Did You Know?

The 12 most frequently used words in *written* English are:

the, of, and, a, to in, is, you, that, it, he, for

- The English language dates back to the 400s, when Germanic tribes, including Angles and Saxons, invaded the island that came to be known (because of the Angles) as England. The epic poem *Beowulf* was written down in about 1000 in the Anglo-Saxon language, known as **Old English**. **Middle English** developed following the 1066 invasion of the Normans, who came from France. Geoffrey Chaucer's *Canterbury Tales* (completed in about 1400) is written in Middle English. Modern English originated in the 16th century. The works of William Shakespeare (1564–1616) are often cited as the beginning of Modern English.
- Figures regarding the average American's total vocabulary vary greatly, from fewer than 5,000 words to more than 20,000. One major reason for this is that researchers differ in the way in which they count the words. For example, if a person knows the meaning of *jump*, some researchers assume that the person also knows the meaning of its derivatives (*jumps*, *jumped*, *jumping*, *jumper*, *jumpers*, *jumpy*), so they give credit for all of those words. Other researchers exclude derivatives, so in the case of *jump*, they would give credit for only one word.
- ***The quick brown fox jumps over the lazy dog*** contains every letter in the English alphabet. (This kind of sentence is called a *pangram*.)
- No words in the English language rhyme with ***orange***, ***month***, ***purple***, or ***silver***.
- ***Set*** is the English word that has the most definitions (the *Oxford English Dictionary* lists 192).
- ***Pneumonoultramicroscopicsilicovolcanoconiosis*** (a lung disease) is the longest word in the English language that appears in a major dictionary. ***Screeched*** is the longest one-syllable English word. ***Rhythms*** is the longest English word that does not contain *a*, *e*, *i*, *o*, or *u*.
- ***Strength*** is the only eight-letter English word that contains only one vowel. ***Indivisibility*** is the only English word in which one vowel occurs six times.
- ***Almost*** is the shortest English word whose letters all appear in alphabetical order.
- ***Bookkeeper*** is the only English word that contains three consecutive sets of double letters. ***Deeded*** is the only English word consisting of two letters used three times each.
- ***Dreamt*** is the only English word that ends in *-mt*. ***Tremendous***, ***horrendous***, ***stupendous***, and ***hazardous*** are the only English words that end in *-dous*. ***Vacuum***, ***continuum***, and ***residuum*** are the only English words that contain *uu*.
- ***Queue*** is the only English word whose pronunciation does not change when its last four letters are removed.

Word Parts and Challenging Words 1

Introduction 1

CHAPTER 1 7

Word Parts: ary, co, col, com, con, cor, il, im, in, ir, de, er, or, ist, pre, re, ex, ing, un 7

Challenging Words: quandary, consensus, incongruous, debilitate, hedonist, precocious, reconciliation, extricate, meandering, unethical 10

CHAPTER 2 17

Word Parts: sub, pro, fy, inter, mis, dis, ob, op, ten, tion, ed 17

Challenging Words: submissive, mollify, intervene, misnomer, dissipate, obstreperous, tentative, correlation, alleviated, prolific 19

CHAPTER 3 26

Word Parts: able, ible, a, an, super, trans, poly, ver, log, ism, chron, post 26

Challenging Words: inevitable, apathy, superfluous, transition, polychromatic, veracity, epilogue, nepotism, chronic, posthumously 29

CHAPTER 4 37

Word Parts: para, tele, culp, eu, ante, rect, fid, equ, pan, sym, syn 37

Challenging Words: paradigm, telepathy, culpable, euphemism, antediluvian, rectify, infidelity, equivocal, panacea, syndrome 39

CHAPTER 5 47

Word Parts: phil, mal, spec, omni, hyper, anti, voc, vok, bi, path, ben 47

Challenging Words: philanthropy, malicious, specter, omnipotent, hypertension, antithesis, vociferous, bilingual, empathy, benign 50

REVIEW TEST, CHAPTERS 1–5 57

CHAPTER 6	63

To the Instructor

Teachers on all levels are aware of the close correlation that exists regarding the breadth of students' vocabulary and their academic performance. However, considering the many instructional and other responsibilities teachers have, it is a challenge for them to find adequate time to devote to vocabulary concerns. *Building Vocabulary for College* was conceived and developed to help teachers provide their students with a practical, rewarding, and time-efficient way to gain the general and specialized vocabulary they need to flourish academically.

The word parts, challenging words, and academic terms featured in this book were selected after consulting numerous textbooks, standardized tests, reference books, periodicals, and college instructors and students. *Building Vocabulary for College* has helped hundreds of high school, college preparatory, community college, and four-year college students to dramatically improve their vocabularies, which in turn, has contributed to their academic success, which is its number one aim.

New to the Eighth Edition

- **Idioms to Know boxes**, which should prove to be particularly helpful to students for whom English is a second language, are now included in each chapter. (The *Mastering Confusing Words* section, a popular feature in the previous edition, is still included.)
- **The majority of the Challenging Words** featured in **Part One** have been replaced with words that appear in one or more editions of the *Scholastic Aptitude Test* (SAT).
- **A variety of new and engaging *Completing a Passage*** sections have been written for this edition.
- **Valuable *Bonus Word* boxes** are included in each of the Academic Terms chapters.
- **Numerous revisions** to words, sentences, exercises, and review tests, including the crossword puzzles, have been made to enhance this text's instructional value and enjoyment for both teachers and students.
- **An updated design** with attractive colors, new photos, and other selected features enrich the text's overall visual appeal while also adding to its instructional utility.
- **A revised *Test Bank*** is now available in print, and an electronic version is located on the Instructor Companion Website for *Building Vocabulary for College*

Organizaton and Content

Each of the seventeen chapters in **Part One: Word Parts and Challenging Words** features ten common word parts (prefixes, suffixes, and roots) and ten college-level challenging words containing these word parts. Each word part and challenging word is introduced in two sentences that offer context clues as to its meaning. Visual aids accompanying selected words provide additional clues. A multiple-choice question after each pair of sentences gives students an immediate opportunity to use the context clues to determine the meaning of the word part or challenging word. Consistently structured exercises, including matching, fill-in, multiple-choice, and close passages provide opportunities for students to enhance and evaluate their understanding of each word part and challenging word. Review tests are included after Chapters 1–5, 6–10, and 11–17.

The eleven chapters in **Part Two: Academic Terms** include basic academic terms presented in a wide variety of introductory humanities, science, social-science, and mathematics courses, as well as terms associated with basic criminal justice and nursing courses. As was true of the vocabulary in **Part One**, each term is introduced in two sentences that provide students with opportunities to practice using context clues, and selected terms are accompanied with visuals. An engaging blend of exercises similar to those in **Part One** reinforces definitions. Review tests are included after Chapters 18–22 and 23–28. An important academic **Bonus Word** is presented at the end of each chapter in **Part Two**.

Both **Parts One** and **Two** feature **Mastering Confusing Words** and **Idioms to Know**. Indexes for the word parts, challenging words, academic terms, bonus words, mastering confusing words, and idioms to know are included at the end of the text, as are appendices concerned with parts of speech and using the dictionary.

Acknowledgements

The Cengage Learning editorial staff provided me with expert guidance and steadfast support, and I am most appreciative of both. I am indebted to Development Editor, Melanie Opacki, for her support, enthusiasm, insights, professionalism, and leadership in guiding this edition to its completion. She was indeed a pleasure to work with, and I am grateful for her many contributions to this edition.

My gratitude continues to extend to the reviewers, colleagues, students, and editors whose assistance made possible the previous editions. For this edition, I am especially grateful for the following reviewers' conscientious feedback and helpful suggestions:

Julie Engstrom, Brigham Young University
Rebecca Ingraham, St. Charles Community College
Chris Morelock, Walters State Community College
Betty Raper, Pulaski Technical College
Stephen Rizzo, Beville State Community College

Finally, the abiding support and interest I have received from colleagues, students, friends, and family is noted and deeply appreciated.

—R. Kent Smith
vocabteach@gmail.com

To the Student

Research has repeatedly revealed that a good vocabulary goes hand in hand with academic success. This book, then, is designed to help you increase your vocabulary in a systematic, practical, and interesting way. You will probably already know some of the word parts, challenging words, and academic terms this text contains, but most of them will likely be unfamiliar to you. In any event, your vocabulary will be increased to a college level as you work through the chapters.

Part One will deepen your understanding of common prefixes, suffixes, and roots (referred to as *word parts*), which will then make it easier for you to decipher the carefully chosen challenging words that are included in this part of the book. These words are associated with well-educated adults as well as those who have done well on the vocabulary section of the *Scholastic Aptitude Test (SAT)*.

Part Two will give you a head start in mastering the academic terms associated with many of the introductory courses you will probably take in college.

In addition, both **Parts One** and **Two** provide you with an excellent opportunity to learn the distinctions between words that are often confused with one another (such as *affect* and *effect*), and to become familiar with a number of common English expressions, known as *idioms*, that you might not know (such as *Monday morning quarterback* or *to steal someone's thunder*).

I hope you will discover, as other students have, that this book contributes to your overall academic success as this is its main goal.

—R. Kent Smith
vocabteach@gmail.com

PART ONE

Word Parts and Challenging Words

Word Parts: Introduction

Knowledge of word parts can play a role in increasing our vocabularies. Word parts include prefixes, suffixes, and root words.

Prefixes are word parts added at the beginning of words, and they dramatically alter a word’s meaning, including changing a word to its opposite meaning: correct—*incorrect*; regard—*disregard*.

Suffixes are word parts added at the end of words. A suffix can change a word’s part of speech: jump (verb)—*jumper* (noun); poison (noun)—*poisonous* (adjective), and knowing a word’s part of speech can contribute to your understanding of its definition:

An *ohmmeter* is needed to reassure electric resistance. (The suffix *-er* indicates *ohmmeter* is a noun, and this knowledge, coupled with the sentence’s context, makes clear that *ohmmeter* is an instrument to measure electric resistance.)

Roots are the base part of words. They convey the bulk of a word’s meaning. A prefix and a suffix can be attached to a root to form variants of the root: *in-* (a prefix meaning “not”) + *cred* (a root meaning “believe”) + *-ible* (a suffix meaning “capable of”) = *incredible* (not capable of being believed).

Although word parts are usually consistent in their meaning, this isn’t always the case. For example, *pre* means “before” in *preview* and *precaution*, but not in *precise* or *precious*; nevertheless, prefixes, suffixes, and roots are sufficiently consistent in their meanings to make it definitely worthwhile to learn their usual meanings. This knowledge will enable you to unlock unfamiliar words that you encounter in a reading assignment, such as “monolithic.” When you know the prefix *mono-* means “one” and the root *lith* means “block of stone,” and the suffix *-ic* means “having the characteristic of,” you will understand that “monolithic” refers to an object made from a single block of stone, or, if used in a general sense, to something that is massive, rigid, and uniform throughout.

Obviously, the ability to analyze unfamiliar words in the preceding way, referred to as **word analysis**, depends on a comprehensive understanding of prefixes, suffixes, and roots, an understanding you will have an opportunity to acquire in **Part One**.

Studying The Word Parts

- Carefully read the two sentences illustrating the meaning of each word part; in some instances, more than one word part is underlined because it is one you have studied in a previous chapter.
- Then select what you believe is the correct meaning for the word part by writing either **a** or **b** in the space provided.

Doing The Exercises

- After you have studied the word parts in the suggested manner, follow the directions for completing the chapter's four sets of exercises for the word parts.

Challenging Words: Introduction

Mastering the definitions of the challenging words in each chapter will contribute to your ability to comprehend college-level material because these words frequently appear in textbooks, newspapers, periodicals, and standardized tests, including the *Scholastic Aptitude Test (S.A.T.)*. You will have an opportunity to learn these words by applying your knowledge of the word parts previously studied and by using context clues, that is, by studying the relationship between a challenging word and the words surrounding it. Becoming familiar with these types of context clues will prove particularly helpful to you now and in the future.

■ Direct Definition

It's rare these days to see anyone wear a *monocle*, an eyeglass for just one eye. *Intrinsic motivation* is a desire for action coming from within an individual. (Both sentences provide straightforward definitions of the italicized words.)

■ Indirect Definition

Although the pain is not intense, it is *chronic*, having bothered me for the past two months.

Her desire for financial security, she realized, was not a sufficient rationale for accepting his marriage proposal.

(In the first sentence, “for the past two months” indicates that *chronic* describes a condition lasting a long time; in the second sentence, “not a sufficient *rationale*” suggests that *rationale* is a reason or a motive.)

■ Examples

Arthropods, such as crabs and lobsters, live in water.

Unrestricted television viewing can have *deleterious* effects on children, including sluggishness and insensitivity.

(In the first sentence, the examples of “crabs and lobsters” indicate that *arthropods* are animals with a hard outer covering and jointed legs. In the second sentence, “sluggishness and insensitivity” suggest that *deleterious* describes something undesirable or even harmful.)

■ Synonyms

The *arbitrator*, or judge, ruled in favor of the club owners.

As a result, the players were *irate*; in other words, they were furious.

(In the first sentence, “or” makes it clear that *arbitrator* and *judge* are synonyms, that is, words with similar meanings. In the second sentence, “in other words” makes it obvious that *irate* and *furious* are also synonyms.)

■ Antonyms

Early in her career, she was careless in her public remarks, but today she is much more *discreet*.

Although the mayor was *churlish* yesterday, he was pleasant and agreeable at today’s news conference.

(In the first sentence, “but” indicates *careless* and *discreet* are antonyms, that is, words with opposite meanings. In the second sentence, “Although” signifies *churlish* has an opposite meaning to those of *pleasant* and *agreeable*.)

■ Key Phrases Plus Knowledge of Word Parts

The military leaders who seized control of the government intended to rule with absolute authority, but their attempt to subjugate the country eventually led to their overthrow.

(The phrase “intended to rule with absolute authority” and knowing that *sub-* means “under” provide clues for understanding *subjugate*, which means “to put under authority.”)

Infidelity is the only grounds for divorce in that country.

(The phrase “only grounds for divorce” and knowing *in-* means “not” and *fid* means “faith” provide the clues for understanding *infidelity*, or “unfaithfulness.”)

Specific context clues like the ones in the preceding examples are not always present to help unlock the meaning of an unfamiliar word. When that is the case, a reasonable inference about the unknown word can often be made by concentrating on what is being said about the subject of the sentence and by identifying the word’s part of speech. Here is an example of this technique:

Bereft of money, friends, and jobs, numerous immigrants struggled to survive in the New World.

(The subject of the sentence is *immigrants* who “struggled to survive,” probably because they were “bereft of money, friends, and jobs.” *Bereft* is an adjective, so concentrating on what is being said about the subject, *immigrants*, we can infer *bereft* means “lacking”; and the sentence does make sense if you use *lacking* instead of *bereft*: “Lacking money, friends, and jobs, numerous immigrants struggled to survive in the New World.”)

Limitations of Context Clues

Although using context clues is generally reliable and is the most practical way of unlocking the meanings of unfamiliar words, this approach has limitations. Specifically, context clues

- often reveal vague rather than precise meanings;
- usually reveal a single meaning, whereas many words have several meanings;
- are sometimes absent or too obscure to be helpful;
- seldom provide certainty of definition.

It should be clear, then, that there are times when you should consult a dictionary (see **Appendix B**, pages 296–297), particularly when you need complete and precise meanings of words or when context clues are lacking or insufficient in a sentence.

Studying The Challenging Words

- Take advantage of pictures and other visual aids that may be available to acquaint you with some of the challenging words.
- Familiarize yourself with each word's pronunciation, part of speech, and definition, noting that (1) a word part you have studied is underlined; (2) the word is presented phonetically in parentheses with a space separating each syllable; (3) the accented syllable is printed in capital letters; and (4) the word's part of speech is presented (see **Appendix A**, beginning on page 292, if you need to review parts of speech.)
- Carefully read the two sentences illustrating the appropriate use of each word; be alert to the types of context clues that have been discussed in addition to applying your knowledge of the underlined word part or parts.
- Select your definition for each challenging word by writing either **a** or **b** in the space provided.

Doing The Exercises

- Follow the directions for completing the chapter's exercises for the challenging words.
- Note that the third set of exercises always ends with three analogy questions. **Analogies are pairs of words with a similar relationship**, so the analogy questions require you to study a pair of words to discover the relationship between them. Then, choosing from several options, you are to select the pair having the same relationship in the first pair of words. Consider this example:
 - **failure : ridicule :: success : praise**

Analogies are read and understood in this manner: **failure is to ridicule as success is to praise**. Now think about the relationship between the first pair of words; that is, if you

fail, people may ridicule you. Notice that the same type of relationship exists between success and praise; that is, if you succeed, people may praise you.

Keep in mind, then, that the relationship of the second pair of words must *always* be the *same* as it is in the first pair, as in these examples (: represents *is to* and :: represents *as*):

Similar meanings	café : restaurant :: clothes : garments
Opposite meanings	cloudy : clear :: straight : crooked
Part to whole	toe : foot :: finger : hand
Place and activity	mall : shopping :: highway : driving
General to specific	car : Ford :: sport : basketball
Noun and its association	clown : silly :: winter : cold
Adjective and its association	generous : good :: tricky : unfair

As the preceding examples demonstrate, the key to doing well on the analogy questions is to discover the relationship between the two words given, then to select the pair of words having a similar relationship.

Mastering Confusing Words

This component is another bonus of each chapter. It focuses on words often confused with one another—*affect/effect*, *council/counsel*, *desert/dessert*, and many others. However, the brief but practical information and exercises presented in this concluding section of each chapter will enable you to quickly and easily learn the distinctions between such frequently misused words.

Idioms to Know

Idioms are natural expressions native speakers of a language use to informally convey information. However, non-native speakers of the language are often puzzled by these expressions. For example, if a native speaker of English said the cost of his new camera was *a drop in the bucket*, other native speakers would probably know he meant the camera's price was low, at least in his opinion. On the other hand, a non-native speaker of English would likely be confused by the idiom *a drop in the bucket*.

To feel comfortable with the English language, then, requires an understanding of idioms. Therefore, each chapter concludes with an opportunity to become acquainted with two common English idioms; you may already know some or most of them; however, if English is your second language, you should find learning the meanings of these idioms helpful.

Review Tests

Review tests are included in Part One. In addition to the type of exercises featured in the chapters, the review tests also include word-completion passages and crossword puzzles. If you periodically review the chapters you have completed, you should do well on the review tests.

Learning Word Parts from Context Clues

1. ary

- It's *customary* for players to shake hands with their opponents after a game.
- A large colorful sign marked the *boundary* between the two states.

ary (a) does (b) does not relate to the word to which it's attached _____.

2. co, col, com, con, cor

- In an impressive display of civic pride, the downtown merchants *cooperated* when they remodeled their storefronts in the same style.
- This summer, three of my friends and I have decided to *collaborate* in painting houses.
- Luis Rodriguez, my *companion* in college, is now a dentist in Minnesota.
- George Washington and Benjamin Franklin were *contemporaries*.
- Coughing is positively *correlated* to smoking.

co, col, com, con, and cor mean to (a) separate (b) combine _____.

3. il, im, in, ir

- Did you know it's *illegal* for businesses to open on Sundays in my community?
- The day after playing softball for the first time this spring, I was practically *immobile* from soreness.
- The celebrity was *inconspicuous* at the football game because she was wearing sunglasses and a heavy long coat as well as a hat.
- The judge dismissed the evidence as *irrelevant*.

il, im, in, and ir change a word to its (a) original (b) opposite meaning _____.

4. de

- How much does a new car *depreciate* in value the first year?
- The trees that had been toppled by storms through the years were in various stages of *decomposition*.

de means move (a) toward (b) away from _____.

5. er, or, ist

- My cousin is a *rancher* in Montana.
- Adele would like to become a high school *counselor*.
- Vic is fun to be around because he's such a *humorist*.

er, or, and ist refer to a person who (a) does (b) doesn't do what the base word indicates _____.

6. pre

- After the *previews* were shown, the feature movie began.
- The staff had *prearranged* the room for the banquet, so the guests were able to be seated immediately.

pre means (a) before (b) after _____.

7. re

- Mr. Lucas had to *revarnish* the table after it was stained by candle drippings.
- The Rapozas had such a good vacation in British Columbia that they are planning to *revisit* this Canadian province next year.

re means to (a) avoid (b) repeat _____.

8. ex

- The dentist reluctantly decided he would have to *extract* the patient's tooth.
- Oranges, which are shipped in abundance from Florida and California, are a major *export* of the United States.

ex means (a) in (b) out _____.

9. ing

- Della is *printing* her answers to the essay questions.
- Gabe is *constructing* a model of the house he plans to build next year.

ing Helps to express the action of (a) interjections (b) verbs _____.

10. un

- The defense lawyer contended the accident was caused by the waiter, so he feels it would be *unjust* to make his client pay damages.
- The cows wandered out of the pasture when the gate was left *unlatched*.

un means (a) with (b) not _____.

Matching Word Parts and Definitions

Match each definition with the word part it defines; some definitions are used more than once.

- | | |
|---------------------------------|----------------------------------|
| _____ 1. ary | a. helps a verb express action |

REGINA

With her ability to sing and play the piano when she was only three years old, Regina was unquestionably a(n) _____ youngster. As she grew up, she liked to have fun, but she certainly was not a(n) _____. Pleasure was not her main goal in life—a musical career was.

So when it came time to choose a college to attend, Regina was in a(n) _____. She had been accepted at two schools, but she couldn't make up her mind which one to attend—the nearby and economical state college that lacked a strong music program, or the expensive, private, out-of-state music college. Complicating matters was the fact that Regina believed it would be _____ of her to ask her hardworking parents to spend more money so she could attend the music college, her first choice; on the other hand, she knew it was _____ of her to consider attending the nearby state college because it could not help her reach her goal of becoming a concert pianist.

As Regina was _____ home from school one day in early spring, she was still struggling to find a way to _____ herself from her predicament. She felt her emotional well-being had begun to _____, so she was anxious for her conflicting feelings a(n) to reach a _____.

Finally, Regina had the good sense to make an appointment with her high school counselor. After a few sessions, Regina received good news! The counselor said there was a(n) _____ among the faculty: Regina would likely receive a generous scholarship from both the high school and the music college she really wished to attend because of her excellent grades and outstanding musical ability.

This information enabled Regina to decide to attend the private music college, a decision that brought her tremendous relief.

MASTERING CONFUSING WORDS

advice / advise

advice a noun meaning a suggestion or an opinion:

Ming's advice is to never buy a car with more than 30,000 miles on it.

advise a verb meaning to provide suggestions:

obstreperous	prolific	submissive	tentative	alleviated

SPENSER

Robert B. Parker (1932–2010) certainly did not _____ his writing ability: This _____ author wrote over sixty crime novels, most of which featured Spenser, a wise-cracking, street smart private detective who lived in Boston. However, to call Spenser a hero would be a(n) _____ because he not only possesses character flaws, but is ruthless as well as downright _____ at times. In such antihero respects, Parker’s Spenser shows a strong _____ to the fictional detectives of the 1930s–1960s, particularly Raymond Chandler’s Philip Marlowe and Dashiell Hammett’s Sam Spade. These rugged detectives are rarely if ever _____ to anyone, whether they are clients or police officials. And as is true of Marlowe and Spade, Spenser is a tough, aggressive investigator who conducts himself in a confident, self-assured manner, not in a(n) _____ one.

Parker’s fictional Spenser became such a popular character that a television series, *Spenser: For Hire*, was produced; it ran for four years in the 1980s. Although Spenser is portrayed as a detective who _____ the fears and concerns of his clients whenever he can, he never tries to _____ the often painful truth he had to share with them. And above all, Spenser does not allow anyone, even the most powerful or dangerous, to _____ in his investigations.

Robert B. Parker’s many books featuring Spenser are widely read throughout the world, and many of today’s detective story writers readily admit that it is Spenser who often captures their imagination when they do their own writing.

device a noun that refers to an object:

A stapler can be a handy device to have on your desk.

devise an action verb meaning to plan, invent, or form in one’s mind:

We need to devise a better way of keeping our basketball from rolling down the hill every time we miss a shot.

TEEN DRIVERS

Possessing the quickest reflexes, keenest eyesight, and greatest stamina, teenagers could reasonably be expected to be the best drivers on the road, but in fact, they are involved in more serious traffic accidents than drivers in any other age bracket. Specifically, drivers ages sixteen to nineteen are four times more likely than older drivers to have a serious car crash. Tragically, thousands of teenagers die annually in car crashes, accounting for 40 percent of all deaths among this age group. Each spring in high schools across the nation, with graduates resplendent in _____ robes and tasseled mortarboards, diplomas are solemnly awarded _____ to seniors who died in car crashes during the school year.

In addition to the many lost lives, a half-million young drivers are seriously injured in car accidents, many of whom will endure permanent disabilities and _____ pain for the rest of their lives.

Considering their physical advantages, why does it seem _____ that many teenagers will be involved in an accident? (One thing is certain: it is not due to driving _____, as teens consistently rank “driving” at or near the top of their favorite activities.) Studies noted for their _____ have identified these factors as the major causes of teenage drivers’ high accident rate:

- They are more likely than older drivers to speed, run red lights, make illegal turns, and drive after using alcohol or drugs.
- They are the least likely to wear seatbelts.
- Over half of all teenage drivers use cell phones or indulge in other risky behavior (combing their hair, tuning their radios, etc.) while driving.
- They often disregard hazardous driving conditions caused by rain, snow, sleet, fog, traffic congestion, and road repairs.

In an effort to significantly reduce the accident rate of young drivers, a number of states have adopted an approach known as “graduated drivers licensing” (GDL) for

applicants under the age of eighteen. While the GDL approach varies from state to state, it generally includes requirements and restrictions like these:

1. An applicant must successfully “graduate” from both the supervised and intermediate states before receiving a full-privileges driver’s license. (The _____ period between each stage is commonly three months.)
2. Applicants must sharpen their driving skills for a specific number of hours under the supervision of adult license holders.
3. Night driving is prohibited for the first three months. (Research reveals that 42 percent of teen fatalities occur between 9:00 P.M. and 6:00 A.M.)
4. Chauffeuring other teens is prohibited unless an adult is present. (Over 60 percent of teens killed in crashes are passengers in cars driven by other teens.)
5. There is zero tolerance for drunk driving. (Even if the teen is the son or daughter of politically connected parents, _____ has no power to change this policy.)

There is gathering and impressive evidence that the GDL approach is effective; specifically, safety experts in states where GDL has been implemented report drops in teen accidents from 10 percent to slightly over 30 percent.* Because of these encouraging results, it is likely that more and more states will adopt GDL in an attempt to save young drivers from injuries and death.

*A(n) _____ to one of these reports indicates that a province in Canada experienced a drop of over 60 percent in the accident rate of sixteen-year-olds one year after adopting a graduated licensing law.

affect a verb meaning “to influence”:

Jenna didn’t think breaking up with him would affect her so much.

How does working the night shift affect you physically?

effect a noun meaning “result”:

Salary raises had a wonderful effect on the morale of the staff.

Waiting around has a tiring effect on most people.

Circle the correct answer:

1. Eating sensibly and exercising regularly soon had a positive affect / effect on his emotional as well as his physical health.
2. Did Connor’s angry outburst affect / effect your opinion of him?

Write original sentences using these words:

1. **affect:** _____

2. **effect:** _____

Idioms to Know

Tyler, just because you don’t like a class is no reason to *throw in the towel* and not try your best.

Write an original sentence using *throw in the towel*:

Barking up the wrong tree: A serious mistake in what you have concluded or in what you are trying to do.

You’re *barking up the wrong tree* if you think you can bluff your way through basic training.

Write a sentence using *barking up the wrong tree*:

Learning Word Parts from Context Clues

1. para

- A *paralegal* works alongside lawyers.
- A *paradox* is something that may be true but seems beyond belief; for example, the more success Nathan had, the more dissatisfied he became.

para means (a) bad or unfortunate (b) beside or beyond _____.

2. tele

- Our college needs a more powerful *telescope* to see the most distant planets in our solar system.
- People are more likely to send an e-mail today to distant friends than a *telegram* unless the message is particularly urgent.

tele means (a) far away (b) close by _____.

3. culp

- Ted was the *culprit* who broke the vase.
- *Mea culpa* is a Latin phrase meaning “I’m guilty.”

culp means (a) at risk (b) at fault _____.

4. eu

- Mr. Sanchez gave a *eulogy* at the memorial service for his beloved neighbor.
- The seniors expressed their *euphoria* on graduation night by tossing their caps high in the air.

eu means (a) sorrowful (b) praiseworthy _____.

5. ante

- Harry Truman’s presidency *antedates* John Kennedy’s by eight years. Between their terms in office, Dwight Eisenhower was president.
- A pronoun must refer to a previous noun. For example, in the sentence, “The package will be expensive to mail because it weighs more than eight pounds,” *package* is the *antecedent* of the pronoun *it*.

ante means (a) before (b) after _____.

6. rect

- A *rectangle* consists of four right angles.
- He has always been a person of high principles and moral *rectitude*, so no one was surprised when he joined the Peace Corps.

rect means (a) slanted, intelligent (b) straight, correct _____.

7. fid

- Chantelle *confided* her secret to Cameron because she knew he wouldn't tell anyone else.
- My sound system has such good *fidelity* that you would swear the band was in my room.

fid is related to (a) secrets (b) dependability _____.

8. equ

- Most people *equate* expensive cars with wealth.
- Needless to say, tightrope walkers must have good *equilibrium*.

equ is related to (a) equality (b) equipment _____.

9. pan

- Athletes from North, Central, and South America participate in the *Pan American* games.
- Barbara's dream is to have a house on the coast with a *panoramic* view of the ocean.

pan means (a) all, wide (b) few, narrow _____.

10. sym, syn

- Damian appreciated his friends' expressions of *sympathy* after his grandfather died.
- By *synthesizing* the information and clues revealed by the extensive investigation, the detectives were able to solve the baffling crime.

sym and **syn** mean (a) against (b) with _____.

Matching Word Parts and Definitions

Match each definition with the word part it defines.

THE CRUISER BICYCLE

The cruiser bicycle is known for its old-fashioned—some may say _____—features: balloon tires, large upright seat, no gears, pedal brakes, and heavy steel frame. Nevertheless, many bicycle enthusiasts consider the cruiser the most beautiful of all bicycles; these people do not have _____ feelings about which bike they prefer.

There are people, however, who object to the name “cruiser”; they apparently consider it a(n) _____ for “beach bike,” and would like to _____ this situation by using the name “beach bike” instead. On the other hand, those who know their bicycle history feel that “beach bike” reflects _____ to the name “cruiser,” which is what this type of bike was called long before the term “beach bike” came on the scene.

The Schwinn Company is credited with creating the cruiser when it introduced the Schwinn Phantom in 1934. With its chain guard, battery-powered headlight, chrome fenders, and steel frame, the Phantom became the _____ for the Schwinn bikes that followed and for other U.S. bicycle companies as well.

Cruisers were popular for many years—and it seemed as if their popularity would continue for decades to come. However, anyone in the late 1950s with mental _____ (if such an ability has ever existed) could have told Schwinn and other U.S. bicycle manufacturers that a new era in bicycles was soon to dawn. This new era began in the 1960s, when bicycles started to be imported from Europe in large numbers. These bikes featured much narrower tires, light frames, three-speed gears, and convenient hand brakes. European bikes soon dominated the U.S. bicycle market. Rather than being _____ of closing their eyes to what was happening, U.S. bike manufacturers, including Schwinn, began producing their own versions of the “English racer” and other such European bicycles. This willingness to change turned out to be the _____ for U.S. bicycle makers’ economic woes.

In the meantime, there were a number of bicyclists—particularly in the western United States—who liked to ride on the beach. The cruiser was the bike best suited

for this, and picked up the names “beach bike” or “beach cruiser.” But throughout the remainder of the 20th century, the European-styled racer and other new bikes, including the mountain bike, were the big sellers.

Then in the mid-1990s, the cruiser started making a comeback. This resurgence was credited to its affordability, comfort, and beauty compared to most other bikes. But another reason for its renewed popularity was unquestionably due to a(n) _____ that many adults were experiencing. The major symptom was a “homesickness” for their childhood days, a time that included ownership of a cruiser.

Nostalgic adults as well as people of all ages began to buy the cruiser again, with its “retro” look, comfortable ride, and ease of maintenance.

CURRENCY FOR THE VISUALLY IMPAIRED

Of the many daily challenges that the over one million visually impaired citizens of our country face, at least one could be eliminated: dealing with our present currency. Because ones, fives, tens, twenties, and the other denominations of U.S. paper money have the same size, shape, and feel, it is impossible for the blind to make distinctions among the various bills. This uniformity in our currency, a federal judge ruled in 2006, amounts to discrimination against the visually impaired. Because discrimination is the _____ of equality, he ordered the U.S. Treasury Department to alter the bills in some manner so that the blind will also have ways of identifying them.

However, some top Treasury officials and others, while expressing _____ for the plight the blind face regarding this issue, nevertheless made _____ objections to the judge's ruling, loudly arguing that it would be much too difficult and expensive to implement the major currency changes necessary to accommodate the visually impaired. These objections bring back the _____ of similar protests made decades ago when some people voiced—often in hurtful, _____

ways—their disapproval for proposals designed to provide the physically challenged with special parking spots, bathrooms, doors, and ramps. But soon after these proposals were enacted into law, the public seldom had even _____ objections to them as people with wheelchairs, walkers, baby strollers, and the like benefited from these special accommodations. To help those for whom English is a second language, these accommodations are increasingly being identified with _____ signs, often made possible by the _____ of individuals and charitable organizations.

The government maintains that to alter currency sizes would cost nearly \$180 million initially and up to \$50 million annually for the necessary new printing plates. However, one need not be _____ to know that there are much less expensive ways to accomplish this goal, including the use of Braille dots, foil strips, raised numbers, rounded edges, and punched holes.

Most of the nations in the world have already adopted one or more of the methods mentioned to enable the blind to make currency distinctions; there is simply no need for our government officials to develop _____ or other stress-induced ailments to comply with the judge's orders. Our visually challenged citizens deserve to live in a society that is as accessible to them as possible, and changing our currency would be a major contribution toward that objective.

MASTERING CONFUSING WORDS

a / an

a an article that is used before words that begin with a consonant sound:

A car was stuck in front of our driveway.

an an article that is used before words beginning with a vowel (*a, e, i, o, u*) sound:

Mark ate two peanut butter sandwiches and an apple before heading back to his afternoon classes.

Circle the correct answer:

IDAHO

If you love the outdoors, are you _____ that Idaho, regardless of the season, offers a variety of outdoor activities to enjoy? Let me _____.

In the spring, Idaho offers some of the best fly-fishing opportunities anywhere in the country. Kayaking, canoeing, rafting, and other water activities are also available in the spring and through much of the fall.

In the summer, horseback riding, mountain biking, hiking, and camping join the list of outdoor sports to enjoy. For _____ souls, there is also ballooning, hang gliding, skydiving, and mountain climbing: the biggest challenge is Borah Peak, with an elevation of 12,668 feet. In fact, Idaho is such a mountainous state, that many a _____ over the years has sought to live his or her solitary life in one of its many majestic mountain ranges.

During Idaho's winter months, outdoor opportunities for the adventurous include both downhill and cross-country skiing, snowshoeing, snowboarding, snowmobiling, snow tubing, skating, sledding, and ice fishing.

For those who are _____ about whether to participate in any of the preceding challenges, know that Idaho also offers numerous opportunities for bird watching and wildlife viewing (don't worry—there is no danger of being attacked by a bear or any other _____ animal).

As a _____, it should be mentioned that for people who just want to engage in some quiet _____ or do _____ for a mistake they have made, Idaho offers thousands of walking trails and scores of lake cottages that are ideal for such individual affairs.

So whether you wish to _____ a raft through a canyon's whitewater, or to sit quietly by a mountain stream, Idaho offers these and many more such outdoor and invigorating opportunities.

quiet silent, peaceful:

The night was so **quiet** I could hear the hall clock ticking downstairs.

quite really, entirely:

Courtney is **quite** concerned about how she did on her zoology test.

quit to stop, to give up:

Colby was so homesick his freshman year that he almost **quit** college.

Circle the correct answer:

“SOCIAL HOST” LAWS

Albion, seventeen, was a _____ high school junior who excelled as a member of the choir, student council, and track team. Far from having a(n) _____ personality, he was considered a unique person because of all of his talents. But when it came to drinking beer, Albion was a(n) _____, as he should have been, considering his age. On the other hand, his _____ Lucas had been drinking beer for the past two years, generally in the privacy of his home and with the consent of his parents.

One afternoon after track practice, Lucas invited Albion and some other friends over to his house to watch TV and have some refreshments. With his mother’s permission, Lucas got three six-packs of beer out of the basement refrigerator. Lucas and some others then talked a reluctant Albion into sharing a few beers with them. Within an hour, Albion was complaining of _____ and an upset stomach, but the others just laughed at him. However, when he started vomiting and then passed out, Lucas and his mother became alarmed. They rushed Albion to the emergency room at the local hospital, where his stomach had to be pumped because of alcohol poisoning.

“Albion” incidents are much too common, even though furnishing alcohol to minors is prohibited in all fifty states. However, because it is a criminal offense, it is often frustratingly difficult to get the necessary burden of proof for a conviction. Consequently, numerous communities and counties throughout this rich, _____ nation have been adopting civil ordinances relating to underage drinking. Then, if a “furnishing alcohol to a minor” infraction occurs, the violation can be legally dealt with administratively rather than by the court system, saving law authorities a great deal of _____ time, energy, and taxpayer money.

These civil ordinances, referred to as “social host” laws, enable the police to break up home parties and issue a fine of \$2,500 or more to parents or other _____ adults who permit underage drinking. Even if parents are out of town or unaware of an underage drinking party, they are held responsible; the ordinances indicate that they

should have known that teens might drink illegally at their home. Parents sometimes object to this provision, not only in a clear, _____ way but also in an angry, _____ manner. However, their objections have not been met with sympathy by the courts.

These “social host” laws should be seriously considered everywhere because alcohol abuse, including binge drinking, is among the leading causes of death among America’s youth. Because surveys indicate that a large percentage of underage drinking occurs at house parties, it is hoped that the growth of “social host” laws in communities across the nation will dramatically decrease alcohol-related deaths among teenagers.

MASTERING CONFUSING WORDS

than / then

than used in comparisons:

The large shopping mall was busier today than it was Saturday.

then when, at that time:

After working for a year, Jodi then plans to attend graduate school.

Circle the correct answer:

ELVIS PRESLEY

Elvis Presley’s national prominence began in 1956 when he was twenty-one. That was the year his first RCA record, *Heartbreak Hotel*, was released. In a matter of days, it was at the top of the popular music charts. From that time on, Elvis’s _____ road to fame was fast and unswerving. He became the leader of rock and roll, appearing on television shows and performing before sell-out crowds in concert halls and arenas throughout the country. Elvis’s energetic, physical style was in sharp contrast to the _____ of most other singers of that time. When he appeared on stage, his screaming fans would lose all _____, creating a deafening _____ of shrieks.

At first, Elvis’s concert audiences were mostly _____ groups of swooning teenagers, but as his popularity grew, his audiences became more _____. Older people also wanted to see an exciting “Elvis the Pelvis” performance.

In 1958, in the midst of his enormous popularity, Elvis was drafted into the U.S. Army. Elvis felt it was his duty to serve, and indicated that he hoped that he wouldn’t be treated any differently than any other Army recruit. However, some people did think, as did Elvis himself, that his musical career would become _____. However, his acceptance of his two-year military obligation won him even more fans, including veterans and critics of his rock and roll style.

After Elvis completed basic training at Fort Hood in Texas, he was assigned to the 3rd Armored Division in Germany. Those who served with Elvis during his military years said they respected and liked him because he did not ask for special favors or attempt to shirk his duties. While stationed in Germany, Elvis fell in love with fourteen-year-old Priscilla Beaulieu. Elvis and Priscilla waited until she was twenty before getting married.

In 1960, after serving two years, Elvis was honorably discharged from the Army. He immediately resumed his musical career, happily exchanging his khakis for performance outfits, which became flashier and, in some instances, almost _____.

Elvis’s popularity continued at a high level throughout the 1960s and most of the 1970s. In addition to recording numerous hits, Elvis made a number of popular movies. He also became the first entertainer to stage a concert that was broadcast throughout the world by satellite.

When Elvis was at Graceland, his home in Memphis, he was known for his _____ behavior, suddenly deciding at any time during the day or night that he and his friends should go bike riding, bowl, play touch football, or engage in some other high-intensity activity.

Unfortunately, as the years went by, prescription drug abuse began to undermine Elvis's health, and he shocked the world when he suddenly died in 1977 at age forty-two.

Had Elvis lived to be an old man, it is unlikely that he would have needed to receive any type of financial _____; since his first RCA recording in 1956, his records have sold steadily through the years.

ORVILLE'S DINER

As far as I and many others are concerned, there's nothing finer than eating at Orville's Diner. So one night after my evening class, I stopped by at good old Orville's to get a bite to eat. The warmth coming from the pizza oven welcomed me as I stepped through the door. I decided to sit at the counter, where a cheerful waitress soon took my order of a BLT, fries, and a coke; not the most healthful food I've ever eaten, but just what I felt like having after a three-hour class.

Despite the surrounding hilly _____ that we have to deal with in order to get to it, Orville's Diner is a popular hangout for us college students. It is close to campus and open 24 hours a day. But we college students aren't the only ones who flock to Orville's. Throughout the day and night, _____ factory workers, night owls, old folks, and travelers eat at Orville's. There, they have the option of ordering all kinds of hearty meals, including chicken, pot roast, meatloaf, pork chops, spaghetti, and pizza.

On Sundays, couples of all ages come to Orville's to enjoy its generous brunches, which include everything from fresh fruits to hot biscuits with gravy.

In the early morning hours, before most people are up, cab drivers huddle at Orville's booths, polishing off their big breakfasts and nursing their steaming mugs of coffee. While it's unlikely you could find a _____ among them, the cabbies can sometimes be heard muttering a _____ or two when they leave the cozy diner, especially during the winter months with its _____ weather. Orville's familiar odors and _____ also seem to _____ their reluctance to leave their early morning sanctuary.

Orville's Diner is such a well-known institution for generations of college students that it once was common for them to steal mugs and glasses with "Orville's Diner" inscribed on them before they graduated. Today it would be unlikely to find this _____ in any student's room; such mugs and glasses are sold by the hundreds at the diner and the college's bookstore.

I don't mean to sound _____, but if for some reason Orville's Diner were to close its doors one or two days a week or shorten its hours (both possibilities have been rumored from time to time), a _____ would likely erupt on campus and other parts of the city until this beloved diner once again opened its doors 24/7.

MASTERING CONFUSING WORDS

principal / principle

principal the chief or main one; also refers to a school administrator:

The principal reason that Stacy wants to be a social worker is so she can help people.

Chandler is working on his master's degree so he will be qualified to be an elementary school principal.

principle rule or standard:

Attending every class is a good principle for college students to remember.

Putting 10 percent of his earnings in a savings account is a principle my brother has always followed, even when he was a young newspaper carrier.

Circle the correct answer:

1. The principal / principle at the high school I attended was well liked by all the students.
2. Being considerate of other people's feelings is an excellent principal / principle to follow.
3. What was the principal / principle reason you dropped out of choir?

THE CASE FOR LIBERAL ARTS

High school seniors planning on attending college are often surprised to learn that many employers don't _____ liberal-arts graduates. In fact, such employers maintain that college graduates should be grounded in broad knowledge, ethical reasoning, social responsibility, speaking and writing skills, and problem-solving abilities; a major in liberal arts, they have found, often provides the best opportunity to acquire such competencies. For example, the chief executive officer of an engineering firm recently said, "Yes, we hire mostly graduates with engineering degrees, but it's equally important that they excel in communication and social skills as well as those relating to engineering. Our employees with a broad background in liberal arts generally do."

Another employer went so far as to say, "_____ technical and people skills, both are important, but my top priority in hiring is finding college graduates who demonstrate _____ problem-solving and social skills." Her comments give _____ to the importance of good critical-thinking and interpersonal skills, which a liberal-arts major has many opportunities to develop.

Most employers don't want to _____ themselves in arguments over which specific liberal-arts courses college students should take, but they are _____ in both their financial support and praise for community colleges, universities, and private colleges that insist that all students, regardless of their major, receive a solid foundation in liberal arts.

But what is meant by liberal arts? Unlike _____ (a belief in one God), which has a restricted meaning, *liberal arts* is a _____ term applying to a wide array of courses, ranging from history and literature to art and music. One

_____ researcher, using a _____ rather than his own name, visited thirty campuses across the country. He discovered a great deal of inconsistency in the designation of liberal-arts courses. For example, on some campuses, women's studies and journalism were considered liberal-arts courses, but on others they were not.

While there may not be agreement on what specific courses should be designated as liberal arts, the term has always indicated studies that provide general knowledge, communication abilities (reading, speaking, listening, writing), and intellectual skills (critical thinking and reasoning), as opposed to more specialized vocational or scientific skills.

Despite the confusion and even controversy about liberal arts, there is general agreement among education, business, and professional people that a major in liberal arts is worth serious consideration because of the personal enrichment and career enhancement possibilities that such a major provides.

MASTERING CONFUSING WORDS

personal / personnel

personal concerned with private matters:

My brother never shared his personal feelings with me about not making the team, but I could tell just by looking at his face that he was extremely disappointed.

personnel a group of people working for the same organization or on the same team:

The bank personnel gave a farewell party for the retiring branch manager.

People in the community are optimistic that the local high school team will do well this season because most of the personnel on the squad gained a lot of valuable experience last year.

Circle the correct answer:

1. Kelsey is looking for a part-time job on campus, so I told her where the college's personal / personnel office is located.
2. Reggie made a personal / personnel pledge to himself that he would improve his grades this semester.

Completing a Passage

After reading the selection, fill in each space with one of the words listed below.

domineering	dystrophy	retrograde	medieval	bereft
adaptation	primeval	colloquial	potable	ostracized

HATFIELDS AND MCCOYS

Though sometimes romanticized as if it were a heroic legend dating back to _____ times, when the earth was in its infancy, the actual tragic story of the Hatfield and McCoy feud dates back to the mid-1800s. At that time, the head of the Hatfield clan was William Anderson “Devil Anse” Hatfield, and the head of the McCoy clan was Randolph, known as “Old Randall,” McCoy. The Hatfields and McCoys lived on opposite sides of the Tug River, which ran its meandering course between the mountainous border of Kentucky and West Virginia. The river was good not only for fishing but also for its _____ water. For a number of years, the Hatfields and McCoys were on friendly terms, even intermarrying. Then the Civil War (1861–1865) erupted.

Except for one exception, Asa McCoy, members of both families sympathized with the South. Asa McCoy joined the Union troops and served for a year before being discharged after he broke a leg, resulting in _____ in that limb.

After Asa returned to his Appalachian home in Kentucky, he was approached by Jim Vance, a relative of the Hatfields. Vance warned Asa, in the unique _____ language of the region, that a group of Confederate supporters, included members of the Hatfield clan, would soon be “visiting him.” Fearing for his life, Asa hid in a cave. He was soon found and shot to death, setting the stage for a _____ feud reminiscent of the _____ hostilities of 500–1500.

Relations between the Hatfields and McCoys remained tense after Asa’s murder, but there was no further bloodshed for a time. Then in 1878, Old Randall McCoy

and Floyd Hatfield got into a bitter quarrel over a pig. A trial was held in an effort to determine the lawful owner. The verdict hinged on Old Randall's nephew, Bill Staton, who, no doubt to the surprise of many people, testified that Floyd Hatfield was the rightful owner of the pig. A few months later, Bill Staton was shot to death by Paris and Sam McCoy.

Star-crossed lovers from the clans then became involved in the long and deadly feud. Old Randall McCoy had an attractive daughter, Roseanna. At a social event, she met Johnse Hatfield, who was handsome but known to be headstrong and _____. Johnse apparently believed that he was more intelligent than most other people and should therefore be able to tell others what to do. Despite his negative characteristics, Roseanna fell in love with Johnse and became pregnant. She, as did others, assumed that she and Johnse would marry and make a loving _____ to a life together. However, her brothers kidnapped Johnse, saying they were going to take him "to jail." Roseanna, fearing for Johnse's life, rode to Devil Anse Hatfield's home to tell him what had happened. Devil Anse quickly got his sons and some neighbors, and they succeeded in rescuing Johnse before he suffered any harm from the McCoy brothers. Shockingly, though, Johnse never returned to Roseanna, even after she gave birth to their daughter Sarah Elizabeth, who died in infancy. Johnse even added to Roseanna's misery by marrying her sixteen-year-old cousin, Nancy McCoy. Roseanna was now _____ by her family and the Hatfields. _____ of family and friends, Roseanna broke down emotionally and physically, dying before she was thirty years old.

The tragedies continued: Three of Old Randall's sons escalated the feud by murdering Ellison Hatfield, stabbing him twenty-six times and shooting him in the back. The Hatfields retaliated by capturing and killing the three McCoy brothers. The Hatfields also broke into the home of Mary McCoy Daniels, whipped Mary and her daughter, and later shot to death Jeff McCoy, Mary's brother.

The Hatfield–McCoy feud, which started in 1863 with the death of Asa McCoy, finally ended in 1888 after eight Hatfields were found guilty of murder, with one of them being publicly hanged and seven others sentenced to life imprisonment. However, an indication that the feud was truly over didn't occur until June 2000, when Hatfield and McCoy descendants held a joint reunion in Pikeville, Kentucky.

conscience a person’s sense of right and wrong:

My conscience bothered me until I finally paid back the money I had borrowed from Shannon a couple of months ago.

conscious being awake, alert, aware:

The patient was conscious about an hour after the surgery was completed.

Are you conscious of the fact that we have a biology test tomorrow?

Circle the correct answer:

1. Trish suddenly became conscience / conscious that her remarks had upset her friend, so she apologized.
2. His conscience / conscious told him not to argue with the police officer, so he didn’t.

Write original sentences using these words:

1. **conscience:** _____

2. **conscious:** _____

Idioms to Know

Back to the drawing board: Starting all over again, as what was tried didn't work.

I painted my basement walls with a water sealer to keep the rain from seeping in; however, the sealer has proved to be useless, so it's *back to the drawing board*.

Write an original sentence using *back to the drawing board*:

To beat a dead horse: To keep talking about something that has already been decided or can't be changed.

I shouldn't *beat a dead horse*, but it still angers me that we lost the title game our senior year because of that referee's bad call.

Write an original sentence using *to beat a dead horse*:

Learning Challenging Words from Context Clues

1. **impeccable** (im PEK uh bul)—adjective

sagacious specious redundant repudiated viable

THOMAS JEFFERSON

Thomas Jefferson, the author of the Declaration of Independence and the third President, was born on April 13, 1783, in what is now Albemarle County, Virginia. He was the third of eight children. His father, Peter Jefferson, was a prominent landowner and public official with a(n) _____ reputation. He died of unknown causes when Thomas was 14 years old. Jefferson's mother, Jane Randolph Jefferson, was born in England and came to America as a child. She died shortly before Jefferson wrote the Declaration of Independence.

Jefferson was 6 feet 2 inches tall and had red hair. He had an unquenchable curiosity regarding all aspects of life, and he was a serious and _____ student, excelling while a student at William and Mary College. Jefferson then studied to be a lawyer, and he was admitted to the Virginia bar in 1767.

Though Jefferson's religious beliefs remain somewhat _____, it is known that he never publicly _____ a believe in God, though he made no secret of the fact that he had little use for the church itself, believing that the clergy often misinterpreted parts of the Bible with _____ reasoning.

When he was 28, Jefferson married Martha Wayles Skelton, 23. By this time, Jefferson was a well-known lawyer and a member of Virginia's House of Burgesses. After their marriage, the Jeffersons lived at Monticello, the home Jefferson had built and continued to remodel throughout his long life. Though the Jeffersons had a number of children, only two daughters lived to reach maturity. When Jefferson was at home, he devoted much of his time to plant life and meteorology, and he kept _____ records on both of these subjects.

After ten years of marriage, tragedy struck when Martha died four months after giving birth to a daughter. Jefferson collapsed when Martha died, and he didn't leave his room for three weeks after her funeral. Obviously, after such mourning, it would be _____, to say that he was "grief-stricken." Jefferson never remarried.

However, Jefferson did eventually resume a normal life, and he became a member of the Continental Congress in 1775-1776. He was appointed to the committee charged with writing a declaration of independence from Great Britain. Though Jefferson was not a(n) _____ person or a particularly good orator, he was a powerful writer, and he is rightfully considered the principal author of the Declaration of Independence.

Jefferson's political career then became truly _____, not _____ as some of his friends feared after his wife died, and in the following years he served as Governor of Virginia, Minister to France, Secretary of State, and President John Adams' Vice President. In 1800, Jefferson was elected President, and he was reelected in 1804.

After serving his two terms as President, Thomas Jefferson happily retired to Monticello where he lived for another 18 years. Fittingly, both Jefferson and Adams died on July 4, 1826, the 50th anniversary of the Declaration of Independence.

complement something that completes or brings to perfection:

Asante’s three-point shooting ability complements the scoring ability of the back-court players.

compliment to praise:

Did you compliment Curtis for his good game?

Circle the correct answer:

1. I would like to complement / compliment all of you for volunteering to clean up the park this first day of spring.
2. Do you think paint or wallpaper would best complement / compliment the furniture in this room?

Write original sentences using these words:

1. **complement:** _____

2. **compliment:** _____

Idioms to Know

Bent out of shape: Needlessly worried, upset, or angry about something.

Marcie was *bent out of shape* over her semester's final grades; however, she passed all of her courses with one A, three B's, and one C.

Write an original sentence using *bent out of shape*:

Elevator doesn't go all the way to the top: Said about someone who doesn't seem to be well informed about most things.

I'm not sure Cappy's *elevator goes all the way to the top*. He thinks he can drive to Florida in six or seven hours, even though it is 1,800 miles from here.

Write an original sentence using *elevator doesn't go all the way to the top*:

Learning Challenging Words from Context Clues

1. **catharsis** (kə THAR sis)—noun

- Attending basketball games is a *catharsis* for Elliot because he's able to rid himself of stress by cheering for his favorite team.
- As a *catharsis* for her anger and disappointment, Julia took a long, brisk walk.

catharsis is most related to a (a) cleansing (b) saving _____.

2. **dearth** (DURTH)—noun

- There was a *dearth* of applicants for the city manager's position, so the city council is going to re-advertise the position.

FRANKLIN PIERCE, 14TH PRESIDENT

Franklin Pierce, our 14th president, was born in 1804 in Hillsborough, New Hampshire. His father, Benjamin Pierce, fought in the Revolutionary War and later served in the New Hampshire Legislature before being elected governor in 1827. Franklin's _____ for politics, then, is readily understood.

Franklin was never accused of _____ as a youngster, as he was an energetic and somewhat devilish lad, quick to pick a fight or to pull a prank. Growing up during the War of 1812, Franklin thrilled to tales of combat that he heard from his older brothers who served in this conflict. Franklin himself later served in the army during the Mexican War of 1846–1848.

Franklin was a good student, entering Bowdoin College in Brunswick, Maine, in 1820. During his sophomore year, he became acquainted with two incoming freshmen, Nathaniel Hawthorne, who became a lifelong friend, and Henry Wadsworth Longfellow. After graduating from Bowdoin, Franklin studied law and was admitted to the bar in 1827.

When he was 29, he married Jane Means Appleton, 28. She was accustomed to _____, having spent much of her youth in the mansion that her wealthy grandparents owned in Amherst, New Hampshire. Jane was a small, frail, and shy person. There was an obvious _____ between Jane's and Franklin's personalities. She preferred a simple, _____ private life, while he relished a boisterous, festive public life. Although they had genuine affection for each other, they began quarreling frequently early in their marriage and gradually drifted apart.

When Franklin was 32, he was elected as a Democrat to the U.S. Senate, and in 1852 he became the Democrat nominee for President. After his election but before he took office, his young son Bennie was killed in a train accident. Jane never recovered from this tragedy. For nearly two years she remained upstairs in the White House, depressed and with a(n) _____ of companionship. As a(n) _____ for her sorrow, she spent much of her time writing letters to her dead son.

Franklin Pierce's presidency was unsuccessful. Although he was seen as a person without _____, he was also considered a(n) _____ because of his often puzzling and controversial decisions. During his four years in office, his popularity declined sharply, and his own party did not re-nominate him for president in 1856.

After James Buchanan was sworn in as president, Franklin Pierce retired to Concord, New Hampshire. He spent his final years in financial security but suffered from severe emotional stress. He became a(n) _____ drinker, although it was difficult for him to hide his heavy drinking from his closest friends. During the Civil War, Jane, who never found relief from the depression she suffered as a result of Bennie's death, died of tuberculosis.

On October 8, 1869, the sad life of Franklin Pierce ended at the age of 65. He is buried at Concord's Old North Cemetery next to his wife.

MASTERING CONFUSING WORDS

coarse / course

coarse rough, vulgar, indecent:

Shay used coarse sandpaper to remove the coat of paint from the old table.

However, his coarse language almost caused the paint to blister and come off by itself.

course plan, route, school subject:

The course of action recommended by her lawyer was to file a legal complaint.

The cross-country course is at least five miles long, according to Bruno.

I enjoy my chemistry course, but I find it difficult and time-consuming.

Circle the correct answer:

1. Did you continue with your foreign language coarse / course this semester?
2. Occasionally, our coach gets angry, but I've never heard him use coarse / course language.
3. The coarse / course we took on our car trip followed the beautiful Connecticut River for many miles.

deleterious	hypothetical	aberration	alienation	gullible
felicitous	trepidation	collateral	impunity	immutable

CELEBRITY WORSHIP

Are you interested in the lives of celebrities? Using _____ reasoning, I'd say the answer is "yes," as studies indicate that people from six to sixty generally are. Of course, the degree of interest varies. Most people have only a passing curiosity: They are so involved in their own activities and relationships that they have little time or energy to devote major attention to "star watching." However, for some people, being engrossed with the lives of celebrities results in _____ from their families and friends. Such obsessed worshipers seem compelled to learn every scrap of information they can about their favorite celebrity, devouring magazines, newspapers, blogs, and other Internet sites, some of which seek to discover a(n) _____ in a celebrity's personal life or public behavior. Some bloggers appear to believe they can, with absolute _____, write anything they want about celebrities, and that _____ fans will believe it, even when the "information" is so absurd that most two-year-olds would know better.

Unfortunately, there are also a few mentally unbalanced individuals who identify so strongly with their idol that they become stalkers. A few years ago, a man from the Midwest borrowed thousands of dollars from a bank—using his house as _____—so that he could move to Los Angeles to be near his "only love," a popular television

actress. The actress naturally became filled with _____ as she began to see this man hanging around outside her apartment day and night. It was _____ that the security personnel at her apartment complex had also become aware of this stalker's presence. With their help, she secured a court order banning the man from not only the apartment complex area but also from the studio lot where she worked. The man soon moved back to the Midwest, much to the relief of the actress.

For a small number of people, then, celebrity worship can be _____ to their emotional and mental health; however, for most, it's a welcome diversion from their regular routines. In addition, psychologists say it's also a(n) _____ fact that admiring accomplished people and having appropriate idols can inspire us to strive toward our life's goals. Celebrity worship, like most things in life, is fine if not taken to the extreme—and if the celebrities are actually worthy role models.

MASTERING CONFUSING WORDS

weather / whether

weather atmospheric conditions:

April weather in the Midwest is unpredictable, with chilly rains one day and sunny, summer-like temperatures the next.

whether if:

I don't know whether Joss is coming with us, do you?

Circle the correct answer:

1. I can't remember weather / whether Kinsey or Serena is the oldest daughter in the family.
2. In the summer, the weather / whether can be a wee bit hot and humid in Texas.

Write original sentences using these words:

1. **weather:** _____

2. **whether:** _____

Idioms to Know

Left blowing in the wind: When a person is abandoned by someone so that he or she must deal with a problem alone.

Instead of Roger helping me explain to the teacher what went wrong with our lab experiment, he *left me blowing in the wind*.

Write an original sentence using *left blowing in the wind*:

An axe to grind: Having an unfair personal grudge against someone or something.

Don't let her criticism of that college bother you: she has *an axe to grind* because she wasn't accepted there.

Write an original sentence using *an axe to grind*:

Learning Challenging Words from Context Clues

1. **debacle** (də BAH kəl)—noun

- Our high-school class reunion was a *debacle*: someone had failed to mail all the invitations, so fewer than thirty people showed up; the restaurant manager had reserved the banquet room for the wrong evening; and the band knew few of the popular songs of our graduation year.
- Gordon laughingly complained that his grand plan for redecorating his apartment was quickly turning into a *debacle*. The wallpaper started coming off after he painted over it, and the carpet store had sent over a ghastly purple rug instead of the pale blue one he had ordered.

debacle is related to a (a) crime (b) disaster _____.

2. **deprivation** (dep rə VĀ shən)—noun

- Warren's raise finally enabled him and his family to live comfortably and not suffer any basic *deprivation*, such as the inadequate housing they had once experienced.

I'm Back!

It's difficult to _____ accurate figures of the number of adults aged twenty to thirty-four who have moved back in with their parents in recent years, but _____ sociologists, after checking and rechecking their figures, say the number is nearly 18 million. Furthermore, a(n) _____ finding in the opinion of a small minority of people, is that just over half of those about to graduate from college indicate that they will move back home to live with their parents. Should, then, their college education be considered a _____ of some sort? According to one professor considered by many authorities to be the _____ of a social analyst, the answer is an emphatic "No!" Then why do so many college graduates and other young adults appear to be wasting their _____ talents that, if fulfilled, would result in professional success as well as self-sufficiency? Not to _____ some of our elder citizens who seem to be _____ in

criticizing the younger generation, but there are a variety of valid reasons why young adults are again living at home.

For example, one recent graduate said that he and a number of his classmates had moved back home after graduation for _____ reasons. In his case, he wanted to pay off his college debts more quickly. He also said that three of his classmates had not been successful in finding jobs. Two other classmates, although employed, chose to live at home because they realized that the only way they could afford an apartment in the trendy suburban area close to where they worked was to give up many of the comforts they were accustomed to, an unreasonable _____, at least in their minds. Another classmate intended to go to graduate school, and living at home was the only way she could afford to do so.

Other young adults move back home to prepare for their marriages; others do so because of divorce. Regardless of the reasons, studies show that most parents are happy to have their children living with them again—particularly if it’s only temporary.

MASTERING CONFUSING WORDS

cloths / clothes

cloths fabrics made of such as wool and cotton:

The cloths in this quilt came from a trunk in my grandmother’s attic.

ROBERT LINCOLN

Abraham and Mary Lincoln had four children, all sons, but if you _____ through the family history, you will discover that only the eldest, Robert, lived to reach adulthood. Edward (1846–1850) died from diphtheria at age four in Springfield, Illinois; William (1850–1862) died from typhoid fever at eleven in Washington, D.C., during his father’s presidency; and Thomas (1853–1871), called Tad, died from tuberculosis at eighteen in Chicago.

Robert Lincoln was born in Springfield, Illinois, in 1843. He graduated from Harvard University in 1864, and although not among the most _____ in his graduating class, he did rank thirty-second among the ninety-nine graduates. He then attended Harvard Law School for a time, but during the last year of the _____ Civil War that seemingly would never end, Robert served faithfully and with _____ as a captain on General Grant’s staff.

On the morning of April 14, 1865, the day of his father's assassination by John Wilkes Booth, Robert was back in Washington and had breakfast with his family. He had been present when General Lee had surrendered to General Grant at Appomattox, Virginia, a week earlier, and he told his family the details relating to this momentous event. He also showed his father a photograph of General Robert E. Lee. After viewing the picture for some time, President Lincoln indicated that he thought General Lee's face reflected goodness.

That evening, President and Mrs. Lincoln attended a play, *Our American Cousin*, at Ford's Theater. Although he was asked to go with them, Robert declined, deciding instead to spend a quiet evening in his room at the White House. He likely was experiencing fatigue from the dramatic, long, and _____ events of the past few weeks.

Earlier that day, John Wilkes Booth had held a(n) _____ meeting with his fellow conspirators. Booth had favored the South during the war and had developed a pathological hatred of Lincoln, viewing him as a _____, ruthless dictator. By killing President Lincoln and members of his Cabinet, the latter of which Booth had assigned to his co-conspirators, Booth apparently thought he would put the federal government in such disarray that the South might have a chance to resume the war. Booth also hoped to _____ his reputation, not as an actor, but as a patriot for the South.

For the rest of his long life, Robert would never _____ himself for not attending the theater with his parents that tragic night. He thought he might have been a _____ that would have prevented the murder of his father.

A month after his father's assassination, Robert, his mother, and his brother Tad moved to Chicago. Robert took law courses at the University of Chicago, and he was admitted to the bar in 1867. The following year, Robert married Mary Eunice Harlan. Over the course of the next few years, they had two daughters (Mary and Jessie) and one son (Abraham, but called "Jack").

Robert Lincoln became a prosperous Chicago lawyer, and in 1881 President James Garfield appointed him Secretary of War (what we now call Secretary of Defense). He served in this capacity until 1885. (Ironically, as well as tragically, Robert served in the Cabinets of Presidents Garfield and McKinley, both of whom were also assassinated.)

Robert Lincoln died at his summer home in Manchester, Vermont, in 1926, just days short of his eighty-third birthday.

There were undeniable differences between Abraham and Robert Lincoln, both in appearance and in personality: in particular, whereas Abraham Lincoln was tall and slender, his son Robert was short and stocky. Robert was also much more reserved and introverted than his famous father. Nevertheless, Robert's life was one of accomplishments and of honor. The last person to have direct lineage to Abraham Lincoln was Robert's grandson, Robert "Bud" Beckwith, who died in 1985 without leaving any heirs.

MASTERING CONFUSING WORDS

shone / shown

shone the past tense of *shine*:

The moon shone brightly in the early evening sky.

shown the past tense of *show*:

One of my favorite movies was shown on TV the other evening.

Circle the correct answer:

ELIZABETH BLACKWELL, M.D.

Elizabeth Blackwell (1821–1910) was the first woman to earn a medical degree in the United States. She was born in England, but she and her family moved to the United States when she was eleven. Her father’s occupational pursuits in New York failed, so he moved the family to New Jersey and eventually to Cincinnati in an attempt to establish a successful business. Unfortunately, Mr. Blackwell died before doing so, leaving his family without any financial resources. To support themselves, Elizabeth, her sisters Anna and Marian, and their mother opened a private school.

During the next few years, Elizabeth taught in Cincinnati as well as in communities in Kentucky and North and South Carolina. From childhood on, Elizabeth always had _____ interests, ranging from literature to natural science, but during her teaching career, she developed a particular interest in medicine. She eventually decided to become a doctor, _____ that many women would prefer to consult with a woman physician about their health problems than with a male doctor.

After studying privately with male doctors, who supported her efforts after listening to her _____ reasons as to why they should help her realize her goal of becoming a physician, Elizabeth _____ the medical schools in the Northeast with admission applications. However, she constantly encountered a(n)

_____ that other women applicants knew only too well: the belief that only men possessed the necessary intellectual, emotional, and physical capacities to become doctors. Her applications were given only _____ attention, then quickly rejected.

However, when administration officials at Geneva Medical College in Geneva, New York, received Elizabeth's application, they decided to poll the students on whether she should be admitted. The students, apparently believing that the matter was a joke, nonchalantly _____ to her admission request. However, when they discovered that Elizabeth's application was genuine, they were shocked, then angry.

After Elizabeth arrived at the college and started to attend classes, many students shunned her. Some professors openly resented her, even prohibiting her from attending certain classroom demonstrations that were considered _____ to medical studies. Students and professors alike believed that Elizabeth had _____ a slot in the medical school that rightfully belonged to a man. Over time, however, students and professors came to admire her for her abilities and persistence. In 1849, Elizabeth graduated first in her class, becoming the first woman to graduate from medical school in the United States.

After further study in France and England, Elizabeth opened a clinic in 1853 in one of the most _____ slums in New York City. Her sister Emily, who had also become a doctor, and Dr. Marie Zakrzewsha, an immigrant from Poland, joined her medical staff. In addition, a number of the city's leading male physicians supported her clinic by serving as consultants. As the years passed, she helped to establish the New York Infirmary for Women and Children, and the Women's Central Association of Relief (this during the Civil War). She also inspired the creation of the U.S. Sanitary Commission and, with her sister, opened a medical college for women that existed for thirty-one years.

After living such a productive life, Dr. Elizabeth Blackwell died in 1910 at the age of eighty-nine.

breath a noun that refers to the act of inhaling and exhaling:

Bettina took a deep breath before diving into the water.

breathe a verb that means inhaling and exhaling air:

It was difficult to breathe in the stuffy, hot room.

Circle the correct answer:

deterrent

ominous

deleterious

inundating

astute

FLIP

Nora, in an effort to break her small male dog Flip from an irritating habit of uttering _____ growls before _____ her small apartment with his shrill barking every time her cell phone or doorbell rang, decided to take a number of _____ steps. Unfortunately, nothing worked until she discovered that the best _____ was to give Flip a dog biscuit whenever her phone or doorbell rang. However, being a(n) _____ dog, Flip soon learned to expect a biscuit whenever he heard any bell, including the doorbell of the apartment next door or a passing Good Humor truck.

Eventually, all the biscuits Flip consumed began to have a(n) _____ effect on his health: he gained way too much weight for such a small dog. Now, instead of being the _____ of a healthy, energetic dog, Flip became a model of an unhealthy and _____ one. During an appointment with Dr. Messenger, Flip’s veterinarian, Nora explained why Flip had gained so much weight. Dr. Messenger

suggested that instead of feeding Flip a dog biscuit every time he heard a bell, she should blow a dog whistle. He explained that humans can't hear the whistle, but dogs can. It was his belief, although _____, that Flip would immediately cease his growling and barking whenever he heard the penetrating whistle, and that Nora could then _____ Flip with reassuring words.

Nora was delighted when Dr. Messenger's theory turned out to be true, and Flip was soon cured of his _____. Even more important, Flip's entire _____, as well as his health and vigor, improved within a few weeks.

Analogies

After selecting your response, put the letter in the space provided.

- _____ 1. **felicitous : fortunate ::** a. energetic : peppy
b. intense : dull
c. lucky : fortunate
d. clumsy : graceful
- _____ 2. **trepidation : trembling ::** a. foolishness : giggling
b. courage : crying
c. curious : nosy
d. fear : quaking
- _____ 3. **collateral : guarantee ::** a. pledge : election
b. pledge : assure
c. pledge : abandon
d. pledge : collect
- _____ 4. **enhance : increase ::** a. occupy : weaken
b. import : surprisingly
c. strengthen : reinforce
d. impress : exhaust
- _____ 5. **garner : distribute ::** a. fix : ruin
b. talent : skill
c. save : keep
d. repair : restore
- _____ 6. **clandestine : sneaky ::** a. engage : retreat
b. regular : irregular
c. essential : necessary
d. sturdy : feeble

Mastering Confusing Words

Circle the correct answer.

1. I wasn't (conscience / conscious) of the fact that Amanda had finished her degree requirements last semester.
2. Do you think a green sofa would (complement / compliment) or clash with the room's other colors?
3. We've had so much dreary (whether / weather this month that I can't remember the last time the sun (shone / shown).
4. It was wonderful to (breath / breathe) fresh air again after being cooped up in the lab all afternoon.
5. I would like to (complement / compliment) Braden for the (coarse / course) of action he recommended: I think it will settle our problem once and for all.
6. We were both out of (breath / breathe) after running to catch the bus before it left, but we made it in time.
7. Do you have some (cloths / clothes) I could use to wipe up this mess? I even spilled some spaghetti on my (cloths / clothes).
8. Do you know (weather / whether) Leah has to work this evening?
9. I told you what might happen if you did that, so my (conscience / conscious) is clear. You have no right to use such (coarse / course) language with me.
10. Well, look who's (shone / shown) up to help set up for the dinner!

Crossword Puzzle

Solve the crossword by using the following words.

alienation	bereft	collateral	covert	debacle	deprivation

6. fussy, very particularly
7. disgraceful, shameful
8. of the first age of the earth
9. secret, concealed
10. to pick out from others, to select

PART TWO

Academic Terms

The eleven chapters in Part Two of *Building Vocabulary for College* enable you to become familiar with many of the basic terms associated with introductory college courses as they are similar to those you would find in the glossaries of college textbooks. Learning these terms' definitions now will be an asset to you as these terms often hold the key to understanding a subject's fundamental concepts.

Studying the Academic Terms

- Take advantage of pictures and other visual aids that may be available to acquaint you with certain academic terms.
- As was suggested you do with the challenging words in Part One, familiarize yourself with each academic term's pronunciation, part of speech, and definition, noting (1) the term is spelled phonetically so you know how it is pronounced; (2) a space separates each syllable, with the accented syllable printed in capital letters; and (3) the term's part of speech.

Examples: connotation (kon uh TAT shun)—noun
hypothesis (hi POTH uh sis)—noun

Note: The pronunciation given for each term in Part Two is a common one, but there may be other acceptable pronunciations.

- Read the sample sentence that follows the term's definition to deepen your understanding of the term.

Doing the Exercises

- Follow the directions for completing the chapter's exercises.
- Complete the **Mastering Confusing Words** and **Idioms to Know** lessons.
- Be prepared for review tests after completing chapters 18–22 and chapters 23–28.

Literature and composition embrace all human experiences: common, unique, sad, joyful, expected, unexpected, disenchanting, and inspirational. Because of this fact, these subjects can provide excellent opportunities to gain valuable insight into life. We all use figures of speech in our talking and writing; that is, we use expressions intended to be interpreted in an imaginative way. However, we may not know the specific names of the figures of speech we use. Here is an opportunity to learn the names of five of the most commonly used figures of speech:

1. simile (SIM ah lee)—noun

A simile is a figure of speech in which two unlike things are compared by using the word *like* or *as*.

“The frisky puppy ran around the yard like an unguided missile” is an example of a *simile*.

2. metaphor (MET uh for)—noun

A metaphor is a figure of speech in which two unlike things are compared or one thing is said to be another thing; the word *like* or *as* is not used in the comparison.

“On Saturday evenings, Wallace’s car was a panther slinking down Main Street, daring anyone or anything to challenge it” is an example of a *metaphor*.

3. analogy (uh NAL uh jee)—noun

An analogy is the general name often used when a comparison is made between unlike things. An *analogy*, however, is often expressed as a simile, as in “The football game was like a battle between gladiators.”

4. personification (pur son uh fa KAY shun)—noun

Personification is a figure of speech in which a nonhuman thing is given human qualities or is said to perform human actions.

“The flowers danced and smiled when the old gardener came their way” is an example of *personification*.

5. **hyperbole** (hi PUR buh lee)—noun

Hyperbole is a figure of speech in which exaggerated words are used for emphasis.

“The closet in my room is so cluttered that an ant wouldn’t have enough room to turn around” is an example of *hyperbole*.

Other common literary terms helpful to know include the following:

6. **genre** (ZHAN ruh)—noun

Genre refers to a category or type of literature, such as novel, autobiography, short story, or poetry.

Biography—an account of a person’s life—is the most popular *genre* of literature for many readers.

7. **denotation** (dee no TAY shun)—noun

Denotation refers to the strict, exact meaning of a word.

The *denotation* of father is “male parent.”

8. **connotation** (kon uh TAY shun)—noun

Connotation refers to a word’s suggested meaning or its emotional associations as contrasted to its denotation meaning; that is, its strict, exact meaning.

The denotation of *home* is residence, but the *connotation of home* suggests to many people feelings of love and security.

9. **alliteration** (uh lit uh RAY shun)—noun

Alliteration is the repetition of the first sound, usually a consonant, in a series of words.

“Francis is fair, frank, friendly, and famous” is an example of *alliteration*.

10. **antagonist** (an TAG uh nist)—noun; **protagonist** (pro TAG uh nist)—noun

The antagonist is the character in a story who oppose the hero or heroine, who is known as the protagonist.

In John Updike’s story “The Christian Roommates,” Lester Spotted Elk was the *antagonist* of Orson, the *protagonist*, when Orson was in high school.

11. **flashback** (FLASH bak)—noun

A flashback is an interruption in the flow of a story, play, or film to present action that occurred earlier.

A *flashback* in the movie showed the old man as a college student.

12. **foreshadowing** (for SHAD o ing)—noun

Foreshadowing is a hint in the story or drama of some coming event, often a tragic one.

The king's nightmare was a *foreshadowing* of the tragic battle that would result in his death the next day.

Literary Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|---------------------|--|
| _____ | 1. hyperbole | a. person who opposes the hero |
| _____ | 2. flashback | b. hint in a story of a coming event |
| _____ | 3. analogy | c. refers to the actual meaning of a word |
| _____ | 4. alliteration | d. interruption in a story to present a previous scene |
| _____ | 5. protagonist | e. general term for the comparison of unlike things |
| _____ | 6. connotation | f. comparison not using <i>like</i> or <i>as</i> |
| _____ | 7. simile | g. giving a thing human characteristics |
| _____ | 8. antagonist | h. hero or leading character in a story |
| _____ | 9. genre | i. category of literature |
| _____ | 10. denotation | j. comparison using <i>like</i> or <i>as</i> |
| _____ | 11. personification | k. exaggeration for the sake of effect |
| _____ | 12. metaphor | l. suggested meaning or emotional associations of a word |
| _____ | 13. foreshadowing | m. series of words starting with the same letter |

Fill-Ins

In each space, write the appropriate term from those listed below.

hyperbole	flashback	analogy	foreshadowing
personification	antagonist	alliteration	genre
denotation	metaphor	protagonist	connotation
simile			

1. "The tree stuck out its leg and tripped me," is _____.
2. The _____ in this story is a young man who eventually triumphs over his chief _____, an evil man who seeks revenge against him and his family.
3. The wilted rose in the bride's wedding bouquet provided a(n) _____ of a doomed marriage.
4. "I drove a million miles during spring break," is obviously _____.

5. The author uses a comical _____, comparing the young girl’s mind to a mug of fizzy root beer.
6. The _____ of *football* includes a game with eleven players on each team.
7. The _____ of *football* includes fall afternoons, marching bands, and roaring crowds.
8. “Grover’s speedboat is like a rocket when he lets out the throttle,” is a _____.
9. Poetry is another _____ of literature.
10. “Bruce brutally batted ball after ball” is an example of _____.
11. As the ship slowly sinks to the bottom of the ocean, there is a(n) _____ of the captain as a young man eagerly enlisting in the Navy.
12. “Riley was a perfectly tuned machine as he ran relentlessly mile after mile” is an example of a(n) _____.

Completing a Passage

Complete the passage by filling in each space with one of the words below

flashback	denotation	alliteration	metaphor
protagonist	simile	hyperbole	genre
antagonist	foreshadowing	connotation	analogy
personification			

LITERARY TERMS

Figures of speech play a prominent role in both prose (regular writing) and poetry. For example, the _____ “Brian was like a tornado on the basketball floor,” the _____ “Brian was a tornado on the basketball floor,” and the _____ “The tornado spread its twisting arms to embrace three entire counties before it breathed its last” could appear in any _____, whether it be fiction, nonfiction, or poetry.

Denotation and connotation are also important contributors to writing. _____ refers to the dictionary meaning of a word (*bomb*—an explosive weapon), whereas _____ refers to the imaginative use of a word (*bomb*—a miserable failure).

Sue Grafton, a writer of a popular mystery series, uses figures of speech like the preceding as well as a smattering of _____ in titling her books, such as *A is for Alibi*, *B is for Burglar*, *C is for Corpse*, and so on through the alphabet. Grafton also

resorts to a _____ now and then to give readers a glimpse into a character's past. _____ is another literary device Grafton uses so that readers have hints about what may happen in the future. She also relies on _____, or comparisons of unlike things, and _____, or exaggeration, to describe the twists, turns, and surprises that are a trademark of her mysteries. The _____ in all of Grafton's novels is a young woman private investigator, Kinsey Millhone, but the _____ who opposes her can vary from a vicious young man to a seemingly sweet old lady.

Sue Grafton is a popular author for many reasons, but one reason is surely her talent for effectively using literary devices like those mentioned above.

BONUS WORD:

onomatopoeia (ON uh MAT uh PEE uh)—noun

Onomatopoeia is the formation of words in imitation of natural sounds, such as *buzz* or *meow*. Other examples of onomatopoeia words include *crack*, *bang*, *crackle*, *fizz*, *splash*, *boom*, *quack*, and *chirp*.

MASTERING CONFUSING WORDS

loose / lose

loose not tight, unfastened:

My seven-year-old brother has some loose teeth.

One of the bolts on the swing set was loose, so I tightened it.

lose to suffer defeat or to misplace something:

After leading the entire game, I didn't think the Bulldogs would lose, but they did.

Valerie, did you lose your Spanish book?

Circle the correct answer:

1. I thought the Mustangs would loose / lose the game after their star player fouled out, but they hung on and won by three points.
2. One of the hinges on the back door is loose / lose.
3. Don't loose / lose the car keys again, young man.

Write original sentences using these words:

1. **loose:** _____

2. **lose:** _____

Idioms to Know

Button your lip: Stop talking.

Rachel and I had been arguing for some time until she finally said in exasperation, "*Button your lip.*"

Write an original sentence using *button your lip*:

Add fuel to the fire: When something is done or said that makes a bad situation even worse.

I *added fuel to the fire* when I told the frustrated man, "Your wife is right; you're never going to fix the leak with that gunk."

Write an original sentence using *add fuel to the fire*:

Learning Oral Communication Terms from Context Clues: Set 1

Because communicating with family, friends, associates, and countless others plays such a key role in our lives, college students, regardless of their majors, are usually required to take at least one course in oral communications (speech). This enhances their ability to interact formally and informally with others, whether in a one-to-one, small-group, or large-group situation. The terms presented here and in the following lesson are among those frequently used in introductory oral communication courses. In addition, a review of the **literature** and **composition** terms preceding these lessons is advisable, as many of these words are also used in oral communication courses.

1. **venue** (VEN yoo)—noun

The place where communication, such as a speech, takes place.

Often, *venue* refers not only to the place where communication takes place, but also to the specific occasion and purpose of the communication.

2. **context** (KON tekst)—noun

The environment in which communication takes place.

Context includes the physical, social, and psychological conditions existing when communication takes place.

3. **speaking** (SPEEK ing) **voice** (vois)—adjective + noun

Refers to the basic factors relating to speech.

The basic factors relating to *speaking voice* include **volume** (loudness, softness), **pitch** (highness, lowness), **inflections** (variations of pitch), **tempo** (speaking rate), **tone** (attitude toward a subject, such as humorous or serious), **diction** (choice and use of words), and **pronunciation**.

4. **active** (AK tiv) and **passive** (PAS iv) **voice** (vois)—adjectives + noun

A verb is in the active voice when the subject of the sentence does the action that the verb describes:

Karen washed the car.

A verb is in the passive voice when it acts upon the subject:

The car was washed by Karen.

Generally, it is best to use the *active voice* for both writing and speaking because it produces more direct, powerful, and interesting communication than the *passive voice* does.

5. enunciation (i NUN sē Ā shən)—noun

Refers to the correct and precise pronunciation of words.

In casual conversations, it's usually okay for us to mispronounce or slur certain words, such as saying “accidently” instead of “accidentally” and “wif” instead of “with”; however, in more formal speaking situations, we should make sure our *enunciation* of all words is appropriate.

6. impromptu speaking (im PROMP too SPEEK ing)—adjective + noun

Speaking done with little or no advance preparation.

Though always a challenge, *impromptu speaking* can be effective and rewarding if the speaker focuses upon one or two main ideas and then provides specific examples for clarification or support.

7. kinesics (kuh NESE iks)—noun

Refers to body movements or body language.

Communication is influenced by *kinesics*, or body movements, which include gestures, posture, facial expressions, and eye behavior.

8. rapport (ra POR)—noun

A harmonious connection between a speaker and his or her audience.

To communicate effectively, speakers must establish *rapport* with their audience, and humor is often used for this purpose.

9. premise (PRIM is)—noun

An assertion made by a speaker that serves as a basis for an argument or for a conclusion.

The speaker's *premise* was that students shouldn't have to pay to attend any athletic or musical events on campus because they already pay an activity fee each semester.

10. critique (kri TEEK)—noun

A careful, in-depth review of something, such as a movie, book, piece of artwork, organization, or product.

The speaker gave a *critique* of the student support programs currently existing on campus. For the most part, she was complimentary of the programs and the people responsible for them; however, she felt the financial aid office was significantly understaffed.

Oral Communication Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|------------------------|---|
| _____ | 1. venue | a. body movements, such as gestures |
| _____ | 2. context | b. when the subject of the sentence does the action that the verb describes |
| _____ | 3. rapport | c. the environment in which communication takes place |
| _____ | 4. critique | d. harmonious connection between speaker and audience |
| _____ | 5. premise | e. speaking done with little or no advance preparation |
| _____ | 6. kinesics | f. the place where communication takes place |
| _____ | 7. speaking voice | g. the correct and precise pronunciation of words |
| _____ | 8. active voice | h. assertion that serves as the basis for an argument or main point of a speech |
| _____ | 9. passive voice | i. in-depth review, such as a movie or book |
| _____ | 10. enunciation | j. refers to the basic factors relating to speech, such as volume, tempo, and diction |
| _____ | 11. impromptu speaking | k. when the verb acts upon the subject |

Fill-Ins

In each space, write the appropriate term from those listed below.

venue rapport premise speaking voice passive impromptu
context critique kinesics active enunciation

1. “The meal was cooked by Jeff” is written in the _____ voice, whereas “Jeff cooked the meal” is in the _____ voice.
2. My instructor gave me three minutes to prepare for a(n) _____ speech on my favorite movie.
3. The teacher has excellent _____ with her students: she calls on them by name and appreciates what they have to say.
4. Our instructor’s use of _____, especially his gestures and facial expressions, effectively convey his sense of humor as well as the main points he wishes to stress during class discussions.
5. His _____ of some words was faulty, as he said “incidentally” instead of “incidentally” and “choclote” instead of “chocolate.”

6. Today's class was devoted to _____, so we discussed such matters as volume, tone, and tempo when we gave a speech.
7. The speaker's basic assumption was that all college students enjoy team sports, and because we were college students, we all enjoyed team sports; however, his _____ was faulty because many college students don't care about team sports at all, preferring outdoor activities such as hiking, camping, and kayaking.
8. The _____, or environment, in which a speech takes place, includes a number of physical, social, and psychological factors, such as the size of the room, the room's temperature, and the ages, backgrounds, and attitudes of the listeners.
9. In speech class today, John gave an impressive _____ of last weekend's rock concert. Although he praised the band's musicianship and choice of numbers, he said that the lead singer overpowered the other singers and that the band's sound system was inadequate, at least for Hudson Hall, the _____ where the concert was held.

Completing the Passage

After reading the selection, fill in each space with one of the terms listed below.

enunciation	rapport	active	venue	speaking
impromptu	context	passive	premise	kinesics

SPEECH GUIDELINES

If you are scheduled to speak formally rather than in a(n) _____ manner, two factors you need to know are the _____, that is, where you will be giving the speech, and the _____. If, for example, you will be speaking in a fairly small room before twenty to thirty people, then you might decide that a multimedia presentation, such as PowerPoint and video clips, would enrich your speech. On the other hand, if you will be speaking before a large group in a spacious hall, you probably will need an appropriate sound system.

Another initial consideration is whether the purpose of your speech is to inform, entertain, persuade, inspire, or motivate. When your purpose is to persuade, it is particularly important that your major assertion or _____ is clear and supported as specifically as possible and that appropriate _____, particularly gestures, facial expressions, and posture, are used to help convey your message.

Keep in mind your audience: Will they be familiar or unfamiliar with your topic? What will be the age range of most of them? Would humor serve as an effective way to establish _____ with them, or should you adopt some other approach?

Research the topic of your speech to make sure your information is up-to-date. You certainly can also use a personal story or two, especially if it helps to make abstract or confusing information clearer. Whenever possible, speak in the _____ rather than the _____ voice, as it is more direct, powerful, and interesting. And be sure your _____ is precise and your _____ voice reflects the proper volume, tone, and diction.

Finally, it's generally best to make sure that your speech doesn't exceed twenty minutes: even the best audiences become restless or overloaded with information in that amount of time.

BONUS WORD: **catalyst** (KAT uh list)—noun

As used in speech, **catalyst** refers to anything that enriches communication, such as good acoustics or helpful visual aids. (**Catalyst** is also a term used in science, and refers to a substance that accelerates a chemical reaction without itself undergoing any change.)

MASTERING CONFUSING WORDS

threw / through

threw past tense of *throw*:

Stan threw his tools in the back of his pickup and left for work.

through from one side to the other; also means completed:

Dora looked through her clothes to find something she thought would be appropriate to wear to the party.

When Ramon got through painting the porch, it was six o'clock, so he decided to call it a day.

Circle the correct answer:

1. Lance walked threw / through the computer lab looking for someone to help him.
2. I threw / through the trash into the wastebasket.
3. Ashley wondered if she'd ever get threw / through writing her paper.

Write original sentences using these words:

1. **threw:** _____

2. **through:** _____

Idioms to Know

Ruffle feathers: To do or say something that upsets someone.

It would *ruffle Sloane's feathers* if we told her that I intended to room with you next semester, so let's not say anything about our decision for now.

Write an original sentence using *ruffle feathers*:

Flash in the pan: Somebody who shows great promise in the beginning but fails to deliver in the end.

Many fans thought Cassie would be a soccer superstar after seeing her outstanding play in her first couple of games, but as the season progressed, she turned out to be a *flash in the pan*.

Write an original sentence using *flash in the pan*:

Psychology is devoted to the systematic study of behavior as well as to the motives for that behavior. Psychology has been found to be an appropriate college major for not only students planning a career in this field, but also for those planning careers in law, business, social work, teaching, and other professions as well. Mastery of the psychology terms presented in this chapter can contribute to your understanding of the basic concepts of this intriguing subject.

1. control group (kun TROL GROOP)—adjective + noun

A group of subjects (people or other organisms) exposed to all the features of a particular experiment *except* for the variable being studied (see **3**). The characteristics of the control group are always matched as closely as possible to those of the experimental group, but the control group is often “treated” with a *placebo* (see **4**) instead of the actual variable.

2. experimental group (ik SPER uh MEN tul GROOP)—adjective + noun

A group of subjects exposed to the variable being investigated in an experiment. The researcher is attempting to discover the effects of the variable on the subjects. The people in the experimental and control groups are of the same age and state of health and follow the same diet and physical routine.

In this study, the *experimental group* received 1000 mg of vitamin D daily to see if it would protect them from colds and other viruses during the winter months. Those in the *control group* received a *placebo* (see **4**). The experimental and control groups are unaware which group is receiving the real variable (vitamin D) and which group is receiving the fake one (placebo).

3. variable (VAR uh bul)—noun

In an experiment, the condition or fact that can be changed or manipulated. (In **2**, vitamin D is the *variable*.)

4. placebo (pluh SEE bo)—noun

An inactive substance used as a control in an experiment to determine the effectiveness of a medical drug or some other treatment. Because a *placebo* is a sugar pill or some other pill without medicinal value, it can serve as a valid comparison to the drug or treatment being tested. However, it can also produce psychological benefits because people in the control group sometimes feel better simply because they are taking what they believe is “medicine.”

The experimental group was given a daily vitamin D pill, whereas the control group was given a pill that looked like a vitamin D pill but was actually a *placebo* containing sugar.

5. empirical (em PIR uh kul)—adjective

Relating to what has been precisely experienced or observed in experiments.

The *empirical* evidence was recorded so that the experiment could be evaluated.

6. hypothesis (hi POTH uh sis)—noun

A logical explanation that needs further investigation before it can be said to be true.

The *hypothesis* for many years was that poliomyelitis was caused by a virus, but this *hypothesis* wasn't found to be true until the 1950s.

7. cognitive (KOG nuh tiv)—adjective

Relating to mental activities like thinking, reasoning, understanding, and knowing.

A major stage in a child's *cognitive* development is reached when he or she becomes capable of abstract reasoning.

8. ego (E go)—noun; **id** (ID)—noun; **superego** (SOO pur E go)—noun

Ego, id, and superego are terms associated with Sigmund Freud (1856–1939), the founder of psychoanalysis. The ego is the conscious part of the personality and is responsible for logical thinking.

The id is the instinctive part of the personality, including the sexual and aggressive instincts, that seeks immediate gratification. Freud maintained that the id is the first system to develop within a person because it is most closely related to the biological realm. The id is the “home” of all psychological energy, or libido (Latin for “lust”).

The superego is the moralistic part of the personality, including beliefs about what conduct is right or wrong.

The *ego* has to resolve the conflicting demands of the *id*, *superego*, and external reality. The *id* is the pleasure-loving, selfish side of a person's personality that seeks immediate satisfaction regardless of consequences. The *superego*, or conscience, is largely a product of parental and societal influences.

9. psychoanalysis (SI ko uh NAL uh sis)—noun

Psychoanalysis is a method of treating emotional disorders through free association, that is, having the patient talk freely about personal experiences, particularly those relating to childhood and dreams.

Sigmund Freud developed *psychoanalysis* in the belief that freely talking about anything coming to mind will uncover hidden emotional conflicts.

Sigmund Freud introduced the practice of *psychoanalysis* to help patients understand their hidden desires and emotions.

10. neurosis (nyoo RO sis)—noun

Neurosis is the term used for emotional disorders characterized by anxiety or other symptoms. A neurosis is not a physical or mental disease, and the sufferer does not lose contact with reality. A neurosis is not as severe a disorder as a *psychosis* (see 11).

Claustrophobia (a fear of enclosed places, such as an elevator) is a common *neurosis*.

11. psychosis (si KO sis)—noun

A psychosis is a severe mental disorder involving personality disorganization and a lack of contact with reality.

A person suffering from a *psychosis* is considered insane.

12. defense mechanisms (duh FENS MEK uh NIZ ums)—adjective + noun

Defense mechanisms are unconscious strategies we use to protect ourselves against unpleasant emotions or to maintain our self-images.

Repression (selective forgetting) and rationalization (excuse making) are two common *defense mechanisms*.

Psychology Terms and Definitions

Match

Match each definition with the term it defines.

- | | |
|--------------------------|--|
| _____ 1. control | a. mechanisms used to protect one's emotions or self-image |
| _____ 2. experimental | b. logical explanation that will be tested for its validity |
| _____ 3. variable | c. instinctive part of the personality |
| _____ 4. placebo | d. group in an experiment not exposed to the variable |
| _____ 5. empirical | e. severe mental disorder |
| _____ 6. hypothesis | f. factor manipulated in an experiment |
| _____ 7. cognitive | g. treatment approach using free association |
| _____ 8. ego | h. an emotional disorder but person is in contact with reality |
| _____ 9. id | i. evidence experienced or observed |
| _____ 10. superego | j. concerned with intellectual abilities |
| _____ 11. psychoanalysis | k. concerned with right and wrong |
| _____ 12. neurosis | l. group exposed to <i>all</i> features of an experiment |
| _____ 13. psychosis | m. responsible for logical thinking |
| _____ 14. defense | n. an inactive substance often used in experiments |

Fill-Ins

In each space, write the appropriate term from those listed below.

defense	neurosis	psychosis	empirical	control
variable	experimental	ego	cognitive	placebo
superego	psychoanalysis	id	hypothesis	

1. Niacin was the _____ used in the study to see if it would help to reduce high cholesterol readings. My folks were in the _____ group, so they received a daily niacin capsule. Another couple I know was in the _____ group, so they were given a _____, which was simple a capsule with nothing in it.

2. The _____ evidence gathered from the experiment indicated that niacin moderately reduced cholesterol.
3. As children mature, their _____ skills become more developed, allowing them to solve more complex problems.
4. My _____ is that my youngest brother will overcome his shyness as he gets older.
5. An individual who is out of touch with reality and whose personality has become disorganized is suffering from a(n) _____.
6. The _____ is the primitive part of the personality that seeks immediate gratification regardless of the consequences, while the _____ is the part of the personality that strives to maintain moral standards.
7. Although my long-time friend is often plagued by anxiety, he is able to meet his responsibilities; nevertheless, he's seeing a psychologist for help in overcoming his _____.
8. Patients undergoing _____ are encouraged to discuss their childhood in an effort to discover the root cause of their emotional struggles.
9. After someone else was given the promotion he had requested, Abner said that was okay with him because the salary raise wasn't much; besides, he didn't think he would like the people he would have had to work with, anyway. Abner's statements represent the possible use of _____ mechanisms.
10. The _____ is that part of the personality responsible for logical reasoning and one's self-image.

Complete the passage by filling in each space with one of the words below.

ego	placebo	defense	control	hypothesis
superego	neurosis	id	experimental	cognitive
psychosis	variable	psychoanalysis	empirical	

PSYCHOLOGY

Psychology, a branch of philosophy until the late 1800s, has always been surrounded by controversy. Sigmund Freud's _____ that the human personality could be divided into the _____ (the instinctive, impulsive part), the _____ (the self-image part), and the _____ (the moralistic part) has stirred up passions for and against this theory ever since he proposed it in 1920. Freud's treatment of emotional

problems by _____, with its emphasis on free association, has also had its share of defenders and critics, including one of the latter who believed it was the biggest fraud of the twentieth century. Nevertheless, Freud's proposition that people resort to _____ mechanisms, such as repression and rationalization, and other _____ maneuvers to protect their self-esteem has gained wide acceptance, as has a number of psychological terms associated with him, such as _____ (emotional distress) and _____ (serious mental disorder).

Psychologists through the years have been criticized because of a lack of _____ evidence to back up their claims. As a result, their investigations began to include a(n) _____ group (those subjected to the treatment, or _____), and a(n) _____ group (those who receive a harmless _____) in an effort to obtain verifiable evidence to support their findings. Nevertheless, psychology remains a controversial, but helpful and popular, discipline.

BONUS WORD: psychosomatic (SI ko so MAT ik)—adjective

Psychosomatic is the term used to reflect the influence the mind can have on the body. For example, the cause of a patient's severe headaches may be due to emotional, not physical, reasons. The term comes from the Greek *psyche* (mind) + *soma* (body). Since the 1930s, **psychosomatic** has been a term used for physical problems caused by emotional disorders.

farther refers to physical distance:

We decided not to hike any farther because it was getting dark.

further indicates to a greater extent or degree:

The happy couple said they would announce their plans in further detail in a couple of weeks.

The governor said the budget would take further study before a final decision could be reached.

Circle the correct answer:

1. After moving to the Southwest, Harry had no farther / further problems with asthma.
2. How much farther / further is it to Dallas?
3. Until farther / further notice, Essex Street will be closed for repairs.

Write original sentences using these words:

1. **farther:** _____

2. **further:** _____

Idioms to Know

I've got your back: A person says this to indicate that he or she will protect someone from harm or criticism by others.

Ed said, "Don't worry, my friend, *I've got your back* if anyone blames you for what happened."

Write an original sentence using *I've got your back*:

Go down like a lead balloon: A suggestion, statement, or action that is overwhelmingly rejected.

When I worked for Mr. Heller, every suggestion I made to him for improving business would *go down like a lead balloon*.

Write an original sentence using *down like a lead balloon*:

Sociology is concerned with the systematic study of human society, including the social interactions among nations, communities, and families. Sociology includes many subfields, such as gerontology, social psychology, and religious and educational sociology. Mastery of the terms presented in this chapter can give you insight into this valuable social science.

1. acculturation (uh kul chuh RAY shun)—noun

Modification of a culture as a result of interaction with another culture.

The *acculturation* of the Japanese to many aspects of Western culture began after World War II.

2. agrarian (uh GRAG ee un)—adjective

Relates to rural life, agricultural groups, and farm ownership.

During the twentieth century, the United States moved from a predominantly *agrarian* to an urban society.

3. bureaucracy (bu ROK ruh se)—noun

Refers to the government's structure, with its numerous offices and officials who have clearly defined responsibilities; is often characterized by inflexible rules and endless red tape.

The Duncans did not let the irritating *bureaucracy* discourage them from attempting to adopt a child.

4. culture (KUL chur)—noun

The patterns of life shared by members of a society and transmitted from one generation to another.

Eating three meals a day is part of our *culture*.

5. demography (duh MOG ruh fee)—noun

The statistical study of human populations, such as information about the number of births, deaths, and marriages.

A study of *demography* reveals that one of the highest birthrates in the United States occurred in the late 1940s.

6. ethnic group (ETH nik GROOP)—adjective + noun

A group within a society that shares the same traits, such as race, nationality, religion, language, and customs.

Immigrants from Germany were an *ethnic group* that helped to settle Cincinnati, Ohio.

7. ethnocentrism (eth no SEN triz um)—noun

The belief that one's own race, nation, or culture is superior to all others.

When people are initially exposed to a different culture, they may fall victim to *ethnocentrism*, a feeling that the new culture they are experiencing is inferior to the one to which they are accustomed.

8. social norms (SO shul NORMS)—adjective + noun

Standards that guide people in what they should or should not do in any particular social situation.

Laws are serious and formal *social norms*.

9. mores (MOR ayes)—noun

Social norms that reflect the moral standards of a society.

Marrying a close relative is opposed by the *mores* of most societies.

10. folkways (FOOK ways)—noun

Social customs approved by society; folkways are not considered as morally significant as mores (see **9**), so they are not strictly enforced.

One of the *folkways* in our society is that a person should dress at least fairly formally when attending a wedding, but it is not considered a serious offense if someone appears wearing jeans and a t-shirt.

11. peer group (PEER GROOP)—adjective + noun

A grouping of individuals of the same general age and social position.

As a child becomes older, his or her *peer group* has more influence.

12. sibling (SIB ling)—noun

A brother or sister.

Jack, my oldest *sibling*, is studying law at a university in New Jersey.

13. stereotype (STER ee uh type)—noun; verb

A standardized image applied to individuals who are identified with a particular group (noun); to make a stereotype of (verb).

The *stereotype* (noun) of the cowboy of the 1850–1920 era is that of a fearless, rugged, independent person; however, we shouldn't *stereotype* (verb) all cowboys of that time in such a manner because it would be inaccurate.

14. urbanism (UR buh niz um)—noun

Patterns of life characteristic of cities.

Some of the benefits of *urbanism* include access to outstanding museums, theaters, and restaurants.

Sociology Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|-------------------|--|
| _____ | 1. social norms | a. adopting new patterns of life |
| _____ | 2. mores | b. a fixed view of individuals |
| _____ | 3. bureaucracy | c. customs not strictly enforced |
| _____ | 4. culture | d. a brother or sister |
| _____ | 5. peer group | e. standards for social behavior |
| _____ | 6. stereotype | f. refers to country life and farming |
| _____ | 7. demography | g. guides that provide moral standards |
| _____ | 8. acculturation | h. study of population figures |
| _____ | 9. urbanism | i. people sharing certain characteristics |
| _____ | 10. agrarian | j. refers to cities |
| _____ | 11. sibling | k. individuals of similar backgrounds |
| _____ | 12. ethnic group | l. belief that one's own culture is the best |
| _____ | 13. folkways | m. organization with rigid rules |
| _____ | 14. ethnocentrism | n. customs and values shared by a society |

Fill-Ins

In each space, write the appropriate term from those listed below.

demography	folkways	urbanism	ethnocentrism	acculturation
peer	culture	stereotype	mores	norms
sibling	agrarian	ethnic	social	bureaucracy

- Mary Beth was exhibiting _____ when she insisted that England's culture is superior to that of any other country.
- People of French descent have been a major _____ group throughout Maine's history.
- The newspaper's editor blamed the state _____ for the endless paperwork involved in the proposed construction of a new city bridge.

4. Among the _____ in our society is the expectation that store clerks will be courteous to customers.
5. Guides that help us to decide how we should behave when in public are _____.
6. Because friends are important to all of us, we wish to be accepted by our _____ group.
7. A United States citizen who moves to the Philippines undergoes a(n) _____ process because of the necessity to acquire new ways of functioning in a different society.
8. Human population figures have to do with the subject of _____.
9. A word referring to city life is _____.
10. Strict guides concerned with society's important moral standards are called _____.
11. Do you know whether Todd's _____ is a brother or sister?
12. Iowa and Nebraska are considered _____ states because of the importance of agriculture to their economy.
13. Laws, religion, and manners are part of our _____.
14. A person who is overly aggressive, loud, and deceptive is the _____ many people have of a used car salesman.

Completing the Passage

Complete the passage by filling in each space with one of the words below.

urbanism	stereotype	bureaucracy	ethnic
social	norms	agrarian	folkways
peer group	demography	ethnocentrism	group
mores	sibling	culture	acculturation

SOCIOLOGY

An important contribution of sociologists has been the development of creditable opinion polls and surveys, as government, business, and educational organizations require systematic methods for gathering valid information about our _____ to make informed decisions. Opinion polls involve _____, that is, the statistical study of births, deaths, marriages, and other such information, such as the influence the eldest _____ may have on his or her younger brothers or sisters.

With the data provided by opinion polls, sociologists are able to identify shifts, if any, in the nation's _____, such as whether certain behaviors once

considered _____ are now classified as the less important _____. Opinion polls also help sociologists discover whether the status of people engaged in various occupations has undergone a significant change. For example, a recent poll indicated that the social ranking of cosmetologists has risen significantly in recent years while the ranking of politicians has remained virtually the same, an indication that many people continue to _____ them as slick and self-serving rather than hardworking public servants.

Government officials are also interested in the information yielded by surveys or polls because they must stay current regarding all matters affecting citizens, whether these matters relate to _____ (metropolitan) or _____ (rural) life. However, after studying the data, they often add even more rules and regulations to an already complex _____.

To have validity, a poll or survey must be a representative sample that accurately mirrors the entire population under study. For example, if a poll's purpose is to gather information about the religious views of students attending colleges and universities in the United States, then steps must be taken to ensure that the polling sample is sufficiently large and varied so that it truly represents this population. In such a poll, the opinions of _____ are essential, but efforts must be made to rule out the domination of any one _____ group. And because most people possess at least some degree of _____ when it comes to cultural matters such as religion, efforts must also be made to poll college students not only from the United States but also from foreign countries—students who are likely undergoing _____.

Though people may sometimes be skeptical about the accuracy of certain polls and surveys, sociologists and others have confidence in their findings if they are based on a representative sample of the group under study, if the polling questions are free of bias, and if the data gathered are analyzed correctly.

BONUS WORD: Utopia (yoo TOH pee uh)—noun

Utopia is a book written by Thomas More in 1516 about an imaginary island where people enjoy perfect legal, social, and political systems. Today, as it has since More's time, **utopia** still refers to an imaginary, ideal place.

desert (1) dry, barren land; (2) forsaking one's duty:

This part of the state would be a desert if it weren't for irrigation.

Mike would never desert his work responsibilities to go with us on such a long trip.

dessert the last course of a meal, often pastries or ice cream:

Gingerbread with lots of whipped cream is my son's favorite dessert.

Circle the correct answer:

1. We decided on strawberry shortcake for desert / dessert.
2. Various kinds of beautiful flowers bloom in the Arizona desert / dessert in late winter and early spring.
3. You must make sure that no one tries to sneak into the concert without a ticket, so don't desert / dessert your post.

Write original sentences using these words:

1. **desert:** _____

2. **dessert:** _____

Idioms to Know

Kick the bucket: To die.

Uncle Bert was so sick last month that I thought he was going to *kick the bucket*, but he's now doing fine, thank goodness.

Write an original sentence using *kick the bucket*:

Long in the tooth: An old person, or a person getting on in years.

I don't think the Cardinals should have given that player a five-year contract: he's getting *long in the tooth*, and will probably play well for only another year or two.

Write an original sentence using *long in the tooth*:

The social sciences embrace content concerned with government and history. U.S. citizens need to understand their nation's heritage and political system if they are to meet their obligations and safeguard their rights. Knowledge of the terms presented in this chapter is useful for courses in United States history and political science.

1. amendment (uh MEND munt)—noun

A change or addition to the Constitution, the basic document establishing the framework of the federal government. There are currently twenty-six amendments to the Constitution.

The Thirteenth *Amendment* forbids slavery.

2. three branches of government:

legislative (LEJ is lay tiv)—adjective, noun

The legislative branch (House of Representatives and Senate) are debating whether the proposed immigration bill should be passed into law.

executive (ig ZEK yuh tiv)—adjective, noun

The executive branch (the President) does not hesitate to enforce the laws concerned with business and financial regulations.

judiciary (joo DISH ee ur ee)—adjective, noun

The judiciary branch (Supreme Court) declared that the environmental law passed by Congress and signed by the President is unconstitutional.

3. ratification (rat uh fuh KAY shun)—noun

A power held by the legislative branch of government (Congress) to approve or disapprove recommendations or actions of the president or other government officials. The Senate's *ratification* is necessary before the treaty becomes official.

4. veto (VE toe)—noun

The president's refusal to sign a bill into law.

The president said he would *veto* the education bill passed by Congress.

5. eminent domain (EM uh nunt dough MAIN)—adjective + noun

The power of the government to acquire private property for public purposes.

The state government's power of *eminent domain* forced the O'Connors to sell a section of their farm so the highway could be altered.

6. laissez-faire (les aye FAIR)—adjective, noun

Characterized by an economic policy that opposes government interferences in business affairs.

The presidential candidate stated that he favored a *laissez-faire*, or government noninterference, when it came to economic matters, but he believed that certain business and financial regulations were necessary so that abuses would not occur.

7. boycott (BOY kot)—noun

An economic means of influencing another nation or business by refusing to purchase its products.

After the British government enacted the Stamp Act, colonial merchants decided to *boycott* English goods, especially tea.

8. filibuster (FILL uh bus tur)—noun

A technique by which a minority of senators attempts to block the passage of a bill through continuous talk, thus delaying the vote.

The *filibuster* has lasted six hours so far, so the controversial bill has not come to a vote.

9. impeachment (im PEECH munt)—noun

A constitutional procedure for removing the president and other high federal officials from office for illegal activities.

Andrew Johnson, who served as president from 1865 to 1869 after the assassination of Abraham Lincoln, and William Clinton, who served as president from 1993 to 2000, are the only presidents to have faced *impeachment*; both were acquitted by the Senate.

10. appropriation (uh PRO pre A shun)—noun

A grant of money to finance a government program.

Congress has approved an *appropriation* to improve the interstate highway system.

11. referendum (REF uh REN dum)—noun

An electoral device that allows voters to approve or disapprove an action taken by their state legislature.

The *referendum* to allow gambling casinos in the state was narrowly defeated by the voters.

12. gerrymandering (JER ee MAN dur ing)—noun or verb

Establishment of a voting district in such a way as to give an advantage to one political party.

The Democrats accused the Republicans of *gerrymandering* the boundaries of the metropolitan area to obtain a voting advantage during elections.

13. lame duck (LAME DUK)—adjective + noun

An elected official whose influence is weakened because he or she is soon to leave office, as a result of either an election defeat or a law that prohibits another term.

The senator, a *lame duck* after losing the fall election, announced that he would join a Washington, D.C., law firm after his senate term expires.

14. red herring (RED HAIR ing)—adjective + noun

An irrelevant topic that diverts attention from the main issue.

The candidate running against the senator angrily claims that the senator's remarks about her divorce years ago is a *red herring* to draw attention away from his poor voting record on important matters such as education and the national debt.

Social Science Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|---------------------------|--|
| _____ | 1. amendment | a. officeholder whose term is almost over |
| _____ | 2. boycott | b. redrawing voting districts to gain an election advantage |
| _____ | 3. legislature | c. enables citizens of a state to call for a special vote |
| _____ | 4. impeachment | d. stalling talk to stop a bill from coming to a vote |
| _____ | 5. judiciary | e. something that distracts from the main issue |
| _____ | 6. red herring | f. money budgeted for a government program |
| _____ | 7. veto | g. branch of government that makes the laws |
| _____ | 8. laissez-faire | h. addition or change in the Constitution |
| _____ | 9. ratification | i. government's power to secure private property |
| _____ | 10. gerrymandering | j. method of removing high government officials from office |
| _____ | 11. filibuster | k. branch of government that interprets the laws |
| _____ | 12. lame duck | l. legislative power to approve certain government actions |

- | | |
|--------------------------|--|
| _____ 13. executive | m. noninterference |
| _____ 14. eminent domain | n. refusal to buy |
| _____ 15. appropriation | o. branch of government responsible for enforcing the laws |
| _____ 16. referendum | p. president's refusal to sign a bill |

Fill-Ins

In each space, write the appropriate term from those listed below.

amendment	legislative	laissez-faire	veto
executive	impeachment	red herring	referendum
appropriation	filibuster	judiciary	lame duck
ratification	gerrymandering	eminent domain	boycott

- The three branches of government are the _____, _____, and _____.
- Believing in as few restrictions on business practices as possible, the president is encouraging Congress to follow his _____ philosophy.
- The striking workers are urging people throughout the country to _____ the company's products.
- The president remains confident that the Senate's _____ of the treaty will occur by the end of the week.
- Some historians and political scientists believe that a(n) _____ to the Constitution should be adopted to ensure that a president is elected by popular vote.
- The governor has urged the state legislature to exercise its right of _____ so that two state parks can be enlarged.
- The President warned that he would _____ any bills requiring an increase in taxes.
- Congress's _____ for space research has been reduced in recent years.
- _____ is a term dating back to 1812, when Elbridge Gerry, the governor of Massachusetts, had the boundaries of the state's voting district redrawn to gain an election advantage.
- The attorney general, now a(n) _____, said that she will resume her law practice after her present term ends next year.
- A state _____ will be conducted this fall to enable voters to express their feelings about the controversial environmental law passed last year by the legislature.

12. The editor of the local newspaper maintains that the crime issue constantly cited by the mayor is a(n) _____ blurring the city's main problem: skyrocketing property taxes.
13. Many historians believe that President Nixon would have faced certain _____ if he hadn't resigned after the Watergate scandal.
14. Efforts are being made to stop the senator's _____ so that a vote can be taken on the bill.

gerrymandering	eminent domain	laissez-faire	veto
judicial	filibuster	amendment	lame duck
boycott	legislature	appropriation	referendum
ratification	red herring	executive	impeachment

FEDERAL GOVERNMENT'S CHECKS AND BALANCES

On September 17, 1787, in Philadelphia, thirty-nine delegates to the Constitution Convention representing twelve of the thirteen states signed the Constitution, a document that they had worked diligently on for four difficult and exhausting months. During this time, there had been many disagreements leading to numerous compromises. However, all the delegates wanted to avoid a central government with unlimited powers, so they eventually decided to separate the powers of the federal government into the _____, _____, and _____ branches. To ensure that none of these branches became too powerful, they included provisions in the Constitution that allowed for checks and balances so that each branch could guard against abuse by the other branches.

In particular, the legislative branch, or Congress, can remove the president (executive) and Supreme Court members (judiciary) from office through _____ if the members are convinced that the president or other high government officials have violated the Constitution. In addition, the legislature can override a President's _____ of a bill if two-thirds of its members still feel that the bill should be made into a law. Also, the Senate (Congress is made up of the House of Representatives and the Senate) has the power to approve or disapprove of presidential appointments, including those to the Supreme Court. The Senate also has the power to approve or disapprove treaties that the president may negotiate. Congress is also the only branch of government that can declare war, enact taxes, and make a(n) _____ for a

special federal program. Congress also has the power to pass a(n) _____ to the Constitution; however, throughout the more than two centuries that the Constitution has been in effect, there have been only twenty-six changes or additions to it, and ten of them, the Bill of Rights, were passed soon after the _____ of the Constitution by the necessary number of states.

On the other hand, the president, as head of the executive branch, has the power to check congressional actions by vetoing bills its members have proposed, thus keeping the bills from becoming laws. In addition, it is the president who nominates candidates for judicial positions, including those of the Supreme Court and the other federal courts, when vacancies occur.

For its part, the judicial branch can declare bills passed by Congress and signed by the president into law as unconstitutional. The judiciary can also rule actions of the president as unconstitutional.

The checks and balances system has worked well throughout the nation's history; the three branches of the federal government have usually been able to follow a(n) _____ approach toward each other, knowing full well that regular interference would not only hamper the workings of the federal government but also is generally uncalled for.

However, during the heat of an election year, a member of Congress, not wanting to become a _____, has been known to hurl a serious charge against the president, who may in turn label the charge as nothing more than a _____ to divert attention from the congressperson's poor legislative record. There have also been times when a president has demanded an end to a congressional _____ (which Congress is within its Constitutional powers to do) so that a bill he is in favor of can be passed.

In addition to checks and balances, the framers of the Constitution took care that the rights of the various states would be protected. This recognition of state rights has allowed citizens of a state, for example, to call for a _____ if they are unhappy with a law passed or another action taken by their state officials, such as the _____ of voting districts so that one of the political parties has an advantage come election time. The federal government also recognizes that a state legislature has the power of _____, and can take private property if it is for the public good. States also have the right to _____ goods from other states if they have a legitimate reason for doing so.

The Constitution, by including a system of checks and balances and protecting the rights of the states, has served our country remarkably well through the years, as Americans and people throughout the world recognize.

BONUS WORD: **anarchy** (AN er kee)—noun

Anarchy is the term used when a country or society is without a government, usually resulting in disorder, confusion, and chaos. **Anarchy** has often occurred when a king, dictator, or a ruling body has been overthrown. In use in the English-speaking world since the 1530s, the word comes from the Greek *anarkhos*, meaning “rulerless.”

MASTERING CONFUSING WORDS

capital / capitol

capital (1) a town or city that serves as the official seat of government; (2) wealth in the form of money or property:

Washington, D.C., is the capital city of the United States.

The couple raised enough capital to start a restaurant of their own.

capitol refers to the building where legislators meet:

Congress meets in the Capitol Building in Washington, D.C.

Circle the correct answer:

1. Much of my aunt's capital / capitol is invested in U.S. saving bonds.
2. The dome on Iowa's capital / capitol building looks like it is made of gold.
3. Sacramento, not Los Angeles, is the capital / capitol city of California.

Write original sentences using these words:

1. **capital:** _____

2. **capitol:** _____

Idioms to Know

Make no bones about it: To state something as fact or something that is not to be taken lightly or questioned.

I'm going to do a lot of traveling after I graduate, *make no bones about it*.
Write an original sentence using *make no bones about it*:

A method to (my, his, her) madness: Although what a person is doing may seem stupid or illogical, the person believes that the final result will be what he or she wants.

Although she made a point of ignoring him, even walking the other way when she saw him on campus, my roommate was actually dying to date the handsome and popular student; however, there was *a method to her madness*, as her "indifference" made her irresistible to him, and they eventually became a couple.

Write an original sentence using *a method to (my, his, her) madness*:

| _____ 10. alliteration | j. exaggeration for the sake of effect |

B

- | | |
|-----------------------------|--|
| _____ 1. critique | a. basic factors relating to speech, such as volume |
| _____ 2. enunciation | b. when the subject of the sentence does the action the verb describes |
| _____ 3. impromptu speaking | c. the environment in which communication takes place |
| _____ 4. premise | d. harmonious connection between speaker and audience |
| _____ 5. venue | e. done with little or no advance preparation |
| _____ 6. context | f. the place where communication takes place |
| _____ 7. passive voice | g. the proper pronunciation of words |
| _____ 8. kinesics | h. assertion serving as the main point of a speech |
| _____ 9. active voice | i. in-depth review, such as for a movie, speech, or book |
| _____ 10. rapport | j. body movements, such as gestures |
| _____ 11. speaking voice | k. when the verb acts upon the subject |

C

- | | | |
|-------|---------------|---|
| _____ | 1. placebo | a. logical explanation that needs to be tested |
| _____ | 2. hypothesis | b. instinctive part of the personality |
| _____ | 3. variable | c. emotional disorder but person in reality |
| _____ | 4. id | d. evidence experienced or observed |
| _____ | 5. ego | e. severe mental disorder with loss of reality |
| _____ | 6. superego | f. factor manipulated in an experiment |
| _____ | 7. psychosis | g. responsible for logical thinking |
| _____ | 8. empirical | h. concerned with intellectual abilities |
| _____ | 9. cognitive | i. concerned with right and wrong |
| _____ | 10. neurosis | j. an inactive substance used in an experiments |

D

Write each of the following terms before its definition.

- | | | | | |
|-------|-------------|------------|------------|---------------|
| _____ | peer group | mores | culture | acculturation |
| _____ | bureaucracy | stereotype | demography | social norms |
- _____ 1. standards for public behavior
 - _____ 2. guides that provide moral standards
 - _____ 3. organization with rigid rules
 - _____ 4. customs and values shared by a society
 - _____ 5. individuals of similar backgrounds
 - _____ 6. a fixed view of individuals
 - _____ 7. study of population figures
 - _____ 8. adopting new patterns of life

E

- | | | | | | | |
|-------|----------|----------|---------|----------|---------------|--------------|
| _____ | folkways | agrarian | sibling | urbanism | ethnocentrism | ethnic group |
|-------|----------|----------|---------|----------|---------------|--------------|
- _____ 1. refers to cities
 - _____ 2. refers to country life and farming
 - _____ 3. a brother or sister
 - _____ 4. people sharing the same religion or other certain characteristics
 - _____ 5. customs not strictly enforced
 - _____ 6. belief that one's own culture is the best

F

- | | | | | |
|-------|-------------|-----------|-------------|---------------|
| _____ | amendment | boycott | legislature | impeachment |
| _____ | red herring | judiciary | veto | laissez-faire |
- _____ 1. branch of government that makes the laws
 - _____ 2. noninterference
 - _____ 3. addition or change in the Constitution

- _____ 4. method of removing high government officials from office
- _____ 5. president's refusal to sign a bill in to law
- _____ 6. refusal to buy or to do business with
- _____ 7. branch of government that interprets the law
- _____ 8. something that distracts from the main issue

G

ratification	gerrymandering	filibuster	lame duck
executive	eminent domain	appropriation	referendum

- _____ 1. branch of government responsible for enforcing the laws
- _____ 2. stalling talk to stop a bill from coming to a vote
- _____ 3. enables citizens of a state to call for a special vote
- _____ 4. legislative power, often the Senate, to approve certain government actions
- _____ 5. money budgeted for a government program
- _____ 6. redrawing voting districts to gain an election advantage
- _____ 7. officeholder whose term is almost over
- _____ 8. government's legal power to secure private property

Mastering Confusing Words

Circle the correct answer.

- When do you think you'll be threw / through with painting the room?
- Jim keeps his loose / lose change in an old broken coffee cup.
- Sharon went farther / further each day until she could comfortably jog three miles.
- Anita cautioned, "Don't loose / lose your billfold again."
- Sloan threw / through the paper on to the porch.
- The judge asked the accused, "Do you have anything farther / further to say?"
- The state museum is right next to the impressive capital / capitol building.
- We were served a brownie with ice cream for desert / dessert.
- The partners said they would need to raise more capital / capitol to expand their business.
- The desert / dessert is blazing hot for much of the year.
- Tallahassee is the capital / capitol city of Florida.
- Greg would never desert / dessert any of his friends in their time of need.

Crossword Puzzle

Solve the crossword by using the following words.

agrarian	alliteration	amendment	cognitive	connotation	critique
demography	empirical	enunciation	filibuster	foreshadowing	genre
gerrymandering	impromptu	placebo	psychosis	sibling	simile
utopia	veto				

ACROSS

2. Inactive substance often used in experiments
7. Refers to literature classifications
8. Evidence observed experienced
13. Perfect or ideal place
16. Continuous talk to stop a vote
17. Comparison using like or as
18. Hint as to what is to come
19. Suggested meaning of a word
20. Pronunciation of words

DOWN

1. Change in the Constitution
3. In-depth review
4. Redrawing of voting districts
5. President's refusal to sign a bill into law
6. Speaking with little or no advanced preparation
9. Rural, country, farm life
10. Refers to intellectual abilities
11. Series of words with same first sound
12. Severe mental disorder
14. Study of population figures
15. Brother or sister

Thousands of college students wish to earn a degree in business, and thousands of others elect or are advised to take an introductory business or economic course so that they can gain a basic understanding of the U.S. economic system. Learning the terms included in this chapter will help you grasp the concepts dealt with in business and economic courses.

1. commodities (kuh MOD uh tees)—noun

Products bought, sold or traded.

Food, clothes, metals, and cars are among the country's chief *commodities*.

2. reciprocity (RES uh PROS uh tee)—noun

A mutual exchange policy in which each part grants the other corresponding privileges. (Informally, this policy is referred to as “If you’ll scratch my back, I’ll scratch yours.”)

The two nations have a policy of *reciprocity* as they have removed the tariff on certain goods coming from each other's country.

3. assets (AS ets)—noun

All items of value owned by a person or company.

The building, equipment, land, and patents are among the company's *assets*.

4. liabilities (LIE uh BIL uh tees)—noun

Debts owed to other people or business firms.

Unfortunately, the store owners had to declare bankruptcy after their *liabilities* continued to exceed their assets.

5. solvency (SOL vun see)—noun

The ability to meet one's financial obligations.

The firm's *solvency* enabled the board of directors to pay off all debts and to modernize the plant's equipment.

6. fiscal (FIS kul)—adjective

Pertaining to financial matters.

The company's *fiscal* year begins July 1.

7. bear market, bull market (BARE MAR kit, BUL MAR kit)—nouns

The stock market is the business of buying, selling, and trading of stocks, bonds, and other financial investments. A **bear market** refers to a falling stock market, when such investments are decreasing in value. A **bull market** refers to a rising market, when such investments are increasing in value.

Although my investments have continued to decline during the current *bear market*, my financial advisor said I shouldn't be discouraged because she was confident a *bull market* would occur before the year ended.

8. portfolio (PORT FOE lee O)—noun

The collection of securities (stocks and bonds) held by a single investor.

By carefully managing his *portfolio*, my uncle was able to retire at age fifty-five.

9. obsolescence (OB suh LES uns)—noun

The condition when certain products are no longer marketable because of scientific or technological advances.

Typewriters have been on the verge of *obsolescence* because of computers.

10. audit (AH dit)—noun, verb

As a noun, an **audit** is an examination of the financial records of a business.

As a verb, to **audit** is to examine the financial records of a business.

Company officials have hired a number of accountants to conduct an *audit* of its financial records; they will *audit* the records of the past two years.

11. tariff (TARE if)—noun

Taxes on imported goods.

To protect our nation's auto companies, the government has placed a *tariff* on cars imported to this country.

12. cartel (kar TEL)—noun

A group of domestic or international businesses that have joined together to control some industry.

An international *cartel* is responsible for the dramatic rise in gasoline prices.

13. embargo (em BAR go)—noun

Official prohibition of trade by one nation against another nation.

Our country has an *embargo* against that nation because of its failure to stop the export of illegal drugs.

14. gross national product (GNP) (grohs NASH uh nul PROD ukt)—noun

The total value of goods and services produced by a nation's business during a specific period, usually a year.

GNP is the official measure of a nation's economic output.

15. balance of trade (BAL uns of TRADE)—noun

The relationship between a nation's exports (what it sells to other countries) and its imports (what it buys from other countries).

The *balance of trade* for the United States during the past six months indicates that more goods were bought from other countries than were sold aboard.

Business and Economic Terms and Definitions

Match

A

Match each definition with the term it defines.

- | | | |
|-------|-----------------|--|
| _____ | 1. liabilities | a. a stock market showing positive growth |
| _____ | 2. fiscal | b. showing a significant rise in prices |
| _____ | 3. solvency | c. securities owned by an investor |
| _____ | 4. embargo | d. ability to meet financial obligations |
| _____ | 5. GNP | e. refers to financial concerns |
| _____ | 6. bull | f. debts |
| _____ | 7. portfolio | g. banning of trade by one nation against another |
| _____ | 8. inflationary | h. nation's total value of goods and services produced |

B

- | | | |
|-------|---------------------|--|
| _____ | 1. balance of trade | a. mutual exchange policy |
| _____ | 2. obsolescence | b. taxes on imported goods |
| _____ | 3. commodities | c. products bought, sold, or traded |
| _____ | 4. bear | d. examination of financial records |
| _____ | 5. cartel | e. comparison of what is bought and sold |
| _____ | 6. reciprocity | f. stock market showing negative growth |
| _____ | 7. tariff | g. products no longer marketable |
| _____ | 8. audit | h. organization formed to establish a monopoly |

Fill-Ins

In each space write the appropriate term from those listed below.

audit reciprocity bull tariff fiscal inflationary
bear solvency cartel obsolescence liabilities GNP
commodities assets embargo balance of trade portfolio

1. A(n) _____ period is especially hard on people with fixed incomes because an increase in their cost of living is not accompanied by a rise in their income.
2. Our company is one of the few that I know of that uses a(n) _____ year of forty-eight weeks in order to have twelve months of four weeks each.
3. _____ sold by the corporation include fruit juices, appliances, and plywood.
4. My investments decreased dramatically in value during last year's _____ market, but fortunately they have increased in value just as dramatically during this year's most welcomed _____ market.
5. The country's prosperity is reflected in its _____ (the total value of business goods and services it has produced); another indicator of its good economic health is its _____, which shows that we sold more than we bought from other countries.
6. The _____ of the corporation's finances indicated that its _____ were worth much more than its _____, or debts; this obviously pleased the board of directors and stockholders, as each knew his or her _____ of securities would increase in value.
7. "If you'll scratch my back, I'll scratch yours" is an informal description of what _____ is all about, and "in the black financially" is one way _____ could be defined.
8. Because those countries have formed a(n) _____ to control steel prices, our government officials announced that there would be a(n) _____ of all imports from these countries.
9. Lobbyists for the fruit growers association are urging Congress to levy a(n) _____ on all fruit—except bananas and pineapples—coming into our country.
10. Quartz watches led to the _____ of watches run by windup springs.

Completing the Passage

Complete the passage by filling in each space with one of the words below.

obsolescence portfolio assets solvency embargoes liabilities
balance of trade bull tariffs audits fiscal reciprocity
bear commodities cartel GNP

JOHN MAYNARD KEYNES (1883–1946)

John Maynard Keynes was a British economist whose influence on U.S. economic policies has been in evidence since the Great Depression of the 1930s. Keynes' major belief was that government action during prolonged _____ markets and continued high unemployment was necessary if the economy were to recover. However, other economists (often referred to as neoclassicists) of that time maintained that struggling businesses would eventually regain their _____, and thus be able to meet their _____ (financial) obligations, and that _____ markets would again dominate if the government would just stay out of the way and let nature take its course.

But as the Depression continued, the federal government, with the election of President Franklin Roosevelt, adopted many of Keynes' policies. The government even borrowed large sums of money to put people to work and to stabilize the nation's financial institutions. And for companies whose products, or _____, were no longer selling because of _____, government loans, grants, and tax cuts became available so that they could modernize or develop new products.

Though Keynes died in 1946, his economic policies dominated in the United States and in many European countries until the mid 1970s. During this time, the total value of U.S. goods and services produced, or its _____, increased, and the _____ with other nations was generally favorable, due in part to _____ agreements. In addition, the _____ of most investors indicated that their financial securities were increasing in value.

In the 1970s, a(n) _____ of some Middle East countries caused the price of oil and gas to rise to unprecedented levels, and high _____ and _____ imposed on certain American exports by a few nations caused the U.S. economy to slow down. There was a growing belief in the country that a lessening of Keynes' policies was needed. This view eventually prevailed, and the federal government adopted a "hands-off" economic policy, which included the elimination of numerous business and financial regulations.

However, in recent years, a number of Keynes' economic policies have been resurrected to combat a troubling economy that many people believe was triggered, in least in part, by certain corporations' dishonest _____ boasting of huge profits, numerous _____, and few _____, or debts, when the opposite situation was true. Deregulation of various financial and business rules also led to abuses that eventually severely harmed the country's economy.

When such financial deceit and abuses were uncovered, a number of corporations went bankrupt, their leaders were prosecuted, their stockholders went broke, and thousands of people lost their jobs.

Keynes' economic policies came back into prominence after the 2008 national election, resulting in the federal government once again playing a more active role in the nation's economy.

BONUS WORD: Machiavellian (MAK ee uh VEL ee un)—adjective

Machiavellian describes behavior or policy characterized by deception and cunning. Niccolò Machiavelli (1469–1527) was an Italian politician who believed that craftiness and deceit were justified in pursuing and maintaining political power. Through the years, **Machiavellian** has come to mean any personal, business, or political behavior that is conducted in a deceitful and self-serving manner to gain an advantage or to hold on to power.

MASTERING CONFUSING WORDS

eminent / imminent

eminent distinguished, famous, noteworthy:

An eminent rock band will be giving a concert at the college auditorium next Thursday evening.

The most eminent building on our campus is Old Main, which was built in 1867.

imminent close at hand or about to happen:

The patient's condition was so serious that death seemed imminent.

A storm seemed imminent, as the sky suddenly darkened and a brisk wind started to blow.

Circle the correct answer:

1. The police announced that the recapture of the convict was eminent / imminent.
2. Mario Lanza, a popular recording artist in the 1950s, is just one of the many eminent / imminent singers to come from Philadelphia.
3. Their departure seems eminent / imminent, as they have put suitcases in the trunk of their car.
4. The most eminent / imminent house in our community was designed by Frank Lloyd Wright.

Write original sentences using these words:

1. **eminent:** _____

2. **imminent:** _____

Idioms to Know

Washing my hands of: Having nothing more to do with.

Since all they do is talk, watch TV, and drink beer instead of studying as we had agreed to do, I'm *washing my hands of* any more involvement with them.

Write an original sentence using *washing my hands of*:

'Til the cows come home: A long time.

To get a plane ticket to Florida now, you may have to stand in line *'til the cows come home*: a lot of colleges in the state are starting their spring breaks this Friday.

Write an original sentence using *'til the cows come home*:

Set 1

In addition to those individuals intending to major in math, computer science, business, accounting, nursing, or any of the sciences, most students, regardless of their major, are required to take at least one or two math courses. Mastery of the fundamental math skills—adding, subtracting, multiplying, dividing—is necessary to succeed in higher-level math courses, including algebra, geometry, and calculus. If it's been some time since you took a math course, you should benefit from reviewing the basic math terms and symbols presented in this chapter.

1. **angles** (ang gəls)—noun

Figures formed by two lines radiating from the same endpoint, called the **vertex** (VUR teks).

The three types of angles are the following:

A **right angle** is a 90° angle.

Right angle

An **acute** (ə KYOOT) **angle** measures less than 90° .

Acute angle

An **obtuse** (ob TOOS) **angle** measures more than 90° .

Obtuse angle

2. addition terms: addends (AD ends), **sum** (sum)—nouns

Addends are the numbers being added; the answer is called the *sum* (sum).

$$\begin{array}{r} 29 \text{ addend} \\ + 61 \text{ addend} \\ \hline 90 \text{ sum} \end{array}$$

3. average (AV rij)—noun

The sum of the addends in a row or column divided by the number of addends in the row or column.

$$\begin{array}{l} 46 + 52 + 39 + 43 = 180 \\ 180 \div 4 = 45 \text{ (the average)} \end{array}$$

4. axioms (AK sē ms), **postulates** (POS chə lāts)—nouns

Statements that are assumed to be true without proof.

Examples: “The whole is greater than its parts.”

“Any straight line can be extended in either direction as far as is desired.”

5. circumference (sər KUM fər əns)—noun

The distance around a circle (a circle’s boundary).

6. diameter (dī AM ə tər)—noun

A straight line segment passing through the center of a figure, such as a circle.

7. division terms: dividend (DIV ə dend), **divisor** (də VĪ zər), **quotient** (KWŌ shənt)—nouns

The dividend is the number that the divisor divides to get the quotient, or the answer.

$$\begin{array}{ccccccc} 39 & \div & 13 & = & 3 & & \\ \text{dividend} & & \text{divisor} & & \text{quotient} & & \end{array}$$

8. exponent (ek SPŌ nənt)—noun

The raised number above a number or symbol that indicates how many times the number or symbol is to be used as a factor.

$$\text{exponent} \rightarrow 4^2 = 4 \times 4$$

$$\text{exponent} \rightarrow 2^4 = 2 \times 2 \times 2 \times 2$$

$$\text{exponents} \rightarrow 2^2 a^3 = 2 \times 2 \times a \times a \times a$$

An exponent is expressed in terms of power; for example, 4^2 is expressed as 4 to the *second power* (4×4), 5^3 is expressed as 5 to the *third power* ($5 \times 5 \times 5$), etc.

9. fractions (FRAK shəns), **mixed numbers** (MIKSTNUM bərs)—nouns

Fractions can be proper or improper; both contain a top number (the *numerator*) and a bottom number (the *denominator*).

A proper fraction represents part of a whole.

$$\frac{3 \text{ numerator}}{4 \text{ denominator}}$$

The denominator indicates that the whole has been divided into four parts; the numerator indicates how many parts are being considered. For example, a cake (the whole) is divided into four parts (indicated by the denominator), and three pieces (indicated by the numerator) have been eaten.

In an improper fraction, the numerator is larger than the denominator.

$$\frac{7}{4}$$

The denominator, 4, indicates that the whole is made up of four parts, but the numerator, 7, indicates that we have more than the four parts, so we have more than the whole.

A mixed number is a whole number plus a proper fraction; $\frac{7}{4}$ could be changed to a mixed number by dividing the numerator by the denominator, resulting in $1\frac{3}{4}$ ($\frac{4}{4}$ make a whole, or one, and there are three-fourths left over, making $1\frac{3}{4}$).

10. subtraction terms

Minuend is the number from which another number is subtracted.

Subtrahend is the number subtracted from the minuend.

Difference is the answer when you have completed the subtraction.

$$\begin{array}{r} 8 \text{ minuend} \\ - 5 \text{ subtrahend} \\ \hline 3 \text{ difference} \end{array}$$

Set 1, Matching Academic Terms and Definitions

Match

Match each definition with the term it defines.

A

- | | | |
|-------|------------------|--|
| _____ | 1. exponent | a. whole number plus a fraction |
| _____ | 2. addends | b. angle of more than 90° |
| _____ | 3. circumference | c. answer for a division problem |
| _____ | 4. axioms | d. number that divides another number |
| _____ | 5. divisor | e. distance around a circle |
| _____ | 6. obtuse | f. statements assumed to be true without proof |
| _____ | 7. dividend | g. numbers being added |
| _____ | 8. mixed number | h. raised number above a number or symbol |
| _____ | 9. quotient | i. number being divided |

B

- | | | |
|-------|----------------------|--|
| _____ | 1. numerator | a. bottom number of a fraction |
| _____ | 2. right angle | b. angle of less than 90° |
| _____ | 3. diameter | c. when the top number of a fraction is smaller than the bottom number |
| _____ | 4. vertex | d. the sum of addends divided by the number of addends |
| _____ | 5. denominator | e. distance across a figure measuring from one side through the exact center to the other side |
| _____ | 6. proper fraction | f. top number of a fraction |
| _____ | 7. average | g. when the top number of a fraction is larger than the bottom number |
| _____ | 8. acute angle | h. angle of 90° |
| _____ | 9. improper fraction | i. answer to an addition problem |
| _____ | 10. sum | j. the common endpoint of two rays that form an angle |

Related Meanings

If the words opposite each other are similar in meaning, write Yes in the space; if they are unrelated, write No.

- | | | |
|-----------------------|-------|--|
| 1. sum | _____ | answer obtained after dividing |
| 2. axioms | _____ | postulates |
| 3. mixed number | _____ | number with a value over 100 |
| 4. acute angle | _____ | angle less than 90° |
| 5. addends | _____ | numbers that are added |
| 6. numerator | _____ | top number of a fraction |
| 7. exponent | _____ | answer obtained after adding |
| 8. right angle | _____ | a 90° angle |
| 9. proper fraction | _____ | when the numerator is smaller than the denominator |
| 10. dividend | _____ | number obtained when you add up a row of addends and then divide by the number of addends |
| 11. vertex | _____ | four-sided rectangle |
| 12. obtuse angle | _____ | angle greater than 90° |
| 13. diameter | _____ | a straight line passing through the center of a circle and meeting at opposite ends of the circumference |
| 14. sum | _____ | raised number above another number or symbol |
| 15. improper fraction | _____ | when the numerator is larger than the denominator |
| 16. quotient | _____ | number being divided |
| 17. average | _____ | statement generally known to be true |
| 18. circumference | _____ | outer boundary of a circle |
| 19. divisor | _____ | 4 is the divisor in this problem: $12 \div 4 = 3$ |

Mathematical Terms and Symbols

Set 2

1. **mean** (MĒN)—noun

Mean is synonymous with average, that is, the sum of addends divided by the number of addends.

$$24 + 31 + 19 + 32 + 26 + 18 = 150; 150 \div 6 = 25 \text{ (the mean)}$$

2. **median** (MĒ dē ən)—noun

The number that separates the data into equal parts when the numbers are arranged from highest to lowest or lowest to highest. Here are the test scores for nine students, arranged both ways:

99	73
97	76
94	78
88	82
85	85

82	88
78	94
76	97
73	99

The median is 85, as there are four numbers above 85 and four below 85; the median will be the same whether you arrange the numbers from highest to lowest or lowest to highest.

3. **mode** (M \bar{O} D)—noun

The number that occurs most frequently in a set of numbers.

17 19 22 17 15 19 21 17 22 17 25 17 14

Here the mode is 17 because it is the number occurring most frequently. This becomes clearer when you arrange the numbers again, either from highest to lowest or from lowest to highest:

25		14	
22		15	
21		17	###
19		19	
17	###	21	
15		22	
14		25	

To obtain the *mean* or *average* for this set of numbers, you would add all the numbers (including two 22s, two 19s, and five 17s), for a total of 242; then, dividing 242 by 13 (the total number of addends), you would get a mean or an average of 18.6, or 19 if you round off to the nearest whole number. To determine the median for these numbers, you would arrange them either from highest to lowest or from lowest to highest (it doesn't matter which way):

25	17
22	17
22	17
21	17
19	15
19	14
17	

The median for these numbers is 17 because there are six numbers above 17 and six below 17.

Making computations like the preceding for a set of figures is often helpful in making decisions, gaining insights, and coming to conclusions. For example, if you were the president of a campus organization and the preceding numbers were the attendance figures for the past thirteen meetings, by computing the *mean*, *mode*, and *median*, you likely could gain valuable insights about the type of programs the members seem to prefer, what time of day or day of the week seems to be best for the meetings, and how the organization's attendance figures compare to those of other years.

4. **multiplication terms: multiplicand** (MUL tə plə KAND), **multiplier** (MUL tə plī ər), **product** (PROD əkt)—nouns

The *multiplicand* is the number to be multiplied by another; the *multiplier* is the number that multiplies the multiplicand; and the *product* is the answer to a multiplication problem.

$$\begin{array}{r} 46 = \text{multiplicand} \\ \times 32 = \text{multiplier} \\ \hline 92 \\ 138 \\ \hline 1,472 = \text{product} \end{array}$$

Multiplicands and multipliers are also called *factors* (FAK turs).

5. **perimeter** (pə RIM ə tər)—noun

The distance around a figure. (A circle's perimeter is the same as its circumference.)

6. **radius** (RĀ dē əs)—noun

A line segment from the exact center to a point on the circumference (or boundary) of the circle.

7. **square root** (SKWĀR ROOT)—adjective + noun

One of two identical factors of a number.

The square root of 25 is 5 ($5 \times 5 = 25$).

The square root of 36 is 6 ($6 \times 6 = 36$).

The square root of 49 is 7 ($7 \times 7 = 49$).

Squaring a number is taking it to its *second power*: $8^2 = 64$ (8×8), and cubing a number is taking it to its *third power*: $9^3 = 729$ ($9 \times 9 \times 9$). Squaring or cubing a number is indicated by the exponent above it: 5^2 , 6^3 , etc.

8. **variable** (VAR ē ə bəl)—noun

The letter of the alphabet used to stand for an unknown number or one that can change or vary. For example:

If you were going to charge \$8.00 for each ticket but you weren't sure how many tickets you would sell, you could represent this mathematically by using the variable n : $8 \times n$, or simply $8n$.

9. math symbols

- + Plus or add ($7 + 5$)
- minus or subtract ($7 - 5$)
- ÷ divide ($9 \div 3$)
- × multiply (9×3)
- also means to multiply ($9 \cdot 3$)
- = equal ($5 = \frac{5}{1}$)
- ≠ not equal ($4 \neq 5$)
- < less than ($4 < 5$)
- > greater than ($5 > 4$)
- $\sqrt{\quad}$ square root of a number ($\sqrt{4} = 2$)
- % percent (78%) (Percent refers to parts of 100, and a percent is often rewritten as a decimal: $\frac{78}{100} = 78\% = .78$.)

Set 2, Academic Terms and Definitions

Match

Match each definition with the term it defines.

A

- | | | |
|-------|-----------------------|---|
| _____ | 1. mode | a. taking a number to its second power, such as 9^2 , or $9 \times 9 = 81$ |
| _____ | 2. product | b. one of two identical factors of a number, such as 8 is for 64 |
| _____ | 3. perimeter | c. line segment running from the exact center of a circle to a point on the circumference (or boundary) of the circle |
| _____ | 4. multiplicand | d. taking a number to its third power, such as 4^3 , or $4 \times 4 \times 4 = 64$ |
| _____ | 5. variable | e. has the same meaning as <i>average</i> |
| _____ | 6. square root | f. a letter used for an unknown number, such as the n in $10 \times n$ |
| _____ | 7. cubing a number | g. number being multiplied |
| _____ | 8. radius | h. answer for a multiplication problem, such as 36 in $9 \times 4 = 36$ |
| _____ | 9. mean | i. number that does the multiplying, such as 7 in 9×7 |
| _____ | 10. median | j. number occurring most often in a set of numbers |
| _____ | 11. multiplier | k. distance around a figure, such as a rectangle or square |
| _____ | 12. squaring a number | l. number separating a column of numbers into two equal groups |

Match each symbol with its meaning.

B

- | | | |
|-------|-------------------|----------------------|
| _____ | 1. \neq | a. square root |
| _____ | 2. $>$ | b. plus or add |
| _____ | 3. $+$ | c. multiply |
| _____ | 4. $\%$ | d. minus or subtract |
| _____ | 5. \times | e. equal |
| _____ | 6. $<$ | f. not equal |
| _____ | 7. $=$ | g. greater than |
| _____ | 8. \cdot | h. percent |
| _____ | 9. $\sqrt{\quad}$ | i. divide |
| _____ | 10. \div | j. less than |
| _____ | 11. $-$ | |

Related Meanings

If the words opposite each other are similar in meaning, write Yes in the space; if they are unrelated, write No.

- | | | |
|-------------------|-------|---|
| 1. product | _____ | 48 in $8 \times 6 = 48$ |
| 2. = | _____ | equal |
| 3. median | _____ | number separating numbers into two equal groups |
| 4. $\sqrt{\quad}$ | _____ | square root |
| 5. perimeter | _____ | angle less than 90° |
| 6. $\%$ | _____ | percent |
| 7. variable | _____ | number occurring most often in a set of numbers |
| 8. cubing | _____ | 6^3 or $6 \times 6 \times 6 = 216$ |
| 9. $>$ | _____ | less than |
| 10. multiplier | _____ | 6 in $12 \times 6 = 72$ |
| 11. $<$ | _____ | greater than |
| 12. squaring | _____ | 8^2 or $8 \times 8 = 64$ |
| 13. \neq | _____ | not equal |
| 14. + | _____ | add or plus |
| 15. = | _____ | multiply |
| 16. multiplicand | _____ | 9 in $9 \times 7 = 63$ |
| 17. \cdot | _____ | multiply |
| 18. mean | _____ | largest number in a group of numbers |
| 19. mode | _____ | letter of the alphabet standing for an unknown number |

Completing the Passage

Complete the passage by filling in each space with one of the words below.

Numerator quotient % + dividend < ± divisor –
Exponents denominator variables > = $\sqrt{\quad}$ ·

MATH SYMBOLS

There are many languages in the world—Spanish, French, Italian, English, Arabic, Chinese, Bengali, German, Portuguese, Japanese, and many, many others—and no one knows them all. But math concepts are the same for people the world over: 2 plus 2 equals 4 is true in all countries. In addition, Arabic numerals (1, 2, 3, etc.) are universally used, so if a person can solve a math problem in the United States, he or she can solve the same problem anywhere in the world.

Math symbols (+, −, ×, etc.) are also used universally; however, unlike math concepts, which were discovered, math symbols were invented. For example, _____, the sign to add, was adapted from the Latin word for “and” (*et*) by a French mathematician in the 1300s. A math book published in Belgium in 1514 used _____, the minus symbol, as well as the plus symbol. Both of these symbols came into general use in much of Europe by the late 1500s. _____, the symbol for multiplication, first appeared in *Clavis Mathematicae (Keys to Mathematics)*, published in London in 1631. The other symbol for multiplication, _____, was first used by a German mathematician in the 1600s because he thought the existing multiplication symbol was too easily confused with the letter x. The obelus, or _____, was first used as a division symbol in an algebra textbook published in 1659. However, by the 1800s, math textbooks in the United States were showing the _____ (number being divided), the _____ (number doing the dividing), and the _____ (answer) in the manner in which students are most familiar, as in this example:

$$\begin{array}{r} 4 \\ 13 \overline{)52} \end{array}$$

The equal sign, _____, first appeared in 1557 in a book by Robert Recorde; the sign of inequality, _____, is attributed to an 18th-century mathematician by the name of Euler. The symbols for “greater than,” _____, and “less than,” _____, came into use after Thomas Harriot published his textbook in 1631. The use of _____,

or raised numbers, such as the 3 in 12^3 , was adopted by other mathematicians after René Descartes (1596–1650) began using them.

The percent symbol, or _____, is believed to have evolved from a symbol used in an anonymous Italian manuscript published in the late 1400s. The use of _____, that is, letters that stand for numbers, can be traced back thousands of years to the ancient Greek civilization.

Fractions were commonly used centuries ago by both Hindus and Arabs, and the horizontal bar separating the _____ and _____ is attributed to al-Hassan, who lived in the 1200s. _____, the square root symbol, first appeared in 1525, and it is credited to Rudolf Coss, a German mathematician.

Because the same math principles, numerals, and symbols are used throughout the world, it can be said that math is a universal “language” that we all share.

BONUS WORD: reciprocal (ri SIP ruh kul)—noun

In mathematics, a **reciprocal** is a number you multiply by so that the result is 1. For example, the **reciprocal** of 3 is $1/3$; 3 can be expressed as $3/1$, so if you flip that number over and multiply you get 1:

$$3/1 \times 1/3 = 3/3 = 1$$

For a mixed number, you do the same thing:

$$4\frac{1}{2} = \frac{9}{2} \text{ and } \frac{9}{2} \times \frac{2}{9} = \frac{18}{18} = 1$$

who's a contraction of *who is*:

Who's going to volunteer to go to the post office to mail this package?

(If you can say, "Who is going to volunteer to go to the post office to mail this package?" then you can use Who's; if you can't substitute who is for who's, then use whose.)

whose a possessive (showing ownership) pronoun:

Whose car is parked in the driveway?

(It is nonsensical to say, "Who is car is parked in the driveway?" If you are in doubt as to whether to write who's or whose, substitute who is for who's; if the sentence sounds correct, then who's can be used, but if the sentence sounds awkward, use whose.)

Circle the correct answer:

1. Does anyone know who's / whose books these are?
2. Jake's a nice guy who's / whose going to do well in the business world.
3. Marjorie, who's / whose thinking of transferring to a smaller college, is in the second semester of her sophomore year.
4. Gary, who's / whose personality has really blossomed this year, was recently elected to the student senate.

Write original sentences using these words:

1. **who's:** _____

2. **whose:** _____

Idioms to Know

Slam dunk: Something that will be easy to do. In basketball, a “slam dunk” is when a player jumps near the top of the rim and slams the ball through the basket for an easy two points.

It was a *slam dunk* for the fraternity to meet its blood drive goal; enough members had donated blood within three hours.

Write an original sentence using *slam dunk*:

Chip on the shoulder: Being angry over something that happened in the past; bearing a grudge.

Gigi still has a *chip on her shoulder* because she didn't get the starring role in the musical that our class performed last fall.

Write an original sentence using *chip on the shoulder*:

Set 1

The biological sciences, which are devoted to the study of the functions and structures of living organisms, include biology, zoology, botany, entomology, microbiology, physiology, genetics, and a number of other sciences as well. A major in one or more of the biological sciences is a popular choice for students interested in careers in medicine, wildlife, forestry, the environment, teaching, and professions having to do with various types of animal or plant life.

Knowledge of the terms in this chapter will be a major asset to you when you take a biological science course.

1. **biology** (bī OL ə jē)—noun

The study of living organisms, including their structure, function, development, and distribution.

Natalie has enjoyed all of her high school science courses, but particularly those having to do with animals and plants; she is seriously considering *biology* as her college major.

2. **zoology** (zō OL ə jē)—noun

The branch of biology specializing in the study of animals.

Matthew is majoring in *zoology*, as he hopes to be a veterinarian some day.

3. **botany** (BOT ə nē)—noun

The branch of biology specializing in the study of plants.

My cousin's landscaping business resulted from his initial interest in *botany*.

4. **entomology** (en tə MOL ə jē)—noun

The branch of biology specializing in the study of insects.

Mr. Bryson, who has a master's degree in *entomology*, was consulted by the Peach Growers' Association when a certain insect began infesting the peach orchards in the state.

5. **microbiology** (MĪ krō bī OL ə jē)—noun
The branch of biology specializing in the study of microorganisms and their effects on other living organisms.
Since *microbiology* involves the study of living organisms too small to be seen by the unaided eye, powerful microscopes must be used.
6. **physiology** (FIZ e OL ə je)—noun
The biological study of the functions of living organisms and their parts.
The nursing degree program includes a challenging course in *physiology* because nurses must understand the functions of the human body.
7. **genetics** (jə NET iks)—noun
The branch of biology devoted to the study of genes, which are responsible for the hereditary characteristics of people and other living organisms.
In *genetics* class, our professor discussed the possibility of altering an organism's genes to prevent the development of abnormalities and disease.
8. **chromosomes** (KRO mə somz)—noun
Microscopic, threadlike bodies in the nucleus of a cell that determine the particular characteristics of an organism. Each cell in a human body has forty-six chromosomes. The majority of animal and plant species have between ten and fifty *chromosomes*.
9. **genes** (JENZ)—noun
Elements in chromosomes that control the development of hereditary characteristics.
The color of a person's eyes is determined by *genes*.
10. **mutation** (mu TĀ shən)—noun
A change in the genes of an organism that is transmitted to the offspring, resulting in offspring that differ in some significant way from the parents.
Professor Bailey said that while the effects of a *mutation* on offspring can sometimes be beneficial, generally a *mutation* results in harmful abnormalities.
11. **symbiosis** (sim bē Ō sis)—noun
The general meaning of this term is “living together.” In biology, it refers to two different types of organisms living together for their mutual benefit.
The *symbiosis* between an Egyptian plover bird and a crocodile results in mutual benefit for them both: the bird eats parasites that are harmful to the crocodile, while the crocodile protects the bird from those who would otherwise prey on it.

Marine biologists study habitats in the ocean, such as coral reefs.

12. fauna, flora (FON ə, FLOR ə)—nouns

Fauna are the animals and flora are the plants of a particular region or period. Some citizens are protesting the planned draining of the bog because they fear the draining will destroy the *fauna* and *flora*, that is, the animals and plants native to the bog region.

13. habitat (HAB ə tat)—noun

The natural physical area where an animal or a plant lives and thrives. The *habitat* for seals is the seashore and the ocean.

Set 1, Biological Sciences Terms and Definitions

Match

A

Match each definition with the term it defines.

- | | |
|-----------------------|--|
| _____ 1. microbiology | a. study of animals |
| _____ 2. mutation | b. threadlike bodies in cells responsible for hereditary characteristics |
| _____ 3. genetics | c. natural physical area where an animal or a plant lives |
| _____ 4. chromosomes | d. plant life of a particular region or period |
| _____ 5. flora | e. abnormality caused by a change in a parent's genes |
| _____ 6. zoology | f. study of microorganisms |
| _____ 7. habitat | g. study of genes |

B

- | | |
|---------------------|---|
| _____ 1. biology | a. study of insects |
| _____ 2. physiology | b. elements in chromosome responsible for eye color and other characteristics |
| _____ 3. symbiosis | c. study of the parts and functions of living organisms |
| _____ 4. genes | d. study of plants |
| _____ 5. botany | e. study of living organisms (animals and plants) |
| _____ 6. fauna | f. animals of a particular region or period |
| _____ 7. entomology | g. mutual relationship that benefits both species |

Fill-Ins

In each space, write the appropriate term from those listed below.

mutation	habitat	physiology	genes	flora
fauna	chromosomes	genetics	microbiology	symbiosis
biology	zoology	entomology	botany	

1. The hereditary factors lying within chromosomes are called _____.
2. Meat ants and leaf hoppers live in _____: the ants receive a rich food source from the hoppers, and the hoppers in return are protected from their enemies by the ants.
3. Surprisingly, glacial ice is the natural _____ of numerous plants, which are considered among the world's hardest _____.

4. A sudden change, called a(n) _____, in an organism's makeup usually results in detrimental effects.
5. _____ contain genes, or hereditary units.
6. The _____ of Montana include(s) a variety of many large and small animals.
7. Because you've been intrigued with insects since you were a youngster, you should consider majoring in _____.
8. I like my _____ class, but learning the Latin names of the many plants we study takes me hours.
9. During the next three years, Nancy, a premed major, said she would be taking courses in _____, to learn about the functions and structures of the human body; _____, to learn about microorganisms and their effects on humans; and _____, in her senior year, to learn how genes determine certain human characteristics.
10. My introductory course in _____ is a challenge because it includes an extensive study of both animal and plant life as well as a three-hour laboratory session every week.
12. Zachary took a course in _____ during the fall semester, and this opportunity to study animals in depth has sparked his interest in veterinarian medicine.

Biological Sciences Terms

Set 2

1. **congenital** (kən JEN ə təl)—adjective

Inborn or existing since birth.

Jeremy says that he has never been able to distinguish between certain colors—including shades of blue and brown—very well. Color blindness like Jeremy's is a *congenital* condition.

2. **homeostasis** (hōm ē ō STĀ sis)—noun

A body's tendency to maintain its internal systems in a normal stable condition.

Homeostasis occurs when a person, in an effort to maintain a normal oxygen level, automatically breathes deeply after running.

3. dormant (DOR mənt)—adjective

Describes an organism at rest and not developing.

Seeds will remain *dormant* until the temperature and other environmental conditions are suitable for sprouting.

4. prolific (prō LIF ik)—adjective

Producing offspring in abundance.

As a result of their frequent litters, rabbits are well known as *prolific* breeders.

5. taxonomy (tak SON ə mē)—noun

The systematic classification of animals and plants into categories.

Taxonomy places organisms with similar structures in the same category.

6. vertebrates, invertebrates (VUR tə brātes, in VUR tə brātes)—nouns

Animals with backbones are vertebrates; animals without backbones are invertebrates.

Dogs are included in the taxonomy classifying *vertebrates* because they have backbones; worms, on the other hand, are listed in the taxonomy classifying *invertebrates*, because they have no backbones.

7. carnivorous (kar NIV ə rəs), **herbivorous** (hur BIV ə rəs),
omnivorous (om NIV ə rəs)—adjectives

A taxonomy relating to animals makes these distinctions for these terms: carnivorous animals eat primarily meat; herbivorous animals eat primarily plants; omnivorous animals eat both meat and plants.

Wolves are *carnivorous*; cows are *herbivorous*; humans, because we eat both plants and animals, are *omnivorous*.

7. hominids (HOM ə nids)—noun

The human family and their ancestors, including extinct humanlike types.

Prehistoric humans are considered *hominids*.

8. plankton (PLANK tən)—noun

The microscopic plants and animals floating near the surface in almost all bodies of water.

Important food sources for most fish are the tiny animals and plants, known as *plankton*, drifting in the water.

9. hybrid (HĪ brid)—noun

The crossbreed or offspring of two animals or plants from different species.
A mule is a *hybrid* resulting from the mating of a horse and a donkey.

10. protoplasm (PRŌtə plaz əm)—noun

A chemically complex, colorless semifluid considered the physical basis of life.
Scientists believe that *protoplasm* is the building block of all animal life.

11. metabolism (mə TAB ə liz əm)—noun

An inclusive term used to refer to all the chemical reactions by which the cells of an organism transform energy, maintain their identity, and reproduce.
All life forms, from single-celled plants to multicelled humans, depend on hundreds of precisely regulated processes known collectively as *metabolism*.

12. ossification (os ə fə KĀshən)—noun

Formation and hardening of the bones.
As people mature, their bones harden, a process called *ossification*.

Set 2, Biological Sciences Terms and Definitions

Match

Match each definition with the term it defines.

A

- | | | |
|-------|-----------------|--|
| _____ | 1. vertebrates | a. hardening of the bones |
| _____ | 2. prolific | b. eating plants |
| _____ | 3. hominids | c. the systematic classification of plants and animals |
| _____ | 4. plankton | d. the tendency for a body to balance itself internally |
| _____ | 5. herbivorous | e. extremely small animals and plants living near the surface of water |
| _____ | 6. homeostasis | f. humans and their ancestors |
| _____ | 7. ossification | g. producing a large number of offspring |
| _____ | 8. taxonomy | h. animals with backbones |

B

- | | | |
|-------|------------------|--|
| _____ | 1. invertebrates | a. in a state of inactivity |
| _____ | 2. omnivorous | b. result when two plants or animals of different species are bred |
| _____ | 3. congenital | c. semifluid substance considered the basis of all life |
| _____ | 4. dormant | d. animals lacking spines |
| _____ | 5. carnivorous | e. inborn, existing since birth |
| _____ | 6. protoplasm | f. eating both plants and animals |
| _____ | 7. hybrid | g. term referring to all of a body's chemical and physical processes |
| _____ | 8. metabolism | h. eating meat |

Fill-Ins

A

In each space, write the appropriate term from those listed below.

metabolism herbivorous protoplasm dormant
hominids ossification omnivorous vertebrates

1. Flower bulbs are _____ in the winter, but they develop shoots in the spring.
2. The primitive Java man is classified with _____ because he is considered a human ancestor.
3. Birds are _____ because they have spines.
4. Because of _____, bones are more brittle as a person ages.
5. _____ is a semifluid substance considered the building block of all animal life.
6. _____ is the term used for the normal chemical and physical activities, such as those involved in digestion and circulation, taking place within living organisms.
7. Horses and zebras are _____ animals, as they eat only grass and other plant life; crows and raccoons are _____, as they eat both plant life and meat.

B

prolific homeostasis invertebrates carnivorous
plankton taxonomy congenital hybrid

1. The veterinarian said my puppy was born with a defective heart valve, a _____ condition that wasn't correctible.
2. Cheetahs and snow leopards eat mainly meat, so they are _____ animals.
3. That particular brand of corn is a _____ developed by cross-pollinating two different varieties.
4. _____ is concerned with the systematic classification of plants and animals based on similar features; for example, crocodiles, lizards, and snakes are classified as reptiles because they all have horny skins and their offspring are hatched from eggs.
5. _____ are tiny animals and plants that drift in most bodies of water.
6. _____ is the term used to describe an organism's natural tendency to keep its system in normal condition, such as by maintaining the same internal temperature despite external conditions.
7. Snails and spiders don't have backbones, so they are classified as _____.
8. Fish are _____, as they produce thousands of eggs.

Completing the Passage

Complete the passage by filling in each space with one of the words below

prolific congenital botany symbiosis flora
dormant habitat hybrids mutations genetics

GREGOR JOHANN MENDEL

Gregor Johann Mendel (1822–1884) is considered to be the “father of modern _____” because he is recognized as the first scientist to study heredity in a comprehensive, systematic manner.

Mendel was born in what was then part of the Austrian Empire but is today part of the Czech Republic. When he was twenty-one, he entered St. Thomas Monastery in Moravia to study for the priesthood. In addition to being a monastery, St. Thomas was also an outstanding center for all types of study, including those disciplines focused on the sciences. The monastery grounds included a botanical garden that featured the

_____ of the area as well as cultivated plants that could also thrive in that particular _____.

Mendel did become a priest, but it soon became obvious that he was better suited to be a teacher. As a result, he was sent to study science and mathematics at the University of Vienna, returning to St. Thomas Monastery after two years. Inspired by his university teachers, Mendel became intensely interested in _____, particularly in the many variations of plants. Shortly after his return to St. Thomas, Mendel began his experiments relating to heredity by using thirty-four different kinds of peas. He was able to use the scientific research skills he had learned while he was at the University of Vienna. One of his interests was developing _____ through crossbreeding. His research required the use of thousands of plants, and because peas are reasonably _____ in reproducing, they were well suited for his purposes.

During an eight-year period, Mendel cultivated and tested over 28,000 pea plants, carefully analyzing pairs of seeds and plants for their hereditary characteristics, which included unexpected _____ that were only sometimes advantageous. He also discovered that plants and other organisms, such as certain types of worms, often lived in _____, an arrangement that helped each to benefit in a significant way.

Mendel believed it was essential to observe his experimental plants in all their stages, including when they were _____, or inactive. As a result of long and careful studies, Mendel eventually discovered that he could predict with great accuracy the pattern of hereditary features that would appear in the various species of the plants in each generation.

Mendel published his important findings on heredity in 1866. His research abilities enabled him to express his results mathematically and statistically, and his findings were eventually recognized as being among the most important ones in the history of science.

In fact, Gregor Johann Mendel's pioneer work relating to heredity heralded the development of genetics into a specialized science. This field of science has advanced to the point that many of today's geneticists confidently say that eventually we will be able to prevent _____ diseases and abnormalities that currently afflict thousands of newborns every year.

BONUS WORD: indigenous (in DIJ uh nus)—adjective

Indigenous refers to people, animals and plants that are native to a particular region. For example, a variety of evergreen and maple trees are *indigenous* to New England, and among the *indigenous* people of Alaska are the Aleuts and Inupiat.

Indigenous comes from the Latin word *indigenus*.

MASTERING CONFUSING WORDS

imply / infer

imply to throw out a suggestion without directly stating it:

Joanna's smiles seem to imply that she has been accepted at the college she most wants to attend.

infer to draw a conclusion:

I could infer from my dad's scowl that he wasn't happy that I hadn't shoveled the snow from the driveway.

Circle the correct answer:

1. From our professor's coy remarks, she seemed to imply / infer that we would have a pop quiz at our next class meeting; what did you imply / infer from what she said?
2. I didn't mean to imply / infer from my snickering that Jackson isn't a good player, so you'd be wrong to imply / infer that he isn't; to tell you the truth, I snickered in sympathy with you because you'll have your hands full trying to keep him from scoring points.

Write original sentences using these words:

1. **imply:** _____

2. **infer:** _____

Idioms to Know

Flying by the seat of my pants: Refers to someone who is doing something by feel or instinct as he or she goes along.

I failed to make plans for my trip out West, so I ended up *flying by the seat of my pants*: I had to grab any flight available, which meant waiting for a long time at the airport, and staying at some pretty shabby motels.

Write an original sentence using *flying by the seat of my pants*:

A day late and a dollar short: Action taken too late and too ineffective to be of any use.

My brother finally stopped by to tell me he would help me clean out my attic, but I told him he was *a day late and a dollar short* because I had done it by myself last Saturday.

Write an original sentence using *a day late and a dollar short*:

Set 1

Physical science can refer to general science courses or courses focused primarily on geology, astronomy, chemistry, physics, or other specialties. Physical science courses contribute to our understanding of the hows and whys of our world and universe. Developments in the various subdivisions of physical science have led to advances in agriculture, industry, engineering, medicine, and many other fields. This chapter presents an opportunity to become familiar with some of the basic terms used in physical science courses.

1. geology (jē OL ə jē)—noun

The scientific study of the origin, history, and structure of the earth.

Earthquakes, landslides, volcanoes, and mineral resources are among the many subjects that are studied in *geology*.

2. topography (tə POG rə fē)—noun

The detailed mapping or description of the surface features of a region.

The state of New York's varied *topography* includes lakes, rivers, mountains, valleys, forests, and plains.

3. sedimentary rocks (sed ə MEN tə rē ROKS)—adjective + noun

Rocks formed from the deposits of sediment (sand or other small fragments of solids).

Sedimentary rocks are soft rocks, and they are often found in layers (strata).

4. metamorphic rocks (met ə MOR fik ROKS)—adjective + noun

Rocks formed from sedimentary rocks that have been subjected to great pressure and heat beneath the earth's surface; they are the most common rocks in the earth's crust.

Metamorphic rocks are hard; marble, for example, is a *metamorphic rock*.

5. igneous rocks (IG nē əs ROKS)—adjective + noun

Rocks formed from cooled magma (hot liquid rock formed within the earth).

Granite and basalt are *igneous rocks*.

6. stalactites (stə LAK tits)—noun

Icicle-shaped rocky deposits hanging from the roofs of caves.

Stalactites are formed on the roofs of caves from the drippings of water containing certain minerals.

© David Muench/CORBIS

This photo of the Chinese Theater in the Carlsbad Caverns shows both *stalactites* and *stalagmites*.

7. stalagmites (stə LAG mits)—noun

Rocky deposits that build up on the floors of caves.

Stalagmites are formed by the drippings of water containing certain minerals; they resemble upside-down stalactites. (To distinguish between stalactites and stalagmites, remember that stalagmites MIGHT reach the ceiling of the roof someday.)

8. meteorology (mē tē ə ROL ə jē)—noun

The science concerned with the earth's atmosphere, particularly its weather and climate.

In *meteorology*, weather refers to atmospheric conditions at a particular time; climate, on the other hand, refers to the average weather conditions over a period of years.

9. astronomy (ə STRON ə mē)—noun

The science concerned with the study of the universe beyond the earth's atmosphere.

Astronomy includes the study of the moon, sun, stars, planets, and asteroids (asteroids are sometimes referred to as minor planets).

10. solar, lunar (SŌlər, LOO nəɾ)—adjectives

Solar refers to the sun, and lunar refers to the moon.

Some houses are built or modified to take advantage of *solar* energy.

The period between full moons is called a *lunar* month.

11. celestial (sə LES chəl)—adjective

Relating to the sky or the heavens.

The Big Dipper is among the best-known *celestial* figures formed by stars.

12. zenith, nadir (ZĒ nith, NĀdər)—nouns

Zenith is the highest point in the sky, or the point directly above the observer; nadir is the lowest point, or the point directly beneath a given position.

This month, the Big Dipper is at its *zenith*, or highest point, but in a few months, it will be at its *nadir*, or lowest point.

Set 1, Physical Science Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|----------------|---|
| _____ | 1. igneous | a. rocky deposits that have formed on cave floors |
| _____ | 2. astronomy | b. rocks most common in the earth's crust |
| _____ | 3. nadir | c. study of the solar system and other matter beyond the earth's atmosphere |
| _____ | 4. meteorology | d. study of a region's surface features |
| _____ | 5. stalagmites | e. relating to the sky or the heavens |
| _____ | 6. zenith | f. rocks formed from deposits of sediment |
| _____ | 7. geology | |
| _____ | 8. solar | |

- | | |
|-----------------------|---|
| _____ 9. metamorphic | g. rocky deposits hanging from cave roofs |
| _____ 10. lunar | h. highest point |
| _____ 11. stalactites | i. rocks formed from cooled magma |
| _____ 12. sedimentary | j. lowest point |
| _____ 13. celestial | k. pertains to the sun |
| _____ 14. topography | l. science of weather and climate |
| | m. study of the earth's origin, history, and structure |
| | n. pertains to the moon |

Fill-Ins

In each space, write the appropriate term from those listed below.

geology	topography	stalagmites	metamorphic	solar
astronomy	stalactites	nadir	sedimentary	
igneous	zenith	meteorology	lunar	

- Granite, used to create buildings, stairs, and other structures, is a(n) _____ rock.
- Oddly shaped _____ could be seen hanging from the cave's roof, while large _____ had built up on the cave's floor.
- _____ includes the study of cartography (mapmaking): maps contribute to a comprehensive understanding of an area's surface features.
- _____ rocks are soft rocks often found in layers, or strata.
- The Raymonds have _____ panels on the roof of their house, and they say that the sun's rays provide them with an economical source of heat.
- During July, that particular constellation, viewed from our country, is at its _____, or highest location.
- Sierra is majoring in _____, as she's interested in the study of earthquakes, volcanoes, and other matters relating to the earth's structure.
- By the third week in December, the sun is at its _____, or lowest point in this part of the world.
- _____ rocks, which are the most common rocks in the earth's crust, are formed from another class of rocks after being subjected to tremendous pressure and heat beneath the earth's surface.
- _____ is the scientific study of weather and climate.
- Is a _____ month the same as a calendar month?

Physical Science Terms

Set 2

1. chemistry (KEM uh stree)—noun

The composition, structure, properties, and reactions of substances.

The study of *chemistry* includes the investigation of substances' atomic and molecular systems.

2. organic, inorganic chemistry (or GAN ik, in or GAN ik KEM ə strē)—
adjectives + noun

Organic chemistry is concerned with basic substances and matter containing carbon, which include all organisms.

The compounds (see **8**) of plants and animals, which contain carbon, are among the topics studied in *organic chemistry*.

In contrast, inorganic chemistry is concerned with basic noncarbon substances and matter.

Acids and minerals containing no carbon are studied in *inorganic chemistry*.

3. element (EL ə mənt)—noun

A fundamental substance that cannot be separated into other substances by chemical means; there are more than a hundred elements.

Hydrogen is classified as an *element* because it cannot be broken down into other substances.

4. atom (AT əm)—noun

The smallest unit of an element that still retains all the chemical properties of the element.

One oxygen *atom* combines with two hydrogen *atoms* to form water.

This diagram shows the locations of *protons*, *electrons*, and *neutrons* within an *atom*.

The Atom

5. proton, electron, neutron (PRŌ ton, ə LEK tron, NOO tron)—nouns

A proton is a very small particle in all atoms; it has a positive electric charge.

An electron is a very small particle in all atoms; it has a negative electric charge.

A neutron is a very small particle in all atoms except hydrogen; it has no electric charge.

Atoms contain minute particles containing *protons*, *electrons*, and *neutrons*.

6. nucleus (NOO cle əs)—noun

The central part of an atom containing protons and neutrons.

The *nucleus* of an atom has a positive charge because of its protons. Electrons, which have a negative charge, are not a core part of the nucleus.

7. molecule (MOL ə kŭl)—noun

Smallest particle of any material capable of existing independently; it contains all the chemical properties of the material.

A *molecule* is formed from atoms with balancing attractive forces.

8. compound (KOM pound)—noun

A pure substance composed of two or more elements chemically united in a specific proportion; therefore, it can be broken down into two or more other pure substances by a chemical change.

Water is a *compound* whose molecules contain two atoms of hydrogen and one atom of oxygen (H₂O).

9. synthesis (SIN thə sis)—noun

The process of combining elements to form a compound.

The *synthesis* of various chemical processes led to the development of nylon.

10. catalyst (KAT ə list)—noun

A substance that initiates or accelerates a chemical reaction without itself undergoing any permanent change.

Chlorophyll is the *catalyst* responsible for the increased rate at which food is made in plants.

11. solute (SOL ūt)—noun

Any gas or solid that will dissolve or disappear when water or other liquid is added.

Salt is a *solute*; when added to water, the salt dissolves.

12. physics (FIZ iks)—noun

The study of matter and energy and the interactions between the two.

Acoustics (relating to sound), optics (relating to vision), and mechanics are among the subjects studied in *physics*.

13. kinetic, potential energy (kə NET ik, pə TEN shə1 EN ər jē)—adjectives + nouns

Kinetic energy is energy in motion; potential energy is stored energy.

A swinging hammer displays *kinetic energy*; a hammer at rest has *potential energy*.

14. centrifugal, centripetal forces (sen TRIF ə gəl, sen TRIP ə təl FŌRS əs)—adjectives + noun

Centrifugal refers to the force that propels an object outward from the center of rotation; centripetal refers to the force that tends to draw an object inward toward the center of rotation.

When a rock is swung at the end of a string, the rock exerts an outward force on the string as it seeks to fly off in space; this is *centrifugal* force at work. On the other hand, the string pulls inwardly on the moving rock to keep it in its circular path; this is *centripetal* force at work.

15. oscillate (OS ə lāt)—verb

To swing to and fro, vibrate, or fluctuate; to make a wavelike motion.

The pendulum will *oscillate* when it is released.

16. malleable (MAL ē ə bəl)—adjective

Describes objects that can be hammered or shaped without breaking.

Metals are *malleable*; that is, they can be processed into desired shapes.

Set 2, Physical Science Terms and Definitions

Match

Match each definition with the term it defines.

A

- | | | |
|-------|--------------|---|
| _____ | 1. inorganic | a. branch of chemistry concerned with the study of noncarbon materials |
| _____ | 2. proton | b. combining process |
| _____ | 3. chemistry | c. has a positive charge |
| _____ | 4. synthesis | d. substance that cannot be broken down into other substances |
| _____ | 5. atom | e. branch of chemistry concerned with the study of materials containing carbon |
| _____ | 6. electron | f. the smallest unit of an element |
| _____ | 7. element | g. has a negative charge |
| _____ | 8. neutron | h. atom's central part |
| _____ | 9. organic | i. study of the composition, structure, properties, and reactions of substances |
| _____ | 10. nucleus | j. has no electric charge |

B

- | | | |
|-------|-----------------|--|
| _____ | 1. solute | a. describes objects that can be hammered and molded |
| _____ | 2. kinetic | b. stored energy |
| _____ | 3. compound | c. energy in motion |
| _____ | 4. physics | d. a pure substance containing two or more elements |
| _____ | 5. centripetal | e. increases chemical reaction rate |
| _____ | 6. potential | f. study of energy and matter and their interactions |
| _____ | 7. malleable | g. to vibrate |
| _____ | 8. molecule | h. outward force |
| _____ | 9. oscillate | i. inward force |
| _____ | 10. centrifugal | j. smallest particle of any material capable of existing independently |
| _____ | 11. catalyst | k. gas or solid that dissolves in liquid |

Fill-Ins

In each space, write the appropriate term from those listed below.

A

chemistry synthesis inorganic neutrons potential solutes atoms
nucleus electrons organic kinetic catalyst protons

- Over the years, combining substances and procedures, a process known as _____, has led to the improvement of innumerable products as well as the development of countless new ones.
- _____, the smallest particles of elements, contain _____ (positive electric charges), _____ (negative electric charges), and _____ (no electric charges).
- An atom's _____ is a very dense region with a positive charge.
- The project the scientists are working on in the laboratory is to develop a _____ that will speed up the chemical reaction rate necessary to produce the special dyes used in medical diagnoses and research.
- Water cascading over a dam is _____ energy, while water held in reserve behind a dam is _____ energy.
- My high school _____ course was about the structure, properties, and reactions of a wide variety of substances, but my current college course in _____ chemistry concentrates solely on substances containing carbon, like animals and plants. Then next fall, I'll be taking a course in _____ chemistry, a course focusing exclusively on noncarbon substances, like acids and minerals.
- Carbon dioxide and oxygen are gases that dissolve in water, so they are considered _____.

B

malleable molecule compound centripetal
centrifugal physics elements

- _____ are fundamental substances consisting of atoms of only one kind, so they cannot be broken down into other substances and, either singly or in combination, they compose everything that exists.
- Chemists use symbols to represent the 100+ elements. For example, the element sodium is represented by Na and the element chlorine by Cl. When these elements are combined, salt (NaCl) is formed. Salt, then, is a _____ because it is made by joining elements.
- Formed by atoms, the smallest particle of a material that can exist independently is a _____.

4. Metals, such as aluminum, steel, and titanium, are _____, so they are used to make thousands of objects, ranging from airplanes to golf clubs.
5. _____ is the study of matter and energy and the interactions between the two, including the effects of _____ (outward) and _____ (inward) forces that characterize objects in circular motion.

Completing the Passage

After reading the selection, fill in each space with one of the terms listed below.

catalysts physics igneous solutes elements oscillating
malleable sedimentary centrifugal compounds geology centripetal

CHEMICAL ENGINEERING

As the name implies, chemical engineering requires a comprehensive knowledge of both chemistry and engineering. Chemical engineers must not only be familiar with the over 100 _____ and the ones involved in specific _____, but also be well-versed in engineering subjects such as mathematics, computers, industrial design, and _____—the latter necessary to know which metals are _____ and to understand the effects of _____ (inward) and _____ (outward) forces when objects used in engineering projects are rotated.

Many people are surprised at the diversity of activities in which chemical engineers are involved. They are, for example, engaged in devising health-related devices, such as pacemakers and catheters, as well as artificial limbs and kidneys.

Many chemical engineers work for pharmaceutical companies, so they must be well-schooled in such matters as _____, which speed up desired reactions, and _____, which dissolve gases and solids into liquids.

Certain chemical engineers must also be experts in _____, as they have to be able to distinguish between soils made from soft _____ rocks from those made from hard _____ ones. This helps determine whether the soil will support the type of structure that is to be built and whether the structure once built will resist _____ in severe weather. Chemical engineers also must take steps to ensure that the environment will remain unharmed.

Those who seek a profession with numerous career paths, ranging from developing medicines to building environmental friendly buildings, should investigate what chemical engineering has to offer.

BONUS WORD: alchemy (AL kuh mee)—noun

Originally, chemistry was called **alchemy**. It was first practiced during the Middle Ages (350–1450) in Egypt, then spread to other parts of the Middle East and eventually to Europe. The major goal of **alchemy** was to turn common metals into gold and silver. Although this goal was never realized, the attempt did lead to the discovery of new substances. The term **alchemy** can be traced to the Greek word *khymeia* (that which is poured out). *Chemistry*, as a term and as a scientific study, dates back to the late 1700s.

MASTERING CONFUSING WORDS

can / may

can able to do something:

Vanessa is confident that she can be at the airport in half an hour.

may permission to do something:

May I borrow your car this evening?

Circle the correct answer:

1. You can / may borrow my car this evening if you can / may fill it up with gas.
2. If I can / may talk with you for a few minutes, I'm sure I can / may help you understand Troy's point of view.

Write original sentences using these words:

1. **can:** _____

2. **may:** _____

Idioms to Know

At the drop of a hat: Refers to someone willing to do something immediately.

One thing I like about my friend Sue is that she will go shopping or out to eat with me *at the drop of a hat*.

Write an original sentence using *at the drop of a hat*:

Monday morning quarterback: A person who is critical after having the benefit of hindsight. As the term relates to football, *Monday morning* is a day or two after a game has been played, so a critic can pass judgment or say what should have been done during the game with the advantage of knowing what actually occurred.

After my accident, I called Gary a *Monday morning quarterback* because he said I was foolish to have taken such a long trip on such slippery roads, but they weren't slippery until two days after I left.

Write an original sentence using *Monday morning quarterback*:

The criminal justice terms included in this chapter may help students gain insight into the fundamental concepts presented in introductory criminal justice, paralegal, law enforcement, prelaw, and other such courses.

Set 1

1. acquittal (uh KWIT ul)—noun

The finding of the court or jury that the defendant is not guilty.

After the defendant's *acquittal* was announced, her family rushed to embrace her.

2. adjudicate (a JOO duh kate)—verb

To settle by legal decision, as a jury or judge does.

A judge will *adjudicate* the divorce settlement, including custody of the children.

3. bail (BALE)—noun

Security, usually in the form of money, used to release an accused person prior to a trial or hearing.

The defendant would forfeit a *bail* of \$10,000 if he failed to appear at his court hearing.

4. change of venue (CHANGE OF VEN you)—noun + preposition + noun

A change in the place of the defendant's trial, generally from the county where the crime was committed to another judicial district.

The judge agreed to the defense lawyer's request for a *change of venue* because of the widespread publicity about the crime.

5. commute (kuh MUTE)—verb

To reduce a guilty person's sentence or punishment.

The judge *commuted* the prisoner's sentence from eight to five years.

6. culpability (kul puh BIL uh tee)—noun

Blameworthy, guilty, at fault.

The head of the stockbroker firm admitted his *culpability* for the illegal business practices that members of his firm had been following.

7. extradite (EK struh dite)—verb

To transfer an accused person to the authorities with legal jurisdiction to try the case.

South Dakota agreed to *extradite* the suspect to Oregon, where he was a suspect in a bank robbery.

8. felony (FEL uh nee)—noun

A major crime punishable by death or a long prison sentence.

Kidnapping is a *felony* punishment by death in some states.

9. habeas corpus (HAY be us KOR pus)—noun (Latin term meaning “you have the body”)

A legal order commanding a person being held in custody to be produced before a court to determine the lawfulness of the person’s confinement.

A request for *habeas corpus* was granted by the judge to determine whether the accused should be released until her scheduled deportation hearing.

10. indict (in DITE)—verb

To formally charge a person with a criminal offense.

The prosecutor is studying the evidence to decide whether to ask a grand jury to *indict* the driver for vehicular manslaughter.

Set 1, Criminal Justice Terms and Definitions

Match

Match each definition with the term it defines.

- | | | |
|-------|---|---|
| _____ | 1. culpability | a. to reduce the severity of the punishment |
| _____ | 2. indict | b. alteration of the location of a defendant’s trial |
| _____ | 3. felony | c. to settle by legal decision, as a jury or judge does |
| _____ | 4. extradite | d. at fault, blameworthy |
| _____ | 5. bail | e. requires a person in custody be brought before the court |
| _____ | 6. acquittal | f. major crime punishable by death or a long prison sentence |
| _____ | 7. commute | g. to formally charge a person with a crime |
| _____ | 8. adjudicate | h. to send a prisoner to authorities in another state |
| _____ | 9. habeas corpus | i. a “not guilty” verdict |
| _____ | 10. culpability
change of venue | j. security posted to gain the release of the accused before a trial |

Fill-Ins

In each space, write the appropriate term from those listed below.

commute bail habeas corpus indict culpability
extradite acquittal change of venue felony adjudicated

1. The neighbors couldn't reach an agreement over the dispute, so they went to court to have the matter _____.
2. The accused remained in jail after failing to raise the necessary money for his _____.
3. The community's widespread hostility against the defendant resulted in a(n) _____ for the trial.
4. If she continues to be a model prisoner for the next couple of years, the judge will likely _____ her sentence from twenty to ten years.
5. The driver acknowledged his _____ for the accident, as he confessed to running a red light.
6. The accused hugged his lawyers immediately after his _____ was announced.
7. The grand jury decided not to _____ the suspect because of a lack of compelling evidence.
8. Ohio officials asked Indiana authorities to _____ the suspect to Ohio.
9. Robbing a bank is a(n) _____, so the judge will undoubtedly sentence the guilty man to a long prison sentence.
10. The lawyer was confident that the judge would issue an order of _____ for her client so that he would either be brought to court and be charged with a crime or be released.

Set 2, Criminal Justice Terms

1. **injunction** (in JUNK shun)—noun

A legal order directing a person to refrain from doing some activity. An injunction is often a preventive measure to guard against future injuries to a victim.

The court *injunction* ordered him to stay at least three miles away from his former wife because of his previous physical abuse of her.

2. **litigation** (lit uh GAY shun)—noun

A legal suit in a court of law.

Unfortunately, *litigation* was necessary to settle the family's dispute over the will.

3. misdemeanor (mis duh ME nor)—noun

A crime punishable by a fine and/or imprisonment, usually for less than a year. A misdemeanor is a less serious crime than a felony.

The protestors were warned that they would be charged with a *misdemeanor* unless they stopped blocking the entrance to the government building.

4. perjury (PUR juh ree)—noun

Lying under oath.

After it was discovered that the witness had lied when giving sworn testimony, the witness was charged with *perjury*.

5. plaintiff (PLANE tif)—noun **defendant** (duh FEN dunt)—noun

The plaintiff is the one who legally complains and initiates court action against someone.

A defendant is the one being sued or, in a criminal case, the one being accused. Mr. Tomsetti, the *plaintiff*, said he was never paid in full for building Mr. Henson's house. Mr. Henson, the *defendant*, contended that Mr. Tomsetti was not paid in full because he had failed to fulfill all the terms of their contract.

6. concurrent (kun KUR unt) and **consecutive** (kun SEK yuh tiv)—adjectives

Concurrent sentencing is when two or more sentences are handed out at the same time, and the sentences are to be served during the same time period.

Consecutive sentencing is when two or more sentences are handed out at the same time, but the time served is to equal to the sum of the sentences.

The defendants, found guilty on all charges, hoped to receive *concurrent* sentencing; however, they received *consecutive* sentencing, so they must serve five years in prison for each of the crimes they committed.

7. subpoena (suh PEE nuh)—noun

A legal order requiring a person to appear in court to give testimony.

The *subpoena* requires the supervisor to testify in court regarding the safety procedures being followed on the day the accident occurred.

8. tort (TORT) **law**—adjective + noun

Tort law is concerned with wrongful acts resulting in injury or damage for which people can seek legal satisfaction.

Tort law is a branch of civil law (as opposed to criminal or contract law) concerned with compensating individuals for personal injury, property damage, or other losses.

9. appeal (uh PEEL)—NOUN

The request for a new hearing of a case already tried.

After the guilty verdict was announced, the defendant's lawyer immediately announced she would seek an *appeal*.

Set 2, Criminal Justice Terms and Definitions

Match

Match the definitions with the term it defines.

- | | |
|-----------------------|--|
| _____ 1. concurrent | a. legal suit in a court of law |
| _____ 2. subpoena | b. person bringing a court suit against someone |
| _____ 3. perjury | c. branch of law concerned with personal injury or property damage |
| _____ 4. injunction | d. crime punishable by a fine or imprisonment |
| _____ 5. appeal | e. lying under oath |
| _____ 6. plaintiff | f. two convictions, but jail time is served at the same time |
| _____ 7. litigation | g. person being sued or accused of a crime |
| _____ 8. consecutive | h. legal order banning someone from doing a certain activity |
| _____ 9. defendant | i. legal order requiring someone to testify in court |
| _____ 10. misdemeanor | j. describes sentences served one after the other |
| _____ 11. tort | k. request for a new trial |

Fill-Ins

In each space, write the appropriate term from those listed below.

perjury appeal concurrently injunction tort law defendant
litigation misdemeanor plaintiff consecutive subpoena

1. The prisoner received _____ sentencing: he will serve a total of twenty years, as each sentence called for ten years in prison.
2. The _____ is suing his ex-boss, the _____, for breach of contract.
3. All of his co-workers were served a(n) _____ to testify in court.
4. The _____, or court trial, is expected to take at least a week.
5. Both the prosecuting attorney and the defense lawyer warned the witnesses that if they committed _____ they would be legally charged, as lying under oath is a serious offense.

6. Spraying graffiti on a government building is a(n) _____, so the guilty persons were fined, sentenced to eighty hours of community service, given a nightly curfew of 7:00 P.M., and placed on probation for five years. In addition, each was served with a(n) _____ prohibiting contact with one another.
7. The accused was found guilty on both charges and sentenced to five years in prison on each charge, to be served at the same time, or _____. His lawyer said that he would confer with his client at some point and decide whether to file a(n) _____ for a new trial.
8. The law firm specializes in _____, that is, it focuses on handling personal injury and property damage cases.

Completing the Passage

Complete the passage by filling in each space with one of the words below.

subpoena	defendant	adjudicated	felony	concurrently
injunction	perjury	change of venue	litigation	culpability
misdemeanor	appeal	habeas corpus	tort law	commuted
extradited	indict	plaintiff	bail	acquittal
consecutively				

DISTRICT ATTORNEY (DA)

District attorneys are either appointed or elected officials who represent a city, county, or state in criminal matters; however, they generally do not get involved in _____ relating to _____, that is, personal injury or property damage cases. A DA's main responsibility is to analyze evidence to decide whether to release an accused person from police custody or to ask a grand jury to _____ the accused. If the DA presents sufficient evidence to suggest that a(n) _____, not a less serious _____, may have been committed by the accused, then the members of the grand jury will recommend that the accused, now known as the _____, be charged with the crime or crimes on which he has been held.

However, if for some reason there is a delay in filing formal charges that results in the accused remaining in custody, his lawyer will ask the judge for a(n) _____ order, that is, to have his client brought into court to know on what basis he is being held. If the district attorney is not prepared to present his evidence against the accused at this time, then the defense lawyer will request that his client be released on _____ until the trial begins. If the judge agrees to the preceding, he may also agree to the DA's request that a(n) _____ be served barring the defendant from contacting his accusers.

Once the defendant is formally charged, his lawyer may ask for a(n) _____ if he feels that his client would not get a fair trial because of where the trial is scheduled to be held; the defense lawyer may do this, for example, if he feels that previous publicity about the case may prejudice the jury against his client. The DA will likely voice his opposition to such a move, but it is the judge who will make the final decision regarding this matter.

Once the trial is underway to be _____ by the jury, the DA (he is, in a sense, the _____) presents evidence that he believes should convince the jury of the defendant's guilt. The DA is always mindful that the evidence he presents must prove beyond a shadow of a doubt the defendant's _____.

The DA may _____ witnesses to testify in court if he feels that they would provide supporting evidence for his case. The DA may even request that a prisoner in another state be _____ if he feels that the prisoner possesses compelling evidence that would make him an important witness for the prosecution. Before testifying, however, the DA will assuredly warn this witness not to commit _____ in an effort to gain favor with him or other legal authorities, but simply to testify to what he knows to be true.

Once all of the evidence has been presented and all the witnesses have testified for both the DA and the defense lawyer, the judge will explain to the jury members what possible verdicts they can legally reach.

If the jury's decision is _____, the defendant, his lawyer, and other supporters will naturally rejoice. On the other hand, if the defendant is found guilty of the charge or charges against him, then the judge will have to decide on the length of the jail sentence. If the defendant has been found guilty of more than one crime, the judge must decide whether the sentences will be served during the same time period, or _____, or one after another, or _____.

A guilty verdict will likely result in an extensive review of the trial proceedings by the defense lawyer to see if there is a basis for a(n) _____, that is, a request for a new trial. If that is not granted, the defense lawyer may, after a period of time, appear before the court to ask that his client's sentence be _____, which would result in less prison time for his client.

As can be seen, a district attorney is intimately involved in a case from its beginning to its end. That is why a DA must have not only a law degree, but also extensive experience practicing law, either privately or perhaps as an assistant district attorney, to be elected or appointed to the critically important DA position.

BONUS WORD: recidivism (ri SID uh viz um)—noun

Recidivism is a relapse into a previous behavioral pattern, especially criminal behavior. Most prison reforms include various rehabilitation programs in an effort to reduce **recidivism**. The term comes from the Latin word *reciduous*, meaning “recurring.” **Recidivism** has been a term used in our country since the 1880s.

MASTERING CONFUSING WORDS

its / it's

its a possessive pronoun:

The car spun off the track when one of its tires came off its rim.

it's a contraction for “it is” or “it has”:

Do you think it's time for us to go? (Do you think it is time for us to go?)

It's been raining for three consecutive days. (It has been raining for three consecutive days.)

(Suggestion: If you can use it is in your sentence, use it's with an apostrophe, as in this example: “Mary doesn't think it's (it is) likely that she will go with us.” However, in “The dog cut its paw on a piece of glass,” the its doesn't have an apostrophe because “The dog cut it is paw on a piece of glass” is not correct.)

Circle the correct answer:

1. Lana realizes that its / it's not too early to decide on a major.
2. Although its / it's star player was injured, the team won the tournament.
3. Its / It's been fun working at a grocery store for the past three years, but now I'd like to find a restaurant job like you have.
4. Why? Do you think its / it's easy to be on your feet for eight straight hours waiting on customers?

Write original sentences using these words:

1. **its:** _____

2. **it's:** _____

Idioms to Know

To steal someone's thunder: To take credit for something that someone else did.

Although his wife is responsible for planting and tending to their beautiful flower garden, her husband *steals her thunder* by bragging about his garden when anyone stops by.

Write an original sentence using *steal one's thunder*:

Shouldn't judge a book by its cover: Just like we shouldn't decide whether a book is worth reading based on its cover, neither should we draw conclusions about someone or something based on outward appearances.

Alice said, "My blind date was the nerdiest looking guy I had ever met, but he turned out to be smart, considerate, and fun; it proved to me that I *shouldn't judge a book by its cover*."

Write an original sentence using *shouldn't judge a book by its cover*:

Although knowledge of the word parts and frequently used medical terms presented in this chapter is beneficial to all students, those planning to enter a medical-related profession such as nursing will find this knowledge particularly valuable.

Word Parts

1. **algia**—pain

Neuralgia is pain extending along a nerve or group of nerves.

2. **arteri**—blood vessel

Arteries are blood vessels carrying blood away from the heart.

3. **arthr**—joint

Arthritis is inflammation of the joints.

4. **cardi**—heart

Bradycardia is a heart rate of less than 60 beats per minute in an adult; *tachycardia* is a heart rate exceeding 100 beats per minute in an adult.

5. **derm**—skin

Dermatology is the branch of medicine concerned with the skin and its diseases.

6. **gastr**—stomach

Gastrology is the branch of medicine concerned with the stomach and its diseases.

7. **hem**—blood

Hematology is the study of blood and the blood-producing organs.

8. **itis**—inflammation

Bronchitis is inflammation of the membrane lining the bronchial tubes.

9. **my**—muscle

Myalgia is muscular pain.

10. **neur**—nerve

Neuritis is inflammation of a nerve (see also *neuralgia* above).

11. **osteo**—bone

Osteoporosis is a disease in which the bones become weak and brittle, often leading to curvature of the spine.

12. **phleb**—vein

Phlebitis is inflammation of a vein.

13. **psych**—mind

Psychiatry is the branch of medicine concerned with mental disorders.

14. **pulmo**—lung

Pulmonary pneumonia occurs in the lungs.

15. **tomy**—act of cutting

Splenectomy is removal of the spleen.

Matching Word Parts with Definitions

A

- | | | |
|-------|-------------------------|---|
| _____ | 1. <u>osteogenesis</u> | a. chronic pain in the muscles |
| _____ | 2. <u>gastroscope</u> | b. relating to the lungs |
| _____ | 3. <u>pulmonic</u> | c. inflammation of a saclike body cavity containing a lubricating fluid |
| _____ | 4. <u>fibromyalgia</u> | d. the formation and development of bony tissue |
| _____ | 5. <u>psychosomatic</u> | e. examination of arteries using x-rays |
| _____ | 6. <u>cardiograph</u> | f. instrument used to examine the interior of the stomach |
| _____ | 7. <u>buritis</u> | g. instrument that records heart movements |
| _____ | 8. <u>arteriography</u> | h. concerned with the influence of the mind on the body |

B

- | | | |
|-------|----------------------|---|
| _____ | 1. <u>phlebology</u> | a. abnormal weakness of the muscles |
| _____ | 2. <u>hemoglobin</u> | b. skin disease |
| _____ | 3. <u>neural</u> | c. iron pigment in the red blood cells |
| _____ | 4. <u>lobotomy</u> | d. examination or treatment of a joint using an instrument inserted through a small opening |

- | | |
|------------------------------|---|
| _____ 5. <u>my</u> asthenia | e. relating to a nerve or the nervous system |

Medical Terms

Set One

1. **acute** (ə KYOOT)—adjective

Describes an illness or pain with a rapid onset and a short, severe course.

Malaria is an *acute* disease as it comes on quickly and continues for a limited but harsh period.

2. **asymptomatic** (ā simp tə MAT ik)—adjective

Not showing any symptoms of disease.

A person known as Typhoid Mary unwittingly spread typhoid fever to many people in the late 1800s and early 1900s, with over 50 people dying, but she herself was *asymptomatic*; that is, she never showed symptoms of typhoid.

3. **atrophy** (AT rə fē)—noun

Wasting away of muscles or a decrease in the size of a body part due to disease or lack of use.

When in space, astronauts do a variety of exercises regularly to prevent *atrophy* of their arms and legs.

4. **benign** (bə NĪN)—adjective

Harmless, not deadly.

The patient was relieved when the doctor told her that the small growth on her neck was *benign*.

5. **cauterize** (Kə tə rīz)—verb

To burn or sear away abnormal tissue by using an instrument, such as a laser or an electrical current.

The surgeon said he would *cauterize* certain blood vessels to stop the patient's internal bleeding.

6. **chronic** (KRON ik)—adjective

Describes a pain or illness of long duration.

My cousin has suffered from *chronic* digestive problems since he was born.

7. **coagulate** (kō AG yə lāt)—verb

To thicken or clot (as of blood).

To stop my nosebleed, I pressed a cotton swab to my nostril until the blood *coagulated*.

8. **cyanosis** (sī ə NŌ sis)—noun

Blue or gray discoloration of the skin because of reduced oxygen levels in the blood.

Low blood oxygen can result in a bluish complexion known as *cyanosis*.

9. **dementia** (dē MEN shə)—noun

A progressive decline in cognitive (mental) abilities; also referred to as Alzheimer’s disease.

While some loss of memory is normal as a person ages, drastic loss of memory or problem solving skills is often a sign of *dementia*.

10. **edema** (ə DĒ mə)—noun

The swelling of body tissues with fluids; bloating.

Fluid accumulation in the lungs is referred to as pulmonary *edema*.

11. **etiology** (ē tē OL ə jē)—noun

The causes or origins of a disease; the study of these causes.

The cause, or *etiology*, of certain eye diseases is still unknown.

12. **febrile** (FĒ brəl)—adjective

Having a fever.

A *febrile* convulsion is caused by an abnormal rise in body temperature.

13. **triage** (TRĒ əzh)—noun

A process followed for sorting injured people into groups based on their need for medical attention. Triage is from a French word meaning “sorting,” and it reflects the Greek word *tria* (“three”). In its strictest sense, then, triage means sorting patients into three categories based on the seriousness of their medical condition.

Triage tags are used to prioritize catastrophe victims regarding their need for medical attention.

Set Two

1. **gerontology** (jer ən TOL ə jē)—noun

Study of the processes and problems of the elderly.

Gerontology is an expanding field of study as the number of elderly people in this nation has increased dramatically over the past few decades.

2. **hospice** (HOS pis)—noun

Type of care of the terminally ill founded on the concept of allowing individuals to die with dignity surrounded by those who love them.

A *hospice* program, staffed by trained volunteers, enabled my friend to die at his own home, which was his wish.

3. **malaise** (mə LĀZ)—noun

A general feeling of sickness; a general sense of depression or unease.

My roommate is not ill, but she's certainly been in a state of *malaise* as she's not been attending her classes or participating in any of her usual activities.

4. **malignant** (mə LIG nənt)—adjective

Deadly, terminal, threatening to life.

Though significant strides have been made over the years in curing certain cancers, others remain *malignant*.

5. **natal** (NĀ təl)—adjective

Pertaining to birth.

My niece, who has always loved babies, is planning to be a nurse in a hospital's *natal* department.

6. **oncology** (on KOL ə jē)—noun

The branch of medicine having to do with cancer.

A medical building devoted to *oncology* is being built in the northern suburbs of our city so that cancer patients living there will not have to travel so far to receive their treatments.

7. **palliative** (PAL ē ə tiv)—adjective

Describes medical care that relieves symptoms but does not cure.

At present, there is no cure for Parkinson's disease, but *palliative* care often enables people with this disease to live more comfortably.

8. pathology (pə THOL ə jē)—noun

The scientific study of diseases and their causes, including the examination of corpses to determine the cause of death.

Challenging courses in *pathology* contribute to medical students' understanding of rare as well as common diseases.

9. prognosis (præg NŌ sis)—noun

The forecast of the probable course and outcome of a disease.

The doctor assured the patient that the *prognosis* regarding her ailment was most favorable, indicating that she could expect a complete cure within two weeks.

10. protocol (PRŌ tə kəl)—noun

Series of standing medical orders or procedures that should be followed under specific conditions.

Medical students often rely on nurses to learn the *protocol* for treating a variety of emergency patients.

11. remission (rə MISH ən)—noun

The lessening of a disease's symptoms.

Media reports state that the senator's cancer is currently in *remission*, so he would be able to resume his duties on next week.

12. trauma (TRə mə)—noun

A life-threatening injury resulting from an accident or violence; a serious emotional shock.

Doctors and nurses treating patients of *trauma*, such as those seriously injured in a car accident, must do their best to remain calm and competent despite the stresses they are undoubtedly experiencing.

13. vertigo (VUR tə gō)—noun

Dizziness; sensation of the head spinning.

One of the side effects of this medicine can be *vertigo*, so don't drive until you are finished taking all of the capsules.

Matching Medical Terms and Definitions

Write each medical term before its definition.

A

coagulate	Edema	palliative	malignant	asymptomatic
vertigo	cauterize	febrile	pathology	

- _____ 1. to burn away abnormal tissue
- _____ 2. medical care that relieves symptoms but does not cure
- _____ 3. to clot
- _____ 4. feverish
- _____ 5. deadly
- _____ 6. swelling of body tissue with fluids; bloating
- _____ 7. not showing any indications of disease
- _____ 8. study of diseases and their causes; studying what caused a death
- _____ 9. dizziness

B

trauma	natal	cyanosis	benign
atrophy	prognosis	hospice	oncology

- _____ 1. forecast of the probable course and outcome of a disease
- _____ 2. blue or gray complexion due to the lack of oxygen
- _____ 3. medical specialty concerned with cancer
- _____ 4. life-threatening injury due to an accident or violence
- _____ 5. compassionate approach designed to allow patients to die with dignity
- _____ 6. refers to birth
- _____ 7. wasting away of muscles
- _____ 8. mild, harmless

C

remission	dementia	chronic
protocol	triage	etiology
malaise	acute	gerontology

- _____ 1. loss of mental powers
- _____ 2. describes a long-lasting pain or illness
- _____ 3. scientific study of aging
- _____ 4. decline in a disease's symptoms

- _____ 5. describes a sudden illness or pain having a short but severe course
- _____ 6. standard medical procedures to follow under certain circumstances
- _____ 7. the origins or causes of diseases
- _____ 8. a vague feeling of illness or unease
- _____ 9. the sorting of injured patients into groups based on their medical need

Completing the Passage

After reading the selection, fill in each space with one of the terms listed below.

cyanosis	triage	chronic	asymptomatic	cauterizing
palliative	acute	febrile	protocols	coagulate
prognosis	malaise	trauma	natal	oncology

EMERGENCY MEDICINE

Emergency medicine, although a medical specialty, encompasses a great deal of general medicine, such as treating nauseated and _____ children suffering from the flu and _____ a patient's wound with an electrical instrument so the blood from the wound will _____ and the healing process can begin. But emergency physicians are especially trained to treat those suffering from physical _____, that is, from life-threatening injuries or illnesses. For example, they are the ones who are counted on to save patients brought into the emergency room with disturbing grayish or bluish complexions indicating _____. Emergency physicians must quickly diagnose and stabilize such patients, then transfer them to the appropriate hospital unit, such as cardiology, or, if they are a cancer patients, _____. In addition, an emergency physician must be capable of diagnosing and then stabilizing recently born babies brought to the emergency room in distress before transferring them to the _____ unit. On the other hand, patients with _____ conditions, such as arthritis, or those exhibiting _____ indicated by _____ findings, are often referred to their private doctors.

In addition to physicians, EMTs (emergency medical technicians), also known as paramedics, are trained to provide life-saving care in any location and to transport patients to the hospital by ambulance or, in some cases, by helicopter. Hospital emergency rooms are also staffed with nurses who are specially trained to help treat seriously injured or critically ill patients, including those with _____ ailments, that is, those whose severe

illnesses came on suddenly and whose _____ for relief from pain and possibly recovery would have been impossible had they not been brought to the emergency room.

_____ exist in emergency rooms to ensure that vital medical procedures are followed in certain situations. For example, to cope with large-scale accidents (as well as extremely crowded waiting rooms), emergency personnel are trained in the _____ system so that priority is given to those patients suffering from the most serious trauma. For example, patients suffering from strokes, poisonings, drug overdoses, heart attacks, car injuries, and acute asthma attacks are given priority over those with minor cuts and sore throats. Although immediate _____ care to relieve extreme pain is often standard practice, relief of symptoms is sometimes delayed to make sure that an accurate diagnosis leading to a cure is not obscured.

Those seeking a career in emergency medicine must undergo lengthy, specialized training, culminating in the passing of certification tests. Emergency physicians, for example, must obtain a four-year medical degree, complete a three-year residency, and pass a national certification exam. The stress for those in emergency medicine is often great, but, fortunately, so is the satisfaction that results from helping those people in the greatest need of medical aid.

BONUS WORD: Tourette syndrome (TOO RET SIN droom)—adjective, noun

Tourette syndrome is a disorder characterized by involuntary movements (tics) that are difficult, if not impossible, to control. Tourette syndrome often affects the muscles associated with speech, causing grunts, shouts, whistles, or other inappropriate noises. Tourette syndrome can also affect other groups of muscles, including those controlling head movements and facial expressions. Medications can sometimes relieve symptoms, but no cure for this puzzling disorder currently exists.

fewer used with individual things that can actually be counted:

Because of the threatening weather, there were fewer people at the game than there were yesterday.

less used when referring to a smaller quantity of something that can't be counted:

Fortunately, we've had less rain this week, so we were able to plant our garden.

Circle the correct answer:

1. We sold fewer / less cakes today than we did at last year's bake sale.
2. I'm disappointed that my new car gets fewer / less miles per gallon than my old one did, and its tank also holds fewer / less gas.
3. This summer, the Department of Transportation has fewer / less money, so there will be fewer / less roads built and repaired and fewer / less part-time workers hired.
4. According to the labels, this cereal has fewer / less calories than that one does, and this widely advertised brand of bottled water actually has fewer / less liquid in it than that generic brand does.

Write original sentences using these words:

1. **fewer:** _____

2. **less:** _____

Idioms to Know

Get into hot water: To get into trouble.

I told Ryan to slow down as he drove through the small village or he would *get into hot water*; but he ignored me, and sure enough, he was stopped a few minutes later and given a speeding ticket.

Write a sentence demonstrating an understanding of *to get into hot water*:

Get down to brass tacks: To get to the heart of the matter.

Abby finally told the sales rep to *get down to brass tacks* and tell her precisely what the lowest offer he would accept for the car she was interested in.

Write a sentence demonstrating an understanding of *to get down to brass tacks*:

REVIEW TEST, Chapters 23–28

Matching Academic Terms and Definitions

A

Match each academic term with its definition.

- | | | |
|-------|-----------------|--|
| _____ | 1. commodities | a. cash, property, and other things of value |
| _____ | 2. vertex | b. concerned with a region's surface features |
| _____ | 3. biology | c. products bought, sold, or traded |
| _____ | 4. geology | d. angle of more than 90° |
| _____ | 5. asymptomatic | e. study of living organisms |
| _____ | 6. assets | f. wasting away of muscles |
| _____ | 7. zoology | g. the point where two lines meet to form an angle |
| _____ | 8. obtuse | h. study of animals |
| _____ | 9. topography | i. no symptoms of disease |
| _____ | 10. atrophy | j. study of the earth's origin, history, and structure |

B

- | | | |
|-------|------------------|---|
| _____ | 1. quotient | a. deterioration of mental abilities; Alzheimer's disease |
| _____ | 2. circumference | b. describes objects that can be shaped |
| _____ | 3. fiscal | c. describes energy in motion |
| _____ | 4. obsolescence | d. lessening of a disease's symptoms |
| _____ | 5. kinetic | e. deposits hanging from cave roofs |
| _____ | 6. potential | f. products no longer in style or marketable |
| _____ | 7. malleable | g. describes stored energy |
| _____ | 8. dementia | h. distance around a circle |
| _____ | 9. remission | i. answer to a division problem |
| _____ | 10. stalactites | j. pertaining to financial matters |

C

Write each word before its definition.

- | | | | | | |
|-------|------------|--|---------------|-----------------|-----------|
| _____ | adjudicate | bail | indict | change of venue | felony |
| _____ | acquittal | culpability | habeas corpus | commute | extradite |
| _____ | _____ | 1. at fault, blameworthy | | | |
| _____ | _____ | 2. major crime punishable by death or a long prison sentence | | | |
| _____ | _____ | 3. to send a prisoner to authorities in another state | | | |
| _____ | _____ | 4. alteration of the location of a defendant's trial | | | |
| _____ | _____ | 5. security posted to gain release from jail | | | |

- _____ 6. to settle by legal means
- _____ 7. to formally charge a person with a crime
- _____ 8. to reduce the severity of the punishment
- _____ 9. requires a person in custody be brought before the court
- _____ 10. a “not guilty” verdict

Complete the Passage

After reading the selection, fill in each space with one of the terms listed below.

genes symbiotic prolific mutations habitat
invertebrates entomology taxonomy dormant flora

SOME TIDBITS ABOUT INSECTS

_____, the scientific study of insects, is a branch of zoology. Students taking a course in this subject learn some mind-boggling information about insects. For example, 95 percent of all animal species are insects, and, according to research reports, there are 10 quintillion (10,000,000,000,000,000,000) living insects! When it comes to reproducing, insects are unbelievably _____, laying thousands of eggs throughout their life span, which can vary from a few hours (certain microorganisms) to seventeen years (certain locusts).

The _____ of insects has no boundaries, as they live and thrive in all parts of the world, including the Arctic and Antarctic regions. Many types of _____, including a variety of water plants, and certain species of insects have a _____ relationship, enabling each to survive. In addition, many species of insects are _____ during certain parts of the year, while others remain constantly active.

Insects are _____, as they lack backbones. The extensive _____ for insects classifies thirty-two different orders; beetles make up the largest order, with over 500,000 different species. It is unlikely that the classification of insects will ever be completed, as _____, which result from changes in the _____ of a parent, will no doubt add many more species as the years go by.

Fill-Ins with Academic Terms

In each space, write the appropriate term from those listed below.

febrile	conglomerate	edema	solvency	celestial
numerator	audit	hospice	divestiture	denominator
protocol	diameter	balance of trade		

1. Nurses receive training regarding the _____ to follow when certain medical situations arise.
2. In the fraction $7/8$, 7 is the _____ and 8 is the _____.
3. _____ is compassionate care designed for the terminally ill so they are permitted to die with as much comfort and dignity as possible.
4. An indicator of a nation's economic health is its _____, that is, how its export sales and import purchases compare.
5. Though not complaining of any discomfort, the young man was found to be _____, with a temperature of over 100 degrees, and clear indications of _____, or bloating, of his ankles.
6. The _____ of the room, that is, the distance from one wall to the opposite with the tape measure running through the exact center, is 32 feet.
7. Throughout the centuries, people have given names to the _____ figures formed by the stars.
8. Because the corporation had a virtual monopoly regarding the selling of many agricultural products in various countries, the court ordered a(n) _____ of its fertilizing company.
9. The business _____ includes TV stations, publishing companies, and paper mills, and its _____ is beyond question, according to an independent _____ of its financial records.

Related Meanings

If the words opposite each other are similar in meaning, write Yes in the space; if they are unrelated, write No.

- | | | |
|--------------------|-------|---|
| 1. sum | _____ | total |
| 2. proton | _____ | positive electric charge |
| 3. neutron | _____ | negative charge |
| 4. electron | _____ | no electric charge |
| 5. $14\frac{5}{8}$ | _____ | mixed number |
| 6. $3/2$ | _____ | proper fraction |
| 7. $4/11$ | _____ | improper fraction |
| 8. $>$ | _____ | equal to |
| 9. $<$ | _____ | less than |
| 10. recession | _____ | substantial increase in business and employment |

- | | | |
|------------------|-------|----------------------------------|
| 11. depreciation | _____ | decline in value |
| 12. chronic | _____ | of short duration |
| 13. ≠ | _____ | greater than |
| 14. malaise | _____ | feeling of well-being |
| 15. palliative | _____ | eases symptoms but does not cure |

Matching Academic Terms and Definitions

Match each academic term with its definition.

- | | | |
|-------|-----------------|--|
| _____ | 1. triage | a. force propelling objects outward |
| _____ | 2. centripetal | b. science of weather |
| _____ | 3. physics | c. combining process |
| _____ | 4. physiology | d. result when two organisms of different species are bred |
| _____ | 5. igneous | e. a substance dissolved in a solution |
| _____ | 6. hybrid | f. force drawing an object inward |
| _____ | 7. solute | g. study of the functions and parts of living organisms |
| _____ | 8. synthesis | h. describes rocks formed by cooled magma |
| _____ | 9. centrifugal | i. study of matter and energy |
| _____ | 10. meteorology | j. the sorting of the injured into groups |

Mastering Confusing Words

Circle the correct answer.

- The city (council / counsel) is scheduled to meet this evening at 7:30.
- Did your advisor (council / counsel) you regarding what courses you should take next semester?
- We need at least three (disinterested / uninterested) people to serve as judges for the art show.
- Jaye prefers swimming to jogging, so she was (disinterested / uninterested) in going running with us.
- I have (fewer / less) money now than I did last month, but, fortunately, I also have (fewer / less) debts.
- Do you know (who's / whose) wristwatch this is?
- Lesley, you'll never believe (who's / whose) studying by himself in the library!
- The clerk asked the customer, "(Can / May) I help you?"
- You (can / may) borrow my car if you (can / may) get it back here within two hours.
- Did you (imply / infer) from what I said that I don't like your cousin? I didn't mean to (imply / infer) that.

Crossword Puzzle

Solve the crossword by using the following academic terms.

acute carnivorous cartel dividend embargo entrepreneur

© Kent R. Smith

ACROSS

1. official banning of trade with a specific country
2. number separating numbers into two equal groups
4. mutual, beneficial exchange
6. securities owned by an investor
9. letter standing for an unknown number
11. semifluid considered to be the building block of life
13. hardening of bones
14. angle of less than 90°
15. business group that controls some industry
16. eating both plants and meat

DOWN

1. a bold, daring business person
2. number occurring most often in a set of numbers
3. body's total chemical and physical processes
5. meat eating
7. to vibrate
8. microscopic organisms floating in water
10. number being divided
12. pertaining to birth

Appendix A

Parts of Speech

1. Adjectives

An adjective describes or modifies a noun or pronoun.

Did you see that gray cat?

Two cars were parked in the driveway.

He is tall, dark, and handsome.

Specific suffixes are associated with adjectives, including -able, -ible, -al, -ful, -ous, -ive, and -y.

She is a capable worker.

This is a reversible coat.

We celebrated the national holiday in Alaska.

Martin is a careful driver.

They own a spacious ranch in Wyoming.

The plaintiff is suing for punitive damages as well.

Sharon is cleaning her messy room.

Demonstrative adjectives: these people, this office

Descriptive adjectives: lovely day, pale color

Interrogative adjectives: What program? Whose coat?

Limiting adjectives: three children, several cars

Possessive adjectives: our apartment, my uncle

Proper adjectives: American flag, Canadian imports

2. Adverbs

An **adverb** describes or modifies a verb, an adjective, or another adverb.

modifying a verb: Brittany walked quickly to the door.

modifying an adjective: She was extremely happy to get the news.

modifying another adverb: Time went by very slowly.

Adverbs often indicate when, where, how, and to what extent.

when: The Andersons will arrive tomorrow.

where: Steve, place the chair here.

how: The children sang loudly.

to what extent: We were completely bewildered by the news.

Adverbs often end in the suffix -ly, as a number of preceding examples illustrate.

3. Conjunctions

A **conjunction** is a word used to join words or groups of words. There are coordinating, subordinating, adverbial, and correlative conjunctions.

Coordinating conjunctions: and, but, for, nor, or, yet, so

Rain and fog made driving difficult.

We had the day off, but Sheila had to work.

My husband bought a ticket, for he loves that type of music.

Meredith couldn't answer the question, nor could I.

You can have ice cream or pudding for dessert.

Shane had his car repaired, yet it is still giving him trouble.

We were tired, so we didn't attend the ceremony.

Subordinating conjunctions: after, although, because, if, etc.

After they left, the party broke up.

Although it was cloudy, Sandy still got a sunburn.

He refused dessert because he is on a diet.

The game will be played next week if it is canceled today.

Adverbial conjunctions: consequently, however, therefore, etc.

Bob never heard from him again; consequently, he rented the apartment to someone else.

I knew that he had applied for that position; however, I was surprised that he got it.

Our plane leaves at 6:30 A.M.; therefore, we will have to get up early.

Correlative conjunctions: either-or, neither-nor, not only—but also

I think that either the cat or the dog broke the lamp.

It is clear that neither the owners nor the workers want the strike to continue.

We were not only surprised but also embarrassed by the news.

4. Interjections

An **interjection** is a word or phrase that expresses strong emotion.

Ouch! I've been stung by a bee.

Look out! There's ice on the sidewalk.

5. Nouns

A **noun** is a person, place, or thing.

person: Emily

place: Prince Edward Island

thing: wrench

Common nouns refer to general classes: woman, city, building

Proper nouns refer to particular people, places, or things: Anne, Detroit, Empire State Building

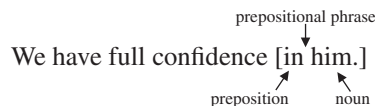

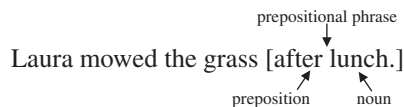

Collective nouns name groups: family, team, class

Concrete nouns name tangible things: rock, flower, table

Abstract nouns name intangible things: idea, bravery, democracy

6. Prepositions

A preposition is a word that combines with a noun or pronoun to form a phrase; prepositional phrases generally serve as adjectives or adverbs.

These words often function as prepositions:

above	behind	during	from	of	to
before	by	for	in	over	with

7. Pronouns

A **pronoun** is a word used in place of a noun.

noun: Paul is coming home tomorrow.

pronoun: He is coming home tomorrow.

These words are among those that serve as pronouns:

I	he	it	they	themselves	which	these	anybody
you	she	we	myself	who	what	those	somebody

8. Verbs

A **verb** is a word or group of words expressing action or the state of being of a subject.

action verb: Yolanda laughed.

state of being verb: Our guests are here.

A **transitive verb** expresses action and has an object.

verb object
↓ ↓
Janet set the package on the table.

verb object
↓ ↓
Wayne flipped the pages of the telephone directory.

An **intransitive verb** does not have an object.

verb
↓
The boy shivered.

verb
↓
The ice and snow melted.

A **linking verb** connects the subject and a complement that renames or describes the subject.

Jamie is the captain.

The clothes seemed inexpensive.

An **auxiliary or helping verb** combines with other verbs to form phrases.

helping verb
↓
Katherine can paint.

helping verb
↓
The windows were closed.

These words function as auxiliary or helping verbs:

am	been	can	did	does	has	is	might	shall	was
are	being	could	do	had	have	may	must	should	were

Appendix B

Using the Dictionary

A dictionary is the best source for learning the precise meanings of words; moreover, it provides other valuable information about words, including their pronunciation, spelling, parts of speech, and origin.

Printed below is the entry for **exonerate** found in the fourth college edition of *The American Heritage Dictionary*, one of the most recommended dictionaries for college students. By becoming familiar with the key parts that have been identified and explained, you will be able to take better advantage of the information that a college-level dictionary provides.

A
|
ex • on • er • ate (ĭg-zŏn' ə rāt') *tr. v.* -at • ed, -at • ing, -ates.
B
|
C
|
D
|
E
|
F
|
G
To free from blame. [*< Lat. exonerare, to free from a burden.*]—**ex on er a tion.** —**ex on er a tive** *adj.*

- A. The **entry word** is printed in boldface type and divided into syllables.
- B. The **pronunciation** of the word is shown in parentheses and indicated by specific letters, lines, and symbols. A guide to pronunciation is generally found in the inside cover of the dictionary as well as at the bottom of every other page.
- C. The **parts of speech** of a word are indicated by an abbreviation; parts of speech are commonly abbreviated in this manner:

adj.—adjective	prep.—preposition
adv.—adverb	pron.—pronoun
conj.—conjunction	v.—verb
interj.—interjection	intr. v. (or vi)—intransitive verb
n.—noun	tr. v. (or vt)—transitive verb

See Appendix A for a review of the parts of speech.

- D. The **verb tenses** of *exonerate* are provided (exonerated, exonerating, exonerates).
- E. The word's **definition** appears after the verb tenses. (Keep in mind that a word may have more than one definition, so it is sometimes necessary to select the definition appropriate to the context in which the word is being used.)

F. The **etymology** of the word is enclosed in brackets; etymology is concerned with the origin and history of words. In our example, it is disclosed that *exonerate* comes from the Latin word *exonerare*, which means “to free from a burden.” The following are typical of the abbreviations used to indicate the language from which a word originated.

OE—Old English, the language spoken in England from the years 700 to 1100

ME—Middle English, the language spoken in England from 1100 to 1500

OF—Old French, the language spoken in France from 800 to 1200

F—French, the language spoken in France today

Lat.—Latin, spoken by the Romans approximately 2,000 years ago

GK—Ancient Greek, spoken in Greece approximately 2,500 years ago

G. “**Relatives**” of the word are indicated; in our example, the noun *exoneration* and the adjective *exonerative* are related to the verb *exonerate*.

Guide words are printed in boldface type at the top of each dictionary page; they indicate the first and last words printed on that particular page. Because words in a dictionary are listed in alphabetical order, the guide words reveal whether the word you are looking for can be found on that particular page. For example, the guide words *exodus* and *expectancy* in *The American Heritage Dictionary* indicate that *exonerate* can be found on that page.

Most college-level dictionaries also include numerous introductory and supplementary pages devoted to a variety of topics such as the following:

- Directions for using the dictionary
- Pronunciation guide and other explanatory notes
- Directories and tables of useful information
- Basic manual on grammar, punctuation, and style
- Brief history of the English language
- Biographical entries

Foreign Words and Phrases Commonly Used in English

The English language includes more words than any other language—largely because it includes so many words drawn from other languages. Here are some examples.

Japanese

bonsai	the art of tending miniature trees and shrubs
haiku	short poem written in 17 syllables divided into 3 lines
origami	artistic paper folding

Spanish

alligator	reptile found in tropical rivers and marshes
burrito	flour tortilla containing meat, beans, cheese, rice
adios	goodbye, farewell
patio	an outdoor bricked, tiled, or paved area adjoining a house

Greek

alphabet	letters used to form words (the word alphabet was formed by combining the first two Greek letters, <i>alpha</i> and <i>beta</i>)
anonymous	unknown person; without a name
athlete	a participant in a sport
metropolis	a large city

French

à la mode	fashionable; served with ice cream
avant-garde	a group applying new techniques in a given field, especially the arts
carte blanche	complete authority or freedom to do what one wants
déjà vu	the feeling that one has previously experienced a current event

German

ersatz	an imitation, fake, or substitute regarded as inferior
hamburger	a ground-beef sandwich
kaput	zapped, wiped out, destroyed, no more
kindergarten	a school class for children who are about five years of age

Dutch

caboose	the last car on a freight train
cookie	a dessert
frolic	playful antics, merriment; to behave playfully
heckle	to aggressively interrupt in an effort to embarrass or to annoy, particularly someone speaking or performing in public
