer-Sine, Shan, Shona, Sidamo, Sinhala, Slovak, Slovenian, Somali, Songhay, Southern Bobo Madaré, Southern Dagaare, Southern Kisi, Southern Paiute, Southern Sotho, Spanish, Sranan, Stellingwerfs, Subanon, Sumo-Mayangna, Sunda, Susu, Swahili, Swedish, Tagalog, Tagbanwa, Tajiki, Tamil, Tatar, Tausug, Teke, Telugu, Tem, Thai, Themne, Tibetan, Tigrigna, Tinà Sambal, Tiruray, Tiv, Tok Pisin, Tonga, Tongan, Tosk Albanian, Tsonga, Tswana, Tulu, Tumbuka, Tupuri, Turkish, Turkmen, Twi, Ukrainian, Upper Guinea Crioulo, Upper Sorbian, Urdu, Uyghur, Uzbek, Vai, Venda, Vietnamese, Vlaams, Waama, Waci Gbe, Wamey, Wáray-Wáray, Welsh, West Central Oromo, West Greenlandic Inuktitut, Western Farsi, Western Maninkakan, Wolof, Wú, Xhosa, Xiang, Yala, Yalunka, Yao, Yiddish, Yom, Yoruba, Yue, Zarma, Zulu, Zuni.

The language names used correspond to the preferred names identified in *Ethnologue Languages of the World* (Gordon, 2005). If a language of interest is not found listed above, consult Chapter 8 that lists synonyms.

Language critiques

A short critique of each of the languages is provided in Chapter 6. It includes synonyms for the language, number of speakers, geographical locations where the language is spoken, language family classification and dialects. Each language has a three letter ISO/DIS 639-3 identity code, established by the International Organization for Standardization. The three letter identifier provides a condensed means of enumerating living, extinct, ancient and other languages and has many uses, in particular in computer systems. In instances within the text where the identity of a language is not definitive, a temporary code in italics has been assigned.

Language synonyms

Many languages have a number of synonyms for individual vegetables. For example, Gourma, Gourmantche, Gurma, Mígulimancema, Goulmacema, Gulmancema, Gulimancema, Gourmantché are synonyms for Gourmanchéma. In some instances, a synonym or synonyms are currently or were previously widely used. When reviewing earlier literature synonyms are routinely encountered. See Chapter 7 for an alphabetical list of language names and synonyms with the latter keyed to the name utilized in Chapter 1 and 2 of this text.

Dialects

In some instances, certain languages are identified by their dialect name. Chapter 8 lists the dialects of the languages covered in the text and keys back to the correct language name.

Acknowledgements

A publication of this nature would be impossible without the help of a number of plant scientists from around the world. In many instances, the compilation of the names for the languages entailed considerable time and effort and I am deeply indebted to these individuals. In particular, I would like to acknowledge the significant contributions made by I.C. Silva Dias, Chris Starr and Betty Schroeder. Other individuals that have contributed to either compiling the list of cultivated vegetables or providing common names for the manuscript are: François Acadien, F. Adamicki, Saida Agaueva, S. Alexander, Y.M. Allain, A.M. Allam, Noor ul Amin, A. Andásfalvy, J. Apelaud, Gardar R. Arnason, D. Astley, Khin Swe Swe Aye, B.Bar-Tel, H. Baugerød, Jannick Bayon, A.S. Bindra, Sistske A.Bloemhoff, Conrad Bonsi, D.R. Caccioni, A. Casas, Mihaela Cerne, Alfonso Cerrate, Satish Chandra, N.J. Chen, Lee Kiang Chua, A.F. Coertze, Constantinos Dagrás, M.J. Day, Elias Dekazos, P.H.M. Dekker, A.P.M. de Nijs, Ivo Djinovic, C.C. Doyle Hugues Dupriez, Z-ca Dyrektora, Charles Ellis, Elazar Fallik, M.E.S.Ferreira, K.J. Fisher, D. 16. Musaceae

16.1. *Musa × paradisiaca* L. var. *paradisiaca*

(EP) a. fruit, b. flower bud; (P) a. C,R, b. C.

Plantain is considered a vegetable as are banana flower buds. A number of languages do not distinguish between banana and plantain, using only a generic term. The following names can be either or both. Dialects of Luyia (Bukusu¹, Itsukha², Kabarasi³).

a. fruit

(AFRIKAANS) piesang; (AGTA) biget; (AGTA, CASIGURAN DUMAGAT) abat, dupat; (AJA) mandan; (ALBANIAN, TOSK) banane; (AMHARIC) muz; (ANDO) banda; (ANUAK) b^ːl^ː, b^ːl^ː; (ARABIC) mooz el-gana; (ASSAMESE) kol; (ATTA, PAMPLONA) dupa, dupag; (AZERBAIJANI, NORTHERN) banan; (BADAGA) ba:caŋnu, ba:le, ba:le haŋnu; (BAFUT) àmbó, àmbótsu, bǎnǎnǎ, mǔnggo, nǔnggo; (BAGA) a-babani; (BAMANANKAN) namassa; (BAOULÉ) manda alié, alié manda; (BASSARI) banana; (BEMBA) nkonde; (BEMBÉ) dikondo; (BÉTÉ) batei; (BETE-BENDI) kí-gwǎ, kí-mbǎ, kí-gwǎǎ; (BICOLANO, CENTRAL) latunda, sab-a, saging-sab-a; (BINUKID) amas, bulig, bunguran, saging, televernng, tundang; (BODO) laihsang, sinisamfa; (BOKYI) kenkwa; (BONTOC, CENTRAL) poso; (BUGHOTU) vudi; (BUHID) punti, yakyaw; (BULLOM SO) puloth, santumir, bana, bǎnǎ, bǎnǎ-bombom-de, bǎnǎ-bumbum, bǎnǎ-katul-le, bǎnǎ-le, kpemde-mane-le, sintem; (BULU) ekon; (BURMESE) nget-pyaw; (CAJUN FRENCH) banane; (CAROLINIAN) uurh, wiisch; (CATALAN-VALENCIAN-BALEAR) plàtan, banana; (CEBUANO) turdan, kardaba; (CZECHEM) banaan; (CHINESE, HAKKA) kioŋm-tsiǎo; (CHINESE, MIN NAN) chio, keng-chio, kin-chio; (CHINESE, WÚ) ba jiao ke; (COMANCHE) aakaa?; (CREE, PLAINS) wákâs; (CREOLE, HAITIAN FRENCH) bannann fran, gwo bannann; (CRIOULO, UPPER GUINEA) bananeira, banana anǎ, banana de cubissique, banana maçã, banana ouro, banana pom, banana prata; (CZECH) banánovnik zeleninový; (DAGAARE, SOUTHERN) boordiē; (DAKOTA) iyaǵezizi; (DANGME-KROBO) blofo kodu, kodu, mãdǎa, mãnǎa; (DANISH) banan, pisang; (DIGO) mgomba, mkoo; (DUTCH) banaan, bakbanaan; (EDE NAGO) ɔgede agbagba; (EDO) oghede, oghedebo; (EFIK) adabri, akpanan-ekop, anwang-ébát, ébát-iba, mbòró; (ENGLISH) plantain; (ESTONIAN) jahubanaan; (ÉWÉ) ablado; (FARSI, EASTERN) kǎle; (FARSI, WESTERN) barhang, bartang; (FIJIAN) vudi; (FINNISH) jauhobanaani; (FON) kokwe sozu; (FRENCH) plantain, banane à cuire, bananier plantain; (FULFULDE, ADAMAWA) kondong, kondongji, ayabaje; (GA) amadaa; (GADDANG) abat, bat; (GAELIC, MANX) duilag, pherick; (GBE-VHE) abladzo, akodu, akodua-zǎ, akodukoko, akodukpe, ewe-kodu, kodu, yevu kodu; (GEN) amandan; (GERMAN) Kochbanane, Mehlbanane, Plantainbanane, Wegerich; (GIKUYU) marĩgũ; (GOLA) banda, banda-gbǣge, konde; (GONJA) bordie, kayeba; (GOURMANTCHÉ) ibourdi; (GREEK) idos mpanana; (HANUNOO) sab-a, sagin balayan, sagin binalatan, sagin buyun, sagin pinakul mukay, saging-sab-a; (HARARI) mǔz, gǎ mǔz; (HAUSA) agade, ayaba, àyàbà, àyàbàr tuùrààwǎa, àyàbàr dàaji; (HAWAIIAN) mai'ā; (HEBREW) banana, mozz; (HERERO) banana-i; (HILIGAYNON) sǎging; (HINDI) kela, kaela, amrit, kachkula, maozkula; (HINDUSTANI) bakwa, kelá, kadali, gahr; (HUNGARIAN) banán, pizǎng; (IBALOI) balat, doman, soging; (IBANAG) balat, damilig, damilik, dufo, duho, dupo; (ICELANDIC) mjǔlbanani; (ICEVE-MACI) bǎnǎnǎ; (IFUGAO) abat, balat, balatan dipping; (IGBO) abì rì ka, elili jì okò, eze ɔgede jì oko, jì okò, ɔgèdè, ɔgèdè ñikiti, unè, unèlè, unèlò ɔcha, òmèjìl, ukam, unè, ipà, ulè, àbirika unèfè, unèrè, abereka, ebegehi, unere, ɔgede, ɔgede ojoko, abrika; (ILOCANO) banangar, latundal, tukol, apugin; (INDONESIAN) pisang, pisang tanduk; (ITALIAN) banana da cuocere, banana verde, piantaggine, banano plantain; (ITAWIT) bahat, bat; (IVATAN) gayod, soteen, soteen gayod, vineveh, vinivih, vinivik; (IZON) beiba, oyinbó, beribǎ, apǎlǎ bǎribǎ, abǎnggha, beké abanggha, berebe-ghǎsa; (JAVANESE) gedang sungu; (JOLA-FONYI) banana; (JULA) brana sousouta; (KABIYÉ) iyabiye; (KALAGAN) balat; (KANKANAEY) baat, bagat; (KANNADA) bale, baale, budibaale, chandrabaale, elebaale, elakkibaale, haavubaale, hombaale, jenubaale, gulurbaale, kadali, kandu, kattubaale, madarangabaale, mavuju, pachhabaale, puttabaale, raajabaale, rambha, rasabaale; (KANURI) àyàwà; (KHMER, CENTRAL) ché:k; (KIRIBATI) te banana, te touru, te rarai; (KISSI, NORTHERN) gbòlo, gbòlo-bana, gbòlo-bendo, gbòlo-mòyo, gbòlo-pòmbò, kpòlo; (KONKANI) kaeli; (KONKOMBA) ayaba; (KONO) kasawane, kondeke, maa, seminga; (KRIO) plantin, kótǎkwakyi, òngùgù dǎndè, kraykray banana; (KURDISH, NORTHERN) mozz; (KWANGALI) otjipanana; (KWÉYÒL) bannann, banann; (LADINO) banana; (LAHU) a^ː paw^v hpui ma; (LAO) kwàyz khauz; (LIMBA) hobana, bana, bana-batogoe; (LITHUANIAN) tikrasis bananas; (LOKO) maa, maa-kotòpò

23.4. *Celosia* spp.

(EP) leaves and tender shoots; (P) C.

Several languages have individual names for each species. When available, the species is indicated with a numerical superscript. Names without a numerical designation represent either generic terms or when a species designation was not available. Principal cultivated vegetable species are *C. argentea* var. *cristata*¹ and *C. trigyna*².

46. Moraceae

46.1. *Humulus lupulus* L. (EP) tender shoots; (P) C.

(AFRIKAANS) hop, hopspruite; (ALBANIAN, TOSK) luvër, sumbullbar; (ASSAMESE) hop; (BELARUSAN) tutavia hmel zvychainie; (CHINESE, MANDARIN) pi jiu hua; (CHINESE, WÚ) pi jiu hua; (CZECH) chmel obecny, chmel otáčivý pazyochy; (DANISH) almindelig humle; (DUTCH) hop; (ENGLISH) hops, hop shoots, common hop; (ESTONIAN) humal; (FINNISH) humala; (FRENCH) houblon commun, houblon lupulin; (GALICIAN) lúparo; (GERMAN) gemeiner Hopfen; (GREEK) lykiskos; (HEBREW) keshutanit mezuya, kshutit metzua; (HUNGARIAN) komló; (ICELANDIC) humall; (ITALIAN) lüppolo; (JAPANESE) karahana-sō, hoppu; (KAZAKH) chmel; (LATVIAN) parastais apinis; (LITHUANIAN) paprastasis apynys; (MACEDONIAN) običen hmel; (NEPALI) hops; (NORWEGIAN) humleskudd, humle; (POLISH) chmiel zwyczajny; (PORTUGUESE) lúpulo; (ROMANIAN) hamei, hamei volubil; (RUSSIAN) hmel viushchijsja, hmel obyknovennyi; (SERBO-CROATIAN) hmelj; (SLOVAK) chmel'; (SPANISH) lúpulo común, hombrecillo; (STELLINGWERFS) hop, bierpolle, (SWEDISH) humle; (TAJIKI) hamel; (TURKISH) şerbetçi otu, şerbetçiotu; (URDU) humulas; (VLAAMS) hop; (WELSH) hopysen.

47. Myrsinaceae

47.1. *Maesa latifolia* (Blume) A. DC. (EP) young leaves and shoots; (P) C.

(CHINESE, WÚ) shu hua du jing shan; (ENGLISH) kipeit; (INDONESIAN) kayu nasi; (JAVANESE) kipeit.

48. Nelumbonaceae**48.1. *Nelumbo nucifera* Gaertner**

(EP) a. rhizomes, leaves; b. seed; (P) a. C; b. C.

In some instances the common name is generic and can refer to either the rhizome or seed.

a. rhizome

(AFRIKAANS) lotuswortels; (ASSAMESE) podum sipa; (BADAGA) kamala, ta:mara; (BENGALI) padma; (BICOLANO, CENTRAL) sukan; (CHINESE, GÁN) lin ou; (CHINESE, MANDARIN) he, he hua; (CHINESE, MIN BEI) ou; (CHINESE, MIN NAN) lián, lián-hoe, hò; (CHINESE, WÚ) lin ou, lian; (CHINESE, XIANG) lin; (CHINESE, YUE) lian ou, ou, ou he; (CZECH) indický lotosu, oddenky lotosu; (DANISH) lotus; (ENGLISH) lotus root, East Indian lotus, Indian lotus, Chinese water-lily, Indian lotus, sacred lotus; (ESTONIAN) lootos; (FILIPINO) lutos, baina; (FINNISH) intianlootusjuuri; (FRENCH) lotus sacré, lotus égyptien, lotus indien, fève d’Egypte, lis du Nil, rose du Nil, racines de lotus; (GERMAN) Indische Lotosblume, Indischer Lotus, Agyptische Bohne; (GREEK) neloumvion; (GUJARATI) suriyakamal; (HEBREW) lotus ha-mayim; (HINDI) kanwal, kamal, ambuj, kanval, laalkamal, padam, purayin; (HINDUSTANI) kamal, kaṅwal padam; (HMONG DAW) qos dej; (HUNGARIAN) lótsággyökér; (IBANAG) lingaling; (ILOCANO) sukaw; (INDONESIAN) teratai, taratai, seroja, seroja merah, saroja merah, padma, patma, bunga padan, bunga telepak, pekaja, lotus, tunjung; (ITALIAN) loto d’Egitto, giglio de nilo; (JAPANESE) renkon; (JAVANESE) trate, tarate; (KANNADA) kamala, tavaregadde, thaavare, padma, thaamara, thaavare beeja, thaavare gedde; (KHMER, CENTRAL) chhu:k; (KONKANI) kamala, saalaka; (LAHU) naw’ bo ve^; (LAO) bwà; (LATVIAN) lotoss; (MAGUINDANAO) sawa; (MALAY) teratai, seroja, padema; (MALAYALAM) thaamara, aravindam, bemthaamara, thandaar; (MARANAO) katabataba; (MARATHI) kamal, kamala; (NEPALI) kamalko phool ko jara; (NEWAR) puskarāmul; (NORWEGIAN) lotusrotter; (ORIYA) padam; (PAMPANGAN) baino; (PANGASINAN) mabalbalino; (PANJABI, EASTERN) kanwal, pamposh, bhā, bhāḥ; (POLISH) lotos kłaczowy; (PORTUGUESE) lotus do Egipto, lotus índico; (SANSKRIT) ambuja, padma, pankaja, pankaga, kamala, kumada, abja, ambhoja, ambhoruha, ambujanma, ambupadma, amburoha, amlana, arvinda, asyapathra, bisakusuma, bisaprasuna, drishopadma, harivettha, indiraalaya, kahlaara, jalodbhava, kawar, kunja, kusheshaya, kutapa, mahaapadma, mahothapala, nala, nalika, nalina, pankeruha, pathoja, pundareeka, pushkara, putaka, raajeeva, saaras, sahsrapathra, sarojanma, sroruha, sarsija, sarsiruha, sharada, sharapadma, shathapathra, shri, shriparna, srivaasa, shuklapadma, shvethapathra, sithaambuja, sujala, thamarasa, vanashobhana, varisoha; (SINHALA) nelum ala; (SPANISH) loto sagrado, rosa del Nilo, haba de Egipto; (SUNDA) tarate, teratai; (TAGALOG) baino; (TAJIKI) nilufar; (TAMIL) ambal, thamarai, thaamarai, chenthaamari, iraaeevam, sivapputhaamarai, thirumaalundi; (TELUGU) kalung, erra-tamara, errathaamara, kamalamu, padmhu, pundreekamu, sougandhikamu, thaamara puvvu, thaamara, thella thaamara, thellane padmanu; (THAI) abua-luang, ubon, sattabut; (TULU) thaamara; (TURKISH) kudi lüt çiçeği; (URDU) kanwal; (VIETNAMESE) sen, hoa sen; (VLAAMS) lotuswortel; (WÁRAY-WÁRAY) nугkad-tugkad.

b. seed

(AFRIKAANS) lotussaad; (ASSAMESE) podum choka; (CHINESE, WÚ) lian zi; (CHINESE, YUE) lian zhi; (CZECH) indický lotosu, oříšky lotosu; (ENGLISH) lotus seed, pythagorean bean, Egyptian bean; (FINNISH) intianlootussiemen; (FRENCH) graines de lotus; (GREEK) lotos; (HUNGARIAN) lótság magvak; (NEPALI) kamalko phoolko biu; (NORWEGIAN) lotusfrø; (POLISH) lotos orzechodajny; (PORTUGUESE) sementes de lotus; (SINHALA) nelum eta; (SPANISH) semillas de loto; (TAJIKI) nilufar; (VLAAMS) lotuszaden.

49. Nyctaginaceae

49.1. *Mirabilis expansa* (Ruiz & Paron) Standley (EP) tubers; (P) C.

(CHINESE, WÚ) zi mo li; (CZECH) nocenka rozprostřená; (DANISH) mauka; (DUTCH) nachtschone; (ENGLISH) mauka; (FINNISH) ihmekukka; (FRENCH) bellede nuit, mauka; (GERMAN) Wunderblume; (GREEK) mirampilis; (HEBREW) leyanit, malkat ha-layla; (ITALIAN) bella di notte espansa; (MALTESE) kummejt; (NORWEGIAN) mirakelblomst; (POLISH) dziwaczek; (TELUGU) mellunipadmamu; (TURKISH) gece sefasi.

50. Nymphaeaceae

50.1. *Euryale ferox* Salisb. (EP) seeds, tender shoots⁵, roots⁵; (P) C.

(BENGALI) makhana; (CHINESE, MANDARIN) qian shi; (CHINESE, WÚ) qian shi; (DUTCH) woeste euryale; (ENGLISH) euryale, foxnut, gorgon water lily; (FILIPINO) lauas; (FRENCH) euryale; (HINDI) makhana; (JAPANESE) onibasū, ibara-basū; (KASHMIRI) juwur; (MAITHILI) makhān; (NEPALI) makhana; (PANJABI, EASTERN) jēwar; (ORIYA) kvntapadmu; (URDU) euryale, makhana; (VLAAMS) euryale.

50.2. *Nymphaea nouchali* Burm. f. (EP) rhizomes, flower stalks, seeds⁵; (P) C,R.

(AMHARIC) bušay; (ASSAMESE) mokuva, nal, bhet phul; (BENGALI) shaluk, rakto-kambal, nal; (BODO) keshro; (BRETON) loa-zour; (CATALAN-VALENCIAN-BALEAR) nenúfar; (CEBUANO) talailo, tunas; (CHICKASAW) aka' aapakali', oka' nampakali', okpal, oktaak okpalli'; (CHINESE, HAKKA) liēn-fā; (CHINESE, MANDARIN) lian; (CHINESE, WÚ) chi ye shui lian; (DANISH) åkande; (DUTCH) waterlelie; (ENGLISH) water lily, lotus lily, blue lotus of India, Egyptian lotus; (ESTONIAN) vesiroos, vesikupp, jõenupp; (FRENCH) nénuphar, nymphéa, lotus bleu d'Égypte; (GAELIC, IRISH) duilleog; (GAELIC, SCOTTISH) duilleag-bhàite; (GERMAN) Seerose, Wasserlilie; (GREEK) nymphaea, noufaro; (GUJARATI) kanval, nilophal; (HINDI) kanval, koyi, koka, koi, bhenght, kuyi, lilophal, neelkamal, neelpadma; (HUNGARIAN) vizililiom; (IBANAG) balinu; (ICELANDIC) vatnalilja; (INDONESIAN) teratai, tunjung, telepok; (ITALIAN) ninfea, ninfea stellata; (JAVANESE) teratai; (KANNADA) nyadale huvu, neela naidile, neela thavare; (KASHMIRI) bumbi kūrū; (KHMER, CENTRAL) rum'-châng; (KIOWA) se'np'odal-e'; (LAO) bwà khiiz bèèz, bauna neai; (MAITHILI) kumud; (MALAY) kelipoh; (MALAYALAM) ampal, citambel, seethambel; (MARATHI) lalakamal, raktakamal, krishnakamal; (MENDE) pupenda; (MONGOLIAN) bölvöö; (MUSKOGEE) aktvpēhv; (NEWAR) toyu uphol-svān; (NGUNDI) tilonlonga; (ORIYA) dhabalakain, rangkain; (PALI) dakasítalikarñ, kallahārañ; (PANJABI, EASTERN) chota kanwal; (POLISH) grzybień, lilia wodna; (SANSKRIT) kumuda, asithothpala, indihar, kahlaara, kandotha, kandottha, kuvalaya, mriduthpala, neelakamala, neelaliya, neelambujanma, neelapadma, neelapathra, neelothpala, neelpankaja, neelpathraka, saugandhika, uthpala, uthpalaka; (SERBO-CROATIAN) lopoč; (SORBIAN, UPPER) bónčawa, gingawa, hatna lilija; (SPANISH) ninfea, nenufar; (SUNDA) karate; (SWAHILI) yangiyangi; (TAGALOG) lauas, pulaw, labas, lawas, pulaw; (TAJIKI) nilufari obi; (TAMIL) alli-tamarai, vellambal, alli, chevambal, karunaital, neelothbalam, neelothpalam; (TELUGU) allitamara, tella-kavala, kaluvva poovu, alli kaada, indivara, nalla kalava, nallani padmamu; (THAI) bua-phuan, bua-khap, bua-phan, bua-sai; (THEMNE) ka-pura; (TURKISH) nilüfer; (URDU) kanwal; (VENDA) mutalàla; (VIETNAMESE) s[us]ng lam.

51. Onagraceae

51.1. *Oenothera biennis* L.

(EP) leaves and tender shoots; (P) R,C.

(AFRIKAANS) nagblom; (BELARUSAN) skripnevaja, aslynnik dvuhgadov; (CHINESE, WÚ) yue jian cao; (CHINESE, YUE) yue jian cao, ye lai xiang; (CZECH) pupalka dvouletá; (DANISH) toårig natlys; (DUTCH) gewone teunisbloem; (ENGLISH) evening primrose; (FINNISH) iltahelokki; (FRENCH) onagre bisannuelle, herbe aux ânes; (GAELIC, SCOTTISH) s(e)òbhrach; (GERMAN) gemeine Nachtkerze; (GREEK) primoula, iranthes, doskraki; (HEBREW) ner ha-layal, ner haleila; (HOPI) poliisi; (HUNGARIAN) parlagi ligetszépe; (ICELANDIC) nattljós; (INDONESIAN) daun panu; (ITALIAN) enàgra comune; (LATVIAN) divgadīgā naktssvece; (LITHUANIAN) dvimetė nakviša; (MACEDONIAN) dvegodišna večernica; (NEPALI) pitambar phool; (NORWEGIAN) rapontika; (POLISH) wiesiołek dwuletni; (PORTUGUESE) onagra, erva dos burros, boa tarde, minuana; (POTAWATOMI) owesa'wanakûk; (SERBO-CROATIAN) pupoljka, dvogodišnj; (SPANISH) onagra, onagra bienal, onagra común, hierba del asno, enotera; (SWEDISH) nattljus; (TURKISH) adi eşekçiçeği eşek çiçeği; (VLAAMS) middelste teunisbloem; (WELSH) melyn yr hwyr.

52. Orobanchaceae

52.1. *Orobanche crenata* Forssk.

(EP) shoots; (P) C.

(ASSAMESE) bonia bau; (BRETON) bara-gad; (CHINESE, WÚ) lie dong; (CZECH) záraza, záraza vroubená; (DANISH) gyvelkvæler; (ENGLISH) broomrape; (ESTONIAN) soomukas; (FINNISH) loisio, nääve; (FRENCH) orobanche chevelue; (GERMAN) Pferdebohne Sommerwurz, Ackerbohne Sommerwurz; (GREEK) orovagchi; (HEBREW) 'aleket ḥaruka, aleket harutza; (HUNGARIAN) szádorgó; (ICELANDIC) ertusnikja; (ITALIAN) orobanche della fava; (LITHUANIAN) puošnioji džioveklė; (MACEDONIAN) sina kitka; (MALTESE) budebbus; (MONGOLIAN) guvshaakhai; (NEPALI) jhokara jhar; (NORWEGIAN) snylterot; (POLISH) zaraza; (PORTUGUESE) orobanca, rabo de raposa, erva toira; (ROMANIAN) lupolie verigel; (RUSSIAN) zaraziha; (SPANISH) jopo de las habas, orobanca; (TAJIKI) shumgiöh; (TURKISH) canavarotu, bostanbozan, muhteşem canavarotu; (VLAAMS) bremraap; (WELSH) orfanc.

53. Oxalidaceae

53.1. *Oxalis tuberosa* Molina

(EP) tubers; (P) C.

(ASSAMESE) tengeshi, sengeri; (CHINESE, MANDARIN) nan mei cu jiang cao; (CHINESE, WÚ) nan mei cu jiang cao; (CZECH) oka, šťavel hlíznatý; (DANISH) oka; (DUTCH) knolkloverzuring; (ENGLISH) oca, oka; (FINNISH) käenkaali; (FRENCH) oxalide tubéreuse, truffette acide; (GERMAN) Knollen-Sauerklee, Knolliger Sauerklee; (GREEK) oxalida; (HEBREW) ḥamziḥ ha-peka'ot; hamtzitz; (HUNGARIAN) gumós madársóska; (INDONESIAN) semanggig; (ITALIAN) acetosella tuberosa; (LITHUANIAN) gumbinis kiškiakopūstis; (MACEDONIAN) krtolesta krasatka; (MONGOLIAN) bultsuut isreg; (NEPALI) chari amilo; (NORWEGIAN) knollgaukesyre; (POLISH) szczawik bulwiasty; (PORTUGUESE) oca, azedinha; (QUECHUA, CUSCO) oca; (SPANISH) oca, huisisai, ibia, aleluya tuberosa; (TAJIKI) turshak; (TURKISH) yumrulu ekşi üçgül, tirtil, kuzu kulağı; (VLAAMS) oka.

54. Passifloraceae

54.1. *Passiflora biflora* Lam. (EP) shoots, young leaves, flowers; (P) C,R.

(ASSAMESE) khasia bael; (CHINESE, WÚ) xi fan lian; (CHINESE, YUE) xi fan lian; (CZECH) mučenka dvoukvětá; (DANISH) passionsblomst; (DUTCH) passiebloem; (ENGLISH) passion flower; (ESTONIAN) kannatuslill; (FRENCH) passiflore à deux fleurs, fleurs de la passion; (GERMAN) Passionsblume; (GREEK) passiflora; (HEBREW) sheonit; (HUNGARIAN) golgotavirág; (INDONESIAN) arjuno sosro, ketungken, bunga kupu-kupu; (ITALIAN) passiflora; (JOLA-FONYI) kuña ñãngol; (NEPALI) ghadi phool; (POLISH) męczennica; (PORTUGUESE) flor da paixão, chagas; (SERER-SINE) mété a koy; (SPANISH) passionaria, flor de la pasión; (TURKISH) çarkifelek, firildak çiçeği; (URDU) passion flower; (WÁRAY-WÁRAY) mirinda; (WOLOF) maribisab.

55. Pedaliaceae

55.1. *Sesamum radiatum* Schumacker (EP) young shoots; (P) C.

(AKAN-AKUAPEM) torotoro; (BAMANANKAN) nudeku; (BAOULÉ) fiandron; (BASSARI) ε-xóyí-kóyí, ngbocho, umpocho; (BUDIK) nyw-ywdy; (BULLOM SO) yenthe-pokan-de, bulko, bukole; (CHINESE, WÚ) xiang ma; (CHINESE, YUE) zhi ma; (CRIOULO, CAPE VERDE) tres-marias; (CZECH) sezam paprsčitý; (DAGBANI) salu; (DANGME-KROBO) zãpui; (ENGLISH) gogoro; (FULFULDE) gouboudo; (FULFULDE, ADAMAWA) noome baroo; (GA) oturo; (GOLA) dologbo, dombo; (GREEK) sousami; (HAUSA) kárkashíí, nomen-bàrééwáá, ríídín bàrééwáá; (HUNGARIAN) szezám; (IGBO) owalo ani, oke ahìhja, ódùm, orọ oji; (INDONESIAN) wijen; (JOLA-FONYI) béné; (KANURI) máráshi; (KISSI, NORTHERN) ninki, chanameyo; (KONKOMBA) baka; (KORO) gbínjò; (KURANKO) kabul, niñgi, ninja, niñke, ninta, ninki; (KRIO) beni-lif, buluko; (LOKO) tabulogo, taminogho; (MALIMBA) budelomo, bulugo; (MANDING-MANDINKA) ninkié, ndeku, udeku, benefing-jongo, beno, lo-nama, nama, ninkyé; (MENDE) tabuko, taugo, buko, daugo; (MÓORÉ) bunda; (PANJABI, EASTERN) til; (POLISH) sezam; (PORTUGUESE) sésamo selvagem, sésamo bravo; (PULAAR) dubulé, laka; (SPANISH) sésamo slavaje; (SUSU) lagai, laxai, salakhoe, selakhonyi, tilingi-na; (SWAHILI) ufuta; (TAJIKI) kunjid, simsim; (TEM) kuseru; (THEMNE) ka-buləko, ka-bunko, (TIV) ne; (VAI) buko, tabuka; (WAMEY) a-mbir; (WOLOF) bene, béné; (YALUNKA) lingi-na; (YORUBA) èkukù.

56. Phytolaccaceae

56.1. *Phytolacca acinosa* Roxb. (EP) leaves and young shoots;(P) C.

(ASSAMESE) jaiong; (CHINESE, WÚ) yin du shang lu; (CHINESE, YUE) shang lu; (CZECH) líčidlo; (DANISH) almondolig kermesbaer; (ENGLISH) Indian poke; (FRENCH) shanglu; (GREEK) phytolakka; (HINDI) matazor, sarangun; (HUNGARIAN) álkörmös; (ITALIAN) cremesina acinosa; (NEPALI) jaringo; (PANJABI, EASTERN) lubar, rinsag; (URDU) matazor; (VIETNAMESE) th[uw] [ow]ng l[u]jlc.

56.2. *Phytolacca americana* L. (EP) leaves and young shoots;(P) C.

(AFRIKAANS) karmosymbos; (CHICKASAW) koshibba'; (CHINESE, MANDARIN) yang shang lu; (CHINESE, YUE) mei guo shang lu; (CRIOULO, CAPE VERDE) uva-macaco; (CZECH) líčidlo americké; (DANISH) amerikansk kormesbaer; (DUTCH) Amerikaanse karmozijnbes, westerse karmozijnbes; (ENGLISH) poke salat, poke, pokeweed; (FRENCH) raisin d'Amérique, morelle à

Chapter 1

grappe; (GERMAN) Amerikanische Kermesbeere, gewöhnliche Kermesbeere; (HMONG DAW) kub nyuj; (HUNGARIAN) álkörmös; (ITALIAN) cremesina uva-turca, ura da colorare; (JAPANESE) yôshu-yama-gobô; (POLISH) szkarłatka amerykańska; (PORTUGUESE) fitolaca; (SPANISH) fitolaca, bledo carbonero, hierba carmin decandra; (TURKISH) Amerikan şekerçi, boyası Amerikan üzümü; (VIETNAMESE) th[uw][ow]ng l[u]jç.

56.3. *Phytolacca esculenta* Van Houtte (EP) leaves and young shoots; (P) C.

(CHINESE, MANDARIN) ke si shang lu; (CHINESE, WÚ) shan luo bo; (CHINESE, YUE) shang lu; (CZECH) ličidlo jedlé; (DANISH) almindelig kermesbaer; (ENGLISH) pokeweed; (ESTONIAN) kermesmari; (FRENCH) yama gobo; (ITALIAN) cremesina edule; (JAPANESE) yama gobô.

56.4. *Phytolacca octandra* L. (EP) leaves and young shoots; (P) C.

(CHINESE, YUE) ba rui shang lu; (CZECH) ličidlo; (ENGLISH) inkweed, dyeberry.

57. Plantaginaceae

57.1. *Plantago coronopus* L. var. *sativa* Fiori (EP) leaves; (P) R,C.

(AFRIKAANS) smalblaarplantago; (CHINESE, MANDARIN) chou ji zhuang che qian; (CHINESE, WÚ) chou ji zhuang che qian; (CHINESE, YUE) qian guan cao, che qian cao; (CZECH) jitrocel, jitrocel vraní nožka; (DANISH) fliget vejbred, hærtshørnvejbred; (DUTCH) hertshoornweegbree; (ENGLISH) buckhorn plantain; (FINNISH) liuskaratamo; (FRENCH) corne de cerf; (GAELIC, IRISH) adharca; (GERMAN) Hirschhorn-Salat, Krähenfuß-Wegerich, Schlitz-Wegerich; (GREEK) plantagos o koronopous; (HEBREW) leḥekh shasu'a, lechekh; (ITALIAN) coròno, corno di cervo; (MACEDONIAN) elenskorogoviden tegavec, pitom tegfavec; (MALTESE) salib l-art; (MONGOLIAN) tavan salaa; (NORWEGIAN) flikkjempe; (POLISH) babka lancetowata, babka; (PORTUGUESE) diabelha, estrela-mar, galapito, guiabelha; (ROMANIAN) patlagină; (RUSSIAN) padarozhnik; (SPANISH) estrellamar, cuerno de ciervo; (TAJIKI) bargi zulf; (TURKISH) geyik boynuzu, karga ayağı, parça yapraklı sinirotu, sinir out; (TURKMEN) elekli atgulak; (VLAAMS) hertshoornweegbree.

58. Polygonaceae

58.1. *Rheum rhabarbarum* L. (EP) petioles; (P) C.

(AFRIKAANS) rabarber; (ALEUT) senartok, sênâluk; (ARABIC) rawend zahar; (ARMENIAN) chandzil; (ASSAMESE) rhubarb; (BELARUSAN) reven; (BLACKFOOT) pokinssomo; (BULGARIAN) kădravolisten reven; (CATALAN-VALENCIAN-BALEAR) ruibarbre; (CHINESE, HAKKA) t'ái vông; (CHINESE, MANDARIN) tang da huang, ta huang; (CHINESE, WÚ) tang da huang; (CREE, PLAINS) sewipak; (CROATIAN) rabarbara; (CZECH) reveň, reveň rebarbora, raveň kadeřavá; (DAKOTA) iyoptaiyepizi, cañhdoḥuhu opemni ka'gapi; (DANISH) rabarber; (DUTCH) rabarber; (ENGLISH) rhubarb, pieplant; (ESTONIAN) rabarber, kurdlehine rabarber; (FARSI, EASTERN) rawâsh; (FARSI, WESTERN) reevand, reevase; (FILIPINO) rhubarb; (FINNISH) raparperi; (FRENCH) rhubarbe, rhapontic; (GAELIC, IRISH) biabhóg; (GAELIC, MANX) rubarb; (GAELIC, SCOTTISH) rùrab; (GEORGIAN) revandi; (GERMAN) Rhabarber, Rhapontic; (GREEK) rion, pion; (HEBREW) rabarber, ribbas ha-ginna; (HINDI) revand chini; (HINDUSTANI) rewand; (HUNGARIAN) rebarbara; (ICELANDIC) rabarbari; (INDONESIAN) rabarber, kalëmbak; (ITALIAN) rabarbaro, rapontico; (JAPANESE) rubaabu, kara daio; (KASHMIRI)

rumach; (KATI) radsâ; (KIRGHIZ) yškyn; (KWÉYÒL) wibab; (LATVIAN) parastais rabarbers, rabarbers; (LITHUANIAN) daržovinis rabarbaras, rabarbarai; (LUXENBOURGEOIS) Rubarb; (MACEDONIAN) reven, običen reven; (MADURA) talembak; (MALAY) rubab, kelebak; (MONGOLIAN) gishuune; (NEPALI) chulthe amilo; (NORWEGIAN) matrabarbra, rabarbra; (PASHTO, NORTHERN) renand, ranāsh; (POLISH) rabarbar ogrodowy, rabarbar, rzewień, rabarbar kedzierzany; (PORTUGUESE) ruibarbo, ruibardo hortense; (ROMANIAN) reven, reventul; (RUSSIAN) reven, reven'ogorodnyj; (SERBO-CROATIAN) rabarbara, rabarber, raved; (SLOVAK) rebarbora; (SLOVENIAN) rabarbara; (SORBIAN, UPPER) rjewjeń; (SPANISH) ruibarbo, rapóntico; (SWEDISH) rabarber; (TAGALOG) rhubarb, rubarbo; (TAJIKI) rebos; (TIBETAN) chūūcuu; (TURKISH) ravent, bahçe işgini; (UKRAINIAN) revin; (URDU) revand chini; (UZBEK) rovoch, rivož; (VIETNAMESE) cay dai hoang; (VLAAMS) rabarber; (WELSH) rhiwbob; (XHOSA) isityalo segadi ekutyiwa kuso isiqa xa siphekiweyo; (YIDDISH) rahbahrber.

58.2. *Rumex acetosa* L.

(EP) leaves; (P) R,C.

67.2. *Valerianella locusta* (L.) Laterrade

(EP) leaves; (P) R,C

(ARABIC) samma; (BELARUSAN) valerjanela malaja; (BRETON) valériane; (BULGARIAN) polska salata; (CATALAN-VALENCIAN-BALEAR) canonges; (CHINESE, MANDARIN) ye ju, yeh chü; (CHINESE, WÚ) ye ju; (CZECH) kozlíček polní, polniček; (DANISH) vårsalat; (DUTCH) veldsla; (ENGLISH) cornsalad, European corn-salad, field salad, lamb's lettuce; (ESTONIAN) põldkännak, valerian-palderjan; (FINNISH) vuononkaali; (FRENCH) doucette, valerianelle potagère, rampon, laitue de brevis, valériane petite, mâche; (GERMAN) Feldsalat, Ackersalat, gemeiner Feldsalat, Saat-Rapuenzchen, Mausohr; (GREEK) nardidion, valerianella; (HEBREW) valeryanit; (HINDI) mushakwali; (HUNGARIAN) galambbegy saláta; (ICELANDIC) vorsalat; (ITALIAN) raperonzolo, valerianella, saleggia, agnellino, dolcetta, gallinette; (JAPANESE) kohn salada, no-jisha; (LATVIAN) salātu baldriņš; (LITHUANIAN) salotinė sultenė; (MACEDONIAN) motovilec, obična motovilka; (NORWEGIAN) vårsalat; (POLISH) roszonek jadalna, ruszponka jadalna; (PORTUGUESE) alface de cordeiro, alface do campo; (ROMANIAN) fetică de grădină; (RUSSIAN) polevoj salat; (SERBO-CROATIAN) matovilac; (SLOVAK) valeriánka pol'ná; (SLOVENIAN) motovilec; (SPANISH) valeriana, valerianela, lechuga de campo, hierba de los canónigos; (SWEDISH) vårklynne, vintersallat; (TURKISH) adi kuzu gevreği, frenk salatasi; (UKRAINIAN) salat pol'ovij; (URDU) mushakwali; (VLAAMS) veldsla, gewone veldsla.

68. Violaceae

68.1. *Viola tricolor* L.

(EP) flowers and leaves; (P) R.

(AFRIKAANS) wilde gesiggie; (ALBANIAN, TOSK) menekshe stambolli; (ASSAMESE) viola; (BELARUSAN) fialka trechcolernaja; (CHINESE, WÚ) shan se jin; (CHINESE, YUE) san se jin; (CZECH) violka trojbarevná; (DANISH) stedmoderblomst; (DUTCH) driekleurig akkerviooltje, viooltje; (ENGLISH) Johnny-jump-up, violet, wild violet, wild pansy, heartsease; (ESTONIAN) kannike; (FINNISH) keto-orvokki; (FRENCH) violier, violette, violette tricolore, pensée sauvage; (GAELIC, IRISH) goirmín; (GERMAN) Veilchen, wildes Stiefmuetterchen, Dreifarbiges Stiefmütterchen; (GREEK) panses; (HEBREW) amnon vetamar, sigal telat goni; (HUNGARIAN) árvácska, háromszinü árvácska; (ICELANDIC) fjola; (ITALIAN) viola, viola tricolore, viola del pensiero, violetta; (KAZAKH) fialka anjutiny glazki; (LATVIAN) trejkrāsu vijolīte; (LITHUANIAN) trispalvė našlaitė; (MACEDONIAN) trobojna temjanuška; (MALTESE) pensieri; (MONGOLIAN) gurvān öngöt nil; (NORWEGIAN) stemorsblomst; (POLISH) fiolek trójbarwny, bratek trójbarwny; (PORTUGUESE) amor perfeito bravo, viola, violeta; (QUECHUA, CUSCO) juacallicma; (ROMANIAN) trei fratipatati; (RUSSIAN) fialka tryohtsvetnaja, anjutinyi glazki; (SERBO-CROATIAN) dan-i-noć, ljubica, trobojna; (SLOVAK) fialka trojfarebná; (SPANISH) viola, violeta, pensamiento silvestre; (STELLINGWERFS) vioelen, vioeltien; (SWEDISH) styvmorsviol; (TAJKI) bunafsha; (TURKISH) hercai menekşe; (URDU) banafsha surag; (VLAAMS) drickleurig viooltje; (WELSH) trilliw.

69. Vitaceae

69.1. *Cissus discolor* Blume

(EP) leaves, young shoots; (P) C.

(ASSAMESE) har ghunusa; (CHINESE, WÚ) qing zi ge; (DANISH) russervin, kænguruvín; (DUTCH) cissus; (ENGLISH) kangaroo vine; (FRENCH) liane aux voyageurs; (GERMAN) Australischer Wein, Känguruhwein; (GREEK) kissos; (ITALIAN) cissus; (JAVANESE) mirah, beubeureuman; (MADURA) rabet dara; (MARINDUQUE) mangangaria; (MONGOLIAN) tsisus; (POLISH) winobluszcz; (PORTUGUESE) cisso, vinha virgem; (SPANISH) cisos, parra virgen; (THAI) dattakua-thao, kham-daeng, lang-daeng; (TURKISH) frenk asmasi; (VIETNAMESE) h[oof] d[awf]ng hai m[af]u.

Chapter 2. Common names of the cultivated vegetable crops of the world, listed alphabetically

- a cu (17.1. AKHA)
 a⁻ cu ka naw[^] (40.43. LAHU)
 a dyeng (38.16. SERER-SINE)
 a dyeng (38.18. SERER-SINE)
 a⁻ hpa[^] meu (15.2. LAHU)
 a⁻ hpe[^] chaweh (62.1. LAHU)
 a⁻ hpe[^] fa[^] hk[']eh^v (62.5. LAHU)
 a⁻ hpe[^] g[']aw^v (23.1. LAHU)
 a⁻ hpe[^] g[']aw^v (23.2. LAHU)
 a⁻ hpe[^] tcuh⁻eh⁻ (62.5. LAHU)
 a⁻ hpeh^v bvuh[^] (38.7a. LAHU)
 a⁻ hpeh^v shi⁻ (38.13a. LAHU)
 a⁻ hpo[^] k[']o⁻ (38.20. LAHU)
 a lu⁻ shi⁻ (62.24. LAHU)
 a⁻ mo[^] k[']o⁻ (38.20. LAHU)
 a⁻ paw^v hpui ma (16.1a. LAHU)
 a teh hpui shi⁻ (38.1. LAHU)
 a[']a (40.30. SAMOAN)
 aaane manjal (20.4. TULU)
 aaathmaguptha (40.18. SANSKRIT)
 aachi chohku (27.16. JAPANESE)
 aachilkkilangu (11.1. MALAYALAM)
 aadagam (40.2. TAMIL)
 aadagi (40.2. TAMIL)
 aadhaki (40.2. MALAYALAM)
 aadhaki (40.2. SANSKRIT)
 aadhaki (40.2. TELUGU)
 aadi (20.6. FIJIAN)
 aadithyalu (30.51. TELUGU)
 aakaa? (16.1a. COMANCHE)
 aal (38.20. HINDI)
 aal vallikkizhangu (39.4. TAMIL)
 ààlàoko (11.7. YORUBA)
 aalivirai (30.51. TAMIL)
 aaloo (8.4. HINDI)
 aaloo (62.24. MARATHI)
 aalooGEDDE (62.24. KANNADA)
 aalooka (62.24. SANSKRIT)
 aalooki (8.4. SANSKRIT)
 aalu (62.24. NEPALI)
 aalu (62.24. PANJABI, EASTERN)
 aalu gaddalu (62.24. TELUGU)
 aamaada (20.4. HINDI)
 aamba haldi (20.4. KONKANI)
 aamlaardraka (11.6. SANSKRIT)
 aan touna (40.31. GOURMANTCHÉ)
 aanandam (20.1. TAMIL)
 aandilee (30.51. TELUGU)
 aane hullu (17.3. KANNADA)
 aankhle jhar (1.1. NEPALI)
 aanteelui (7.2. AFRIKAANS)
 aapneut (40.1. AFRIKAANS)
 aara root (15.2. MARATHI)
 aardaker (40.11. DUTCH)
 aardaker (40.11. VLAAMS)
 aardamandel (10.1. VLAAMS)
 aardappel (62.24. DUTCH)
 aardappel (62.24. VLAAMS)
 aardappelboon (40.22. VLAAMS)
 aardappelyam (11.2. VLAAMS)
 aardappelyam (11.6. VLAAMS)
 aardboontjie (40.1. AFRIKAANS)
 aardmandel (10.1. DUTCH)
 aardnoot (40.1. DUTCH)
 aardnoot (40.1. VLAAMS)
 aardnootje (40.1. DUTCH)
 aardpeer (27.26. DUTCH)
 aardpeer (27.26. VLAAMS)
 aardraka (20.6. KANNADA)
 aardrakah (20.6. SANSKRIT)
 aardrakamu (20.6. TELUGU)
 aardrashaka (20.6. SANSKRIT)
 aarjaka (44.4. SANSKRIT)
 aart (40.28. STELLINGWERFS)
 aartappel (62.24. AFRIKAANS)
 aartappeljam (11.2. AFRIKAANS)
 aarumaatha thandu (23.3. TAMIL)
 aarumatha-thandu (23.3. TAMIL)
 aashukachu (8.4. SANSKRIT)
 [aas]u n[uw][ows]c (64.3. VIETNAMESE)
 aba (8.1. IBANAG)
 aba (8.4. IBALOI)
 aba (8.4. ILOCANO)
 aba-aba (8.1. BONTOC, CENTRAL)
 ābāabūr⁻ (39.4. ANUAK)
 ābāabúré (39.4. ANUAK)
 a-babani (16.1a. BAGA)
 ababika (24.9. SANSKRIT)
 àbàchà (39.4. IGBO)
 abaga (38.27. GOURMANTCHÉ)
 abai (40.3. MARATHI)
 abai (40.4. MARATHI)

Chapter 2

- àbàjẹ (11.7. YORUBA)
abalong (8.4. CEBUANO)
a-bana (16.1a. THEMNE)
àbàná òfíá (11.2. IGBO)
àbàná òfíá baba (11.2. IGBO)
àbàná òfíá gbara (11.2. IGBO)
àbàná òfíá mbaba (11.2. IGBO)

abáŋgha (16.1a. IZON)
abāns (17.1. MARWARI)
abāns (17.2. MARWARI)
abāns (17.4. MARWARI)
abarè (40.9. TULU)
abat (16.1a. AGTA, CASIGURAN DUMAGAT)
abat (16.1a. GADDANG)
abat (16.1a. IFUGAO)
āb̄c (17.7. ANUAK)
a-boko (36.3. THEMNE)
abɔ̀ɔ (38.20. KRIO)
abɔ̀ɔdwobaa (36.3. TWI)
abdülleziz (10.1. TURKISH)
abe (40.29. BUHID)
abek (27.14. EWONDO)
abelmoskus (45.1. DANISH)
abema (45.4. GBE-VHE)
abéřẹ (27.8. YORUBA)
abéřẹ olóko (27.8. YORUBA)
abereka (16.1a. IGBO)
abereka mwọ (9.1. IGBO)
abəš (40.32. AMHARIC)
Abessijnse mosterd (30.3. VLAAMS)
abessinsk sennep (30.3. DANISH)
abesszin kel (30.3. HUNGARIAN)
abgesi (38.5. ÉWÉ)
àbí (11.7. IGBO)
abì rì ka (16.1a. IGBO)
abina (11.1. IGBO)
abir (8.1. TOK PISIN)
àbirika unèřè (16.1a. IGBO)
abisinska repka (30.3. MACEDONIAN)
a-bita-lif (27.24. THEMNE)
abja (48.1a. SANSKRIT)
ablazgo (16.1a. ÉWÉ)
ablazgo (16.1a. GBE-VHE)
ablao (11.2. PALAWANO, CENTRAL)
ablé (17.7. BAOULÈ)
abo (40.3. GUJARATI)
abo (40.4. GUJARATI)
abo (45.1. BAATONUM)
abo jaja (63.1. YORUBA)
aboboe (40.43. ÉWÉ)
abóbora almiscarada (38.17. PORTUGUESE)
abóbora carneira (38.20. PORTUGUESE)
abóbora chila (38.15. PORTUGUESE)
abóbora da Guiné (38.17. PORTUGUESE)
abóbora de água (38.1. PORTUGUESE)
abóbora de sequeiro porco (38.17. CRIOULO, CAPE VERDE)
abóbora gila (38.15. PORTUGUESE)
abóbora menina (38.14. PORTUGUESE)
abobora menina (38.16. PORTUGUESE)
abóbora moscata (38.17. PORTUGUESE)
abóbora porqueira (38.18. PORTUGUESE)
abóbora preta (38.17. PORTUGUESE)
abóbora serpente (38.29. PORTUGUESE)
abóbora serpente (38.30. PORTUGUESE)
aboborinha (38.18. PORTUGUESE)
aboborita (38.18. PORTUGUESE)
abok (38.3. BULU)
abok (38.14. BULU)
abok (38.16. BULU)
abok (38.16. EWONDO)
abok (38.17. BULU)
abok (38.17. EWONDO)
abok (38.18. BULU)
abolo (16.1a. LUO)
abolo (16.1b. LUO)
a-bonthila (23.3. THEMNE)
aborɔ̀fo sapo (38.22. TWI)
abore-ire (27.8. YORUBA)
abore-oloka (27.8. YORUBA)
a-boro (59.2. THEMNE)
aborobaą (19.1. TWI)
àbórrà (23.4. EDO)
aboyu (17.7. GONJA)
abqaake (40.32. AFAR)
abrɔ̀dwemaa (36.3. AKAN-AKUAPEM)
abrɔ̀fo-yisa (20.6. GBE-VHE)
abrika (16.1a. IGBO)
abrinō (40.1. YALA)
abrojo de água (64.3. SPANISH)
abua-luang (48.1a. THAI)
abubu ntɔ̀pe (43.1. AKAN-ASANTE)
abubu sa tawo (11.2. WÁRAY-WÁRAY)
àbũn (40.1. TIV)
ābũn (40.1. TIV)
abun ahi (40.1. TIV)
aburobia (9.1. AKAN-AKUAPEM)
aburobia (9.1. AKAN-ASANTE)

- aburobia (9.1. TWI)
 aburuma (7.3. SANGA)
 aburuma neḡera (7.10. SANGA)
 abva (40.4. GUJARATI)
 abvo (40.3. GUJARATI)
 a-bwɔ (27.14. THEMNE)
 ābʹy (17.7. ANUAK)
 Abyssinian mustard (30.3. ENGLISH)
 açafrao da Índia (20.2. PORTUGUESE)
 açafraon (20.2. CRIOULO, UPPER GUINEA)
 acanthopanax espinoso (26.4. SPANISH)

¹ There is often more than one scientific name (Latin binomial) used for a vegetable crop; these alternative names are considered synonyms. In some instances, the name that is currently used is not universally accepted. In addition, binomials are subject to change, especially with the increasing use of molecular genetics for assessing relatedness. As a consequence, synonyms can greatly complicate the identification of a species of interest. Since the common names are listed taxonomically in Chapter 1, having the correct scientific name is essential for finding a crop. This chapter lists synonyms for the scientific names of the vegetable crops in the text. The correct name is in bold, followed by a number that indicates the family and the specific crop within the family in Chapter 1 (e.g. 24.1. indicates the 24th family and the 1st crop). Each synonym is keyed back to the correct scientific name, which should be used to find the crop of interest.

Chapter 4a. Edible plant part utilized, listed by English common name

Young plants (aerial parts)

For additional information on plant parts consumed, see Chapter 1.

Alligator weed (23.1)
Chombujiggangi (30.49)¹
Common seepweed (35.10)
Deodeog (33.3)²
Kalimeris (27.28)
Marjoram (44.6)
Palm-grass (17.6)
Sessile alternanthera (23.2)

Shoots

Alfalfa (40.17)
Amaranthus (23.3)
American black nightshade (62.15)
Angelica (24.1)
Asparagus (13.2)
Bamboo shoots (17.1, 17.2, 17.4)
Barilla plant (35.7)
Bitter leaf (27.24)
Bottle gourd (38.20)³
Buffalo spinach (27.19)
Buko (41.1)
Broomrape (52.1)
Bur marigold (27.8)
Cape pondweed (25.1)
Cat's whiskers (34.2)
Ceylon spinach (28.1)
Chayote (38.25)³
Cockscomb (23.4)
Common comfrey (29.2)
Cosmos (27.12)
Edible chrysanthemum (27.23)
Elephant grass (17.3)
Euryale (50.1)³
Evening primrose (51.1)
False roselle (45.3)

Fenugreek (40.32)
Flameflower (59.4)
Fluted gourd (38.27)³
Galinsoga (27.22)
Gilo (62.14b)
Ginger (20.6)³
Gogoro (55.1)
Greater galangal (20.1)³
Hawksbeard velvetplant (27.14)
Hops (46.1)
Hydrocotyle (24.15)
Indian poke (56.1)
Inkweed (56.4)
Ivy gourd (38.4)³
Japanese angelica (24.2)
Japanese wild ginger (20.5)³
Jew's marrow (63.1)
Kangaroo vine (69.1)
Kipeit (47.1)⁴
Kudzu (40.30)³
Mallow (45.5)
Mango ginger (20.3)³
Meadow salsify (27.47)
New Zealand spinach (22.2)
Parrot's feather (42.1)
Passion flower (54.1)
Pea (40.28)³
Pea eggplant (62.23)³
Pointed gourd (38.31)³
Poke salat (56.2)
Pokeweed (56.3)
Prickly comfrey (29.3)
Salsola (35.8)
Sierra Leone bologi (27.13)
Snake gourd (38.29)³
Sow thistle (27.18)
Spikenard (26.2)
Summer cypress (35.2)
Summer savory (44.9)
Sunset hibiscus (45.2)
Tettu (21.1)

¹ Korean name

² Japanese name

³ Secondary use

⁴ Javanese name

⁵ Indonesian name

Chapter 4a

Wasabi (30.58)³
Water bamboo (17.8)
Water bitter leaf (27.44)
Water dropwort (24.17)
Water mimosa (40.19)
Water spinach (36.2)
Wild asparagus (13.1)
Wonderberry (62.21)³

Stems

Bamboo shoot mustard (30.5)
Celtuce (27.30)
Coastal glehnia (24.14)
Common seepweed (35.10)
Gemiferous mustard (30.8)
Kohlrabi (30.30)
Siberian ginseng (26.4)
Strumous mustard (30.18)
Swollen stem mustard (30.19)
Water bamboo (17.8)

Pseudostem

Kurrat (7.6)
Leek (7.8)
Shallot (7.2)
Welsh onion (7.5)

Leaves

Abyssinian mustard (30.3)
African eggplant (62.18)
African valerian (27.21)
Alfalfa (40.17)
Amaranthus (23.3)
American black nightshade (62.15)
Angelica (24.1)
Asiatic pennywort (24.7)
Aster (27.17)
Barilla plant (35.7)
Beet (35.4)
Bitter gourd (38.23)³
Black mustard (30.24)
Bottle gourd (38.20)³
Broad beaked mustard (30.38)
Buckhorn plantain (57.1)
Buffalo spinach (27.19)
Buko (41.1)
Bur marigold (27.8)

Capitata mustard (30.4)
Carrot (24.11)³
Cassava (39.4)³
Cat's whiskers (34.2)
Celeriac (24.5)³
Celery (24.4)³
Ceylon spinach (28.1)
Chammamul (24.22)¹
Chard (35.3)
Chaya (30.2, 39.1)
Chayote (38.25)³
Chervil (24.3)
Chicory (27.10a)
Chimapaya (27.4)¹
Chinese bellflower (34.3)
Chinese cabbage (30.40)
Chinese chive (7.13)
Chinese kale (30.25)
Chinese wolfberry (62.8)
Chive (7.11)
Coastal glehnia (24.14)
Cockscomb (23.4)
Common cabbage (30.27a)
Common comfrey (29.2)
Common sauropus (39.5)
Common seepweed (35.10)
Coriander (24.9)
Cornsalad (67.2)
Cosmos (27.12)
Croton (39.3)
Cuckoo-flower (30.44)
Cut leaf mustard (30.6)
Dandelion (27.45)
Dock (58.3)
Edible chrysanthemum (27.23)
Endive (27.9)
European pennyroyal (44.2)
Evening primrose (51.1)
False roselle (45.3)
Fennel (24.13)
Fenugreek (40.32)
Florence fennel (24.12) leaf base
Flower-like leaf mustard (30.16)
Fluted gourd (38.27)
French sorrel (58.4)
Garden cress (30.51)
Garden myrrh (24.16)
Garlic (7.10)³
Giant garlic (7.12)
Giant taro (8.1)³

- Godulbbaegi (27.48)¹
Golden apple (62.14a)
Gomchwi (27.34)¹
Good King Henry (35.5)
Great-headed garlic (7.1)³
Guasca (27.1)
Gynura (27.25)
Hastate-leaved pondweed (18.1)
Hawksbeard velvetplant (27.14)
Head lettuce (27.31)
Hill mustard (30.42)
Hoary basil (44.4)
Horseradish (30.1)³
Hydrocotyle (24.15)
Ice plant (22.1)
Indian lettuce (27.29)
Indian poke (56.1)
Inkweed (56.4)
Involute mustard (30.9)
Italian corn-salad (67.1)
Italian parsley (24.20)
Ivy gourd (38.4)³
Japanese angelica (24.2)
Japanese aralia (26.3)
Japanese garlic (7.7)
Japanese hornwort (24.10)
Japanese wild ginger (20.5)³
Jew's marrow (63.1)
Johnny-jump-up (68.1)
Kale (30.35)
Kalimeris (27.28)
Kangaroo vine (69.1)
Kipeit (47.1)⁴
Kudzu (40.30)³
Kumindelan (27.41)⁵
Kurrat (7.6)
Ladybell (33.1)
Large leaf mustard (30.17)
Leaf lettuce (27.32)
Leaf radish (30.55)
Leek (7.8)
Line mustard (30.12)
Long petiole mustard (30.13)
Longroot onion (7.14)³
Lotus root (48.1a)³
Mallow (45.5)
Marrow stem kale (30.32)
Mignonette (60.1)
Miner's lettuce (59.1)
Mock pak choy (30.37)
Mugwort (27.7)
Nasturtium (65.1)
New Zealand spinach (22.2)
Orach (35.1)
Oval-leaved pondweed (18.2)
Pak-choi (30.36)
Para cress (27.2)
Parsley (24.19)
Parsnip (24.18)³
Passion flower (54.1)
Perilla (44.7)
Pigeon pea (40.2)³
Pilea (66.1, 66.2)
Poke salat (56.2)
Pokeweed (56.3)
Prickly comfrey (29.3)
Prickly-pear (32.1)
Pualele (27.43)
Purslane (59.2)
Quinoa (35.6)
Rampion (33.2)³
Red cabbage (30.27b)
Redleaf chicory (27.10b)
Roquette salad (30.48)
Roselle (45.4)³
Rungia (21.2)
Rutabaga (30.22)³
Salsify (27.46)
Salsola (35.8)
Saururis (61.1)
Savoy cabbage (30.34)
Scolymus (27.36)³
Scorzonera (27.38)³
Sea kale (30.45)³
Sedum (37.1)
Shallot (7.2)
Shephard's purse (30.43)
Siberian ginseng (26.4)
Siberian kale (30.23)
Sierra Leone bologi (27.13)
Small leaf mustard (30.7)
Smooth loofah (38.22)³
Snake gourd (38.29)³
Sorrel (58.2)
Sow thistle (27.18, 27.27, 27.42)
Spearment (44.3)
Spinach (35.9)
Spinach mustard (30.39)
Spiny sow thistle (27.40)
Spot flower (27.3)

Chapter 4a

Spotted garden thistle (27.37)
Stinging nettle (66.3)
Summer savory (44.9)
Sunset hibiscus (45.2)
Sweet basil (44.5)
Sweetpotato (36.3)³
Swollen stem mustard (30.19)
Tannia (8.9)³
Tannier spinach (8.8)
Tartar bread-plant (30.46)
Taro (8.4)³
Tarragon (27.6)
Tettu (21.1)
Thousand-headed kale (30.33)
Tillered mustard (30.15)
Tronchuda (30.28)
Turfed stone leek (7.9b)
Turnip greens (30.41b)
Turnip-rooted parsley (24.21)³
Upland cress (30.2)
Vegetable fern (5.1)
Vegetable rape (30.21)
Wallrocket (30.47)
Water dropwort (24.17)
Water fern (4.1)
Water mimosa (40.19)
Water spinach (36.2)
Watercress (30.52)
Waterleaf (59.3)
Watershield (31.1)
Welsh onion (7.5)
White flowered mustard (30.11)
White mustard (30.57)
Wide petiole mustard (30.10)
Wild lettuce (27.33)
Winged bean (40.29)³
Wonderberry (62.21)
Yellow velvetleaf (14.1)

Petioles

Borage (29.1)
Butterbur (27.35)
Cardoon (27.15)
Celery (24.4)
Edible burdock (27.5)³
Giant elephant's ear (8.5)
Giant taro (8.1)³
Japanese farfugium (27.20)
Rhubarb (58.1)

Sea kale (30.45)
Tartar bread-plant (30.46)
Yellow velvetleaf (14.1)

Flower/inflorescence/flower stalk/spike

Banana inflorescence (16.1b)
Broccoli (30.31)
Broccoli raab (30.41c)
Cape pondweed (25.1)
Capper (34.1)
Cauliflower (30.26)
Chimapaya (27.4)¹
Chinese chive (7.13)
Chinese kale (30.25)
Day lily (13.3)
Globe artichoke (27.16)
Greater galangal (20.1)
Japanese wild ginger (20.5)³
Johnny-jump-up (68.1)
Nasturtium (65.1)³
Marjoram (44.6)
Mignonette (60.1)
Passion flower (54.1)
Peduncled mustard (30.20)
Spearmint (44.3)
Spot flower (27.3)
Sugarcane inflorescence (17.5)
Tronchuda (30.28)
Vegetable rape (30.21)
Water lily (50.2)
White mustard (30.57)
Yellow velvetleaf (14.1)

Immature seed pods

Asparagus pea (40.13)
Black gram (40.37)
Black-eyed pea (40.43)
Catjang (40.41)
Cluster bean (40.6)
Edible podded pea (40.27)
Fenugreek (40.32)
Grass pea (40.10)
Green bean (40.26)
Jicama (40.21)³
Lentil (40.12)
Marama bean (40.33)
Moth bean (40.35)
Mung bean (40.38)

Pigeon pea (40.2)
Potato bean (40.22)
Rat tail radish (30.53)
Scarlet runner bean (40.24)
Tepary bean (40.23)
Winged bean (40.29)
Yard-long bean (40.42)

Fruit

African eggplant (62.18)
African horned cucumber (38.12)
American black nightshade (62.15)
Angled loofah (38.21)
Armonian cucumber (38.10)
Bell pepper (62.1)
Bitter gourd (38.23)
Bonnet pepper (62.4)
Bottle gourd (38.20)
Buko (41.1)
Cantaloupe (38.7a)
Cape gooseberry (62.12)
Casabanana (38.26)
Cat's whiskers (34.2)
Cayenne pepper (62.2)
Chayote (38.25)
Citron (38.2)
Cucumber (38.13a)
Currant tomato (62.10)
Cyclanthera (38.19)
Eggplant (62.19)
Garden egg (62.17)
Golden apple (62.14a)
Hairy-fruited eggplant (62.16)
Indian nightshade (62.25)
Ivy gourd (38.4)
Japanese snake gourd (38.30)
Malabar gourd (38.15)
Mango melon (38.8)
Muskmelon (38.7b)
Musky pumpkin (38.17)
Naranjillo (62.22)
Okra (45.1)
Oriental pickling melon (38.9)
Pea eggplant (62.23)
Pepino (62.20)
Pickling cucumber (38.13b)
Plantain (16.1a)
Pointed gourd (38.31)
Prickly-pear (32.1)

Pumpkin (38.14)
Rocoto (62.6)
Scarlet eggplant (62.14c)
Small pepper (62.3)
Smooth loofah (38.22)
Snake gourd (38.29)
Squash melon (38.24)
Strawberry tomato (62.11)
Summer squash (38.18)
Tabasco pepper (62.5)
Tomatillo (62.13)
Tomato (62.9)
Tree tomato (62.7)
Watermelon (38.3)
Wax gourd (38.1)
West Indian gherkin (38.6)
White-seeded melon (38.5)
Winter melon (38.11)
Winter squash (38.16)
Wonderberry (62.21)

Seed

For details on seed maturity, see Chapter 1.

Adzuki bean (40.36)
African yam bean (40.31)³
Alfalfa (40.17) sprouts
Amaranthus (23.3) sprouts
Asian water chestnut (64.1)
Bambara groundnut (40.39)
Black gram (40.37)
Black-eyed pea (40.43)
Broad bean (40.34a)
Catjang (40.41)
Cluster bean (40.6)
Coriander (24.9)
Euryale (50.1)
Fluted gourd (38.27)
Garbanzo bean (40.5)
Garden myrrh (24.16)³
Grass pea (40.10)
Green bean (40.26)
Horse gram (40.16)
Horseradish (30.1) sprouts³
Hyacinth bean (40.9)
Jack bean (40.3)
Jicama (40.21)³
Kersting's groundnut (40.15)
Lentil (40.12) and sprouts³

Chapter 4a

Lima bean (40.25)
Lotus seed (48.1b)
Lupin (40.14)
Manchurian spikenard (26.1) sprouts³
Moth bean (40.35)
Mung bean (40.38) and sprouts
Oyster nut (38.28)
Pea (40.28)
Peanut (40.1)
Perilla (44.7)³
Pigeon bean (40.34b)
Pumpkin (38.14)³
Rice bean (40.40)
Scarlet runner bean (40.24)
Singhara nut (64.2)
Soybean (40.8.) sprouts
Sweet corn (17.7)
Sword bean (40.4)
Tepary bean (40.23)
Velvet bean (40.18)
Water chestnut (64.3)
Water lily (50.2)³
Watermelon (38.3)³
White-seeded melon (38.5)
Winged bean (40.29)
Winter squash (38.16)³
Yard-long bean (40.42)

Roots

Arracacha (24.6.)
Beet (35.4)
Carrot (24.11)
Cassava (39.4)
Celeriac (24.5)
Chinese radish (30.54)
Coastal glehnia (24.14)
Dandelion (27.45)³
Edible burdock (27.5)
Euryale (50.1)³
Garden myrrh (24.16)³
Gobouazami (27.11)¹
Godulbbaegi (27.48)¹
Horseradish (30.1)
Jicama (40.21)
Kudzu (40.30)
Ladybell (33.1)
Maca (30.50)

Marama bean (40.33)³
Meadow salsify (27.47)
Parsnip (24.18)
Potato bean (40.22)
Radish (30.56)
Rampion (33.2)
Rose glorybind (36.1)
Rutabaga (30.22)
Salsify (27.46)
Scolymus (27.36)
Scorzonera (27.38)
Skirret (24.23)
Sweetpotato (36.3)
Tartar bread-plant (30.46)³
Tettu (21.1)³
Tuberous chervil (24.8)
Tuberous-rooted mustard (30.14)
Turnip (30.41a)
Turnip-rooted parsley (24.21)
Winged bean (40.29)³
Yacon (27.39)
Yam bean (40.20)

Tubers

African yam bean (40.31)
Bitter yam (11.4)
Chinese yam (11.6)
Chufa (10.1)
Country potato (44.8)
Cush-cush yam (11.8)
Earth chestnut (40.11)
False yam (43.1)
Flemingia (40.7)
Hausa potato (44.10)
Japanese artichoke (44.11)
Jerusalem artichoke (27.26)
Lesser yam (11.5)
Mauka (49.1)
Oca (53.1)
Potato (62.24)
Potato yam (11.2)
Topee (15.1)
Tuberous nasturtium (65.2)
Ulluco (28.2)
Water yam (11.1)
White Guinea yam (11.7)
Yellow yam (11.3)

Corms

Arrowhead (6.2)
Chinese arrowhead (6.1)
Chinese water chestnut (10.2)
Elephant yam (8.3)
Gallan (8.7)
Giant swamp taro (8.6)
Giant taro (8.1)
Indian kale (8.10)
Konjac (8.2)
Tannia (8.9)
Taro (8.4)
Wild water chestnut (10.3)

Bulbs

Garlic (7.10)
Giant garlic (7.12)
Great-headed garlic (7.1)
Lily (13.4)
Longroot onion (7.14)
Maravilla bulb (12.1)
Onion (7.3)
Rakkyo (7.4)
Tree onion (7.9a)
Tuffed hyacinth (13.5)

Rhizomes

Deodeog (33.3)¹
East Indian arrowroot (19.1)
Edible canna (9.1)
Ginger (20.6)
Greater galangal (20.1)³
Japanese wild ginger (20.5)
Long zedoary (20.4)
Lotus root (48.1a)
Mango ginger (20.3)
Shiny bugleweed (44.1)
Turmeric (20.2)
Wasabi (30.58)
Water lily (50.2)
West Indian arrowroot (15.2)

Miscellaneous structures

Asiatic pennywort (24.7) stolon³
Bracken (2.1) immature fronds
Brussels sprouts (30.29) axillary buds
Cinnamon fern (3.1) immature fronds
Gemiferous mustard (30.8) axillary bud
Horsetail (1.1) young strobili
Japanese flowering fern (3.2) immature frond
Roselle (45.4) calyx
Sweet corn (17.7) immature cob with seed

Chapter 4b. Edible part utilized, listed by abbreviated scientific name

Young plants (aerial parts)

For additional details on the plant part consumed, see Chapter 1.

Alternanthera philoxeroides (23.1)
Alternanthera sessilis (23.2)
Codonopsis lanceolata (33.3)
Erysimum amurense (30.49)¹
Kalimeris yomena (27.28)
Origanum vulgare (44.6)
Setaria palmifolia (17.6)
Suaeda glauca (35.10)

Shoots

Abelmoschus manihot (45.2)
Alpinia galanga (20.1)¹
Amaranthus spp. (23.3)
Angelica archangelica (24.1)
Angelica keiskei (24.2)
Aponogeton distachyos (25.1)
Aralia cordata (26.2)
Asparagus acutifolius (13.1)
Asparagus officinalis (13.2)
Bambusa spp. (17.1)
Basella alba (28.1)
Bassia scoparia (35.2)
Bidens pilosa (27.8)
Celosia spp. (23.4)
Cissus discolor (69.1)
Cleome gynandra (34.2)
Coccinia grandis (38.4)¹
Corchorus olitorius (63.1)
Cosmos caudatus (27.12)
Crassocephalum bicafrae (27.13)
Crassocephalum crepidioides (27.14)
Curcuma mangga (20.3)¹
Dendrocalamus spp. (17.2)
Emilia sonchifolia (27.18)
Enydra fluctuans (27.19)
Euryale ferox (50.1)¹
Galinsoga parviflora (27.22)

Glebionis coronarium (27.23)
Gnetum gnemon (41.1)
Gymnanthemum amygdalinum (27.24)
Hibiscus acetosella (45.3)
Humulus lupulus (46.1)
Hydrocotyle sibthorpioides (24.15)
Ipomoea aquatica (36.2)
Justicia insularis (21.1)
Lagenaria siceraria (38.20)¹
Maesa latifolia (47.1)
Malva rotundifolia (45.5)
Medicago sativa subsp. *sativa* (40.17)
Myriophyllum aquaticum (42.1)
Neptunia prostrata (40.19)
Oenanthe javanica subsp. *javanica* (24.17)
Oenothera biennis (51.1)
Orobanche crenata (52.1)
Passiflora biflora (54.1)
Pennisetum purpureum (17.3)
Phyllostachys spp. (17.4)
Phytolacca acinosa (56.1)
Phytolacca americana (56.2)
Phytolacca esculenta (56.3)
Phytolacca octandra (56.4)
Pisum sativum subsp. *sativum* var. *sativum* (40.28)¹
Pueraria montana var. *lobata* (40.30)¹
Salsola komarovii (35.7)
Salsola soda (35.8)
Satureja hortensis (44.9)
Sechium edule (38.25)¹
Sesamum radiatum (55.1)
Solanum aethiopicum (62.14)
Solanum americanum (62.15)
Solanum nigrum (62.21)¹
Solanum torvum (62.23)¹
Struchium sparganophorum (27.44)
Symphytum officinale (29.2)
Symphytum × *uplandicum* (29.3)
Talinum paniculatum (59.4)
Telfairia occidentalis (38.27)¹
Tetragonia tetragoniodes (22.2)
Tragopogon pratensis (27.47)

¹ Secondary use

Chapter 4b

Trichosanthes cucumerina (38.29)¹
Trichosanthes dioica (38.31)¹
Trigonella foenum-graecum (40.32)
Wasabia japonica (30.58)¹
Zingiber mioga (20.5)¹
Zingiber officinale (20.6)¹
Zizania latifolia (17.8)

Stems

Brassica juncea var. *crassicaulis* (30.5)
Brassica juncea var. *gemmifera* (30.8)
Brassica juncea var. *strumata* (30.18)
Brassica juncea var. *tumida* (30.19)
Brassica oleracea var. *gongyloides* (30.30)
Eleutherococcus senticosus (26.4)
Glehnia littoralis (24.14)
Lactuca sativa var. *angustana* (27.30)
Suaeda glauca (35.10)
Zizania latifolia (17.8)

Pseudostem

Allium cepa var. *aggregatum* (7.2)
Allium fistulosum (7.5)
Allium kurrat (7.6)
Allium porrum (7.8)

Leaves

Abelmoschus manihot (45.2)
Acmella ciliata (27.1)
Acmella paniculata (27.3)
Acmella uliginosa (27.4)
Adenophora triphylla (33.1)
Allium ampeloprasum var. *ampeloprasum* (7.1)¹
Allium cepa var. *aggregatum* (7.2)
Allium fistulosum (7.5)
Allium kurrat (7.6)
Allium macrostemon (7.7)
Allium porrum (7.8)
Allium × *proliferum* (7.9)
Allium sativum (7.10)¹
Allium schoenoprasum (7.11)
Allium scorodoprasum (7.12)
Allium tuberosum (7.13)
Allium victorialis (7.14)¹
Alocasia macrorrhizos (8.1)¹
Amaranthus spp. (23.3)
Angelica archangelica (24.1)

Angelica keiskei (24.2)
Anthriscus cerefolium (24.3)
Apium graveolens var. *dulce* (24.4)¹
Apium graveolens var. *rapaceum* (24.5)¹
Aralia elata (26.3)
Armoracia rusticana (30.1)¹
Artemisia dracunculus (27.6)
Artemisia indica var. *maximowiczii* (27.7)
Atriplex hortensis (35.1)
Barbarea verna (30.2)
Basella alba (28.1)
Beta vulgaris Cicla group (35.3)
Beta vulgaris Crassa group (35.4)
Bidens pilosa (27.8)
Brasenia schreberi (31.1)
Brassica carinata (30.3)
Brassica juncea var. *capitata* (30.4)
Brassica juncea var. *crispifolia* (30.6)
Brassica juncea var. *foliosa* (30.7)
Brassica juncea var. *involuta* (30.9)
Brassica juncea var. *latipa* (30.10)
Brassica juncea var. *leucanthus* (30.11)
Brassica juncea var. *linearifolia* (30.12)
Brassica juncea var. *longepetiolata* (30.13)
Brassica juncea var. *multiceps* (30.15)
Brassica juncea var. *mutisecta* (30.16)
Brassica juncea var. *rugosa* (30.17)
Brassica juncea var. *tumida* (30.19)
Brassica napus var. *napobrassica* (30.22)¹
Brassica napus var. *napus* (30.21)
Brassica napus var. *pabularia* (30.23)
Brassica nigra (30.24)
Brassica oleracea var. *alboglabra* (30.25)
Brassica oleracea var. *capitata* (30.27)
Brassica oleracea var. *costata* (30.28)
Brassica oleracea var. *medullosa* (30.32)
Brassica oleracea var. *ramosa* (30.33)
Brassica oleracea var. *sabauda* (30.34)
Brassica oleracea var. *viridis* (30.35)
Brassica rapa subsp. *chinensis* (30.36)
Brassica rapa subsp. *chinensis* var. *parachinensis* (30.37)
Brassica rapa subsp. *narinosa* (30.38)
Brassica rapa subsp. *nipposinica* var. *perviridis* (30.39)
Brassica rapa subsp. *pekinensis* (30.40)
Brassica rapa subsp. *rapa* (30.41)
Bunias orientalis (30.42)
Cajanus cajan (40.2)¹
Campanula rapunculus (33.2)¹

Edible part utilized, listed by abbreviated scientific name

- Capsella bursa-pastoris* (30.43)
Cardamine pratensis (30.44)
Celosia spp. (23.4)
Centella asiatica (24.7)
Ceratopteris thalictroides (4.1)
Chenopodium bonus-henricus (35.5)
Chenopodium quinoa subsp. *quinoa* (35.6)
Cichorium endivia subsp. *endivia* (27.9)
Cichorium intybus (27.10)
Cissus discolor (69.1)
Cleome gynandra (34.2)
Cnidioscolus aconitifolius (39.1)
Cnidioscolus chayamansa (39.2)
Coccinia grandis (38.4)¹
Codiaeum variegatum (39.3)
Colocasia esculenta (8.4)¹
Corchorus olitorius (63.1)
Coriandrum sativum (24.9)
Cosmos caudatus (27.12)
Crambe maritima (30.45)¹
Crassocephalum bialfrae (27.13)
Crassocephalum crepidioides (27.14)
Cryptotaenia japonica (24.10)
Daucus carota subsp. *sativus* (24.11)¹
Diplazium esculentum (5.1)
Diplotaxis muralis (30.47)
Doellingeria scabra (27.17)
Eleutherococcus senticosus (26.4)
Emilia sonchifolia (27.18)
Enydra fluctuans (27.19)
Eruca sativa (30.48)
Fedia cornucopiae (27.21)
Foeniculum vulgare subsp. *vulgare* var. *azoricum* (24.12)
Foeniculum vulgare subsp. *vulgare* var. *dulce* (24.13)
Glebionis coronarium (27.23)
Glehnia littoralis (24.14)
Gnetum gnemon (41.1)
Gynura bicolor (27.25)
Hibiscus acetosella (45.3)
Hibiscus sabdariffa (45.4)¹
Houttuynia cordata (61.1)
Hydrocotyle sibthorpioides (24.15)
Ipomoea aquatica (36.2)
Ipomoea batatas var. *batatas* (36.3)¹
Ixeridium dentatum (27.27)
Justicia insularis (21.1)
Kalimeris yomena (27.28)
Lactuca indica (27.29)
Lactuca sativa var. *capitata* (27.31)
Lactuca sativa var. *longifolia* (27.32)
Lagenaria siceraria (38.20)¹
Launaea taraxacifolia (27.33)
Lepidium sativum (30.51)
Ligularia fischeri (27.34)
Limnocharis flava (14.1)
Luffa aegyptiaca (38.22)
Lycium chinense (62.8)
Maesa latifolia (47.1)
Malva rotundifolia (45.5)
Manihot esculenta subsp. *esculenta* (39.4)¹
Medicago sativa subsp. *sativa* (40.17)
Mentha pulegium (44.2)
Mentha spicata (44.3)
Mesembryanthemum crystallinum (22.1)
Momordica charantia (38.23)¹
Monochoria hastata Solms (18.1)
Monochoria vaginalis (18.2)
Montia perfoliata (59.1)
Myrrhis odorata (24.16)
Nasturtium officinale (30.52)
Nelumbo nucifera (48.1)¹
Neptunia prostrata (40.19)
Ocimum americanum (44.4)
Ocimum basilicum (44.5)
Oenanthe javanica subsp. *javanica* (24.17)
Oenothera biennis (51.1)
Opuntia ficus-indica (32.1)
Passiflora biflora (54.1)
Pastinaca sativa (24.18)¹
Perilla frutescens var. *crispa* (44.7)
Petroselinum crispum var. *crispum* (24.19)
Petroselinum crispum var. *neapolitanum* (24.20)
Petroselinum crispum var. *tuberosum* (24.21)¹
Phytolacca acinosa (56.1)
Phytolacca americana (56.2)
Phytolacca esculenta (56.3)
Phytolacca octandra (56.4)
Pilea glaberrima (66.1)
Pilea melastomoides (66.2)
Pimpinella brachycarpa (24.22)
Plantago coronopus var. *sativa* (57.1)
Platycodon grandiflorus (34.3)
Portulaca oleracea (59.2)
Psophocarpus tetragonolobus (40.29)¹
Pueraria montana var. *lobata* (40.30)¹
Raphanus sativus Oleiformis group (30.55)
Reseda odorata (60.1)
Rumex acetosa (58.2)

Chapter 4b

Rumex patientia (58.3)
Rumex scutatus (58.4)
Rungia klossii (21.2)
Salsola komarovii (35.7)
Salsola soda (35.8)
Satureja hortensis (44.9)
Sauropus androgynus (39.5)
Scolymus hispanicus (27.36)¹
Scolymus maculatus (27.37)
Scorzonera hispanica (27.38)¹
Secchium edule (38.25)¹
Sedum sarmentosum (37.1)
Sinapis alba (30.57)
Solanum aethiopicum (62.14)
Solanum americanum (62.15)
Solanum macrocarpon (62.18)
Solanum nigrum (62.21)
Sonchus asper (27.40)
Sonchus malaianus (27.41)
Sonchus oleraceus (27.42)
Sonchus wightianus (27.43)
Spinacia oleracea (35.9)
Suaeda glauca (35.10)
Symphytum officinale (29.2)
Symphytum × *uplandicum* (29.3)
Talinum fruticosum (59.3)
Taraxacum officinale (27.45)
Telfairia occidentalis (38.27)
Tetragonia tetragonioides (22.2)
Tragopogon porrifolius (27.46)
Trichosanthes cucumerina (38.29)¹
Trigonella foenum-graecum (40.32)
Tropaeolum majus (65.1)
Urtica dioica (66.3)
Valerianella eriocarpa (67.1)
Valerianella locusta (67.2)
Viola tricolor (68.1)
Xanthosoma brasiliense (8.8)
Xanthosoma sagittifolium (8.9)¹
Youngia sonchifolia (27.48)
Zingiber mioga (20.5)¹

Petioles

Alocasia macrorrhizos (8.1)¹
Apium graveolens var. *dulce* (24.4)
Arctium lappa (27.5)¹
Borago officinalis (29.1)
Colocasia gigantea (8.5)
Crambe maritima (30.45)

Cynara cardunculus subsp. *cardunculus* (27.15)
Farfugium japonicum (27.20)
Limnocharis flava (14.1)
Petasites japonicus (27.35)
Rheum rhabarbarum (58.1)

Flower/inflorescence/flower stalk/spike

Acmella paniculata (27.3)
Acmella uliginosa (27.4)
Allium tuberosum (7.13)
Alpinia galanga (20.1)
Aponogeton distachyos (25.1)
Brassica juncea var. *utilis* (30.20)
Brassica napus var. *napus* (30.21)
Brassica oleracea var. *alboglabra* (30.25)
Brassica oleracea var. *botrytis* (30.26)
Brassica oleracea var. *costata* (30.28)
Brassica oleracea var. *italica* (30.31)
Brassica rapa subsp. *rapa* (30.41)
Capparis spinosa (34.1)
Cynara cardunculus (27.16)
Hemerocallis spp. (13.3)
Limnocharis flava (14.1)
Mentha spicata (44.3)
Musa × *paradisiaca* var. *paradisiaca* (16.1)
Nymphaea nouchali (50.2)
Origanum vulgare (44.6)
Passiflora biflora (54.1)
Reseda odorata (60.1)
Saccharum edule (17.5)
Sinapis alba (30.57)
Tropaeolum majus (65.1)¹
Viola tricolor (68.1)
Zingiber mioga (20.5)¹

Immature seed pods

Cajanus cajan (40.2)
Cyamopsis tetragonoloba (40.6)
Lathyrus sativus (40.10)
Lens culinaris (40.12)
Lotus tetragonolobus (40.13)
Pachyrhizus erosus (40.21)¹
Pachyrhizus tuberosus (40.22)
Phaseolus acutifolius var. *acutifolius* (40.23)
Phaseolus coccineus (40.24)
Phaseolus vulgaris var. *vulgaris* (40.26)
Pisum sativum subsp. *sativum* var. *macrocarpon* (40.27)

Psophocarpus tetragonolobus (40.29)
Raphanus sativus Caudatus group (30.53)
Trigonella foenum-graecum (40.32)
Tylosema esculentum (40.33)
Vigna aconitifolia (40.35)
Vigna mungo var. *mungo* (40.37)
Vigna radiata var. *radiata* (40.38)
Vigna unguiculata subsp. *cylindrica* (40.41)
Vigna unguiculata subsp. *sesquipedalis* (40.42)
Vigna unguiculata subsp. *unguiculata* (40.43)

Fruit

Abelmoschus esculentus (45.1)
Benincasa hispida (38.1)
Capsicum annuum var. *annuum* (62.1)
Capsicum annuum var. *longum* Bailey (62.2)
Capsicum baccatum var. *baccatum* (62.3)
Capsicum chinense (62.4)
Capsicum frutescens (62.5)
Capsicum pubescens (62.6)
Citrullus lanatus var. *citroides* (38.2)
Citrullus lanatus var. *lanatus* (38.3)
Cleome gynandra (34.2)
Coccinia grandis Voigt (38.4)
Cucumeropsis mannii Naudin (38.5)
Cucumis anguria var. *anguria* (38.6)
Cucumis melo subsp. *melo* var. *cantalupensis* (38.7)
Cucumis melo subsp. *melo* var. *chito* (38.8)
Cucumis melo subsp. *melo* var. *conomon* (38.9)
Cucumis melo subsp. *melo* var. *flexuosus* (38.10)
Cucumis melo subsp. *melo* var. *inodorus* (38.11)
Cucumis metuliferus (38.12)
Cucumis sativus (38.13)
Cucurbita argyrosperma (38.14)
Cucurbita ficifolia (38.15)
Cucurbita maxima (38.16)
Cucurbita moschata (38.17)
Cucurbita pepo (38.18)
Cyclanthera pedata (38.19)
Cyphomandra betacea (62.7)
Gnetum gnemon (41.1)
Lagenaria siceraria (38.20)
Luffa acutangula (38.21)
Luffa aegyptiaca (38.22)
Lycopersicon esculentum var. *esculentum* (62.9)
Lycopersicon pimpinellifolium (62.10)
Momordica charantia (38.23)
Musa × *paradisica* var. *paradisica* (16.1)

Opuntia ficus-indica (32.1)
Physalis alkekengi (62.11)
Physalis peruviana (62.12)
Physalis philadelphica (62.13)
Praecitrullus fistulosus (38.24)
Sechium edule (38.25)
Sicana odorifera (38.26)
Solanum aethiopicum (62.14)
Solanum americanum (62.15)
Solanum ferox (62.16)
Solanum incanum (62.17)
Solanum macrocarpon (62.18)
Solanum melongena (62.19)
Solanum muricatum (62.20)
Solanum nigrum (62.21)
Solanum quitoense (62.22)
Solanum torvum (62.23)
Solanum violaceum (62.25)
Trichosanthes cucumerina (38.29)
Trichosanthes cucumeroides (38.30)
Trichosanthes dioica (38.31)

Seed

Amaranthus spp. (23.3)
Arachis hypogaea (40.1)
Aralia continentalis (26.1)
Armoracia rusticana (30.1)¹
Canavalia ensiformis (40.3)
Canavalia gladiata (40.4)
Cicer arietinum (40.5)
Citrullus lanatus var. *lanatus* (38.3)¹
Coriandrum sativum (24.9)
Cucumeropsis mannii (38.5)
Cucurbita argyrosperma (38.14)¹
Cucurbita maxima (38.16)¹
Cyamopsis tetragonoloba (40.6)
Euryale ferox (50.1)
Glycine max (40.8.)
Lablab purpureus (40.9)
Lathyrus sativus (40.10)
Lens culinaris (40.12)
Lupinus spp. (40.14)
Macrotyloma geocarpum (40.15)
Macrotyloma uniflorum (40.16)
Medicago sativa subsp. *sativa* (40.17)
Mucuna pruriens var. *utilis* (40.18)
Myrrhis odorata (24.16)¹
Nelumbo nucifera (48.1)
Nymphaea nouchali (50.2)¹

Chapter 4b

Pachyrhizus erosus (40.21)¹
Perilla frutescens var. *crispa* (44.7)¹
Phaseolus acutifolius var. *acutifolius* (40.23)
Phaseolus coccineus (40.24)
Phaseolus lunatus (40.25)
Phaseolus vulgaris var. *vulgaris* (40.26)
Pisum sativum subsp. *sativum* var. *sativum*
(40.28)
Psophocarpus tetragonolobus (40.29)
Sphenostylis stenocarpa (40.31)¹
Telfairia occidentalis (38.27)
Telfairia pedata (38.28)
Trapa bicornis (64.1)
Trapa natans var. *bispinosa* (64.2)
Trapa natans var. *natans* (64.3)
Vicia faba (40.34)
Vigna aconitifolia (40.35)
Vigna angularis (40.36)
Vigna mungo var. *mungo* (40.37)
Vigna radiata var. *radiata* (40.38)
Vigna subterranea (40.39)
Vigna umbellata (40.40)
Vigna unguiculata subsp. *cylindrica* (40.41)
Vigna unguiculata subsp. *sesquipedalis* (40.42)
Vigna unguiculata subsp. *unguiculata* (40.43)
Zea mays subsp. *mays* (17.7)

Roots

Adenophora triphylla (33.1)
Apium graveolens var. *rapaceum* (24.5)
Arctium lappa (27.5)
Armoracia rusticana (30.1)
Arracacia xanthorrhiza (24.6.)
Beta vulgaris Crassa group (35.4)
Brassica juncea var. *megarrhiza* (30.14)
Brassica napus var. *napobrassica* (30.22)
Brassica rapa subsp. *rapa* (30.41)
Campanula rapunculus (33.2)
Chaerophyllum bulbosum (24.8)
Cirsium dipsacolepis (27.11)
Convolvulus japonicus (36.1)
Crambe tatarica (30.46)¹
Daucus carota subsp. *sativus* (24.11)
Euryale ferox (50.1)¹
Glehnia littoralis (24.14)
Ipomoea batatas var. *batatas* (36.3)
Justicia insularis (21.1)¹

Lepidium meyenii (30.50)
Manihot esculenta subsp. *esculenta* (39.4)
Myrrhis odorata (24.16)¹
Pachyrhizus ahipa (40.20)
Pachyrhizus erosus (40.21)
Pachyrhizus tuberosus (40.22)
Pastinaca sativa (24.18)
Petroselinum crispum var. *tuberosum* (24.21)
Psophocarpus tetragonolobus (40.29)¹
Pueraria montana var. *lobata* (40.30)
Raphanus sativus Dakion group (30.54)
Raphanus sativus Radicula group (30.56)
Scolymus hispanicus (27.36)
Scorzonera hispanica (27.38)
Sium sisarum (24.23)
Smallanthus sonchifolius (27.39)
Taraxacum officinale (27.45)¹
Tragopogon porrifolius (27.46)
Tragopogon pratensis (27.47)
Tylosema esculentum (40.33)¹
Youngia sonchifolia (27.48)

Tubers

Calathea allouia (15.1)
Cyperus esculentus (10.1)
Dioscorea alata (11.1)
Dioscorea bulbifera (11.2)
Dioscorea cayenensis (11.3)
Dioscorea dumetorum (11.4)
Dioscorea esculenta (11.5)
Dioscorea oppositifolia (11.6)
Dioscorea rotundata (11.7)
Dioscorea trifida (11.8)
Flemingia vestita (40.7)
Helianthus tuberosus (27.26)
Icacina oliviformis (43.1)
Lathyrus tuberosus (40.11)
Mirabilis expansa (49.1)
Oxalis tuberosa (53.1)
Plectranthus esculentus (44.8)
Solenostemon rotundifolius (44.10)
Solanum tuberosum (62.24)
Sphenostylis stenocarpa (40.31)
Stachys affinis (44.11)
Tropaeolum tuberosum (65.2)
Ullucus tuberosus (28.2)

Corms

Alocasia macrorrhizos (8.1)
Amorphophallus konjac (8.2)
Amorphophallus paeoniifolius var.
campanulatus (8.3)
Colocasia esculenta (8.4)
Cyrtosperma chamissonis (8.6)
Cyrtosperma merkusii (8.7)
Eleocharis dulcis (10.2)
Eleocharis kuroguwai (10.3)
Sagittaria sagittifolia subsp. *leucopetala* (6.1)
Sagittaria sagittifolia subsp. *sagittifolia* (6.2)
Xanthosoma sagittifolium (8.9)
Xanthosoma violaceum (8.10)

Bulbs

Allium ampeloprasum var. *ampeloprasum* (7.1)
Allium cepa var. *cepa* (7.3)
Allium chinense (7.4)
Allium × *proliferum* (7.9)
Allium sativum (7.10)
Allium scorodoprasum (7.12)
Allium victorialis (7.14)
Lilium spp. (13.4)
Muscari comosum (13.5)
Tigridia pavonia (12.1)

Rhizomes

Alpinia galanga (20.1)¹
Canna indica (9.1)
Codonopsis lanceolata (33.3)
Curcuma longa (20.2)
Curcuma mangga (20.3)
Curcuma zedoaria (20.4)
Lycopus lucidus (44.1)
Maranta arundinacea (15.2)
Nelumbo nucifera (48.1)
Nymphaea nouchali (50.2)
Tacca leontopetaloides (19.1)
Wasabia japonica (30.58)
Zingiber mioga (20.5)
Zingiber officinale (20.6)

Miscellaneous structures

Brassica juncea var. *gemmaifera* (30.8)
Brassica oleracea var. *gemmaifera* (30.29)
Centella asiatica (24.7)¹
Equisetum arvense (1.1)
Hibiscus sabdariffa (45.4)
Osmunda cinnamomea (3.1)
Osmunda japonica (3.2)
Pteridium aquilinum (2.1)
Zea mays subsp. *mays* (17.7)

Chapter 5a. Method of preparation, listed by English common name

Vegetables consumed cooked

For additional information on the plant part consumed, see Chapter 1.

- Abyssinian mustard (30.3)
Adzuki bean (40.36)
African eggplant (62.18)
African valerian (27.21)
African yam bean (40.31)
Alfalfa (40.17)
Alligator weed (23.1)
Amaranthus (23.3)
American black nightshade (62.15)
Angelica (24.1)
Angled loofah (38.21)
Arracacha (24.6.)
Arrowhead (6.2)
Asian water chestnut (64.1)
Asiatic pennywort (24.7)
Asparagus (13.2)
Asparagus pea (40.13)
Aster (27.17)
Bambara groundnut (40.39)
Bamboo shoots (17.1, 17.2, 17.4)
Bamboo shoot mustard (30.5)
Banana inflorescence (16.1b)
Barilla plant (35.7)
Beet (35.4)
Bell pepper (62.1)
Bitter gourd (38.23)
Bitter leaf (27.24)
Bitter yam (11.4)
Black gram (40.37)
Black mustard (30.24)
Black-eyed pea (40.43)
Bonnet pepper (62.4)
Borage (29.1)
Bottle gourd (38.20)
Bracken (2.1)
Broad beaked mustard (30.38)
Broad bean (40.34a)
Broccoli (30.31)
Broccoli raab (30.41c)
Broomrape (52.1)
Brussels sprouts (30.29)
Buckhorn plantain (57.1)
Buffalo spinach (27.19)
Buko (41.1)
Bur marigold (27.8)
Butterbur (27.35)
Cape gooseberry (62.12)
Cape pondweed (25.1)
Capitata mustard (30.4)
Capper (34.1)
Cardoon (27.15)
Carrot (24.11)
Casabanana (38.26)
Cassava (39.4)
Catjang (40.41)
Cat's whiskers (34.2)
Cauliflower (30.26)
Cayenne pepper (62.2)
Celeriac (24.5)
Celery (24.4)
Celtuce (27.30)
Ceylon spinach (28.1)
Chard (35.3)
Chaya (39.1, 39.2)
Chayote (38.25)
Chervil (24.3)
Chicory (27.10)
Chimapaya (27.4)¹
Chinese arrowhead (6.1)
Chinese bellflower (34.3)
Chinese cabbage (30.40)
Chinese chive (7.13)
Chinese kale (30.25)
Chinese radish (30.54)
Chinese water chestnut (10.2)
Chinese wolfberry (62.8)
Chinese yam (11.6)
Chombujiggangi (30.49)¹
Chufa (10.1)
Cinnamon fern (3.1)
Cluster bean (40.6)
Coastal glehnia (24.14)
Cockscomb (23.4)

¹ Korean name

² Japanese name

⁴ Indonesian name

Chapter 5a

- Common cabbage (30.27a)
Common comfrey (29.2)
Common sauropus (39.5)
Common seepweed (35.10)
Coriander (24.9)
Cornsalad (67.2)
Cosmos (27.12)
Country potato (44.8)
Croton (39.3)
Cuckoo-flower (30.44)
Currant tomato (62.10)
Cush-cush yam (11.8)
Cut leaf mustard (30.6)
Cyclanthera (38.19)
Dandelion (27.45)
Day lily (13.3)
Deodeog (33.3)²
Dock (58.3)
Earth chestnut (40.11)
East Indian arrowroot (19.1)
Edible burdock (27.5)
Edible canna (9.1)
Edible chrysanthemum (27.23)
Edible podded pea (40.27)
Eggplant (62.19)
Elephant grass (17.3)
Elephant yam (8.3)
European pennyroyal (44.2)
Euryale (50.1)
Evening primrose (51.1)
False roselle (45.3)
False yam (43.1)
Fennel (24.13)
Fenugreek (40.32)
Flameflower (59.4)
Flemingia (40.7)
Flower-like leaf mustard (30.16)
Fluted gourd (38.27)
French sorrel (58.4)
Galinsoga (27.22)
Gallan (8.7)
Garbanzo bean (40.5)
Garden cress (30.51)
Garden egg (62.17)
Garlic (7.10)
Gemmiferous mustard (30.8)
Giant elephant's ear (8.5)
Giant garlic (7.12)
Giant swamp taro (8.6)
Giant taro (8.1)
Gilo (62.14b)
Ginger (20.6)
Globe artichoke (27.16)
Gobouazami (27.11)¹
Godulbbaegi (27.48)¹
Gogoro (55.1)
Golden apple (62.14a)
Gomchwi (27.34)¹
Good King Henry (35.5)
Grass pea (40.10)
Greater galangal (20.1)
Great-headed garlic (7.1)
Green bean (40.26)
Guasca (27.1)
Gynura (27.25)
Hairy-fruited eggplant (62.16)
Hastate-leaved pondweed (18.1)
Hausa potato (44.10)
Hill mustard (30.42)
Hoary basil (44.4)
Hops (46.1)
Horse gram (40.16)
Horseradish (30.1)
Horsetail (1.1)
Hyacinth bean (40.9)
Hydrocotyle (24.15)
Indian kale (8.10)
Indian lettuce (27.29)
Indian poke (56.1)
Indian nightshade (62.25)
Inkweed (56.4)
Involute mustard (30.9)
Italian corn-salad (67.1)
Italian parsley (24.20)
Ivy gourd (38.4)
Jack bean (40.3)
Japanese angelica (24.2)
Japanese aralia (26.3)
Japanese artichoke (44.11)
Japanese farfugium (27.20)
Japanese flowering fern (3.2)
Japanese garlic (7.7)
Japanese hornwort (24.10)
Japanese snake gourd (38.30)
Japanese wild ginger (20.5)
Jerusalem artichoke (27.26)
Jew's marrow (63.1)
Jicama (40.21)
Kale (30.35)
Kalimeris (27.28)

- Kangaroo vine (69.1)
Kersting's groundnut (40.15)
Kipeit (47.1)³
Kohlrabi (30.30)
Konjac (8.2)
Kudzu (40.30)
Kumindelan (27.41)⁴
Kurrat (7.6)
Ladybell (33.1)
Large leaf mustard (30.17)
Leaf radish (30.55)
Leek (7.8)
Lentil (40.12)
Lesser yam (11.5)
Lily (13.4)
Lima bean (40.25)
Line mustard (30.12)
Long petiole mustard (30.13)
Long zedoary (20.4)
Longroot onion (7.14)
Lotus root (48.1a)
Lotus seed (48.1b)
Lupin (40.14)
Maca (30.50)
Malabar gourd (38.15)
Mallow (45.5)
Manchurian spikenard (26.1)
Mango ginger (20.3)
Marama bean (40.33)
Maravilla bulb (12.1)
Marjoram (44.6)
Marrow stem kale (30.32)
Mauka (49.1)
Meadow salsify (27.47)
Mignonette (60.1)
Miner's lettuce (59.1)
Mock pak choy (30.37)
Moth bean (40.35)
Mugwort (27.7)
Mung bean (40.38)
Musky pumpkin (38.17)
New Zealand spinach (22.2)
Oca (53.1)
Okra (45.1)
Onion (7.3)
Orach (35.1)
Oriental pickling melon (38.9)
Oval-leaved pondweed (18.2)
Oyster nut (38.28)
Pak-choi (30.36)
Palm-grass (17.6)
Para cress (27.2)
Parrot's feather (42.1)
Parsley (24.19)
Parsnip (24.18)
Passion flower (54.1)
Pea (40.28)
Pea eggplant (62.23)
Peanut (40.1)
Peduncled mustard (30.20)
Perilla (44.7)
Pigeon bean (40.34b)
Pigeon pea (40.2)
Pilea (66.1, 66.2)
Plantain (16.1a)
Pointed gourd (38.31)
Poke salat (56.2)
Pokeweed (56.3)
Potato (62.24)
Potato bean (40.22)
Potato yam (11.2)
Prickly comfrey (29.3)
Prickly-pear (32.1)
Pualele (27.43) 1
Pumpkin (38.14)
Purslane (59.2)
Quinoa (35.6)
Radish (30.56)
Rakkyo (7.4)
Rampion (33.2)
Rat tail radish (30.53)
Red cabbage (30.27b)
Rhubarb (58.1)
Rice bean (40.40)
Rocoto (62.6)
Roquette salad (30.48)
Rose glorybind (36.1)
Roselle (45.4)
Rungia (21.2)
Rutabaga (30.22)
Salsify (27.46)
Salsola (35.8)
Saururis (61.1)
Savoy cabbage (30.34)
Scarlet eggplant (62.14c)
Scarlet runner bean (40.24)
Scolymus (27.36)
Scorzonera (27.38)
Sea kale (30.45)
Sedum (37.1)

Chapter 5a

- Sessile alternanthera (23.2)
Shallot (7.2)
Shepherd's purse (30.43)
Shiny bugleweed (44.1)
Siberian ginseng (26.4)
Siberian kale (30.23)
Singhara nut (64.2)
Skirret (24.23)
Small leaf mustard (30.7)
Small pepper (62.3)
Smooth loofah (38.22)
Snake gourd (38.29)
Sorrel (58.2)
Sow thistle (27.18)
Sowthistle (27.27, 27.42)
Soybean (40.8)
Spikenard (26.2)
Spinach (35.9)
Spinach mustard (30.39)
Spiny sow thistle (27.40)
Spot flower (27.3)
Spotted garden thistle (27.37)
Squash melon (38.24)
Stinging nettle (66.3)
Strawberry tomato (62.11)
Strumous mustard (30.18)
Sugarcane inflorescence (17.5)
Summer cypress (35.2)
Summer savory (44.9)
Summer squash (38.18)
Sunset hibiscus (45.2)
Sweet basil (44.5)
Sweet corn (17.7)
Sweetpotato (36.3)
Sword bean (40.4)
Tabasco pepper (62.5)
Tannia (8.9)
Tannier spinach (8.8)
Taro (8.4)
Tarragon (27.6)
Tartar bread-plant (30.46)
Tepary bean (40.23)
Tettu (21.1)
Thousand-headed kale (30.33)
Tomato (62.9)
Tomatillo (62.13)
Topee (15.1)
Tree onion (7.9a)
Tree tomato (62.7)
Tronchuda (30.28)
Tuberous chervil (24.8)
Tuberous nasturtium (65.2)
Tuberous-rooted mustard (30.14)
Tuffed hyacinth (13.5)
Turfed stone leek (7.9b)
Turmeric (20.2)
Turnip (30.41a)
Turnip greens (30.41b)
Turnip-rooted parsley (24.21)
Ulluco (28.2)
Upland cress (30.2)
Vegetable fern (5.1)
Vegetable rape (30.21)
Velvet bean (40.18)
Wallrocket (30.47)
Wasabi (30.58)
Water bamboo (17.8)
Water bitter leaf (27.44)
Water chestnut (64.3)
Water dropwort (24.17)
Water fern (4.1)
Water lily (50.2)
Water mimosa (40.19)
Water spinach (36.2)
Water yam (11.1)
Watercress (30.52)
Waterleaf (59.3)
Wax gourd (38.1)
Welsh onion (7.5)
West Indian arrowroot (15.2)
West Indian gherkin (38.6)
White flowered mustard (30.11)
White Guinea yam (11.7)
White mustard (30.57)
White-seeded melon (38.5)
Wide petiole mustard (30.10)
Wild asparagus (13.1)
Wild lettuce (27.33)
Wild water chestnut (10.3)
Winged bean (40.29)
Winter squash (38.16)
Wonderberry (62.21)
Yacon (27.39)
Yam bean (40.20)
Yard-long bean (40.42)
Yellow velvetleaf (14.1)
Yellow yam (11.3)

Vegetables consumed raw

- African horned cucumber (38.12)
Alfalfa (40.17)
Alligator weed (23.1)
Amaranthus (23.3)
American black nightshade (62.15)
Angelica (24.1)
Armonian cucumber (38.10)
Asiatic pennywort (24.7)
Beet (35.4)
Bell pepper (62.1)
Black mustard (30.24)
Broccoli (30.31)
Buckhorn plantain (57.1)
Buffalo spinach (27.19)
Cantaloupe (38.7a)
Cape gooseberry (62.12)
Cape pondweed (25.1)
Capper (34.1)
Carrot (24.11)
Cauliflower (30.26)
Celeriac (24.5)
Celery (24.4)
Celtuce (27.30)
Chervil (24.3)
Chicory (27.10a)
Chimapaya (27.4)
Chinese chive (7.13)
Chinese radish (30.54)
Chinese water chestnut (10.2)
Chive (7.11)
Chufa (10.1)
Common cabbage (30.27a)
Common sauropus (39.5)
Coriander (24.9)
Cornsalad (67.2)
Cosmos (27.12)
Country potato (44.8)
Cuckoo-flower (30.44)
Cucumber (38.13a)
Currant tomato (62.10)
Dandelion (27.45)
Deodeog (33.3)¹
Edible podded pea (40.27)
Endive (27.9)
Evening primrose (51.1)
Fennel (24.13)
Florence fennel (24.12)
Garden cress (30.51)
Garden egg (62.17)
Garden myrrh (24.16)
Garlic (7.10)
Giant garlic (7.12)
Ginger (20.6)
Great-headed garlic (7.1)
Greater galangal (20.1)
Guasca (27.1)
Hairy-fruited eggplant (62.16)
Hawksbeard velvetplant (27.14)
Head lettuce (27.31)
Hoary basil (44.4)
Horseradish (30.1)
Hydrocotyle (24.15)
Ice plant (22.1)
Indian nightshade (62.25)
Italian corn-salad (67.1)
Italian parsley (24.20)
Japanese artichoke (44.11)
Japanese garlic (7.7)
Jerusalem artichoke (27.26)
Jew's marrow (63.1)
Johnny-jump-up (68.1)
Kohlrabi (30.30)
Kumindelan (27.41)
Kurrat (7.6)
Leaf lettuce (27.32)
Leek (7.8)
Lentil (40.12)
Mango ginger (20.3)
Mango melon (38.8)
Marjoram (44.6)
Meadow salsify (27.47)
Miner's lettuce (59.1)
Muskmelon (38.7b)
Naranjillo (62.22)
Nasturtium (65.1)
New Zealand spinach (22.2)
Onion (7.3)
Oriental pickling melon (38.9)
Palm-grass (17.6)
Para cress (27.2)
Parsley (24.19)
Parsnip (24.18)
Passion flower (54.1)
Peanut (40.1)
Pepino (62.20)
Perilla (44.7)
Pickling cucumber (38.13b)
Pilea (66.1, 66.2)

Chapter 5a

Plantain (16.1a)
Prickly-pear (32.1)
Pualele (27.43)
Pumpkin (38.14)
Purslane (59.2)
Radish (30.56)
Rampion (33.2)
Red cabbage (30.27b)
Redleaf chicory (27.10b)
Roquette salad (30.48)
Salsify (27.46)
Saururis (61.1)
Scorzoneria (27.38)
Sessile alternanthera (23.2)
Shallot (7.2)
Sierra Leone bologi (27.13)
Sorrel (58.2)
Sow thistle (27.18)
Sowthistle (27.42)
Spear-mint (44.3)
Spinach (35.9)
Spiny sow thistle (27.40)
Spot flower (27.3)
Strawberry tomato (62.11)
Summer squash (38.18)
Sunset hibiscus (45.2)
Sweet basil (44.5)
Sweet corn (17.7)
Swollen stem mustard (30.19)
Tarragon (27.6)
Tartar bread-plant (30.46)
Tettu (21.1)
Tomato (62.9)
Tomatillo (62.13)
Tree onion (7.9a)
Turnip-rooted parsley (24.21)
Upland cress (30.2)
Wallrocket (30.47)
Water dropwort (24.17)
Water lily (50.2)
Watercress (30.52)
Watermelon (38.3)
Watershield (31.1)
Welsh onion (7.5)
White mustard (30.57)
White-seeded melon (38.5)
Wild water chestnut (10.3)
Winged bean (40.29)
Winter melon (38.11)

Vegetables consumed preserved

Armonian cucumber (38.10)
Cabbage (30.27)
Capitata mustard (30.4)
Capper (34.1)
Chinese cabbage (30.40)
Chinese radish (30.54)
Citron (38.2)
Country potato (44.8)
Cucumber (38.13a)
Ginger (20.6)
Gobouazami (27.11)¹
Greater galangal (20.1)
Horsetail (1.1)
Involute mustard (30.9)
Japanese artichoke (44.11)
Okra (45.1)
Oriental pickling melon (38.9)
Pickling cucumber (38.13b)
Rat tail radish (30.53)
Shiny bugleweed (44.1)
Strumous mustard (30.18)
Swollen stem mustard (30.19)
Tabasco pepper (62.5)
Tillered mustard (30.15)
Wax gourd (38.1)
West Indian gherkin (38.6)
White flowered mustard (30.11)

Chapter 5b. Method of preparation, listed by abbreviated scientific name

Vegetables consumed cooked

For additional information on plant part consumed method, see Chapter 1

- Abelmoschus esculentus* (45.1)
Abelmoschus manihot (45.2)
Acmella ciliata (27.1)
Acmella paniculata (27.3)
Acmella uliginosa (27.4)
Adenophora triphylla (33.1)
Allium ampeloprasum var. *ampeloprasum* (7.1)
Allium cepa var. *aggregatum* (7.2)
Allium cepa var. *cepa* (7.3)
Allium chinense (7.4)
Allium fistulosum (7.5)
Allium kurrat (7.6)
Allium macrostemon (7.7)
Allium porrum L. (7.8)
Allium × *proliferum* (7.9)
Allium sativum (7.10)
Allium scorodoprasum (7.12)
Allium tuberosum (7.13)
Allium victorialis (7.14)
Alocasia macrorrhizos (8.1)
Alpinia galanga (20.1)
Alternanthera philoxeroides (23.1)
Alternanthera sessilis (23.2)
Amaranthus spp. (23.3)
Amorphophallus konjac (8.2)
Amorphophallus paeoniifolius (8.3)
Angelica archangelica (24.1)
Angelica keiskei (24.2)
Anthriscus cerefolium (24.3)
Apium graveolens var. *dulce* (24.4)
Apium graveolens var. *rapaceum* (24.5)
Aponogeton distachyos (25.1)
Arachis hypogaea (40.1)
Aralia continentalis (26.1)
Aralia cordata (26.2)
Aralia elata (26.3)
Arctium lappa (27.5)
Armoracia rusticana (30.1)
Arracacia xanthorrhiza (24.6.)
Artemisia dracunculus (27.6)
Artemisia indica var. *maximowiczii* (27.7)
Asparagus acutifolius (13.1)
Asparagus officinalis (13.2)
Atriplex hortensis (35.1)
Bambusa spp. (17.1)
Barbarea verna (30.2)
Basella alba (28.1)
Bassia scoparia (35.2)
Benincasa hispida (38.1)
Beta vulgaris Cicla group (35.3)
Beta vulgaris Crassa group (35.4)
Bidens pilosa (27.8)
Borago officinalis (29.1)
Brassica carinata (30.3)
Brassica juncea var. *capitata* (30.4)
Brassica juncea var. *crassicaulis* (30.5)
Brassica juncea var. *crispifolia* (30.6)
Brassica juncea var. *foliosa* (30.7)
Brassica juncea var. *gemmifera* (30.8)
Brassica juncea var. *involuta* (30.9)
Brassica juncea var. *latipa* (30.10)
Brassica juncea var. *leucanthus* (30.11)
Brassica juncea var. *linearifolia* (30.12)
Brassica juncea var. *longepetiolata* (30.13)
Brassica juncea var. *megarrhiza* (30.14)
Brassica juncea var. *mutisecta* (30.16)
Brassica juncea var. *rugosa* (30.17)
Brassica juncea var. *strumata* (30.18)
Brassica juncea var. *utilis* (30.20)
Brassica napus var. *napobrassica* (30.22)
Brassica napus var. *napus* (30.21)
Brassica napus var. *pabularia* (30.23)
Brassica nigra (30.24)
Brassica oleracea var. *alboglabra* (30.25)
Brassica oleracea var. *botrytis* (30.26)
Brassica oleracea var. *capitata* (30.27)
Brassica oleracea var. *costata* (30.28)
Brassica oleracea var. *gemmifera* (30.29)
Brassica oleracea var. *gongyloides* (30.30)
Brassica oleracea var. *italica* (30.31)
Brassica oleracea var. *medullosa* (30.32)
Brassica oleracea var. *ramosa* (30.33)
Brassica oleracea var. *sabauda* (30.34)
Brassica oleracea var. *viridis* (30.35)
Brassica rapa subsp. *chinensis* (30.36)
Brassica rapa subsp. *chinensis* var. *parachinensis* (30.37)

Chapter 5b

- Brassica rapa* subsp. *narinosa* (30.38)
Brassica rapa subsp. *nipposinica* var. *perviridis* (30.39)
Brassica rapa subsp. *pekinensis* (30.40)
Brassica rapa subsp. *rapa* (30.41)
Bunias orientalis (30.42)
Cajanus cajan (40.2)
Calathea allouia (15.1)
Campanula rapunculus (33.2)
Canavalia ensiformis (40.3)
Canavalia gladiata (40.4)
Canna indica (9.1)
Capparis spinosa (34.1)
Capsella bursa-pastoris (30.43)
Capsicum annuum var. *annuum* (62.1)
Capsicum annuum var. *longum* (62.2)
Capsicum baccatum var. *baccatum* (62.3)
Capsicum chinense (62.4)
Capsicum frutescens (62.5)
Capsicum pubescens (62.6)
Cardamine pratensis (30.44)
Celosia spp. (23.4)
Centella asiatica (24.7)
Ceratopteris thalictroides (4.1)
Chaerophyllum bulbosum (24.8)
Chenopodium bonus-henricus (35.5)
Chenopodium quinoa subsp. *quinoa* (35.6)
Cichorium intybus (27.10)
Cicer arietinum (40.5)
Cirsium dipsacolepis (27.11)
Cissus discolor (69.1)
Cleome gynandra (34.2)
Cnidoscolus aconitifolius (39.1)
Cnidoscolus chayamansa (39.2)
Coccinia grandis (38.4)
Codiaeum variegatum (39.3)
Codonopsis lanceolata (33.3)
Colocasia esculenta (8.4)
Colocasia gigantea (8.5)
Convolvulus japonicus (36.1)
Corchorus olitorius (63.1)
Coriandrum sativum (24.9)
Cosmos caudatus (27.12)
Crambe tatarica (30.46)
Cryptotaenia japonica (24.10)
Cucumeropsis mannii (38.5)
Cucumis anguria var. *anguria* (38.6)
Cucumis melo subsp. *melo* var. *conomon* (38.9)
Cucurbita argyrosperma (38.14)
Cucurbita ficifolia (38.15)
Cucurbita maxima (38.16)
Cucurbita moschata (38.17)
Cucurbita pepo (38.18)
Curcuma longa (20.2)
Curcuma mangga (20.3)
Curcuma zedoaria (20.4)
Cyamopsis tetragonoloba (40.6)
Cyclanthera pedata (38.19)
Cynara cardunculus (27.16)
Cynara cardunculus subsp. *cardunculus* (27.15)
Cyperus esculentus (10.1)
Cyphomandra betacea (62.7)
Cyrtosperma chamissonis (8.6)
Cyrtosperma merkusii (8.7)
Daucus carota subsp. *sativus* (24.11)
Dendrocalamus spp. (17.2)
Dioscorea alata (11.1)
Dioscorea bulbifera (11.2)
Dioscorea cayenensis (11.3)
Dioscorea dumetorum (11.4)
Dioscorea esculenta (11.5)
Dioscorea oppositifolia (11.6)
Dioscorea rotundata (11.7)
Dioscorea trifida (11.8)
Diplazium esculentum (5.1)
Diplotaxis muralis (30.47)
Doellingeria scabra (27.17)
Eleocharis dulcis (10.2)
Eleocharis kuroguwai (10.3)
Eleutherococcus senticosus (26.4)
Emilia sonchifolia (27.18)
Enydra fluctuans (27.19)
Equisetum arvense (1.1)
Eruca sativa (30.48)
Erysimum amurense (30.49)
Euryale ferox (50.1)
Farfugium japonicum (27.20)
Fedia cornucopiae (27.21)
Flemingia vestita (40.7)
Foeniculum vulgare subsp. *vulgare* var. *dulce* (24.13)
Galinsoga parviflora (27.22)
Glebionis coronarium (27.23)
Glehnia littoralis (24.14)
Glycine max (40.8.)
Gnetum gnemon (41.1)
Gymnanthemum amygdalinum (27.24)
Gynura bicolor (27.25)
Helianthus tuberosus (27.26)
Hemerocallis spp. (13.3)

Method of preparation, listed by abbreviated scientific name

- Hibiscus acetosella* (45.3)
Hibiscus sabdariffa (45.4)
Houttuynia cordata (61.1)
Humulus lupulus (46.1)
Hydrocotyle sibthorpioides (24.15)
Icacina oliviformis (43.1)
Ipomoea aquatica (36.2)
Ipomoea batatas var. *batatas* (36.3)
Ixeridium dentatum (27.27)
Justicia insularis (21.1)
Kalimeris yomena (27.28)
Lablab purpureus (40.9)
Lactuca indica (27.29)
Lactuca sativa var. *angustana* (27.30)
Lagenaria siceraria (38.20)
Lathyrus sativus (40.10)
Lathyrus tuberosus (40.11)
Launaea taraxacifolia (27.33)
Lens culinaris (40.12)
Lepidium meyenii (30.50)
Lepidium sativum (30.51)
Ligularia fischeri (27.34)
Lilium spp. (13.4)
Limnocharis flava (14.1)
Lotus tetragonolobus (40.13)
Luffa acutangula (38.21)
Luffa aegyptiaca (38.22)
Lupinus spp. (40.14)
Lycium chinense (62.8)
Lycopersicon esculentum var. *esculentum* (62.9)
Lycopersicon pimpinellifolium (62.10)
Lycopus lucidus (44.1)
Maesa latifolia (47.1)
Macrotyloma geocarpum (40.15)
Macrotyloma uniflorum (40.16)
Malva rotundifolia (45.5)
Manihot esculenta subsp. *esculenta* (39.4)
Maranta arundinacea (15.2)
Medicago sativa subsp. *sativa* (40.17)
Mentha pulegium (44.2)
Mirabilis expansa (49.1)
Momordica charantia (38.23)
Monochoria hastata (18.1)
Monochoria vaginalis (18.2)
Montia perfoliata (59.1)
Musa × *paradisiaca* var. *paradisiaca* (16.1)
Muscari comosum (13.5)
Myriophyllum aquaticum (42.1)
Nasturtium officinale (30.52)
Nelumbo nucifera (48.1)
Nymphaea nouchali (50.2)
Ocimum americanum (44.4)
Ocimum basilicum (44.5) 1
Oenanthe javanica subsp. *javanica* (24.17)
Oenothera biennis (51.1)
Opuntia ficus-indica (32.1)
Origanum vulgare (44.6)
Orobanche crenata (52.1)
Osmunda cinnamomea (3.1)
Osmunda japonica (3.2)
Oxalis tuberosa (53.1)
Pachyrhizus ahipa (40.20)
Pachyrhizus erosus (40.21)
Pachyrhizus tuberosus (40.22)
Passiflora biflora (54.1)
Pastinaca sativa (24.18)
Pennisetum purpureum (17.3)
Perilla frutescens var. *crispa* (44.7)
Petasites japonica (27.35)
Petroselinum crispum var. *crispum* (24.19)
Petroselinum crispum var. *neapolitanum* (24.20)
Petroselinum crispum var. *tuberosum* (24.21)
Phaseolus acutifolius var. *acutifolius* (40.23)
Phaseolus coccineus (40.24)
Phaseolus lunatus (40.25)
Phaseolus vulgaris var. *vulgaris* (40.26)
Phyllostachys spp. (17.4)
Physalis alkekengi (62.11)
Physalis peruviana (62.12)
Physalis philadelphica (62.13)
Phytolacca acinosa (56.1)
Phytolacca americana (56.2)
Phytolacca esculenta (56.3)
Phytolacca octandra (56.4)
Pilea glaberrima (66.1)
Pilea melastomoides (66.2)
Pisum sativum subsp. *sativum* var. *macrocarpon* (40.27)
Pisum sativum subsp. *sativum* var. *sativum* (40.28)
Plantago coronopus var. *sativa* (57.1)
Platycodon grandiflorus (34.3)
Plectranthus esculentus (44.8)
Portulaca oleracea (59.2)
Praecitrullus fistulosus (38.24)
Psophocarpus tetragonolobus (40.29)
Pteridium aquilinum (2.1)
Raphanus sativus Caudatus group (30.53)
Raphanus sativus Dakion group (30.54)

Chapter 5b

- Raphanus sativus* Oleiformis group (30.55)
Raphanus sativus Radicula group (30.56)
Reseda odorata (60.1)
Rheum rhabarbarum (58.1)
Rumex acetosa (58.2)
Rumex patientia (58.3)
Rumex scutatus (58.4)
Rungia klossii (21.2)
Saccharum edule (17.5)
Sagittaria sagittifolia subsp. *leucopetala* (6.1)
Sagittaria sagittifolia subsp. *sagittifolia* (6.2)
Salsola komarovii (35.7)
Salsola soda (35.8)
Satureja hortensis (44.9)
Sauropus androgynus (39.5)
Scolymus hispanicus (27.36)
Scolymus maculatus (27.37)
Scorzonera hispanica (27.38)
Sechium edule (38.25)
Sedum sarmentosum (37.1)
Sesamum radiatum (55.1)
Setaria palmifolia (17.6)
Sicana odorifera (38.26)
Sinapis alba (30.57)
Sium sisarum (24.23)
Smallanthus sonchifolius (27.39)
Solanum americanum (62.15)
Solanum ferox (62.16)
Solanum incanum (62.17)
Solanum macrocarpon (62.18)
Solanum melongena (62.19)
Solanum muricatum (62.20)
Solanum nigrum (62.21)
Solanum torvum (62.23)
Solanum tuberosum (62.24)
Solanum violaceum (62.25)
Solenostemon rotundifolius (44.10)
Sonchus asper (27.40)
Sonchus malaiianus (27.41)
Sonchus oleraceus (27.42)
Sonchus wightianus (27.43)
Sphenostylis stenocarpa (40.31)
Spinacia oleracea (35.9)
Stachys affinis (44.11)
Strachium sparganophorum (27.44)
Suaeda glauca (35.10)
Symphytum officinale (29.2)
Symphytum × *uplandicum* (29.3)
Tacca leontopetaloides (19.1)
Talinum fruticosum (59.3)
Talinum paniculatum (59.4)
Taraxacum officinale (27.45)
Telfairia occidentalis (38.27)
Telfairia pedata (38.28)
Tetragonia tetragonioides (22.2)
Tigridia pavonia (12.1)
Tragopogon porrifolius (27.46)
Tragopogon pratensis (27.47)
Trapa bicornis Osbeck (64.1)
Trapa natans var. *bispinosa* (64.2)
Trapa natans var. *natans* (64.3)
Trichosanthes cucumerina (38.29)
Trichosanthes cucumeroides (38.30)
Trichosanthes dioica (38.31)
Trigonella foenum-graecum (40.32)
Tropaeolum tuberosum (65.2)
Tylosema esculentum (40.33)
Ullucus tuberosus (28.2)
Urtica dioica (66.3)
Valerianella eriocarpa (67.1)
Valerianella locusta (67.2)
Vicia faba (40.34)
Vigna aconitifolia (40.35)
Vigna angularis (40.36)
Vigna mungo var. *mungo* (40.37)
Vigna radiata var. *radiata* (40.38)
Vigna subterranea (40.39)
Vigna umbellata (40.40)
Vigna unguiculata subsp. *cylindrica* (40.41)
Vigna unguiculata subsp. *sesquipedalis* (40.42)
Vigna unguiculata subsp. *unguiculata* (40.43)
Wasabia japonica (30.58)
Xanthosoma brasiliense (8.8)
Xanthosoma sagittifolium (8.9)
Xanthosoma violaceum (8.10)
Youngia sonchifolia (27.48)
Zea mays subsp. *mays* (17.7)
Zingiber mioga (20.5)
Zingiber officinale (20.6)
Zizania latifolia (17.8)

Vegetables consumed raw

- Abelmoschus manihot* (45.2)
Acmella ciliata (27.1)
Acmella paniculata (27.3)
Allium ampeloprasum var. *ampeloprasum* (7.1)
Allium cepa var. *aggregatum* (7.2)
Allium cepa var. *cepa* (7.3)
Allium fistulosum (7.5)

Method of preparation, listed by abbreviated scientific name

- Allium kurrat* (7.6)
Allium macrostemon (7.7)
Allium porrum (7.8)
Allium × *proliferum* (7.9)
Allium sativum (7.10)
Allium schoenoprasum (7.11)
Allium scorodoprasum (7.12)
Allium tuberosum (7.13)
Alpinia galanga (20.1)
Alternanthera philoxeroides (23.1)
Alternanthera sessilis (23.2)
Amaranthus spp. (23.3)
Angelica archangelica (24.1)
Anthriscus cerefolium (24.3)
Aponogeton distachyos (25.1)
Apium graveolens var. *dulce* (24.4)
Apium graveolens var. *rapaceum* (24.5)
Arachis hypogaea (40.1)
Armoracia rusticana (30.1)
Artemisia dracunculus (27.6)
Artemisia indica var. *maximowiczii* (27.7)
Barbarea verna (30.2)
Benincasa hispida (38.1)
Beta vulgaris Crassa group (35.4)
Brasenia schreberi (31.1)
Brassica juncea var. *tumida* (30.19)
Brassica nigra (30.24)
Brassica oleracea var. *botrytis* (30.26)
Brassica oleracea var. *capitata* (30.27)
Brassica oleracea var. *gongyloides* (30.30)
Brassica oleracea var. *italica* (30.31)
Campanula rapunculus (33.2)
Capparis spinosa (34.1)
Capsicum annuum var. *annuum* (62.1)
Cardamine pratensis (30.44)
Centella asiatica (24.7)
Cichorium endivia subsp. *endivia* (27.9)
Cichorium intybus (27.10)
Citrullus lanatus var. *lanatus* (38.3)
Codonopsis lanceolata (33.3)
Corchorus olitorius (63.1)
Coriandrum sativum (24.9)
Cosmos caudatus (27.12)
Crambe maritima (30.45)
Crassocephalum bialfræe (27.13)
Crassocephalum crepidioides (27.14)
Cucumeropsis manni (38.5)
Cucumis melo subsp. *melo* var. *cantalupensis* (38.7)
Cucumis melo subsp. *melo* var. *chito* (38.8)
Cucumis melo subsp. *melo* var. *conomon* (38.9)
Cucumis melo subsp. *melo* var. *flexuosus* (38.10)
Cucumis melo subsp. *melo* var. *inodorus* (38.11)
Cucumis metuliferus (38.12)
Cucumis sativus (38.13)
Cucurbita argyrosperma (38.14)
Cucurbita pepo (38.18)
Curcuma mangga (20.3)
Cyperus esculentus (10.1)
Daucus carota subsp. *sativus* (24.11)
Diplotaxis muralis (30.47)
Eleocharis dulcis (10.2)
Eleocharis kuroguwai (10.3)
Emilia sonchifolia (27.18)
Enydra fluctuans (27.19)
Eruca sativa (30.48)
Foeniculum vulgare subsp. *vulgare* var. *azoricum* (24.12)
Foeniculum vulgare subsp. *vulgare* var. *dulce* (24.13)
Helianthus tuberosus (27.26)
Houttuynia cordata (61.1)
Hydrocotyle sibthorpioides (24.15)
Justicia insularis (21.1)
Lactuca sativa var. *angustana* (27.30)
Lactuca sativa var. *capitata* (27.31)
Lactuca sativa var. *longifolia* (27.32)
Lens culinaris (40.12)
Lepidium sativum (30.51)
Lycopersicon esculentum var. *esculentum* (62.9)
Lycopersicon pimpinellifolium (62.10)
Medicago sativa subsp. *sativa* (40.17)
Mentha spicata (44.3)
Mesembryanthemum crystallinum (22.1)
Montia perfoliata (59.1)
Mucuna pruriens var. *utilis* (40.18)
Musa × *paradisiaca* var. *paradisiaca* (16.1)
Myrrhis odorata (24.16)
Nasturtium officinale (30.52)
Nymphaea nouchali (50.2)
Ocimum americanum (44.4)
Ocimum basilicum (44.5)
Oenanthe javanica subsp. *javanica* (24.17)
Oenothera biennis (51.1)
Opuntia ficus-indica (32.1)
Origanum vulgare (44.6)
Passiflora biflora (54.1)
Pastinaca sativa (24.18)

Chapter 5b

Petroselinum crispum var. *crispum* (24.19)
Petroselinum crispum var.
 neapolitanum (24.20)
Petroselinum crispum var. *tuberosum* (24.21)
Physalis alkekengi (62.11)
Physalis peruviana (62.12)
Physalis philadelphica (62.13)
Pilea glaberrima (66.1)
Pilea melastomoides (66.2)
Pisum sativum subsp. *sativum* var.
 macrocarpon (40.27)
Plantago coronopus var. *sativa* (57.1)
Plectranthus esculentus (44.8)
Portulaca oleracea (59.2)
Psophocarpus tetragonolobus (40.29)
Pueraria montana var. *lobata* (40.30)
Raphanus sativus Dakion group (30.54)
Raphanus sativus Radicula group (30.56)
Rumex acetosa (58.2)
Sauropus androgynus (39.5)
Scorzonera hispanica (27.38)
Setaria palmifolia (17.6)
Sinapis alba (30.57)
Solanum aethiopicum (62.14)
Solanum americanum (62.15)
Solanum ferox (62.16)
Solanum incanum (62.17)
Solanum quitoense (62.22)
Solanum violaceum (62.25)
Sonchus asper (27.40)
Sonchus malaianus (27.41)
Sonchus oleraceus (27.42)
Sonchus wightianus (27.43)
Spinacia oleracea (35.9)
Stachys affinis (44.11)
Taraxacum officinale (27.45)
Tetragonia tetragonioides (22.2)

Tragopogon porrifolius (27.46)
Tragopogon pratensis (27.47)
Tropaeolum majus (65.1)
Valerianella eriocarpa (67.1)
Valerianella locusta (67.2)
Viola tricolor (68.1)
Zea mays subsp. *mays* (17.7)
Zingiber officinale (20.6)

Vegetables consumed preserved

Abelmoschus esculentus (45.1)
Alpinia galanga (20.1)
Brassica juncea var. *capitata* (30.4)
Brassica juncea var. *involuta* (30.9)
Brassica juncea var. *leucanthus* (30.11)
Brassica juncea var. *multiceps* (30.15)
Brassica juncea var. *strumata* (30.18)
Brassica juncea var. *tumida* (30.19)
Brassica oleracea var. *capitata* (30.27)
Brassica rapa subsp. *pekinensis* (30.40)
Capparis spinosa (34.1)
Capsicum frutescens (62.5)
Cirsium dipsacolepis (27.11)
Citrullus lanatus var. *citroides* (38.2)
Cucumis anguria var. *anguria* (38.6)
Cucumis melo subsp. *melo* var. *conomon* (38.9)
Cucumis melo subsp. *melo* var.
 flexuosus (38.10)
Cucumis sativus (38.13)
Equisetum arvense (1.1)
Lycopus lucidus (44.1)
Plectranthus esculentus (44.8)
Raphanus sativus Caudatus group (30.53)
Raphanus sativus Dakion group (30.54)
Stachys affinis (44.11)
Zingiber officinale (20.6)

Chapter 6. Languages¹

- ABUA** – abn, (syn. Abuan). Abua is spoken by 25,000 people in Nigeria. Classification: Niger Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Cross River, Delta Cross, Central Delta, Abua-Odual. Dialects: Central Abuan, Emughan, Otapha, and Okpeden.
- AFAR** – aar, (syn. Afaraf, Danakil, Denkel, Afar Af, Adal). Afar is spoken by 1,400,000-1,500,000 people in Ethiopia, Somalia, Djibouti, and Eritrea. Classification: Afro-Asiatic, Cushitic, East, Saho-Afar. Dialects: Northern Afar, Central Afar, Aussa, and Baadu (Ba'adu).
- AFRIKAANS** – afr. Afrikaans is spoken by 6,000,000 people in South Africa and 10,000,000 second language speakers. It is also spoken by immigrants in Australia, Botswana, Canada, Lesotho, Malawi, Namibia, New Zealand, Zambia, and Zimbabwe. Classification: Indo-European, Germanic, West, Low Saxon-Low Franconian, Low Franconian. Dialects: Cape Afrikaans (West Cape Afrikaans), Orange River Afrikaans, and East Cape Afrikaans.
- AGTA** – *afa*. Agta is a cluster of 8 languages spoken on Luzon, the Philippines, one of which is extinct. There are a very limited number of speakers i.e. ~ 2,000. Classification: Austronesian, Malayo-Polynesian.
- AGTA, CASIGURAN DUMAGAT** – dgc, (syn. Casiguran Dumagat). Casiguran Dumagat Agta is spoken by 600 people in the Aurora province of Luzon, the Philippines. Classification: Austronesian, Malayo-Polynesian, Northern Philippine, Northern Luzon, Northern Cordilleran, Dumagat, Northern. Casiguran Dumagat Agta is similar to Paranan.
- AJA** – aja, (syn. Adja, Ajja). Aja is spoken by a very limited number of people in southern Sudan, western Bahr el Ghazal Province and in the western Central African Republic. Classification: Nilo-Saharan, Central Sudanic, West, Kresh. Aja is thought to be midway between Banda and Kresh.
- AKAN** – aka. Akan is a language spoken by 8,300,000 in Ghana and eastern Côte d'Ivoire; there are 1,000,000 second language speakers. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Nyo, Potou-Tano, Tano, Central, Akan. Dialects: Fante, Akuapem, Asante, Agona, Dankyira, Asen, Akyem Bosome, Kwawu, and Ahafo.
- AKAN-AKUAPEM** – aka-*aub*. Akuapem is a dialect of Akan. There are 8,300,000 speakers of Akan in Ghana with 555,000 Akuapem in the southeast, north of Accra.
- AKAN-ASANTE** – aka-*aag*, (Asante syn. Ashante Twi, Asanti, Achanti). Asante is a dialect of Akan spoken in Ghana by the Asante people. The Asante population numbers 2,800,000 people that are located in south central Ghana.
- AKAN-FANTE** – aka-*fat*, (Fante syn. Fanti, Mfantse). Fante is a dialect of Akan spoken in Ghana by the Fante. The Fante population numbers 1,900,000 people that are located in south central Ghana.
- AKHA** – ahk, (syn. Kaw, Ekaw, Ko, Aka, Ikaw, Ak'a, Ahka, Khako, Kha Ko, Khao Kha Ko, Ikor, Aini, Yani). Akha is spoken by 1,000,000 people in the Chiangmai, Chiangrai, and Maehongson provinces in Thailand, the Yunnan province of China, and in Burma. Classification: Sino-Tibetan, Tibeto-Burman, Lolo-Burmese, Loloish, Southern Loloish, Akha, Hani, Ha-Ya. Dialects: Ako, Asong.
- AKLANON** – akl, (syn. Aklan, Aklano, Panay, Aklanon-Bisayan). There are 394,500 speakers of Aklanon, primarily in the Aklan Province of Northern Panay, the Philippines. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, Central Philippine, Bisayan, West, Aklan. Aklanon is similar to Hiligaynon.
- AKPA** – akf, (syn. Akweya). Akpa is spoken by 27,000 people in Nigeria. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Idomoid, Yatye-Akpa. Akpa is similar to Ekpari.

¹ Primary source – Gordon, 2005. Each language has a three letter ISO/DIS 639-3 identity code, established by the International Organization for Standardization, listed after its name. In instances where the identity of the language is not definitive, a temporary code has been assigned and is in italics.

- AKWA** – akw. Akwa is spoken by 24,000 people in the Cuvette Region, Makoua District of Congo. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Northwest, C, Mbosi.
- ALBANIAN, TOSK** – als, (syn. Albanian, Tosk, Arnaut, Shqip, Shqip, Skchip, Shqiperë, Zhgabe). Tosk Albanian is spoken by 2,980,000 people, primarily in south Albania to the Shkumbi River. It is also spoken by a small number of immigrants in Belgium, Egypt, Germany, Greece, Turkey, Ukraine, and the United States. Classification: Indo-European, Albanian, Tosk. Dialects: Arbanasi, Srem, Camerija, and Korca.
- ALEUT** – ale, (syn. Unangam Tunuu). Only about 300 Aleut speakers remain; Western Aleut is spoken on Atka Island and Eastern Aleut on the eastern Aleutian Islands, Pribilofs, Siberian Commander Islands and Alaskan Peninsula. Classification: Eskimo-Aleut, Aleut. Dialects: Western Aleut and Eastern Aleut.
- AMHARIC** – amh, (syn. Abyssinian, Ethiopian, Amarinya, Amarigna). Amharic is a Semitic language spoken by 17,373,000 of the Amhara people in North Central Ethiopia, the Amhara Region and in Addis Ababa. A small number of speakers are found in Egypt and Sweden. In Israel it is used by around 40,000 Jews of Ethiopian origin. Worldwide there are approximately 4,000,000 second language users. Classification: Afro-Asiatic, Semitic, South Ethiopian, South, Transversal, Amharic-Argobba.
- ANDO** – ang. Ando is reported by Burkill as a language in the Côte d’Ivoire. There are 78 languages spoken there. The correct language of the words listed is not known.
- ANUAK** – anu, (syn. Anywak, Anywa, Yambo, Jambo, Nuro, Anyuak, Dho Anywaa). Anuak is a Nilotic language of the Nilo-Saharan language family. It is spoken by 45,000 of the Anuak people primarily in the western part of Ethiopia. It is also spoken by 52,000 people in the Sudan with a total of 97,000 speakers in all countries. Classification: Nilo-Saharan, Eastern Sudanic, Nilotic, Western, Luo, Northern, Anuak. Dialects: Adoyo, Coro, Lul, and Opëno.
- ANYIN** – any, (syn. Anyi, Agni). There are 610,000 Anyin speakers in Côte d’Ivoire and 200,000 in Ghana, plus anywhere from 10,000 to 100,000 second language speakers. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Nyo, Potou-Tano, Tano, Central, Bia, Northern. Dialects: Sanvi, Indenie, Bini, Bona, Moronou, Djuablin, Ano, Abe, Barabo and Alangua. Baoulé and Nzema are the closest languages to Anyin.
- APACHE, JICARILLA** – apj. There are 2,000 Jicarilla Apaches in Northern New Mexico primarily in Rio Arriba and Sandoval counties, though the number of speakers is significantly lower. Use of the language is declining. Classification: Na-Dene, Nuclear Na-Dene, Athanpaskan-Eyak, Athapaskan, Apachean, Navajo-Apache, Eastern Apache.
- ARABIC** – arb. Arabic is a Central Semitic language that is spoken by more than 280,000,000 people as a first language and 250,000,000 as a second language, mostly in the Middle East and North Africa. Classification: Afro-Asiatic, Semitic, Central, South, Arabic. A diverse cross-section of dialects are spoken, not all of which are mutually intelligible. Standard Arabic is the official language that is widely taught in schools and used for all written materials and formal speeches. Dialects: Egyptian, Gulf, Iraqi, Levantine, Maghrebi, Andalusi, Bahrani, Central Asia, Hassaniya, Hejazi, Judeo-Arabic dialects, Maltese, Najdi, Shuwa, Siculo, Sudanese, and Yemeni.
- ARMENIAN** – hye, (syn. Haieren, Somkhuri, Ermenice, Ermeni Dili, Armjansik Yazyk). There are a total of 6,723,000 Armenian speakers in all countries, of which 3,400,000 live in Armenia. Remaining speakers are found in a wide range of countries from India to the United States. Classification: Indo-European, Armenian. Dialects: Eastern Armenian, Erevan, Tbilisi, Karabagh, Shamakhi, Astrakhan, Dzhulfa, Agulis, Khvoy-Salmst, Urmia-Maragheh, Artvin, Karin, Mus, Van, Tigranakert, Kharberd, Shabin-Karahissar, Trabzon, Hamshen, Malatya, Kilikien, Syria, Arabkir, Akn, Sebaste, Ewdokia, Smyrna, North Komedia, Constantinople, Rodosto, Crimea, and Ashkharik. All of the dialects are intelligible. Eastern Armenian is the most widely used and is spoken in Armenia and its Turkish and Iranian borderlands.

- ASSAMESE** – asm, (syn. Asambe, Asami, Asamiya). There are 15,334,000 speakers of Assamese, most of whom are in the Assam state in northern India. Classification: Indo-European, Indo-Iranian, Indo-Aryan, Eastern zone, Bengali-Assamese. Dialects: Jharwa, Mayang, Standard Assamese, and Western Assamese.
- ATTA, PAMPLONA** – att, (syn. Northern Cagayan Negrito). Pamplona Atta is spoken by 1000 people in the Northwestern Cagayan Province of Luzon, the Philippines. Classification: Austronesian, Malayo-Polynesian, Northern Philippine, Northern Luzon, Northern Cordilleran, Ibanagic, Ibanag. Pamplona Atta is similar to Ibanag North.
- AZERBAIJANI, NORTHERN** – azj, (syn. Azeri Turk, Azerbaijani, Azerbaydzhani). Azerbaijani is spoken by 7,000,000 people, the majority of which (6,069,000) are in Azerbaijan and southern Dagestan. It is also spoken in a wide range of other countries, e.g. Georgia, Germany, Russia, Estonia, the United Kingdom, the United States, Uzbekistan, Syria, Iraq, Turkey, Turkmenistan, Ukraine, Canada. Classification: Altaic, Turkic, Southern, Azerbaijani. Dialects: Quba, Derbend, Baku, Shamakhi, Salyan, Lenkaran, Qazakh, Airym, Borcala, Terekeme, Qyzylbash, Nukha, Zaqatala, Qabala, Yerevan, Nakhchivan, Ordubad, Ganja, Shusha, and Karapapak.
- BAATONUM** – bba, (syn. Baatonu, Baatombu, Baruba, Bargu, Burgu, Berba, Barba, Bogung, Bargawa, Barganchi, Bariba). Baatonum is spoken by 560,000 people, 460,000 of whom are located in Benin, primarily in the central, north, and Borgou Provinces. It is also spoken (~100,000) in some areas of Nigeria (Kwara and Niger states and in the Borgu local government area). Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Bariba.
- BADAGA** – bfg, (syn. Badag, Badagu, Badugu, Baduga, Vadagu). Badaga is spoken by 50,000 people in the Nilgiri Hills of southern India. Classification: Dravidian, Southern, Tamil-Kannada, Kannada.
- BAFIA** – ksf, (syn. Rikpa, Ripey, Rikpa', Bekpak). Bafia is spoken by 60,000 people in Cameroon. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Northwest, A, Bafia (A.50). Dialects: Kpa and Bape.
- BAFUT** – bfd, (syn. Bufe, Fu, Fut, Befef). Bafut is spoken in Cameroon by 50,000 people. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Wide Grassfields, Narrow Grassfields, Mbam-Nkam, Ngemba. Bafut is related to Bamum. Dialects: Bafut and Buge.
- BAGA** – bad. Baga is a group of closely related languages that are spoken by 30,000 people in the coastal region of Guinea. Approximately one-half speak Landoma, a closely related language; many also speak the Mande language Susu. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Southern, Mel, Temne. The Baga languages: Baga Binari (bcg), Baga Koga (bgo), Baga Manduri (bmd), Baga Mboteni (bgm), Baga Sitemu (bsp), Baga Sobane (bsv), are often considered dialects of Baga. The specific dialect of the crops listed was not indicated.
- BALANTA-KENTOHE** – ble, (syn. Balanta, Balant, Balante, Balanda, Ballante, Belante, Bulanda, Brassa, Alante, Frase). Blanta-Kentohe is spoken by 393,000 people, mostly in Guinea-Bissau, along the north central and central coast. It is also spoken in Gambia. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Northern, Bak, Balant-Ganja. Dialects: Fora, Kantohe (Kentohe, Queuthoe), Naga, and Mane.
- BALTI** – bft, (syn. Sbalti, Baltistani, Bhotia of Baltistan). Balti is spoken by 337,000 people in Baltistan, northeastern Pakistan (270,000) and in parts of India (Ladakh). Classification: Sino-Tibetan, Tibeto-Burman, Himalayish, Tibeto-Kanauri, Tibetic, Tibetan, Western. Dialects: Chorbat, Purik, and others.
- BAMANANKAN** – bam, (syn. Bambara, Bamanakan). Bamanankan is spoken by 2,700,000 people in Mali; including second language speakers, there are a total of 6,000,000 speakers in all countries. Bamanankan is similar to Dioula. Classification: Niger-Congo, Mande, Western, Central-Southwestern, Central, Manding-Jogo, Manding-Vai, Manding-Mokole, Manding, Manding-East, Northeastern Manding, Bamana. Dialects: Standard Bambara, Somono, Segou, San, Beledugu, Ganadugu, Wasulu and Sikasso.

- BAMILEKE** – *bai*. The Bamileke are a collection of Semi-Bantu ethnic groups found in the highlands of Cameroon's West Province. They comprise of more than 2,120,000 members within over 100 individual groups that are linguistically related, i.e. from the Bantoid branch of the Niger-Congo language family. The specific language of the crops listed was not indicated.
- BAOULÉ** – *bci*, (syn. Baule, Bawule). There are 2,130,000 Baoulé speakers found primarily in southern Cote d'Ivoire. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Nyo, Potou-Tano, Tano, Central, Bia, Northern. Dialects: similar to Anyin; many subgroups but largely mutually intelligible.
- BASQUE** – *eus*, (syn. Vascuense, Euskera). Basque is spoken by 1,063,000 people (approximately 665,700 first language speakers) in the Spanish Basque country and in southwest France. Classification: Basque. Dialects: Bizkaian, Gipuzkoan, and Upper Navarrese (in Spain), and Lower Navarrese, Lapurdian, and Zuberoan (in France).
- BASSARI** – *bsc*, (syn. Basari, Tenda Basari, Biyan, Onëyan, Onian, Ayan, Wo). There are approximately 8,800 Bassari speakers in Senegal. It is also spoken in Guinea and Guinea-Bissau with a total of 18,000 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Northern, Eastern Senegal-Guinea, Tenda. Dialects: closely related to Budik.
- BELARUSAN** – *bel*, (syn. Belarusian, Belorussian, Bielorussian, White Russian, White Ruthenian, Byelrussian). Belarusian is spoken by 6,715,000 people in Belarus with an estimated total of 9,081,000 speakers in all countries, the majority being in Russia, Ukraine, Poland, Azerbaijan, Canada, Estonia, Kazakhstan, Latvia, Lithuania, Moldova, Tajikistan, and Turkmenistan. Classification: Indo-European, Slavic, East. Dialects: Northeast Belarusian, Southwest Belarusian, and Central Belarusian. Linguistically, Belarusian is between Russian and Ukrainian.
- BEMBA** – *bem*, (syn. Chibemba, Cibemba, Ichibemba, Icibemba, Wemba and Chiwemba). Bemba is spoken by 3,300,000 people in Zambia with a total of 3,600,000 speakers in all countries, the balance being primarily in Botswana, Democratic Republic of Congo and Malawi. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, M, Bemba. Dialects: Lembue, Lomotua, Ngoma, Nwesi, Town Bemba, Luunda, Chishinga, Kabende, Mukulu, Ng'umbo, Twa of Bangweulu, and Unga.
- BEMBÉ** – *bmb*, (syn. Beembe, Ebembe, Ibembe, Kibembe, Mbeembe). Bembé is spoken by 252,000 people in Democratic Republic of Congo; it is also used in some parts of Burundi and Tanzania. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, D, Bembe. Bembé is similar to several other languages: Lega-Mwenga dialects, Buyu, Lega-Shabunda, Zimba, Enya, Nyanga, Tembo, and Lengola.
- BENGALI** – *ben*, (syn. Banga-Bhasa, Bangala, Bangla). Bengali evolved from the Magadhi Prakrit and Sanskrit languages and is spoken in the eastern Indian subcontinent by nearly 230,000,000 people worldwide, ranking it fifth or sixth among the most spoken languages of the world. There are an estimated 100,000,000 speakers in Bangladesh; it is also spoken in India, Malawi, Nepal, Saudi Arabia, Singapore, United Arab Emirates, United Kingdom, and the United States. Classification: Indo-European, Indo-Iranian, Indo-Aryan, Eastern zone, Bengali-Assamese. Dialects or languages in the Bengali group: Central Bengali, Western Bengali, Southwestern Bengali, Northern Bengali, Rajbanshi, Bahe, Eastern Bengali, Haijong, Southeastern Bengali, Ganda, Vanga, and Chittagonian.
- BEROM** – *bom*, (syn. Birom, Berum, Gbang, Kibo, Kibbo, Kibbun, Kibyen, Shosho, Aboro, Boro-Aboro, Afango, Chenberom, Cen Berom). Berom is spoken by 300,000 people primarily within Nigeria's Plateau State. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Plateau, Beromic. Dialects: Gyell-Kuru-Vwang (Ngell-Kuru-Vwang), Fan-Foron-Heikpang, Bachit-Gashish, Du-Ropp-Rim, Hoss, and Cen.
- BÉTÉ** – *byf*. There are three Bété languages spoken in Côte d'Ivoire – Daloa, Gagnoa, and Guiberoua with 130,000, 150,000 and 130,000 speakers, respectively. Each is classified as a Niger-Congo, Atlantic-Congo, Volta-Congo, Kru, Eastern, Bete language. The specific language for the vegetable names listed in the text was not identified.

- BETE-BENDI** – btt, (syn. Bette-Bendi, Dama). Bete-Bendi is spoken by 36,800 people in the Cross River State and Obudu local government area of Nigeria. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Cross River, Bendi. Dialects: Bete (Bette, Mbete) and Bendi. Bete-Bendi is not the same as the language Bete spoken in the Nigerian state of Gongola, Bete spoken in Cameroon, or Bété of Côte d'Ivoire.
- BICOLANO, CENTRAL** – bcl, (syn. Bikol, Biko, Bicalano). Central Bicolano is spoken by 2,500,000 people in the Philippines, primarily in Southern Catanduanes, Northern Sorsogon, Albay, Camarines, Norte and Sur, and Luzon. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, Central Philippine, Bikol, Coastal, Naga. Dialects: Naga and Legaspi.
- BINUKID** – bkd, (syn. Manobo, Binukid Manobo, Binokid, Bukidnon, Western Bukidnon Manobo). Spoken by 100,000 people in north central Mindanao, southern Bukidnon, northeastern Cotabato and Agusan del Sur Provinces in the Philippines. Classification: Austronesian, Malayo-Polynesian, Southern Philippine, Manobo, North. Dialects: Kalabugao, Bukidnon, Minalawang, Esperanza, and Agusan del Sur. Binukid is similar to Higaonon.
- BLAAN, SARANGANI** – bps, (syn. Bilaan, Balud, Tumanao). Sarangani Blaan is spoken by 90,700 people on Mindanao, the Philippines. Classification: Austronesian, Malayo-Polynesian, South Mindanao, Bilic, Blaan.
- BLACKFOOT** – bla, (syn. Pikanii, Siksika, Blackfeet). Blackfoot is spoken by 5,000 people in Alberta and northern Montana. Classification: Alaic, Algonquian, Plains. Dialects: Piegan and Blood.
- BOBO MADARÉ, SOUTHERN** – bwq, (syn. Bobo Fing, Bobo Fi, Black Bobo, Bobo). The language is listed in the text as Bobo. Southern Bobo Madaré is spoken by 311,000 people primarily in the Houet Province of Burkina Faso. Classification: Niger-Congo, Mande, Western, Northwestern, Soninke-Bobo, Bobo. Dialects: Bengé, Sogokiré, Voré, Syabéré (Sya), and Zara (Bobo Dioula, Bobo Julia).
- BODO** – brx, (syn. Boro, Bodi, Bara, Boroni, Mechi, Meche, Mech, Meci, Kachari). Bodo is spoken by 600,000 of the Bodo people in the state of Assam in India and to some extent in Nepal and Bangladesh. Classification: Sino-Tibetan, Tibeto-Burman, Jingpho-Konyak-Bodo, Konyak-Bodo-Garo, Bodo-Garo, Bodo. Dialects: Chote and Mech. Bodo is an official language in Assam and is one of 22 languages with constitutional status in India.
- BOKYI** – bky, (syn. Boki, Nki, Okii, Uki, Nfua, Osikom, Osukam, Vaaneroki). Boky is spoken by 140,000 people in Nigeria and 4,000 in Cameroon. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Cross River, Bendi. Dialects: Basua (Bashua), Irruan (Erwan, Eerwee), Boje (Bojie), Kwakwagom, Nsadop, Osokom, Wula (Baswo, Okundi, Kecwan), Oku, Boorim, Oyokom, Abo (Abu), and Eastern Boky (Eastern Boki).
- BONTOC, CENTRAL** – bnc, (syn. Igorot, Bontok, Bontoc). Central Bontoc is spoken by 40,000 people in the Central Mountain Province of Luzon in the Philippines. Classification: Austronesian, Malayo-Polynesian, Northern Philippine, Northern Luzon, South-Central Cordilleran, Central Cordilleran, Nuclear Cordilleran, Bontok-Kankanay, Bontok. Dialects: Sadanga, Guinaang Bontoc, and Bayyu.
- BOSNIAN** – bos. Bosnian is a South Slavic language spoken by 2,700,000 people primarily in Bosnia and Herzegovina. It is also spoken in Serbia, Montenegro, Croatia, Albania, Kosova, and by immigrants in a number of countries. Classification: Indo-European, Balto-Slavic, Slavic, South, Western South Slavic.
- BRETON** – bre, (syn. Brezhoneg). Breton is spoken by 500,000 people in France, primarily in Western Brittany with additional speakers in Eastern Brittany and among immigrants in other countries. Classification: Indo-European, Celtic, Insular, Brythonic. Dialects: Leonais, Tregorrois, Vannetais, and Cornouaillais. Cornish and Welsh are closely related to Breton and are generally mutually comprehensible.

- BUDIK** – tnr, (syn. Bedik, Tandanke, Tendanke, Tenda, Bande, Basari du Bandemba). Budik is spoken by 3,000 people in Senegal. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Northern, Eastern Senegal-Guinea, Tenda. Budik closely resembles Bassari.
- BUGHOTU** – bgt, (syn. Bugotu, Bugoto, Bugota, Mbughotu, Mahaga). Bughotu is spoken by 4,000 people in the Solomon Islands, primarily on Santa Isabel and Furona Islands. Classification: Austronesian, Malayo-Polynesian, Central-Eastern, Eastern Malayo-Polynesian, Oceanic, Central-Eastern Oceanic, Southeast Solomonic, Gela-Guadalcanal, Bughotu. Dialects: Hageulu and Vulava.
- BUHID** – bku, (syn. Bukil, Bangon, Batangan). Buhid is spoken by 8,000 people in southern Mindoro, the Philippines. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, South Mangyan, Buhid-Taubuid.
- BULGARIAN** – bul, (syn. Balgarski). There are 8,000,000 Bulgarian speakers in Bulgaria and another 1,000,000 among immigrants in Canada, Greece, Hungary, Israel, Moldova, Montenegro, Romania, Serbia, Turkey, and the United States. Classification: Indo-European, Slavic, South, Eastern. Dialects: Palityan (Palitiani, Bogomil) and Pomak.
- BULLOM SO** – buy, (syn. Northern Bullom, Bolom, Bulem, Bullun, Bullin, Bulom, Mmani, Mandingi, Mandenyi). Bullom So is spoken by approximately 500 people in Sierra Leone and along its border with Guinea. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Southern, Mel, Bullom-Kissi, Bullom, Northern. Dialects: Mmani and Kafu.
- BULU** – bum, (syn. Boulou). Bulu is a Bantu language with 174,000 speakers in Cameroon, predominately in the Southern, Central, and Eastern Provinces and 800,000 second language speakers. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Northwest, A, Yaunde-Fang. Dialects: Yelinda, Yembana, Yengono, Zaman, and Bene.
- BURMESE** – mya, (syn. Bama, Bamachaka, Myen, Myanmar). Burmese is spoken by 32,000,000 people predominately in Myanmar. It is also spoken by a relatively small number (ca. 300,000) in Bangladesh, Malaysia, and Thailand. Classification: Sino-Tibetan, Tibeto-Burman, Lolo-Burmese, Burmish, Southern. Dialects: Merguese (Mergui, Beik), Yaw, Danu (Trauw), Burmese, and Palaw.
- BUTUANON** – btw. Butuanon is spoken by 34,500 people on Mindanao in the Philippines. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, Central Philippine, Bisayan, South, Butuan-Tausug. Butuanon is similar to Kamayo and Surigaonon.
- CAJUN FRENCH** – frc, (syn. Français Acadien, Acadian, Cajun, Cajan, Cadien). Cajun French is a dialect of French spoken by approximately 1,000,000 people in Southern Louisiana west of the Mississippi. It differs from Metropolitan French in pronunciation, vocabulary and intonation. The use of Cajun French continues to decline. Classification: Indo-European, Italic, Romance, Italo-Western, Western, Gallo-Iberian, Gallo-Romance, Gallo-Rhaetian, Oïl, French. Dialects: Marsh French, Prairie French, and Big Woods French.
- CAROLINIAN** – cal, (syn. Saipan Carolinian, Southern Carolinian). Carolinian is an Austronesian language spoken by 3,000 people on Saipan, Anatahan and Agrihan islands of the Northern Mariana Islands. Along with English and Chamorro, it is one of the three official languages of the islands. Classification: Austronesian, Malayo-Polynesian, Central-Eastern, Eastern Malayo-Polynesian, Oceanic, Central-Eastern Oceanic, Remote Oceanic, Micronesian, Micronesian Proper, Ponapeic-Trukic, Trukic. Carolinian is similar to Satawalese, Woleaian, Puluwatese, Mortlockese, Chuukese, and Ulithian.
- CATALAN-VALENCIAN-BALEAR** – cat, (syn. Català, Catalán, Bacavès, Catalanian). Catalan-Valencian-Balear is spoken by 6,473,000 people in Northeastern Spain and Catalonia and Valencia Provinces, Balearic Islands and certain other areas in Spain and by immigrants in a number of countries around the world. Classification: Indo-European, Italic, Romance, Italo-Western, Western, Gallo-Iberian, Ibero-Romance, East Iberian. Dialects: Catalan-Rousillonese (Northern Catalán), Valencian (Valenciano, Valencià), Balearic (Balear, Insular Catalan, Mallorqui, Menorqui,

- Eivissenc), Central Catalan, Algherese, and Northwestern Catalan (Pallarese, Ribagorçan, Lleidatà, Aiguavivan).
- CEBUANO** – ceb, (syn. Sugbuhanon, Sugbuanon, Visayan, Bisayan, Binisaya, Sebuano). Cebuano is an Austronesian language spoken by 20,000,000 people in the Philippines, predominately in Negros, Cebu, Bohol, Visayas and parts of Mindanao. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, Central Philippine, Bisayan, Cebuano. Dialects: Cebu, Boholano, Leyete, and Mindanao Visayan.
- CHECHEN** – che, (syn. Nokhchiin, Nokchiin Muott, Galancho). Chechan is spoken by 1,500,00 people, primarily in Chechnya. Classification: Northeast Caucasian, Nakh, Vainakh, Chechen. Dialects: Akkhiy, Chiantiy, Chiebarloy, Mialkhiy, Nokhchmakhkakhoy, Orstkhoj, Sharoy, Shuotoy and Terloy.
- CHEROKEE** – chr, (syn. Tsalagi, Tslagi). Cherokee is an Iroquoian language spoken by 15,000 to 22,500 people in Oklahoma and North Carolina. Classification: Iroquoian, Southern Iroquoian. Dialects: Elati (Lower Cherokee, Eastern Cherokee), Kituhwa (Middle Cherokee), Otali (Upper Cherokee, Western Cherokee, Overhill Cherokee) and Overhill Middle Cherokee.
- CHICKASAW** – cic, (syn. Chikashshanompa). Chickasaw is a Muskogean language. Of an ethnic population of 35,000 to 37,000, there are only around 1000 Chickasaw speakers. They are found primarily in south central Oklahoma. Classification: Muskogean, Western. Chickasaw is very similar to Choctaw, such that the two languages are considered by some as dialects of the same language.
- CHINESE, GÀN** – gan, (syn. Gan, Kan, Jiangxihua). Gàn is spoken by 20,580,000 people in Jiangxi, the southeastern corner of Hubei and parts of Anhui, Hunan and Fujian provinces of China. Classification: Sino-Tibetan, Chinese. Dialects: Chang-Jing, Yi-Liu, Ji-Cha, Fu-Guang, and Ying-Yi.
- CHINESE, HAKKA** – hak, (syn. Hakka, Hokka, Kejia, Kechia, Ke, Xinminhua, Majiahau, Tu Guangdonghau). Hakka is a primary subdivision of Chinese spoken by the Hakka ethnic group in southern China and immigrants and their descendents in many areas of the world. It is spoken by 25,725,000 in China with a total of 30,000,000 speakers worldwide. Classification: Sino-Tibetan, Chinese. Dialects: Yue-Tai (Meixian, Raoping, Taiwan, Kejia), Yuezhong (Central Guangdong), Huizhou, Yuebei (Northern Guangdong), Tingzhou (Min-Ke), Ning-Long (Longnan), Yugui, and Tonggu. Yue-Tai is the standard dialect.
- CHINESE, MANDARIN** – cmn, (syn. Mandarin, Guanhua, Beifang Fangyan, Northern Chinese, Guoyu, Standard Chinese). Mandarin Chinese is the most widely spoken language in the world with 867,200,000 speakers on mainland China and an estimated total of 885,000,000 worldwide. Classification: Sino-Tibetan, Chinese. Dialects: Huabei Guanhua (Northern Mandarin), Xibei Guanhua (Northwestern Mandarin), Xinan Guanhua (Southwestern Mandarin), and Jinghuai Guanhua (Jiangxia Guanhua, Lower Yangze Mandarin).
- CHINESE, MIN BEI** – mnp, (syn. Northern Min, Min Pei). Min Bei is spoken by 10,290,000 people in China, primarily in northern Fujian Province. Classification: Sino-Tibetan, Chinese. Dialects: Min Nan, Min Bei, Min Dong, Min Zhong, and Pu-Xian.
- CHINESE, MIN NAN** – nan, (syn. Southern Min, Minnan). Min Nan is spoken by 25,725,000 people on the mainland of China. It is also spoken in Brunei, Indonesia, Malaysia, Philippines, Singapore, Taiwan, Thailand, and the United States for a total of 46,228,000 speakers in all countries. Classification: Sino-Tibetan, Chinese. Dialects: Xiamen (Amoy), Leizhou (Lei Hua, Li Hua), Chao-Shan (Choushan, Chaozhou), Hainan (Hainanese, Qiongwen Hua, Wenchang), Longdu, and Zhenan Min.
- CHINESE, WÚ** – wuu. Wú is spoken by 77,000,000 people, second among Chinese languages to Mandarin and tenth among all languages worldwide. It is primarily spoken in Shanghai, much of Zhejiang province, and southern Jiangsu province. Classification: Sino-Tibetan, Chinese. Dialects: Taihu, Jinhua (Kinhwa), Taizhou, Oujiang, Wuzhou, Chuqu, and Xuanzhou.

- CHINESE, XIANG** – hsn, (syn. Hunan, Hunanese, Xiang, Hsiang). Xiang is spoken by 36,015,000 people in central and southwestern Hunan, Sichuan, and northern Guangxi provinces. Classification: Sino-Tibetan, Chinese. Dialects: Changyi, Luoshao, and Jishu.
- CHINESE, YUE** – yue, (syn. Yuet Yue, Gwong Dung Waa, Cantonese, Yue, Yueh, Yueyu, Baihua). Yue, commonly referred to as Cantonese in the United States, is spoken by an estimated 52,000,000 people in China, primarily in Guangdong and parts of Guangxi in the southern mainland of China, Hong Kong and Macau. It is also spoken by immigrants in Southeast Asia, Canada and the United States. Classification: Sino-Tibetan, Chinese. Yue is distinct and mutually unintelligible from the other major Chinese languages.
- CHUWABU** – chw, (syn. Chuwabo, Chwabo, Cuwabo, Cuabo, Chuabo, Chichwabo, Cicuabo, Txuwabo, Echwabo, Echuabo). Chuwabu is spoken by 786,000 people in Mozambique along the central coast. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, P, Makua (P.30). Dialects: Central Chuwabo, Nyaringa, Marale, Karungu, and Maindo.
- COMANCHE** – com. Comanche is a Uto-Aztecan language now spoken by only about 200 of the Comanche people in western Oklahoma. The language split off from the Shoshone in the early 1700s. The name comes from a Ute word for enemy or stranger. Classification: Uto-Aztecan, Northern Uto-Aztecan, Numic, Central. Comanche is close to Shoshoni. During World War II, Comanche troops in the U.S. Army conveyed sensitive operational messages in Comanche that the enemy was unable to decipher.
- CREE, PLAINS** – crk, (syn. Western Cree). Plains Cree is an Algonquian language spoken by 34,000 people in the plains region of Canada, primarily in north central Manitoba, westward across Saskatchewan and Central Alberta to the Rocky Mountains. Classification: Algic, Algonquian, Central, Cree-Montagnais-Naskapi. Dialects: Plains Cree, Western York Cree, and Northern Alberta Cree.
- CREOLE, HAITIAN FRENCH** – hat, (syn. Kreyol, Haitian, Haitian Creole, Aisyen). Haitian Creole is spoken by 6,965,000 people in Haiti and another 400,000 in the Caribbean region, Canada and the United States. It is the most widely spoken Creole language in the world. Classification: Creole, French based. Dialects: Fables and Plateau Haitian Creole.
- CRIOULO, CAPE VERDE** – kea, (syn. Kabuverdianu, Caboverdiano). Cape Verde Crioulo is a Portuguese Creole spoken by 926,000 people in the Republic of Cape Verde off the western coast of Africa and by a limited number of people in Angola, Brazil, France, Germany, Guinea-Bissau, Italy, Luxembourg, Netherlands, Portugal, Senegal, Spain, and the United States. It is considered the oldest Creole language. Classification: Portuguese based Creole. Dialects: Sotavento and Baravento.
- CRIOULO, UPPER GUINEA** – pov, (syn. Kiryol, Portuguese Creole, Kriulo, Guinea-Bissau Creole). Upper Guinea Crioulo is a Portuguese Creole spoken by 190,000 people in Guinea-Bissau and a total of 392,000 worldwide. Classification: Portuguese base Creole. Dialects: Bissau-Bolama Creole, Bafatá Creole, and Cacheu-Ziguinchor Creole.
- CROATIAN** – hrv, (syn. Hrvatski). Croatian is a South Slavic language spoken by 4,800,000 people in Croatia and 6,214,000 worldwide, many of which are in Bosnia and Herzegovina, Serbia (Vojvodina), and Montenegro but also in Austria, Germany, Hungary, Italy, Slovakia and Slovenia. Classification: Indo-European, Slavic, South, Western. Dialects: Kaykavski, Chakavski, and Shtokavski (Ijekavski), the latter being the official dialect.
- CZECH** – ces, (syn. Cestina). Czech is a West Slavic language spoken by 10,004,000 people in the Czech Republic and in a number of other countries (e.g. Austria, Bulgaria, Canada, Israel, Poland, Romania, United States, Germany, Croatia, Serbia, Slovakia, and Ukraine) for a total of 11,525,000 speakers worldwide. Classification: Indo-European, Slavic, West, Czech-Slovak. Dialects: Central Bohemian, Czecho-Moravian, Hanak, Lach (Yalach), Northeast Bohemian, and Southwest Bohemian.

- DAGAARE, SOUTHERN** – dga, (Southern Dagari, Dagari, Dagara, Degati, Dagati, Dogaari, Dagaare). Southern Dagaare is spoken by 700,000 of the Dagaaba people in Ghana; including Northern Dagara in Burkina Faso, there is a total of 1,000,000 speakers. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Central, Northern, Oti-Volta, Western, Northwest, Dagaari-Birifor, Dagaari. Dialects: Dagaare and Birifor.
- DAGBANI** – dag, (syn. Dagbane, Dagomba, Dagbamba). Dagbani is Gur language spoken by 800,000 people in Northeast Ghana. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Central, Northern, Oti-Volta, Western, Southeast. Dialect: Nanuni (Nanumba). Dagbani is similar to Mampruli, Talni, and Kusaal.
- DAKOTA** – dak, (syn. Sioux). Dakota is spoken by 5,000 Dakota Sioux in the western United States and southern Canada. Dakota is one of forty-five languages that make-up the Siouan family; Dakota and Lakota are thought by some to be dialects of the same language. Classification: Siouan, Siouan Proper, Central, Mississippi Valley, Dakota. Dialects: Dakota (Santee) and Nakota (Yankton).
- DANGME** – ada, (syn. Adangme). Dangme is a Kwa language spoken by 800,000 people in southeast Ghana, coastal areas east of Accra and inland. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Nyo, Ga-Dangme. Dialects: Ada, Ningo, Osu, Shai, Gbugbla, and Krobo.
- DANGME-KROBO** – ada-*kro*. Dangme-Krobo is a dialect of Dangme (Adangme) that is spoken in Ghana. It is listed by Burkill as Adangme-Krobo.
- DANISH** – dan, (syn. Dansk, Central Danish, Sjaelland). Danish is a Scandinavian language spoken by 5,000,000 people in Denmark and an additional 300,000 in Canada, Faroe Islands, Germany, Greenland, Iceland, Norway, Sweden, United Arab Emirates and the United States. Classification: Indo-European, Germanic, North, East Scandinavian, Danish-Swedish, Danish-Riksmal, Danish. Danish is divided into three distinct dialect groups – Eastern Danish (including Bornholm, Scania and Halland dialects), Island Danish (including Zealand, Funen, Lolland, Falster, and Møn), and Jutlandic (including North, East, West and South Jutlandic dialects).
- DENDI** – ddn, (syn. Dandawa). Dendi is a Songhai language spoken by 30,000 people in Benin and a few thousand more in other countries. Classification: Nilo-Saharan, Songhai, Southern. Dendi is closely related to Zarma and Songai.
- DIGO** – dig, (Kidigo, Chidigo). Digo is a Bantu language spoken by 217,000 of the Digo people in Kenya. It is also spoken in Tanzania with a total of 305,000 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, E, Nyika, Mijikenda. Dialects: Chinondo (Northern Digo), Ungu (Lungu, Southern Digo), Ts'imba, and Tsw'aka (Chw'aka).
- DITAMMARI** – tbz, (syn. Ditamari, Tamari, Somba). Ditammari is spoken by 20,000 people in Benin. It is also spoken in Togo with a total of 47,500 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Central, Northern, Oti-Volta, Eastern. Dialects: Eastern Ditammari and Western Ditammari.
- DOONDO** – dde, (syn. Dondo, Kidoondo). Doondo is spoken by 3,000 people in Congo. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, H, Kongo (H.10). It is a member of the Kongo cluster of languages.
- DUTCH** – nld, (syn. Nederlands, Hollands). Dutch is a West Germanic language spoken by 12,360,000 people in the Netherlands and 22,000,000 native speakers worldwide. It is also spoken in Belgium, Suriname, Aruba, and to a lesser extent in parts of France (Flanders), Germany (lower Rhine) and several former Dutch colonies and by immigrant populations throughout the world. Classification: Indo-European, Germanic, West, Low Saxon-Low Franconian. Dialects: Brabantic, East Flemish, West Flemish, Hollandic, Lumburgish, South Geldric, and Zeelandic.
- EDE NAGO** – nqg, (syn. Nago, Nagots, Nagot). Ede Nago is spoken by 200,000 people in southeastern Benin. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Defoid, Yoruboid, Edekiri. Dialects: Ede Nago is a member of the Ede language cluster.

- EDO** – bin, (syn. Bini, Benin, Addo, Oviedo, Ovioba). Edo is Benue-Congo language spoken by 1,000,000 people in Nigeria, primarily in the Bendel State and the Ovia, Oredo and Orthonmwon local government areas. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Edoid, North-Central, Edo-Esan-Ora.
- EFIK** – efi, (syn. Calabar). Efik is a member of the Ibibio dialect cluster spoken by 400,000 people in the Cross River and Akwa Ibom states of Nigeria. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Cross-River, Delta Cross, Lower Cross, Oholo, Efik.
- ENGLISH** – eng. English is a West Germanic language that evolved in England. It is spoken by 55,000,000 people in the United Kingdom, 309,000,000 to 400,000,000 as a first language worldwide, and an estimated 199,000,000 to 1,400,000,000 people as a second language. Classification: Indo-European, Germanic, West, English. There are a diverse range of dialects in the United Kingdom from Cockney to Lower Scottish. English is now generally considered the universal language of science and it is estimated that one half of the world population will be fluent in English by 2015.
- ESTONIAN** – est, (syn. Eesti, Viro). Estonian is a Finno-Ugric language spoken by 953,000 people in Estonia and a total of 1,075,000 in all countries. Classification: Uralic, Finnic. Language groups and (dialects): Northeastern Coastal Estonian (Tallinn and Narva), North Estonian (island, western, central and eastern), and South Estonian (Mulgi, Tartu, and Võru). The language is most closely related to Finnish.
- ÉWÉ** – ewe, (syn. Eibe, Ebwe, Eve, Efe, Eue, Vhe, Gbe, Krepi, Krepe, Popo). Éwé is a Niger-Congo language spoken in Ghana by 2,250,000 people and in Togo and Benin with a total of over 3,000,000 in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Left Bank, Gbe. Dialects: Anglo (Anlo), Awuna, Hudu, and Kotafoa.
- EWONDO** – ewo, (syn. Ewundu, Jaunde, Yaunde, Yaunde). Ewondo is spoken by 577,700 people in Cameroon. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Northeast, A, Yaunde-Fang (A.70). Dialects: Badjia (Bakjo), Bafeuk, Bamvele (Mvele, Yezum, Yesoum), Bane, Beti, Fong, Mbida-Bani, Mvete, Mvog-Niengue, Omvang, Yabekolo (Yebekolo), Yabeka, Yabekanga, Enoah, Evouzok.
- FARSI, EASTERN** – prs, (syn. Persian, Dari, Parsi). There are 5,600,000 Eastern Farsi speakers in Afghanistan. It is also spoken in Iran and Pakistan with a total of 7,600,000 speakers in all countries. Classification: Indo-European, Indo-Iranian, Iranian, Western, Southwestern, Persian. Dialects: Dari (Afghan, Farsi, Herati, Tajiki, Kaboli, Kabuli, Khorasani), and Parsiwan.
- FARSI, WESTERN** – pes, (syn. Persian, New Persian, Parsi, Irani). Western Farsi is spoken by 22,000,000 people in Iran and a total of 24,000,000 speakers in all countries. Classification: Indo-Iranian, Iranian, Western, Southwestern, Persian. Dialects: Sedehi, Shirazi, Ketabi, Mashadi, Shahrudi, Kazeruni, Esfahani, Kermani, Araki, Basseri, Old Shirazi, Shirazjahrenomi, Yazdi, Qazvini, Tehrani, Bandari, Kashani, and Mahalhamadani.
- FIJIAN** – fij, (syn. Fiji, Standard Fijian, Eastern Fijian, Nadroga, Nadronga). Fijian is an Austronesian language spoken by 330,000 people in Fiji and a total of 334,000 speakers in all countries. Classification: Austronesian, Malayo-Polynesian, Central-Eastern Eastern Malayo-Polynesian, Oceanic, Remote Oceanic, Central Pacific, East Fijian-Polynesian, East Fijian. Dialects: Kadavu, Southeast Viti Levu, Bau, Northeast Viti Levu, Central Vanua Levu, Northeast Vanua Levu, Southeast Vanua Levu, and West Vanua Levu.
- FILIPINO** – fil, (syn. Pilipino). Filipino is based on Tagalog and is spoken throughout the Philippines. Classification: Austronesian, Malayo-Polynesian, Meso Philippine, Central Philippine, Tagalog.
- FINNISH** – fin, (syn. Suomi, Suomea). Finnish is a Finno-Ugric language spoken by 4,700,000 people in Finland. It is also spoken in Canada, Estonia, Norway, Russia, Republic of Karelia, Sweden and the United States, with a total of 5,233,000 speakers in all countries. Classification: Uralic, Finnic. Dialects: Southwestern Finnish, Häme (Tavast), south Pohjanmaa, Central and North Pohjanmaa, Peräpohja, Savo (Savolax), and Southeastern Finish (Finnish Karjala, Finnish Karelian).

- FON** – fon, (syn. Fo, Fongbe, Fonnu, Fogbe, Dahomeen, Djedji). Fon is part of the Gbe language cluster spoken by 1,700,000 people in Benin and 1,735,000 in all countries (e.g. Togo). Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Left Bank, Gbe, Fon. Dialects: Agbome, Arohun, Gbekon, and Kpase.
- FRENCH** – fra, (syn. Français). French is spoken by 51,000,000 people in France. It is also spoken in a diverse range of other countries for a total of 64,858,000 speakers in all countries. Classification: Indo-European, Italic, Romance, Italo-Western, Western, Gallo-Iberian, Gallo-Romance, Gallo-Rhaetian, Oïl. Dialects: Standard French, Norman (Normand), Angevin, Berrichon, Bourbonnais, Bourguignon, Franc-Comtois, Gallo, Poitevin, Santongeais, and Lorraine.
- FULFULDE** – *ful*. The eastern, east central, and west central dialects of the Fula languages are called Fulfulde. They include Adamawa (fub), Bagirmi (fui), Maasina (ffim), and Borgu (fub) Fulfulde. The language for the crops listed was not specified though based on location (Nigeria and Cameroon) the names may represent both Borgu and Adamawa Fulfulde.
- FULFULDE, ADAMAWA** – fub, (synonyms for Adamawa Fulfulde vary with location. In Cameroon they are: Adamawa, Fulani, Peul, Peulh, Ful, Fula, Fulbe, Boulbe, Eastern Fulani, Fulfulde, Foulfoulde, Pullo, Gapelta, Pelta Hay, Domona, Pladina, Palata, Paldena, Dzemay, Zemay, Zaakosa, Pule, Taareyo, Sanyo, and Biira while in Nigeria common synonyms are: Eastern Fulfulde, Fulatanchi, Fulani, Fula, Fillanci, Fula-Fulfulde). Adamawa Fulfulde is a Fula language spoken by the Fula people over a relatively extensive area of West Africa. The western dialects are called Pulaar (Pular) and the eastern, east central, and west central dialects are called Fulfulde. Adamawa Fulfulde is an east central form of Fula that is spoken in parts of Cameroon (700,000 speakers), Chad (128,000), Sudan (90,000) and Nigeria where the total number of Fulfulde (Nigerian Fulfulde) speakers is 7,611,000. Classification: Niger-Congo, Atlantic-Congo, Atlantic, Northern, Senegambian, Fulani-Wolof, Fula, Eastern.
- GA** – gaa, (syn. Amina, Gain, Accra, Acra). Ga is a Kwa language spoken by 600,000 people in southeastern Ghana around Accra and is one of 16 languages the Ghanaian government uses in publishing. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Kwa, Nyo, Ga-Dangme.
- GADDANG** – gad, (syn. Cagayan). Gaddang is spoken by 30,000 people on Luzon, the Philippines. Classification: Austronesian, Malayo-Polynesian, Northern Philippine, Northern Luzon, Northern Cordilleran, Ibanagic, Gaddang. Many Gaddang speakers also use Ilocano.
- GAELIC, IRISH** – gle, (syn. Irish, Erse, Gaeilge). Irish is a Goidelic language spoken by 260,000 people in Ireland and a total of 355,000 speakers in all countries. Classification: Indo-European, Celtic, Insular, Goidelic. Dialects: Munster-Leinster (Southern Irish), Connacht (Western Irish), and Donegal (Ulster, Northern Irish). It is now spoken by only a small minority of the population.
- GAELIC, MANX** – glv, (syn. Manx, Gaelg, Gailck). Manx is a Goidelic language previously spoken on the Isle of Man. The language essentially died out in the early 1970s but has been the subject of revival efforts such that there are currently around 100 speakers. Classification: Indo-European, Celtic, Insular, Goidelic. Dialects: Manx is close to Scottish Gaelic.
- GAELIC, SCOTTISH** – gla, (syn. Gàidhlig, Gaelic, Scots Gaelic, Albannach, Gaidhlig, Erse). Scottish is a Goidelic language spoken by 58,000 people in the United Kingdom, in particular around Glasgow, the north and central counties of the Ross region of Scotland, and on Skye and the Hebrides. Classification: Indo-European, Celtic, Insular, Goidelic. Dialects: East Sutherlandshire.
- GALICIAN** – glg, (syn. Galego, Gallego). Galician is spoken by 3,173,000 people in the Galicia region of Spain and neighboring areas and in northern Portugal. Its close similarity to Portuguese has simulated an ongoing debate as to whether it is simply a dialect of Portuguese or a distinct language. Classification: Indo-European, Italic, Romance, Italo-Western, Western, Gallo-Iberian, Ibero-Romance, West Iberian, Portuguese-Galician. Dialects: Eastern, Central, and Western.
- GANDA** – lug, (syn. Luganda, Ugandan). Ganda, also commonly called Luganda, is spoken by 3,016,000 people in Uganda, especially in southern Uganda in the Buganda region. There are an additional 1,000,000 second language users. Classification: Niger-Congo, Atlantic-Congo, Volta-

- Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, J, Nyoro-Ganda. Dialects: Kooki (Olukooki), Sese (Olusesse), Luvuma, and Ludiopa.
- GBAYA** – gya, (syn. Baya, Gbaya Nord-Ouest, Northwest Gbaya). - KONKOMBA** – xon, (syn. Likpakpaln, Kpankpan, Kom Komba). Konkomba is spoken by 500,000 of the Konkomba people in Ghana and in Togo for a total of 550,000 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Central, Northern, Oti-Volta, Gurma. Dialects: Lichabool-Nalong, Limonkpel, Linafiel, Likoonli, and Ligbeln.
- KONO** – kno, (syn. Konnoh). Kono is spoken by 190,000 of the Kono people in the Eastern Province of Sierra Leone. Classification: Niger-Congo, Mande, Western, Central-Southwestern, Central, Manding-Jogo, Manding-Vai, Vai-Kono. Dialects: Northern Kono (Sando), and Central Kono (Fiama, Gbane, Gbane Kando, Gbense, Gorama Kono, Kamara, Lei, Mafindo, Nimi Koro, Nimi Yama, Penguia, Soa, Tankoro, Toli).
- KOONGO** – kng, (syn. Kongo, Kikongo, Congo, Kikoongo). Koongo is spoken by 1,000,000 people in the Democratic Republic of the Congo, predominately in the Bas-Congo Province. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, H, Kongo (H.10). Dialects: South Congo, Central Kongo, West Kongo (Fiote, Fioti), Bwende (Buende), East Kongo, Southeast Kongo, and Nzamba (Dzamba).
- KOREAN** – kor, (syn. Hanguohua, Hanguk Mal). Korean is spoken by 42,000,000 people in South Korea, 20,000,000 in North Korea and a total of 67,019,000 speakers in all countries. Classification: Language isolate (no discernable genealogical relationship with other languages). Dialects: Seoul (Kangwondo, Kyonggido), Ch'ungch'ongdo (North Ch'ungch'ong, South Ch'ungch'ong), Kyongsangdo (North Kyongsangdo, South Kyongsangdo), Chollado (North Chollado, South Chollado), and Cheju Island.
- KORO** – kfo, (syn. Koro Jula). Koro is spoken by 40,000 people in Cote d'Ivoire. Classification: Niger-Congo, Mande, Western, Central-Southwestern, Central, Manding-Jogo, Manding-Vai, Manding-Mokole, Manding, Manding-East, Southeastern Manding, Maninka-Mori.
- KRIO** – kri, (syn. Creole, Patois). Krio is spoken by 472,000 of the Krio people in Sierra Leone and a total of 481,000 speakers in all countries. Krio is a Creole language of the descendants of freed slaves from the West Indies, Britain and the United States. Classification: Creole, English based, Atlantic, Krio. Dialects: Aku.
- KUNG-EKOKA** – knw, (syn. Ekoka-!Xû, Kung, !Kung, !Ku, !Xu, !Hu, Qxü, !Xun, !Khung, !Xung). Kung-Ekoka is spoken by 1,757 of the Kung Bushmen in Namibia and a total of 6,899 in all countries. Classification: Khoisan, Southern Africa, Northern. Dialect: Akhoe.
- KURANKO** – knk, (syn. Koranko). Kuranko is spoken by 250,000 of the Kuranko people in the Northern Province of Sierra Leone. It is also spoken in Guinea for a total of 305,000 speakers in all countries. Classification: Niger-Congo, Mande, Western, Central-Southwestern, Central, Manding-Jogo, Manding-Vai, Manding-Mokole, Mokole. Dialects: Barrawa, Nieni, Mankaliya, Sambaya, Ney, Sengbe, and Mongo.
- KURDISH, NORTHERN** – kmr, (syn. Kurmanji, Kurmancî, Kirmancî, Kermancî, Kurdi, Kurdî). Northern Kurdish is spoken by 3,950,000 people in Turkey. It is also spoken in Iraq, Iran and to

- a lesser extent elsewhere for a total of 9,113,000 speakers in all countries. Classification: Indo-European, Indo-Iranian, Iranian, Western, Northwestern, Kurdish. Dialects: Boti (Botani), Marashi, Ashiti, Bayezidi, Hekari, and Shemdinani.
- KWANGALI** – kwn, (syn. Sikwangali, Rukwangali, Kwangari, Kwangare). Kwangali is a Bantu language spoken by 73,000 of people in the Okavango Region of Namibia. It is also spoken in Angola for a total of 84,000 in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, K, Kwangwa (K.40) Dialect: Sambyu (Shisambyu, Sambiu, Sambio).
- KWANYAMA** – kua, (syn. Ochikwanyama, Kuanyama, Ovambo, Humba, Kwanjama, Kwancama, Otjiwambo, Owambo). Kwanyama is spoken by 421,000 people in Angola and 250,000 in Namibia. Classification: Niger-Congo, Atlantic-Congo, Benue-Congo, Bantoid, Southern, Bantu, Central, Zone R, Kwanyama. Dialects: similar to Ndonga and Kwambi.
- KWÉYÒL** – acf, (Patwa, Patois, Saint Lucian Creole French, Lesser Antillean Creole French). Kwéyòl is a French Creole spoken by 158,000 people in Saint Lucia. It is also spoken in Dominica, France, Grenada, Guyana, Trinidad, and Tobago for a total of 357,000 speakers in all countries. Classification: Creole, French based.
- LADINO** – lad, (syn. Judeo Spanish, Judæo-Spanish, Judæo-Espagnol, Judeoespañol, Sefardi, Dzhudezmo, Judezmo, Spanyol, Haquetiya). Ladino or Judæo-Spanish is a Romance language spoken by 100,000 Sephardic Jews in Israel and in Greece, Turkey and a number of countries around the world for a total of 110,000 speakers in all countries. Classification: Indo-European, Italic, Romance, Italo-Western, Western, Gallo-Iberian, Ibero-Romance, West Iberian, Castilian. Dialects: Judezmo (Judyo, Jidyó), Ladino, and Haquetiya (Haketia, Haketiya, Hakitia).
- LAHU** – lhu, (Lohei, Lahuna, Laku, Kaixien, Namen, Mussuh, Muhso, Musso, Mussar, Moso). Lahu is a Tibeto-Burman language spoken by 411,000 of primarily the Laho people in the Yunnan Province of China. It is also spoken in Myanmar, Thailand, and Laos for a total of 577,000 speakers in all countries. Classification: Sino-Tibetan, Tibeto-Burman, Lolo-Burmese, Loloish, Southern, Akha, Lahu. Dialects: Na (Black Lahu, Musser Dam, Northern Lahu, Loheirn), Nyi (Red Lahu, Southern Lahu, Musseh Daeng, Luhishi, Luhushi), and Shehleh.
- LAKOTA** – lkt, (Lakhota, Teton, Teton Sioux). Lakota is a Siouan language spoken by 6,000 of the Lakota people found in North and South Dakota, northern Nebraska and Montana and southern Minnesota. Classification: Siouan, Siouan Proper, Central, Mississippi Valley, Dakota. Dialect: Brulé.
- LAO** – lao, (syn. Laotian Tai, Laotian, Phou Lao, Eastern Thai, Lum Lao, Lao Wiang, Lao Kao, Rong Kong, Tai Lao, Lao-Tai, Lào, Lao-Lum, Lao, Noi). Lao is a member of the Kradai language family spoken primarily by 3,000,000 the Lao people in Laos. It is also spoken in the Isan Region in northeastern Thailand, a number of other countries (e.g. France, Canada, China, Australia, United States) and as a second language by a number of ethnic groups in Thailand for a total of 3,188,000 speakers. Classification: Tai-Kadai, Kam-Tai, Be-Tai, Tai-Sek, Tai, Southwestern, Lao-Phutai. Dialects: Luang Prabang, Vientiane (Wiang Jan), Savannakhet (Suwannakhet), Pakse, Lao-Kao, Lao-Khrang.
- LATVIAN** – lav, (syn. Lettish, Lettisch). Latvian is a Baltic Language spoken by 1,394,000 people in Latvia and in a number of other countries for a total of 1,544,000 speakers. Classification: Indo-European, Baltic, Eastern. Dialects: West Latvian (Central Latvian) and East Latvian (High Latvian, Latgalian).
- LIMBA**– lia, (syn. West Central Limba, Yimba, Yumba). West Central Limba is spoken by 335,000 people in Sierra Leone. Other West African Limba languages include East Limba (lma) spoken in Sierra Leone and Limba or Malimba (mzd) spoken in Cameroon. Classification (West Central Limba): Niger-Congo, Atlantic-Congo, Atlantic, Southern, Limba. Dialects: Western Limba (Tonko, Sela) and Central (Tamiso, Gbongogbo).

- LISU** – lis, (syn. Lissu, Lisaw, Li-Shaw, Li-Hsaw, Lu-Tzu, Lesuo, Li, Lishu, Liso, Leisu, Leshuopa, Loisu, Southern Lisu, Yao Yen, Yaw-Yen, Yaw Yin, Yeh-Jen, Chung, Cheli, Chedi, Lip`a, Lusu, Khae). Lisu is spoken by 580,000 people in China and 723,000 in all countries. Classification: Sino-Tibetan, Tibeto-Burman, Lolo-Burmese, Loloish, Northern, Lisu. Dialects: Hau Lisu (Flowery Lisu), Pai Lisu (White Lisu), and Lu Shi Lisu.
- LITHUANIAN** – lit, (syn. Lietuviskai, Lietuvi, Litovskiy, Litewski, Litauische). Lithuanian is a Baltic language related to Latvian and Old Prussian that is spoken by 2,955,000 people in Lithuania and a total of 3,125,000 in all countries. Classification: Indo-European, Baltic, Eastern. - YALA** – yba, (syn. Iyala). Yala is a member of the Niger-Congo language family that is spoken by 50,000 people in Nigeria, primarily in the Cross River State and the Ogoja, Obubra, and Ikom local government areas. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Idomoid, Akweya, Etulo-Idoma, Idoma. Dialects: Nkum (Yala Ikom), Nkum Akpambe (Yala Obubra), and Yala Ogoja.
- YALUNKA** – yal, (syn. Yalunke, Djallonke, Kjalonke, Dialonke, Jalonke, Jallonka). Yalunka, a Mande language, is spoken by 30,000 of the Yalunka people in Sierra Leone. It is also spoken in Guinea, Mali, and Senegal with a total of 55,000 speakers in all countries. Classification: Niger-Congo, Mande, Western, Central-Southwestern, Central, Susu-Yalunka. Dialects: Sulima, Firia, and Musaia.
- YAO** – yao, (syn. Chiyao, Achawa, Adsawa, Adsoa, Ajawa, Ayawa, Ayo, Ayao, Djao, Haiiao, Hiao, Hyao, Jao, Veiao, Wajao). Yao is spoken by 1,000,000 people in Malawi. It is also spoken in Mozambique, Tanzania and Zambia with a total of 1,942,000 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, P, Yao (P.20). Dialect: Mangoche.
- YIDDISH** – ydd, (syn. Judeo-German, Eastern Yiddish). Yiddish is a Germanic language spoken by 215,000 people in Israel. It is also spoken in Argentina, Australia, Belarus, Belgium, Brazil, Canada, Costa Rica, Estonia, Hungary, Latvia, Lithuania, Moldova, Panama, Poland, Puerto Rico, Romania, Russia, South Africa, Ukraine, Uruguay, United Kingdom, United States and elsewhere by a total of 3,142,000 speakers in all countries. Written Yiddish uses the Hebrew alphabet. Classification: Indo-European, Germanic, West, High German, Yiddish. Dialects: Southeastern Yiddish, Mideastern Yiddish, and Northeastern Yiddish.
- YOM** – pil, (syn. Pila, Pilapila, Kpilakpila). Yom is spoken by 74,000 people in Benin. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, North, Gur, Central, Northern, Oti-Volta, and Yom-Nawdm.

Chapter 6

YORUBA – yor, (syn. Yooba, Yariba). Yoruba is spoken by 18,850,000 of primarily the Yoruba people in Nigeria. It is also spoken in Benin and Togo in West Africa and by immigrants in the United Kingdom and United States with a total of 19,327,000 speakers in all countries. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Defoid, Yoruboid, Edekiri. Dialects: Oyo, Ijesha, Ila, Ijebu, Ondo, Wo, Owe, Jumu, Iworro, Igbonna, Yagba, Gbedde, Egba, Akono, Aworo, Bunu (Bini), Ekiti, Ilaje, Ikale, and Awori.

ZARMA – dje, (syn. Dyerma, Dyarma, Dyabarma, Adzerma, Djerma, Zabarma, Zarbarma, Zarmaci). Zarma, a member of the Songhay language grouping, is spoken by 2,100,000 people in Niger, primarily in the southwestern part of the country and a limited number elsewhere. Classification: Nilo-Saharan, Songhai, Southern. Dialect: Kaado.

ZULU – zul, (syn. Isizulu, Zunda). Zulu is a Bantu language spoken by 9,200,000 of the Zulu people in South Africa, especially in Zululand and northern Natal. It is also spoken in Botswana, Lesotho, Malawi, Mozambique, and Swaziland. Classification: Niger-Congo, Atlantic-Congo, Volta-Congo, Benue-Congo, Bantoid, Southern, Narrow Bantu, Central, S, Nguni (S.40). Dialects: Lala and Qwabe; similar to Swazi and Xhosa.

ZUNI – zun, (syn. Zunni, Shiwi'ma). Zuni is spoken by 9,651 of the Zuni Indian tribe in western New Mexico and eastern Arizona. Classification: language isolate.

Chapter 7. Language synonyms¹

- Abakwariga – see Hausa
Aborlan Tagbanwa – see Tagbanwa
Aboro – see Berom
ABUA – abn
Abuan – see Abua
Abyssinian – see Amharic
Acadian – see Cajun French
Accra – see Ga
Achawa – see Yao
Acra – see Ga
Adal – see Afar
Adamawa – see Fulfulde, Adamawa
Adangme – see Dangme
Adare – see Harari
Adarinnya – see Harari
Addo – see Edo
Adere – see Harari
Aderinya – see Harari
Adja – see Aja
Adsawa – see Yao
Adsoa – see Yao
Adzerma – see Zarma
Aeta Negrito – see Sambal, Botolan
Afan Oromo – see Oromo, West Central
Afango – see Berom
AFAR – aar
Afar Af – see Afar
Afaraf – see Afar
Af-Maxaad Tiri – see Somali
AFRIKAANS – afr
Af-Soomaali – see Somali
AGAT – *afa*
Agni – see Anyin
AGTA, CASIGURAN DUMAGAT – dgc
Ahka – see Akha
Aini – see Akha
Aiysyen – see Creole, Haitian French
AJA – aja
Ajawa – see Yao
Ajja – see Aja
Ak'a – see Akha
Aka – see Akha
AKAN – aka
AKAN-AKUAPEM – aka-*aub*
- AKAN-ASANTE** – aka-*aag*
AKAN-FANTE – aka-*fat*
AKHA – ahk
Aklan – see Aklanon
Aklano – see Aklanon
AKLANON – akl
Aklanon-Bisayan – see Aklanon
AKPA – akf
AKWA – akw
Akweya – see Akpa
Alada – see Gun
Alada-Gbe – see Gun
Alante – see Balanta-Kentohe
Albanian – see Albanian, Tosk
ALBANIAN, TOSK – als
Albannach – see Gaelic, Scottish
Alealum – see Malayalam
ALEUT – ale
Amanung Sisuan – see Pampangan
Amarigna – see Amharic
Amarinya – see Amharic
Ambo – see Ndonga
AMHARIC – amh
Amina – see Ga
Anatolian – see Turkish
Andhra – see Telugu
ANDO – *ang*
Anguru – see Lomwe, Malawi
Annamese – see Vietnamese
ANUAK – anu
Anyi – see Anyin
ANYIN – any
Anyuak – see Anuak
Anywa – see Anuak
Anywak – see Anuak
Apabhramsa – see Maithili
APACHE, JICARILLA – apj
Apurawnon – see Tagbanwa
ARABIC – arb
ARMENIAN – hye
Armjansik Yazyk – see Armenian
Arnaut – see Albanian, Tosk
Asambe – see Assamese
Asami – see Assamese

¹ The names of the languages listed in bold capitals are indicated as correct in *Ethnologue – Languages of the World*, 15th edition. Since many languages have more than one name, their synonyms are also listed and keyed back to the appropriate name. Each language has a three letter ISO/DIS 639-3 identity code; in instances where the identity of the language is not definitive, a temporary code has been assigned and is in italics.

Chapter 7

- Asamiya – see Assamese
Asanga – see Sanga
ASSAMESE – asm
ATTA, PAMPLONA – att
Atto – see Giangan
Ayan – see Bassari
Ayao – see Yao
Ayawa – see Yao
Ayo – see Yao
Ayta Hambali – see Sambal, Botolan
Azerbaijani – see Azerbaijani, Northern
AZERBAIJANI, NORTHERN – azj
Azerbaydzhani – see Azerbaijani, Northern
Azeri Turk – see Azerbaijani, Northern
Baatombu – see Baatonum

Bangaru – see Hindi
Banginda – see Gbaya
Bangkalan – see Madura
Bangkalon – see Madura
Bangwe – see Sena
Bankoti – see Konkani
Banta – see Themne
Bantayan – see Hiligaynon
Banten – see Javanese
Banten – see Sunda
Baol – see Wolof
Bape – see Bafia
Baraa – see Mandjak
Barain – see Gourmantché
Barani – see Gourmantché
Baraniire – see Gourmantché
Baravento – see Crioulo, Cape Verde
Barkoundouba – see Gourmantché
Barrawa – see Kuranko
Basan – see Izon
Basco Ivatan – see Ivatan
Bashua – see Bokyi
Bassa Nge – see Nupe-Nupe-Tako
Bassan – see Izon
Basseri – see Farsi, Western
Basua – see Bokyi
Baswo – see Bokyi
Batad – see Ifugao
Bathi – see Panjabi, Eastern
Batu Sangkar-Pariangan – see Minangkabau
Bau – see Fijian
Bautzen – see Sorbian, Upper
Bavarian – see German
Bawean – see Madura
Bawihka – see Sumo-Mayangna
Bay of Plenty – see Maori
Bayag – see Isnag
Bayash – see Romanian
Bayezidi – see Kurdish, Northern
Bayot – see Jola-Fonyi
Bayyu – see Bontoc, Central
Bazaar Malay – see Malay
Bazezuru – see Shona
Bazuzura – see Shona
Beik – see Burmese
Beledugu – see Bamanankan
Benaadir – see Somali
Bendi – see Bete-Bendi
Bene – see Bulu
Benge – see Bobo Madaré, Southern
Berad – see Telugu
Berrichon – see French
Bete – see Bete-Bendi
Beti – see Ewondo
Betsileo – see Malagasy
Bette – see Bete-Bendi
Bezanzano – see Malagasy

- Bhaca – see Xhosa
 Bhandari – see Konkani
 Bhatneri – see Panjabi, Eastern
 Bhatti – see Panjabi, Eastern
 Bhatyiana – see Panjabi, Eastern
 Bhumij – see Mundari
 Bhumij Munda – see Mundari
 Bhumij Thar – see Mundari
 Big Woods French – see Cajun French
 Bila – see Tsonga
 Bini – see Yoruba
 Binli – see Hanunoo
 Birifor – see Dagaare, Southern
 Bissau-Bolama Creole – see Crioulo, Upper
 Guinea
 Biwangan – see Maguindanao
 Bizkaian – see Basque
 Black Lahu – see Lahu
 Blood – see Blackfoot
 Blue Miao – see Hmong-Njua
 Bō – see Maninkakan, Eastern
 Bobo Dioula – see Bobo Madaré, Southern
 Bobo Julia – see Bobo Madaré, Southern
 Bogandé – see Gourmantché
 Bogomil – see Bulgarian
 Bogor – see Sunda
 Boholano – see Cebuano
 Boje – see Bokyi
 Bojie – see Bokyi
 Bok – see Mandjak
 Bokod – see Ibaloi
 Boma – see Izon
 Bombali – see Themne
 Bompoka – see Nicobarese, Car
 Bomvana – see Xhosa
 Bonny-Opobo – see Igbo
 Boorim – see Bokyi
 Borcala – see Azerbaijani, Northern
 Bornholm – see Danish
 Botani – see Kurdish, Northern
 Boti – see Kurdish, Northern

Appendix I. Diacritics

English is one of the few languages that utilizes the standard 26 letters of the Latin alphabet. Many other Latin alphabet-based languages supplement the sounds that can be represented by the letters using diacritics (e.g. á, ã, â, ä, å, ã, ä, å, à, á, â, ã, ä, å, ä, á, à, ã, ä, å) (Wells, 2010). Diacritics used in the text are listed below; however, their effect on pronunciation is not consistent across languages. As a consequence, it is best to consult an explanation of the use of diacritics for each language.

Acute accents (e.g. á, â, é, í, ó, í, ñ, í, ú, ý) have a wide range of applications depending upon the language. For example, in certain languages (e.g. Lakota, Portuguese, Spanish) they represent stressed vowels. In certain other languages, they indicate a long vowel (e.g. Czech, Hungarian, Irish) and in Polish palatalization. In some African languages, an acute accent over a vowel typically indicates a rising tone, while over *d*, *k*, or *t* in Senegalese languages, it hardens and shortens the letter. A double acute (e.g. ő, ű) is primarily used in Hungarian and acts as a combination of an acute and a diaeresis, giving a longer sound to the respective letters.

A grave accent (e.g. à, è, ì, ò, ù, ÿ), like an acute accent, has various effects on pronunciation depending upon the language. In French a grave accent indicates a half-open vowel; in Italian and Catalan it is a stressed vowel; in Scottish Gaelic a long vowel; and in Vietnamese it denotes a low tone. In a number of the African languages listed, a grave accent over a vowel denotes a falling tone.

In certain African languages, a double grave accent (e.g. à, è, ì, ò, ù) over a vowel indicates a deeper falling tone when following a syllable already under a falling tone. Likewise, in Serbian, Croatian and Slovenian, a double grave accent indicates a falling tone.

A circumflex accent (e.g. â, ê, î, ô, û, ð, ÿ) in Welsh denotes a long vowel including *ŵ* and *ÿ* which are also vowels. In Chichewa, *ŵ* is a bilabial fricative, while in Portuguese *â*, *ê*, *î*, and *ô* are nasalized vowels. In Turkish, a circumflex appears over an *a* or *u* when a preceding consonant (e.g. *k*, *g*, *l*), is pronounced as a palatal plosive, while in certain African languages a circumflex accent over a vowel indicates a rising tone. In Potawatomi, *ê* is pronounced as in the English word *bet*, *î* as in *bit* and *û* as in *luck* (Smith, 1933), while in Kiowa the circumflex (*î*, *ï*) indicates a combination of an acute and a grave accent.

A inverted circumflex, also known as a hachek (e.g. č, ě, š, ž), is represented by a relatively sharp wedge over the letter. In Czech, Slovak, Croatia, Slovene, and certain other languages, *š* and *ž* indicate palato-alveolar fricatives. In Amharic, the grapheme *č* denotes the voiceless postalveolar affricate consonant, similar to *ch* in the English word *chocolate*, *ğ* signals [dʒ] and *š* signals [ʃ]. In Czech, *č* is a voiceless affricate while a hachek over an *e* indicates palatalization of the preceding consonant. In several of the African languages listed, a hachek over a consonant indicates a hardened aspiration, a fricative or sibilant; however, when over a vowel it denotes a falling tone in the Nigerian languages.

The breve (e.g. ă, ě, ĭ, ȓ, ȕ) differs from the hachek in that it is more rounded. In several languages, it denotes the shortness of a vowel. For example, in Romanian *ă* indicates a mid central vowel. In several of the African languages the presence of a breve over a vowel shortens it.

A macron over a vowel (e.g. ā, ē, ī, ō, ū) indicates a long vowel in Maori, Hawaiian, and Latvian, while in Yoruba it indicates a mid tone. In certain African languages, a macron lengthens a vowel, though more commonly the vowel is doubled to show length. In Pinyin, ā, ē, ī, ō, ū, ū are used to indicate the

Appendix II. Unique letters/symbols and alphabetization

Unique letters and symbols

In some instances, unique letters are required for representing distinctive sounds that cannot be reproduced using Latin letters and diacritics. For example the palatoalveolar fricative (ʃ) may be represented by *sh* in English or š, ṣ̌ or ş, depending upon the language. In English certain sounds can be represented by combining two letters [sh or ng], called a digraph. In other languages, however, these adjacent letters may sometimes be pronounced separately. In other instances, it is not possible to accurately represent the required sound with existing letters or diacritics, in which case, additional letters are required. For example in the Khoisan languages clicking sounds are used which cannot be reproduced using the Latin alphabet. In addition to new letters, ligatures (the fusion of two letters such as æ) are routinely used in some languages.

Several West African languages use additional letters (e.g. ŋ, ɲ, ə, ε, ɔ). Where possible the pronunciation indicated by the letter is listed below, typically by language or language groups. In a few instances, symbols used from several sources lack descriptions of their pronunciation and an explanation could not be found. For more detailed explanation of unique characters, one should utilize a dictionary for the language in question.

Afro-roman characters used in a number of African languages

- ɓ – a glottalised *b*
- ɸ – an implosive *b*
- ɖ – a post-alveolar *d*
- ɗ – a glottalised *d*
- ɗ̥ – an implosive *d*
- ɛ – an open *e*
- ə – a central vowel (schwa), as at the end of English *soda*
- f* – a bilabial *f*
- ɣ – a voiced velar fricative
- ḱ – a glottalized *k*
- ɲ – a palatal nasal *ny*
- ŋ – a velar nasal as the *ng* in English *sing*
- ɔ – a short back vowel as in English *brought*
- ɔ̄ – a short back vowel in Nigerian languages
- ʃ – *sh*
- ɣ̣ – a glottalised *y*

Amharic (see Kane, 1990)

- g^w – the superscript *w* indicates a voiced labiovelar stop.
- ʔ – represents a voiceless glottal stop.

Azerbaijani, Kazakh, Kirghiz, Tatar

- ɨ – indicates a retracted *i* sound.

Appendices

Herero is a Bantu language and like the Khoisan languages of southern Africa, uses clicks as speech sounds. The primary sounds are symbolized using ! , ≠ (or ǀ), and ! . Many of the Bantu languages (e.g. Zulu) use the letters *c*, *x*, and *q* for dental, lateral, and alveolar clicks.

! – represents an alveolar click which is made using the tip of the tongue which is pulled down abruptly from the roof of the mouth.

≠ – or more correctly ǀ , is a palatal click that is made with a flat tongue that is pulled down abruptly from the roof of the mouth. It makes a softer sound clicking sound than the ! .

Comanche

ʔ – represents a glottal stop.

German

β – the German *eszett* or *scharfes* symbol has been replaced in modern German by *ss*.

Khmer, Central

: – when following a vowel, it indicates a lengthening of the vowel sound.

Kung-Ekoka is synonymous with **!KUNG**, a member of the Khoisan language family that uses click sounds. The sound is created by sucking on the molars in the back of the mouth to create a sound (*tchick*) somewhat like that used in English to get a horse moving.

// or ǀ – a pulmonic click.

! – click consonant.

Lahu

Diacritical marks in some versions of Lahu are placed one space after each vowel.

\wedge – represents a rising tone.

\vee – represents a falling tone.

ˉ – represents a very low tone.

Lakota

η – The lower case Greek letter η (eta) is used in popular Lakota orthography to indicate the nasality of a preceding vowel.

Lao

: – when following a vowel, it indicates a lengthening of the vowel sound.

Nama-Damara

- ! – represents a post-alveolar click release (sharp click).
- // – represents affricated lateral clicks.
- / – represents affricated dental clicks.
- – represents a stem that occurs with a prefix.

Paiute, Southern (Martineau, 1992)

- ’ – an apostrophe indicates a glottal stop.
- ˊ – an acute accent mark is used to distinguish a long vowel from a short one.

Potawatomi (Smith, 1933)

- ’ – an apostrophe indicates a glottal stop.

Pume

- t^h – a superscript *h* indicates aspiration of the sound.

Samoan and Raratongan

- ˀ – indicates a glottal unaspirated voiceless stop.

Somali

- d – indicates an implosive dental stop.

Tibetan

- ɔ – though not specified in the source, it probably represents a low mid-back rounded vowel / alternatively, a high central unrounded vowel.

Vietnamese

- [] – Letters within brackets represent transcriptions of Vietnamese characters (e.g. [aws] = ă, [oos] = ô, [oox] = õ, [oo] = ô, etc.).

Warma

- ð – indicates the voiced *th* sound in the English word *thus*.

Yom

- μ – is thought to represent a syllabic nasal sound as in the *om* of the English word *bottom*.
- τ – though not indicated by the source, it probably indicates a partially voiced *t* sound when adjacent to an *m* or *r*.

Zuni

/ – a slash represents a glottal stop in Zuni that is unaspirated and voiceless (Newman, 1958).

Italicization

Certain prefixes are italicized in several African languages, the use of which varies depending upon the language and source. In a number of cases, the meaning of italicization in vernacular name lists is not indicated. In some instances, the use of italics indicates singular versus plural definite for the plant or for the useful part of the plant. For example, in Themne the prefixes *a-*, *am-*, *an-* indicate singular while *ε-* indicates plural; *ka-* singular for the useful part of the plant and *ta-* the plural; *ma-* the fruit (Deighton, 1957). In various Niger-Congo languages the vernacular name may begin with an italicized *n*, *m*, *g* or *k* followed by a specific letter (e.g., *mb*, *nd*, *ng*, *nj*, *gb* or *kp*) which indicates an altered pronunciation of the second letter. When the name is modified with a prefix, the initial consonant is commonly altered for euphony (e.g., *t* becomes *l*; *k* becomes *g*). In some sources prefixes are ignored in alphabetization; however, herein the prefix is treated as part of the word.

Alphabetization

In the Latin alphabet used by the English language, individual letters are alphabetized in the following order: a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. In some languages certain digraphs (a two letter combinations such as *sh*, *ng*, *nh*) are treated as distinct letters and their alphabetization varies depending upon the language. In addition, letters with diacritics over them in some languages may be alphabetized using distinctly different methods, as illustrated by Estonian vowels with diacritics which are found in the following order at the end of the alphabet: p, r, s, š, z, ž, t, u, v, õ, ä, ö, ü. The Kiowa alphabet exhibits the following order: a, au, e, i, o, u, ai, aui, oi, ui, b, f, p, v, g, c, k, q, d, j, t, th, ch, x, s, z, l, w, y, h, m, n, while the Zuni alphabet, comprised of only 18 letters, is ordered as follows: a, b, d, ch, e, h, i, k, l, ł, m, n, o, p, s, t, u, w, y.

In the text, diacritics are ignored with regard to alphabetization. The following alphabetical sequence is used: a/α, æ/æ, b/β, c/Ϸ, d/d/d, e/ε/ʃ/ə, f, f, g, h/γ, i/i, j, k/k, l, m, n/n/η, o, p, q, r, s, β, t, u, v, w, x, y/γ, z, δ, η, where slashes (/) indicate the letters are handled alphabetically as equals.
